No. R. 135

18 February 2005

AGRICULTURAL PRODUCT STANDARDS ACT, 1990  
(ACT NO. 119 OF 1990)

### REGULATIONS RELATING TO THE GRADING, PACKING AND MARKING OF CANNED FRUIT INTENDED FOR SALE IN THE REPUBLIC OF SOUTH AFRICA

The Minister of Agriculture has under section 15 of the Agricultural Product Standards Act, 1990 (Act No. 119 of 1990) -

- (a) made the regulations in the Schedule;
- (b) determined that the said regulations shall come into operation three months after date of publication; and
- (c) read together with section 3(2) of the said Act, repealed the regulations published by Proclamations Nos. R. 238 of 22 October 1971, R. 1895 of 22 October 1971 and R. 72 of 2 March 1973 in so far as it relates to canned fruit, and Part II and III of Government Notice No. R. 1898 of 22 October 1971 as well as Government Notice No. R. 1079 of 25 June 1976, as amended by Government Notices Nos. R. 954 of 12 May 1978, R. 2593 of 29 December 1978, R. 607 of 28 March 1980, R. 1327 of 9 July 1982, R. 991 of 13 May 1983 and R. 1867 of 24 August 1984.

#### **Definitions**

1. In these regulations, unless inconsistent with the text, any word or expression to which a meaning has been assigned in the Act, shall have a corresponding meaning, and –

"A2½" means a container with a capacity of 853 ml;

"A10" means a container with a capacity of 3 090 ml;

"address" means an address in the Republic of South Africa which includes the street or road number (if a number has been allotted), the name of the street or road and the name of the town, village or suburb and, in the case of a farm, the name of the farm and of the magisterial district in which it is situated and, in the case of imported canned fruit, the address of the manufacturer, supplier or importer;

"blemishes" means scab, surface spots, hail marks or other discolouration on the surface of the fruit, which detrimentally affects the general appearance of any particular unit;

"canned fruit" means commercially sterile fruit in hermetically sealed containers;

"commercially sterile" means the conditions achieved by application of heat, sufficient alone or in combination with other appropriate treatments, to render the fruit free from micro-organism capable of growing in food at normal non-refrigerated conditions at which the fruit are likely to be held during distribution, storage and display;

"consignment" means a quantity of canned fruit of the same kind which is delivered at any one time under cover of the same delivery note or receipt note, or which is delivered by the same vehicle, or if such a quantity is subdivided into different production groups, grades or packing sizes, each quantity of each of the different production groups, grades or packing sizes;

"container" means the immediate container which is manufactured from any suitable material into which canned fruit are packed for final sale;

"contents" means everything that is contained in a container;

"**cut out syrup**" means liquid which passes through the sieve when the drained mass of the contents of the container is determined;

"**defects**" with regard to canned fruit, means –

- (a) injury caused by mechanical damage;
- (b) discolouration;
- (c) insect infestation;
- (d) injury of a pathological nature;
- (e) imperfections due to inadequate workmanship;
- (f) foreign or poor taste and odours; or
- (g) cloudy syrup or darkened natural juice;

"**degrees Brix**" or "**°Brix**" means the percentage by mass of sucrose in the cut-out syrup, and which, for the purpose of these regulations, is taken to be equal to the total percentage soluble solids as determined by means of a refractometer corrected to 20°C;

"**diameter**" with regard to canned fruit, means the largest diameter measured at right angles to the longitudinal axis of the canned fruit as the case may be, unless otherwise indicated;

"**drained mass**" means the mass, in grams, of the drained contents of a container of canned fruit, determined as prescribed in the methods of inspection;

"**extraneous vegetable matter**" means any harmless part of a plant not normally present in the canned fruit;

"**foreign matter**" means any material not normally present in, on or between the canned fruit;

"**fully grown**" means that the fruit concerned, when harvested, has reached a stage of development that will ensure the proper completion of the ripening process;

"**hermetically sealed containers**" means containers which are sealed to protect the contents against the entry of micro-organisms during and after heat processing;

"**ingressing mass**" means the mass of fruit, in grams, packed in the container prior to processing;

"**Inspector**" means the executive officer or an officer under his or her control, or an assignee or an employee of an assignee;

"**Juice**" means natural fruit juice;

"**main panel**" means that part of the container which is in the same field of vision as the trademark, trade name or brand name displayed the most prominent and any other part of the containers bearing the trademark, trade name or brand in equal prominence;

"**manufacturer**" means any establishment which processes fruit to produce canned fruit;

"**microbiological spoilage**" means spoilage of a microbiological nature, determined as prescribed in the methods of inspection;

"**nutritive sweeteners**" means any substance having greater than two percent caloric value of sugars per equivalent unit of sweetening capacity ( $^{\circ}\text{Brix}$ ), as permitted by the Foodstuffs, Cosmetics and Disinfectants Act, 1972 (Act No. 54 of 1972);

"**non-nutritive sweeteners**" means any substance having less than two percent caloric value of sugars per equivalent unit of sweetening capacity ( $^{\circ}\text{Brix}$ ), as permitted by the Foodstuffs, Cosmetics and Disinfectants Act, 1972 (Act No. 54 of 1972);

"**outer container**" means a container which contains one or more containers of canned fruit;

**"packed to capacity"** means that the container has been filled with the maximum quantity of fruit that can be sealed therein without breaking or crushing the contents;

**"packer"** means any establishment dealing in the course of trade with canned fruit by packing them for sale, and also an establishment on behalf of whom such product is packed for sale;

**"peel"** means peel that adhere to the flesh of the fruit or is found loose in the container: Provided that it shall not be considered as a defect in the case of "unpeeled" styles;

**"permitted"** means permitted in terms of the Foodstuffs, Cosmetics and Disinfectants Act, 1972 (Act No. 54 of 1972);

**"pit fragments"** means any hard pit material and pit extensions excluding soft pit material and extensions;

**"production group"** means a quantity of canned fruit marked with the same code marks;

**"sound"** means free from insect damage, insect infestations, external or internal defects which detrimentally affect the quality of the fruit;

**"the Act"** means the Agricultural Product Standards Act, 1990 (Act No. 119 of 1990);

**"trimmed"** with regard to canned fruit, means that uneven portions or portions with blemishes have been cut away and "trimming" has a corresponding meaning;

**"uniform colour"** means that the product consists of units with a colour which do not vary significantly within the product concerned with regard to colour;

**"200 mm sieve"** means a sieve with a diameter of 200 mm, with apertures of 2,3 mm, manufactured from wire with a diameter of not less than 0,9 mm and not more than 1,25 mm; and

**"300 mm sieve"** means a sieve with a diameter of 300 mm and with apertures of 2,3 mm, manufactured from wire with a diameter of not less than 0,9 mm and not more than 1,25 mm.

