## CHAPTER II

### Alternative Dispute Resolution Rules

#### Dispute resolution service

3. (1) A registrant must submit to proceedings under the rules if a complainant asserts, in accordance with the procedure, that -

(a) the complainant has rights in respect of a name or mark which is identical or similar to the domain name and, in the hands of the registrant the domain name is an abusive registration; or

(b) the domain name, in the hands of the registrant, is an offensive registration.

(2) The complainant is required to prove on a balance of probabilities to the adjudicator that the required elements in subregulation (1) are present.

#### Evidence of abusive or offensive registration

4. (1) Factors, which may indicate that the domain name is an abusive registration includes-

(a) Circumstances indicating that the registrant has registered or otherwise acquired the domain name primarily to -

(i) sell, rent or otherwise transfer the domain name to a complainant or to a competitor of the complainant, or any third party, for valuable consideration in excess of the registrant's reasonable out-of-pocket expenses directly associated with acquiring or using the domain name;

(3) There shall be a rebuttable presumption of abusive registration if the complainant proves that the registrant has been found to have made an abusive registration in three or more disputes in the 12 months before the dispute was filed.

#### **How a registrant may indicate that domain name is not an abusive registration**

5. Factors, which may indicate that the domain name is not an abusive registration, include-

- (a) before being aware of the complainant's cause for complaint, the registrant has -
  - (i) used or made demonstrable preparations to use the domain name in connection with a good faith offering of goods or services;

(b) the substance of the dispute relates to acts that occurred prior to or subsequent to the close of submissions in the earlier case;

(2) A registrant may update technical information, such as name servers, for the domain name provided that such updates do not result in the transfer or deletion of a domain name subject to a dispute.

(3) Where an update of technical information results in the transfer or deletion of the domain name, the registrant shall be liable for any damages that may arise as a result of such transfer or deletion, if the registrant was aware of a dispute lodged under these Regulations in respect of such domain name.

(4) Where a second level domain administrator is informed of a domain name dispute, the second level domain administrator must take steps to ensure that the domain name is not transferred, or allowed to be deleted during the course of the dispute.
