0020	Conscious sedation: Any case that is conducted outside of a hospital theatre shall be coded with the relevant procedure code. To identify these cases, the above modifier should be used to indicate to the medical scheme that there will be no hospital/theatre account.							
0021	Determination of anaesthetic fees: Anaesthetic fees are determined by obtaining the sum of the basic anaesthetic units (allocated to each procedure that might be performed under anaesthetic as indicated in the "Anaesthetic Performed" column) plus the time units (calculated according to the formula in Modifier 0023) and the appropriate modifiers (see Modifiers 0037-0044). In cases of operative procedures on the musculoskeletal system, open fractures and open reduction of fractures or dislocations add units as laid down by Modifiers 5441 to 5448							06.06
0023	The basic anaesthetic units are laid down in the tariff and are reflected in the anaesthetic column. These basic anaesthetic units reflect the additional anaesthetic risk, the technical skill required of the anaesthesiologist/anaesthetist and the scope of the surgical procedure, but exclude the value of the actual time spent administering the anaesthetic. The time units (indicated by "T") will be added to the listed basic anaesthetic units in all cases on the following basis: Anaesthetic time shall be per 15 minute period or part thereof, calculated from the commencement of the anaesthetic, i.e. 2.00 anaesthetic units per 15 minute period or part thereof, provided that should the duration of the anaesthetic be longer than one (1) hour the number of units shall, after one (1) hour, be 3.00 anaesthetic units per 15 minute period or part thereof.							06.05
0024	Pre-operative assessments not followed by procedures: If a pre-operative assessment of a patient by the anaesthesiologist/anaesthetist is not followed by an operation, it will be regarded as a visit at hospital or nursing home and the appropriate hospital visit item should be charged.							06.05
0025	Calculation of anaesthetic time: Anaesthetic time is calculated from the time the anaesthesiologist/anaesthetist begins to prepare the patient for the induction of anaesthesia in the operating theatre or in a similar equivalent area and ends when the anaesthesiologist/anaesthetist is no longer required to give his/her personal professional attention to the patient, i.e. when the patient may, with reasonable safety, be placed under the customary post-operative supervision. Where prolonged personal professional attention is necessary for the well-being and safety of such patient, the necessary time will be valued on the same basis as indicated above for the anaesthetic time. The anaesthesiologist/anaesthetist must show on his/her account the exact anaesthetic time, including the supervision time spent with the patient.							06.05
0027	More than one procedure under the same anaesthetic: Where more than one operation is performed under the same anaesthetic, the basic anaesthetic units will be that of the major operation with the highest number of units							06.04
0028	Indicator for use of low flow anaesthetic technique less than 1litre/minute: Fresh gas flow of less than 1 litre/minute							06.06

Code	Description	Ver		Add		Specialists		General Practitioners / non-designated Specialists		Anaesthesiology	
		RVU	Fee	RVU	Fee	RVU	Fee	RVU	Fee	RVU	Fee
0029	Assistant anaesthesiologists: When rendered necessary by the scope of the anaesthetic, an assistant anaesthesiologist may be employed. The remuneration of the assistant anaesthesiologist shall be calculated on the same basis as in the case where a general practitioner administers the anaesthetic										06.04
0030	Indicator for use of low flow anaesthetic technique 1-2 litre/minute: Fresh gas flow of 1 to 2 litre/minute										06.06
0031	Intravenous drips and transfusions: Treatment with intravenous drips and transfusions is considered part of the normal treatment in administering an anaesthetic. No additional fees may be charged for such services when rendered either prior to, or during actual theatre or operating time										06.04
0032	Patients in prone position: Anaesthesia administered to patients in the prone position shall have a minimum of 4,00 basic anaesthetic units. When the basic anaesthetic units for the procedure is 3,00, one extra anaesthetic unit should be added. If the basic anaesthetic units for the procedure is 4,00 or more, no extra units should be added										06.04
0033	Participating in general care of patients: When an anaesthesiologist/anaesthetist is required to participate in the general care of a patient during a surgical procedure, but does not administer the anaesthetic, such services may be remunerated at full anaesthetic rate, subject to the provisos of modifier 0035: Anaesthetic administered by an anaesthesiologist/anaesthetist. and modifier 0036: Anaesthetic administered by general practitioners.										06.05
0034	Head and neck procedures: All anaesthetics administered for diagnostic, surgical or X-ray procedures on the head and neck shall have a minimum of 4,00 basic anaesthetic units. When the basic anaesthetic units for the procedure is 3,00, one extra anaesthetic unit should be added. If the basic anaesthetic units for the procedure is 4,00 or more, no extra units should be added										06.04
0035	Anaesthetic administered by an anaesthesiologist/anaesthetist: No anaesthetic administered shall have a total value of less than 7,00 anaesthetic units (basic units, time units plus appropriate modifiers).										06.05
0036	Anaesthetic administered by general practitioners: The units (basic units plus time plus the appropriate modifiers) used to calculate the fee for an anaesthetic administered by a general practitioner lasting one hour or less, shall be the same as that for an anaesthesiologist. For anaesthetic lasting more than one hour, the units used to calculate the fee for an anaesthetic administered by a general practitioner will be 4/5 (80%) of the total number of units (basic units plus time [refer to modifier 0023] plus the appropriate modifiers) applicable to an anaesthesiologist. Please note that the 4/5 (80%) principle will be applied to all anaesthetics administered by general practitioners with the proviso that no anaesthetic with a total number of units higher than 11,00 will be reduced to less than 11,00 units in total. The monetary value of the unit is the same for both an anaesthesiologist/anaesthetist.										06.05