#### ***Restrictions on the sale of canned fruit***

2. (1) No person shall sell canned fruit in the Republic of South Africa –
  - (a) unless such product is graded in accordance with grades referred to in regulation 3;
  - (b) unless such product complies with the standards referred to in regulations 4 and 5;
  - (c) unless such product complies with the types of pack referred to in regulation 6;
  - (d) unless such product complies with the packing media requirements referred to in regulation 7;
  - (e) unless the containers in which such product is packed, comply with the requirements referred to in regulation 8;
  - (f) unless such product is packed in accordance with the packing requirements referred to in regulation 9;
  - (g) unless such product concerned are marked in the manner prescribed in regulation 10; and
  - (h) if such product is marked with particulars and in a manner so prescribed as particulars with which it may not be marked.

(2) The Executive Officer may grant written exemption, entirely or partially to any person on such condition, as he or she may deem necessary, from the provisions of subregulation (1).

## PART I: GENERAL QUALITY REQUIREMENTS FOR CANNED FRUIT

### ***Grades for canned fruit***

3. Canned fruit shall comply with the applicable grades for each kind of canned fruit as set out in Part II of these regulations.

### ***Standards for grades of canned fruit***

4. (1) All grades of canned fruit –
  - (a) shall be prepared from sound, fresh, clean and washed fruit;
  - (b) shall, subject to the provisions of paragraph (c), be free from any substance which does not normally form part of canned fruit, excluding extraneous vegetable matter; and
  - (c) shall contain only permitted food additives.
- (2) Subject to the provisions of subregulation (1) –
  - (a) Extra Choice Grade, Choice Grade, Standard Grade, Substandard Grade and Manufacturers Grade canned fruit shall comply with the specific quality standards as set out in Part II; and
  - (b) Undergrade canned fruit, which may not be presented for sale, shall comprise fruit that do not comply with the standards for Extra Choice Grade, Choice Grade, Standard Grade, Substandard Grade or Manufacturers Grade, as set out in paragraph (a), and are inedible due to the presence of harmful or aesthetically objectionable foreign matter or foreign flavours and odours.

### ***Standards for styles of canned fruit***

5. (1) Canned fruit shall be presented as any of the styles prescribed in each of the canned fruit as set out in Part II.
  - (2) Any other presentation of the product shall be permitted: Provided that it –
    - (a) is sufficiently distinctive from other forms or presentation laid down in these regulations;
    - (b) meets all other requirements of these regulations, including the permissible deviations which are applicable to that style which most closely resembles the style or styles intended to be provided under this provision; and
    - (c) is adequately described on the label to avoid confusing or misleading the consumer.

### ***Types of pack***

6. Canned fruit shall be presented as any one of the following types of pack:
  - (a) Regular pack which shall consist of fruit packed in a packing medium.
  - (b) Heavy pack which shall consist of crushed style fruit with or without sweetening ingredients and containing at least 73 percent drained mass.

- (c) Solid pack which shall consist of practically all fruit with very little or no free flowing liquid.

***Types and standards of packing media***

7. (1) (a) Canned fruit shall be packed in any one of the following packing media:
- (i) Water, where water is the sole packing medium.
  - (ii) Water and fruit juice(s), where water and juice from the fruit concerned, or water and any other single fruit juice or water and two or more fruit juices are combined in any proportion to form the packing medium.
  - (iii) Fruit juice(s), where –
    - (aa) juice from the fruit concerned, or any other compatible fruit juice, is the sole packing medium; or
    - (bb) two or more compatible fruit juices, which may include juice from the fruit concerned, are combined to form the packing medium: Provided that the fruit juices may be pulpy, turbid or clear.
- (b) Any of the packing media mentioned in paragraph (a) may contain permitted nutritive sweeteners or non-nutritive sweeteners and flavourants.
- (2) (a) When permitted nutritive sweeteners are added to water, water and fruit juice(s) or fruit juice(s), the packing media shall be classified on the basis of the cut-out strength as follows:
- (i) Very light syrup - Not less than 9°Brix but less than 14°Brix.
  - (ii) Light syrup - Not less than 14°Brix but less than 18°Brix.
  - (iii) Syrup - Not less than 16°Brix but less than 20°Brix.
  - (iv) Heavy syrup - Not less than 18°Brix.
- (b) The cut-out strength of any product must comply to the requirements mentioned in paragraph (a): Provided that 33,3 percent of the containers in an inspection sample may deviate by 1 °Brix.
- (3) When permitted non-nutritive sweeteners are added to water the packing media shall be declared as –
- (a) "packed in water sweetened with non-nutritive sweeteners";
  - (b) "in water sweetened with non-nutritive sweeteners";
  - (c) "packed in water sweetened with 'x"'; or
  - (d) "in water sweetened with 'x'" [where 'x' indicates the name(s) of the specific non-nutritive sweetener(s)].
- (4) When no nutritive sweeteners or non-nutritive sweeteners are added to water, water and fruit juice(s) or fruit juice(s), the packing media shall be declared as –
- (a) "packed in water";

- (b) "in water";
- (c) "packed in water and 'x' juice(s)";
- (d) "in water and 'x' juice(s)";
- (e) "packed in 'x' juice(s)"; or
- (f) "in 'x' juice(s)", as the case may be [where 'x' indicates the name(s) of the specific fruit juice(s)].

### **REQUIREMENTS FOR CONTAINERS**

#### ***General***

8. (1) Containers for canned fruit shall –
- (a) be intact, clean, suitable and strong enough for the packing and normal handling of the canned fruit: Provided that reusable containers shall be properly sterilised;
  - (b) be free from rust and serious dents or any other disorders which may detrimentally affect the quality of the product;
  - (c) not impart any undesirable taste or odour to the contents thereof; and
  - (d) be closed properly and in a manner permitted by the nature thereof.
- (2) If containers containing canned fruit are packed in outer containers, such outer containers shall be clean, neat and intact.

### **PACKING REQUIREMENTS**

#### ***General***

9. (1) Except where otherwise stipulated in these regulations, canned fruit of different kinds, grades or styles shall not be packed together in the same container or outer container.
- (2) Canned fruit shall, in the case of Manufacturer's Grade, be packed in A10 or larger containers.
- (3) In the case of unspecified canned fruit mixes, the composition of each mix, in descending order, shall be submitted in writing to the Executive Officer.
- (4) In the case of unspecified canned fruit, the proposed quality standards shall be submitted in writing to the Executive Officer.

### **MARKING REQUIREMENTS**

10. (1) Each container containing canned fruit shall be clearly and legibly marked or labelled with the following particulars:
- (a) A code mark which has been approved, in writing, by the Executive Officer and which consists of the name of the canning establishment, the product concerned and the date of manufacturer thereof: Provided that –
    - (i) the canning establishment identification code shall be indicated at the last position in the sequence: Provided further that in the case where the codes are indicated in two lines, the identification code shall be the last digit in the second line; and

- (ii) in case of a transparent container where the contents are clearly visible, the product code need not be indicated.
- (b) The name or trade mark of the manufacturer or packer.
- (c) The physical address of the manufacturer or packer.
- (d) A true description of the contents thereof indicated on the main panel: Provided that if a permissible artificial colouring and artificial flavouring matter has been added to canned fruit the words disclosing that fact shall be declared on the list of ingredients.
- (e) The packing medium in which the canned fruit is packed, shall be declared on the product name or in close proximity to the product name: Provided that it is still declared on the main panel.
- (f) An indication of the grade thereof: Provided that the expression "Caterers Grade" may be used instead of the expression "Manufacturers Grade".
- (g) The net mass of the contents thereof, as required in terms of the Trade Metrology Act, 1973 (Act No. 77 of 1973).
- (h) The expression "Product of" followed by the name of the country of origin: Provided that no abbreviations shall be used.
- (2) If one or more containers with canned fruit are packed in an outer container, such outer container shall be marked with the following particulars:
- (a) The name or trademark of the manufacturer or packer.
- (b) The physical address of the manufacturer or packer.
- (c) A true description of the contents thereof.
- (d) An indication of the grade thereof: Provided that the expression "Caterers Grade" may be used instead of the expression "Manufacturers Grade".
- (e) The net mass of the contents thereof as required in terms of the Trade Metrology Act, 1973 (Act No. 77 of 1973).
- (f) The expression "Product of" followed by the name of the country of origin: Provided that no abbreviations shall be used.
- (g) The number of containers packed therein.
- (3) If a transparent outer container is used and the particulars on the containers are visible from the outside, the requirements of subregulation (1) need not be complied with.
- (4) The label of a container of canned fruit shall –
- (a) be clean and neat;
- (b) be pasted securely;
- (c) not be pasted over other labels; and
- (d) be affixed to such container only by or on behalf of the packer or manufacturer concerned or his agent.

(5) Subject to the provisions of subregulations (1) and (2) and regulation 11, canned fruit shall comply with the additional marking requirements, where applicable, for each kind of canned fruit as set out in Part II.

**Prohibited particulars**

11. No word, mark, illustration, depiction or any other method of expression that constitute a misrepresentation, or, directly or by implication, create or may create a misleading impression regarding the contents, quality or grade, shall appear on a container or outer container containing canned fruit.

**SAMPLING**

**Obtaining a representative sample**

12. (1) For the purpose of an inspection, an inspector shall proceed as follows:
  - (a) Draw at random a representative sample by drawing the number of containers in column 2 of Table 1, opposite the production group in column 1 of Table 1, taking the net mass of each container into consideration.
  - (b) Examine from each of the containers obtained in paragraph (a), a working sample which is representative of the contents of the container as prescribed in subregulation (2) and (3).
  - (c) Determine the number of containers of which the contents do not comply with the regulations.
  - (d) If the number of containers obtained in paragraph (c) exceed the number of containers in column 3 of Table 1, the consignment shall be downgraded or prohibited for sale.
- (2) A working sample shall in the case of –
  - (a) A2½ container or smaller consist of the drained contents of container; and
  - (b) containers larger than A2½ consist of the drained contents of the container: Provided that in the case of the determination of the uniformity in size, the drained mass of 600 g shall be used.
- (3) The working sample size, when determining the percentage residual core of pineapples in the case of –
  - (a) pineapple rings or slices, shall be at least 400 g but not more than 500 g of the drained product taken at random from the combined contents of any two containers; and
  - (b) pineapple pieces, chunks, segments, spears, titbits and broken rings, shall be at least 200 g but not more than 300 g of the drained product taken at random from the combined contents of any two containers.

**METHODS OF INSPECTION**

**Determination of degrees Brix**

13. (1) The total percentage soluble solids in canned fruit shall be determined –
  - (a) by means of a refractometer corrected to 20°C; and
  - (b) 15 days after packing, when equalization is complete.

- (2) The total percentage soluble solids in canned fruit shall be determined as follows:
- Open the containers and stir the contents carefully with a glass or metal rod without damaging the contents.
  - Place a drop of the packing medium onto the prism of the refractometer and take the reading.
  - The rod and prism should be thoroughly wiped with a clean dry cloth before the following reading is taken.
  - The refractometer should be checked for accuracy, as specified in the manual of instructions accompanying it, before use.

***Determination of microbiological spoilage***

14. Microbiological spoilage shall be determined by storing the canned fruit at warehouse temperature: Provided that the containers which blow or leak in any production group during a period of ten days, may be removed from the production group if the rest of the production group is stored for a further period of ten days at warehouse temperature.

***Determination of drained mass***

15. (1) The drained mass of canned fruit shall be determined as follows:
- Empty the opened container in such a manner onto a sieve of which the mass has been previously determined, that the contents are evenly distributed: Provided that –
    - a 200 mm sieve shall be used if the mass of the contents of the container is less than 1,4 kg; and
    - a 300 mm sieve shall be used if the mass of the contents of the container is 1,4 kg or more.
  - Carefully invert by hand all fruits having cavities if they fall on the sieve with cavities facing up.
  - Allow two minutes for draining and determine the mass of the sieve and drained fruit.
  - The mass so obtained, minus the mass of the sieve, shall be considered to be the mass of the drained fruit.

(2) The drained mass for containers of which the volume is larger or smaller than A2½ containers, shall be calculated *pro rata* to the capacity of A2½ containers by using the following formula or reading it from Table 2 since the standards for drained mass are based on A2½ containers:

Drained mass for the fruit concerned as specified in Part II	X	Volume of the container concerned (ml)
	853	

(3) Canned fruit shall in the case of A2½ containers, not deviate with more than 30 g from the prescribed minimum specifications, except for peaches where the deviation shall not exceed 50 g, and *pro rata* in the case of containers larger or smaller than A2½, at any time within four days of the date of manufacture of the canned fruit concerned.

(4) If the drained mass declared on the label or embossed container is more than the prescribed minimum drained mass, it shall comply with the higher drained mass.

(5) In an inspection sample, 10 percent of the containers may deviate with not more than five percent from the prescribed drained mass: Provided that the average drained mass of the inspection sample is equal to or more than the prescribed drained mass.

#### **Determination of count**

16. (1) The count for containers of which the volume is larger or smaller than A2½ containers, shall be calculated *pro rata* to the capacity of A2½ containers by using the following formula or reading it from Table 3 since the standards for count are based on A2½ containers:

- (a) For containers with a capacity larger than 853 ml

$$X = \frac{(a \times c)}{b}$$

- (b) For containers with a capacity smaller than 853 ml

$$X = \left\{ \frac{(a \times c)}{b} \right\} + (25\%)$$

where:

x = count to be determined

a = prescribed count for the A2½ tin as per specific product

b = volume of A2½ tin (ml)

c = volume of applicable tin size (ml)

(2) If the unit count in a container exceeds the prescribed maximum unit count in Part II, the excess units shall be removed prior to the determination of drained mass. In the case where the drained mass comply with the requirements, the excess count shall be ignored.

#### **Eccentricity of pineapple rings**

17. Eccentricity of pineapple rings shall be determined as follows:

- (a) Place a measuring instrument graduated in millimetres in such a manner on the pineapple ring, so that the measuring edge of the measuring instrument passes through the centre of the coring hole.
- (b) First determine the shortest radial measurement from the outside edge of the pineapple ring to the inside edge of the coring hole.
- (c) Then determine the longest radial measurement from the inside edge of the coring hole to the outside edge of the pineapple ring.
- (d) Divide the difference between the two measurements by two.

#### **Offences and penalties**

18. Any person who contravenes or fails to comply with the provisions of these regulations shall be guilty of an offence and upon conviction be liable to a fine or to imprisonment in accordance with section 11 of the Act.

#### **Other legislation**

19. The provisions of these regulations shall be in addition to and not in substitution for the regulations published under the Foodstuffs, Cosmetics and Disinfectants Act, 1972 (Act No. 54 of 1972).

**PART II: SPECIFIC QUALITY REQUIREMENTS FOR CANNED FRUIT****CANNED APRICOTS**

20. The quality requirements for canned apricots are as follows:

**Definitions**

- (1) Where used with regard to canned apricots –
- (a) "caps" in the case of apricot halves, means the residue that remains after the packing medium has been drained for two minutes on a 6 mm mesh sieve of 450 mm diameter;
  - (b) "pit/stone material" means, in the case of all styles other than whole apricots, pits and pieces of pit that are hard and sharp: Provided that it shall not be considered as a defect when whole apricot pits or kernels are used as seasoning ingredients; and
  - (c) "off suture cut" in the case of apricot halves, means a suture cut which exceeds 6 mm in width and thus detracts markedly from the normal appearance of the fruit.

**Styles and standards for styles**

- (2) (a) Canned apricots shall be presented as one of the following styles:
- (i) Whole apricots;
  - (ii) Apricot halves;
  - (iii) Apricot slices; and
  - (iv) Apricot pieces, mixed pieces or irregular pieces.
- (b) (i) Whole apricots shall consist of unpitted whole apricots and may have been peeled or not.
- (ii) Apricot halves shall consist of pitted apricots cut into two approximately equal parts along the suture from stem to apex and may have been peeled or not.
- (iii) Apricot slices shall consist of pitted apricots cut into wedge shaped units and may have been peeled or not.
- (iv) Apricot pieces, mixed pieces or irregular pieces shall consist of pitted apricots cut into irregular shaped and sized units and may have been peeled or not.

**Quality Standards**

- (3) (a) There shall be five grades of canned apricots, namely Extra Choice Grade, Choice Grade, Standard Grade, Substandard Grade and Manufacturers Grade.

(b) The quality standards for canned apricots are as follows:

<b>Quality factor</b>	<b>Extra Choice Grade</b>	<b>Choice Grade</b>	<b>Standard Grade</b>	<b>Substandard Grade</b>	<b>Manufacturers Grade</b>
(a) Microbiological spoilage (maximum per production group)	0,25%	0,25%	0,25%	0,25%	0,25%
(b) Fill of containers in the case of whole apricots, apricot halves, slices and pieces shall comply to at least one of the following minima:

**CANNED APRICOT PULP AND SOLID PACK APRICOTS (APRICOT PIE FRUIT)**

21. The quality requirements for canned apricot pulp and canned solid pack apricots(apricot pie fruit) are as follows:

**Styles and standards for styles**

- (1) (a) Canned apricot pulp and canned solid pack apricots shall be presented as one of the following styles:  
(i) Apricot halves;  
(ii) Apricot pieces, mixed pieces or irregular pieces; and

- (b) (i) Apricot pulp.  
     (ii) Apricot halves shall consist of pitted apricots cut into two approximately equal parts along the suture from stem to apex and may have been peeled or not.  
     (iii) Apricot pieces, mixed pieces and irregular pieces shall consist of pitted apricots cut into irregular shaped and sized units and may have been peeled or not.
- (iii) Apricot pulp shall consist of the edible part of apricots with the removal of pits but with or without the removal of peel, obtainable by mechanical or physical crushing of apricots.

**Quality standards**

- (2) (a) There shall be three grades of canned apricot pulp and canned solid pack apricots (apricot pie fruit), namely Extra Choice Grade, Choice Grade and Manufacturers Grade.

(b) The quality standards for canned apricot pulp and canned solid pack apricots (apricot pie fruit) are as follows:

Quality factor	Extra Choice Grade	Choice Grade	Manufacturers Grade
(a) Microbiological spoilage (maximum per production group)	0,25%	0,25%	0,25%
(b) Fill of containers in the case of solid pack	Shall be packed to capacity: Provided that in the case of caps, more than 65% per volume of the containers shall consist of caps  Sound, well-coloured apricots  (i) Shall be free from defects (ii) Shall be free from pits and pieces of pits  Shall retain their shape	Shall be packed to capacity: Provided that in the case of caps, more than 35% per volume of the containers shall consist of caps  As for Extra Choice Grade  (i) and (ii) as for Extra Choice Grade  As for Extra Choice Grade	Packed to capacity  As for Extra Choice Grade  Shall be reasonably free from defects, pits and pieces of pits  Shall have a reasonable good shape  As for Extra Choice Grade

<b>Quality factor</b>	<b>Extra Choice Grade</b>	<b>Choice Grade</b>
(a) Shape (caps)	35%	35%
(b) Blemishes	15%	30%

**CANNED APPLES**

22. The quality requirements for canned apples are as follows:

***Styles and standards for styles***

- (1) (a) Canned apples shall be presented as one of the following styles:
- (i) Apple segments
  - (ii) Apple slices
- (b) (i) Apple segments shall consist of peeled and cored apples sliced longitudinally from the calyx to the stem into segments.
- (ii) Apple slices shall consist of peeled and cored apples sliced longitudinally from the calyx to the stem into slices.

***Quality Standards***

- (2) (a) There shall be four grades of canned apples, namely Extra Choice Grade, Choice Grade, Substandard Grade and Manufacturers Grade.
- (b) The quality standards for canned apples are as follows:

<b>Quality Factor</b>	<b>Extra Choice Grade</b>	<b>Choice Grade</b>	<b>Substandard Grade</b>	<b>Manufacturers Grade</b>

**CANNED APPLE SAUCE**

24. The quality requirements for canned apple sauce are as follows:

**Definitions**

- (1) Where used with regard to canned apple sauce –
  - (a) "colour" means the colour of the typical variety or varieties of apples used other than "flavoured" or "artificially coloured";
  - (b) "consistency" means the flow characteristics of the product and the degree of separation of liquid; and
  - (c) "flavour" means –
    - (i) the degree of excellence of the natural aroma and flavour of the apple ingredients;
    - (ii) the apparent relationship of the acidity to sweetness;
    - (iii) the freedom of undesirable flavours; and
    - (iv) with respect to flavoured types, the flavour balance of the apple ingredient in relation to the added flavour.

***Styles and standards for styles***

- (2) (a) Canned apple sauce shall be presented as one of the following styles:
- (i) Regular or comminuted;
  - (ii) Chunk or chunky.
- (b) (i) Regular or comminuted apple sauce shall consist of apples which may have been peeled and cored or not, comminuted into granular particles.
- (ii) Chunk or chunky apple sauce shall consist of apples, which may have been peeled and cored or not, chopped into small pieces.

***Quality standards***

- (3) (a) There shall be three grades of canned apple sauce, namely Extra Choice Grade, Choice Grade and Manufacturers Grade.
- (b) The quality standards for canned apple sauce are as follows:

Quality Factor	Extra Choice Grade	Choice Grade	Manufacturers Grade

#### CANNED BERRIES

25. The quality requirements for canned berries are as follows:

##### **Definitions**

- (1) Where used with regard to berries—
  - (a) "berries" means all of the recognised berries including but not limited to strawberries, raspberries, youngberries, booyensberries, bilberries, blueberries and mulberries;
  - (b) "disintegrated" means units which are crushed;
  - (c) "firm" means units which are not fully developed and of which more than 75 per cent of the outer surface area is green; and
  - (d) "malformed" means berries which are not normally developed and which contains hard part in the fruit flesh;

32

- (e) "defects" means –
- (i) overripe berries which tend to be mushy;
  - (ii) units with insect damage;
  - (iii) disintegrated and partially dry berries;
  - (iv) immature berries;
  - (v) excessive trimming in the case of whole berries;
  - (vi) grit present in the products; or
  - (vii) any other defects which detracts markedly from the normal appearance, edibility and flavour of the individual units or a quantity of berries.

**Styles and standards for styles**

- (2) (a) Canned berries shall be presented as whole berries.
- (b) Whole berries shall consist of whole, intact berries with the stalks removed.
- (3) (a) There shall be five grades of canned berries, namely Extra Choice Grade, Choice Grade, Standard Grade, Substandard Grade and Manufacturers Grade.
- (b) The quality standards for canned berries are as follows:

***Additional marking requirements***

- (5) Subject to the provisions of regulation 10: Part I, the cultivar of the berries used shall be stated on the label: Provided that –
- youngberries and booyseberries may be deemed to be identical; and
  - youngberries may be described as "Cape loganberries".

**CANNED CAPE GOOSEBERRIES**

26. The quality requirements for canned Cape gooseberries are as follows:

**Definitions**

- (1) Where used with regard to Cape gooseberries –

- (a) "crushed" means units which have been cracked or broken by crushing to the extend that it has lost the normal shape (not due to ripeness);  
Provided that units with cracked or broken skins shall not be considered crushed.

**Style**

- (2) Canned Cape gooseberries shall be presented as whole gooseberries.

**Quality Standards**

- (3) (a) There shall be five grades of canned Cape gooseberries, namely Extra Choice Grade, Choice Grade, Standard Grade, Substandard Grade and Manufacturers Grade.
- (b) The quality standards for canned Cape gooseberries are as follows:

(5) Subject to the provisions of regulation 10: Part I, the product name "Golden Berries" may be used instead of Cape gooseberries.

**CANNED FIGS**

27. The quality requirements for canned figs are as follows:

**Definitions**

- (1) Where used with regard to figs –
  - (a) "disintegrated" means units, in the case of whole figs, which have been crushed; and
  - (b) "immature" means units which are not fully developed.

**Styles and standards for styles**

- (2) (a) Canned figs shall be presented as one of the following styles:
  - (i) Whole figs.
  - (ii) Split figs or broken figs.
- (b) (i) Whole figs shall consist of whole intact figs which may be slightly cracked: Provided that the figs retain their natural conformation without exposing the interior.
- (ii) Split figs or broken figs shall consist of figs which have open to such an extent that the seed cavity is exposed. The shape of the fruit may be distorted, and the fruit may be broken apart into entirely separate pieces.

**Quality Standards**

- (3) (a) There shall be four grades of canned figs, namely Choice Grade, Standard Grade, Substandard Grade and Manufacturers Grade.
- (b) The quality standards for canned figs are as follows:

<b>Quality factor</b>	<b>Choice Grade</b>	<b>Standard Grade</b>	<b>Substandard Grade</b>	<b>Manufacturers Grade</b>

## CANNED FRUIT COCKTAIL

28. The quality requirements for canned fruit cocktail are as follows:

### **Definitions**

- (1) Where used with regard to fruit cocktail –
  - (a) "**broken cherry halves**" means any portion of a cherry that is definitely less than an apparent half or a definitely mutilated cherry half.
  - (b) "**crushed/broken grape**" means grape that has been –
    - (i) crushed to the extend that it has lost its normal shape; or
    - (ii) severed into two separate parts: Provided that the broken units of grapes that collectively equal the size of a full size unit are considered one unit in applying the permissible deviations; and
  - (c) "**pit/stone material**" means pits and pieces of pit that are hard and sharp and which are at least 1,5 mm in any dimension.

### **Kinds of fruit**

- (2) (a) The following kinds of fruit may be used in the preparation of canned fruit cocktail:
  - (i) "peaches (yellow clingstone)
  - (ii) Pears
  - (iii) Pineapples
  - (iv) Grapes (any seedless variety)
  - (v) Cherries, which may be –
    - (aa) any light, sweet variety; or
    - (bb) artificially coloured red; or
    - (cc) artificially coloured red and flavoured, whether natural or artificial: Provided that it does not stain the other ingredients.
- (b) Kinds of fruit used in the preparation of canned fruit cocktail shall consist of either fresh, frozen or previously canned fruit.
- (c) One of the ingredients, excluding the main ingredient, may be of one grade lower than the others.

***Styles permitted for the kinds of fruit***

(3) The styles permitted for the kind of fruit, which may be peeled, pitted or cored as may be applicable for the respective fruit, used in the preparation of canned fruit cocktail are as follows:

- (a) Peaches - Diced
- (b) Pears - Diced
- (c) Pineapples - Pieces, titbits, chunks or diced
- (d) Grapes - Whole
- (e) Cherries - Halves or whole (pitted)

***Forms of Pack***

- (4) Canned fruit cocktail shall be presented as one of the following forms of pack:
- (a) Three and four fruit - fruit cocktail which shall consist of a mixture of three or four fruits of the kinds and styles described in subregulations (2)(a) and (3); Provided that –
    - (i) cherries may be omitted, except for Extra Choice Grade; or
    - (ii) grapes may be omitted.
  - (b) Five and six fruit - fruit cocktail which shall consist of a mixture of the five or six fruits of the kinds and styles described in subregulations (2)(a) and (3).

***Proportions of fruit***

(5) Canned fruit cocktail shall contain the kinds of fruit in the following proportions, based on the individual drained fruit mass in relation to the total drained mass of all the fruit:

Fruit	Style	Proportion	
		3 and 4 Fruits - Fruit Cocktail	5 and 6 Fruit - Fruit Cocktail
Peaches	Diced	30% to 50%	30% to 50%

**CANNED MANGOES**

36. The quality requirements for canned mangoes are as follows:

**Definitions**

- (1) Where used with regard to canned mangoes –
  - (a) "crushed" means a unit which has been –
    - (i) crushed to the extent that it has lost its normal shape (not due to ripeness); or
    - (ii) severed into definite parts: Provided that partially disintegrated halves shall not be considered broken: Provided further that all portions that collectively equal the size of one unit are considered one unit in applying the allowance in the permissible deviations; and
  - (b) "rind" means rind that adhere to the flesh of the mango or is found loose in the container.
- (2) (a) Canned mangoes shall be presented as one of the following styles:
  - (i) Mango halves
  - (ii) Mango slices
  - (iii) Mango diced
  - (iv) Mango pieces, mixed pieces or irregular pieces
- (b)
  - (i) Mango halves shall consist of peeled mangoes cut into two approximately equal parts along the suture from stem to apex.
  - (ii) Mango slices shall consist of peeled mangoes cut lengthwise or crosswise into long, slender pieces.

**Styles and standards for styles**

- (iii) Mango diced shall consist of peeled mangoes cut into approximately cube-shaped units.
  - (iv) Mango pieces, mixed pieces or irregular pieces shall consist of peeled mangoes cut into irregular shaped and sized units.
- (3) (a) There shall be four grades of canned mangoes namely Extra Choice Grade, Choice Grade, Substandard Grade and Manufacturers Grade.
- (b) The quality standards for canned mangoes are as follows:

## CANNED ORANGES

37. The quality requirements for canned oranges are as follows:

### ***Styles and standards for styles.***

(1) (a) Canned oranges shall be presented as one of the following styles:

- (i) Whole orange segments
- (ii) Broken orange segments
- (iii) Orange slices
- (iv) Orange pieces

(b) (i) Whole orange segments shall consist of peeled orange segments which are practically intact and which retain their original shape:  
Provided that the segments may be slightly split.

(ii) Broken orange segments shall consist of portion of segments which retain at least 50 percent of their original apparent size, or which are large enough to remain on a sieve having 12 mm square openings formed by a wire of 2 mm diameter.

(iii) Orange slices shall consist of peeled oranges cut transversally into slices.

(iv) Orange pieces shall consist of portions of segments that are large enough to remain on a sieve having 8 mm square openings formed by a wire of 2 mm diameter

### ***Size grouping in the case of whole orange segments***

(2) Canned whole orange segments shall be grouped according to size in the following manner:

- |     |         |   |
|-----|---------|---|
| (a) | Large:  | 20 or less whole orange segments per 100 gram of drained fruit. |
| (b) | Medium: | 21 to 35 whole orange segments per 100 gram of drained fruit.   |
| (c) | Small:  | 36 or more whole orange segments per 100 gram of drained fruit. |

### ***Quality Standards***

(3) (a) There shall be five grades of canned oranges, namely Extra Choice Grade, Choice Grade, Standard Grade, Substandard Grade and Manufacturers Grade.

**CANNED PEACHES: FREESTONE**

41. The quality requirements for canned freestone peaches are as follows:

**Definitions**

- (1) Where used with regard to canned freestone peaches –

- (a) "crushed/broken" means a unit, in the case of whole peaches, peach halves and peach quarters, which has been –
  - (i) crushed to the extent that it has lost its normal shape (not due to ripeness); or
  - (ii) severed into definite parts: Provided that all portions that collectively equal the size of a full size unit are considered one unit in applying the permissible deviations.
- (b) "freestone peach" means peach where the pit separates readily from the flesh; and
- (c) "pit/stone material" means, in the case of all styles other than whole peaches, pits and pieces of pit (including pit extensions) that are dark, hard and sharp and which are at least 1,5 mm in any dimension: Provided that it shall not be considered as a defect when whole peach pits or peach kernels are used as seasoning ingredients.

**Styles and standards for styles**

- (2) (a) Canned freestone peaches shall be presented as one of the following styles:

- (i) Whole peaches
  - (ii) Peach halves
  - (iii) Peach quarters
  - (iv) Peach slices
  - (v) Peach diced
  - (vi) Peach pieces, mixed pieces or irregular pieces.
- (b)
- (i) Whole peaches shall consist of whole, peeled and unpitted peaches.
  - (ii) Peach halves shall consist of peeled and pitted peaches cut into two approximately equal parts.
  - (iii) Peach quarters shall consist of peeled and pitted peaches cut into four approximately equal parts.
  - (iv) Peach slices shall consist of peeled and pitted peaches cut into wedge shaped units.
  - (v) Peach diced shall consist of peeled and pitted peaches cut into approximately cube-shaped units.
  - (vi) Peach pieces, mixed pieces or irregular pieces shall consist of peeled and pitted peaches cut into irregular shaped and sized units.

***Additional marking requirements***

- (5) If the requirement for the minimum number of peach halves as prescribed in subregulation (3)(d) are not complied with, the count shall be stated on the label.

**CANNED PEACHES: YELLOW CLINGSTONE**

42. The quality requirements for canned yellow clingstone peaches are as follows:

**Definitions**

- (1) Where used with regard to yellow clingstone peaches –
  - (a) "clingstone peach" means a peach which have the pit adhered to the flesh.

92

- (b) "crushed/broken" means a unit, in the case of whole peaches, peach slices, peach halves and peach quarters, which has been –
- (i) crushed to the extent that it has lost its normal shape (not due to ripeness); or
  - (ii) severed into definite parts: Provided that all portions that collectively equal the size of a full size unit are considered one unit in applying the permissible deviations; and
- (c) "pit/stone material" means, in the case of all styles other than whole peaches, pits and pieces of pit (including pit extensions) that are dark, hard and sharp and which are at least 1,5 mm in any dimension: Provided that it shall not be considered as a defect when whole peach pits or peach kernels are used as seasoning ingredients.

**Styles and standards for styles**

- (2) (a) Canned yellow clingstone peaches shall be presented as one of the following styles:
- (i) Whole peaches
  - (ii) Peach halves
  - (iii) Peach quarters
  - (iv) Peach slices
  - (v) Peach diced
  - (vi) Peach pieces, mixed pieces or irregular pieces
- (b)
- (i) Whole peaches shall consist of whole, peeled and unpitted peaches.
  - (ii) Peach halves shall consist of peeled and pitted peaches cut into two approximately equal parts.
  - (iii) Peach quarters shall consist of peeled and pitted peaches cut into four approximately equal parts.
  - (iv) Peach slices shall consist of peeled and pitted peaches cut into wedge shaped units.
  - (v) Peach diced shall consist of peeled and pitted peaches cut into approximately cube-shaped units.
  - (vi) Peach pieces, mixed pieces or irregular pieces shall consist of peeled and pitted peaches cut into irregular shaped and sized units.

**Quality Standards**

- (3) (a) There shall be five grades of canned yellow clingstone peaches, namely Extra Choice Grade, Choice Grade, Standard Grade, Substandard Grade and Manufacturers Grade.

- (b) The quality standards for canned yellow clingstone peaches are as follows:

**CANNED PEACH PULP AND PEACH PIE FRUIT (SOLID PACK PEACH)**

43. The quality requirements for canned peach pulp and peach pie fruit (solid pack peaches) are as follows:

***Styles and standards for styles***

- (1) (a) Canned peach pie fruit (solid pack peaches) shall be presented as unscreened, which shall consist of either peach halves, peach quarters, peach segments or peach slices.
- (b) Canned peach pulp shall be presented as screened, which shall consist of peaches comminuted into granular particles.

***Quality Standards***

- (2) (a) There shall be three grades for canned peach pulp and peach pie fruit (solid pack peaches), namely Extra Choice Grade, Choice Grade and Manufacturers Grade.
- (b) The quality standards for canned peach pulp and peach pie fruit (solid pack peaches) are as follows:

Quality factor	Extra Choice Grade	Choice Grade	Manufacturers Grade

**CANNED PEARS**

44. The quality requirements for canned pears are as follows:

**Definitions**

(1) Where used with regard to pears –

- (a) "crushed/broken" means a unit, in the case of whole pears, pear halves, quarters and slices, which has been –
- (i) crushed to the extent that it has lost its normal shape (not due to ripeness); or
  - (ii) severed into definite parts: Provided that pear halves which are slightly split from the edge to the core cavity or at the stem-end shall not be considered broken: Provided further that all portions that collectively equal the size of a full unit are considered one unit in applying the permissible deviations;
- (b) "core material" means, in the case of all styles other than uncored whole pears, portions of a seed cavity or of a loose core, with or without seeds: Provided that all pieces of a core in a sample shall be aggregated and pieces totaling approximately one-half of a core shall be considered one unit in applying the permissible deviations; and
- (c) "loose seed" means any pear seed, or the equivalent in pieces of one seed, not included in the core material.

**Styles and standards for styles**

- (2) (a) Canned pears shall be presented as one of the following styles:
- (i) Whole pears
  - (ii) Pear halves
  - (iii) Pear quarters

- (iv) Pear slices  
 (v) Diced pears  
 (vi) Pear pieces, mixed pieces or irregular pieces
- (b) (i) Whole pears shall consist of peeled or unpeeled whole pears which may have been cored or not.  
 (ii) Pear halves shall consist of peeled or unpeeled pears, with the stems and cores removed, and cut into two approximately equal parts.  
 (iii) Pear quarters shall consist of peeled pears with the cores removed and cut into four approximately equal parts.  
 (iv) Pear slices shall consist of peeled pears with the cores removed and cut into wedge shaped units.  
 (v) Diced pears shall consist of peeled pears with the cores removed and cut into cube-shaped units.  
 (vi) Pear pieces, mixed pieces or irregular pieces shall consist of peeled pears with the cores removed and cut into irregular shaped and sized units.

***Additional marking requirements***

- (5) If the requirements for the minimum number of pear halves as prescribed in subregulation (3)(d) are not complied with, the count shall be stated on the label.

**CANNED PINEAPPLES**

45. The quality requirements for canned pineapples are as follows:

***Definitions***

- (1) Where used with regard to canned pineapples –
  - (a) "black spot" means –
    - (i) the soft, watery, brown discolouration (wet type) of an infested fruit which spreads to neighbouring fruit; or
    - (ii) dry spot of which the infested tissue has a brown and corky appearance;
  - (b) "broken" means when all styles of canned pineapples severed into definite parts;
  - (c) "core" means the pineapple portion which is identified as definitely hard and characteristic of the centre structure which is normally removed during processing; and
  - (d) "excessive trimming" means when pineapple is trimmed to an extent that its normal shape is destroyed and detracts from the appearance of such unit.

- (5) If the requirements for the minimum number of pear halves as prescribed in subregulation (3)(d) are not complied with, the count shall be stated on the label.
- (b) "broken" means when all styles of canned pineapples severed into definite parts;
- (c) "core" means the pineapple portion which is identified as definitely hard and characteristic of the centre structure which is normally removed during processing; and
- (d) "excessive trimming" means when pineapple is trimmed to an extent that its normal shape is destroyed and detracts from the appearance of such unit.

(2) (a) Canned pineapples shall be presented as one of the following styles:

- (i) Pineapple wholes
  - (ii) Pineapple rings (slices)
  - (iii) Pineapple half slices
  - (iv) Pineapple quarter slices
  - (v) Pineapple pieces
  - (vi) Pineapple chunks
  - (vii) Pineapple diced (segments)
  - (viii) Pineapple titbits (pizza cut)
  - (ix) Pineapple broken rings
  - (x) Pineapple wafers
  - (xi) Pineapple crushed or grated
  - (xii) Pineapple spears
- (b) (i) Pineapple whole shall consist of the cylindrical whole cut with the core removed.
- (ii) Pineapple rings shall consist of uniformly cut circular rings cut across the axis of the peeled, cored pineapple cylinders.
- (iii) Pineapple half slices shall consist of uniformly cut and approximately semicircular halves of slices.
- (iv) Pineapple quarter slices shall consist of uniformly cut, one-fourth portions of slices.
- (v) Pineapple pieces shall consist of irregular shapes and sizes not identifiable as specific style and does not include chunks.
- (vi) Pineapple chunks shall consist of short, thick pieces cut from thick slices or from peeled cored pineapple and predominantly more than 12 mm in both thickness and width, less than 38 mm in length.
- (vii) Pineapple diced (segments) shall consist reasonably uniform, cubed shaped pieces, predominantly 14 mm or less in the longest edge dimension.
- (viii) Pineapple titbits (pizza cut) shall consist of reasonably uniform wedge shaped sectors cut from slices or portions thereof and are predominantly from 8 mm to 13 mm.
- (ix) Pineapple broken rings shall consist of arc shaped portions which may not be uniform in size or shape.

114

- (x) Pineapple wafers shall consist of uniformly circular slices or rings cut across the axis of the peeled and uncored pineapple cylinders.
- (xi) Pineapple crushed or grated shall consist of finely cut or shredded or grated or diced pieces of pineapples.
- (xii) Pineapple spears shall consist of long slender pieces cut radially and lengthwise of the cored pineapples cylinder predominantly 65 mm or longer.

#### **Quality Standards**

- (5) (a) There shall be five grades of canned pineapples, namely Extra Choice Grade, Choice Grade, Standard Grade, Substandard Grade and Manufacturers Grade.

- (b) The quality standards for canned pineapples are as follows:
