DENTAL TECHNICIANS

Dental Technicians 2009

DRAFT NATIONAL REFERENCE PRICE LIST FOR DENTAL TECHNICIANS, EFFECTIVE FROM 1 JANUARY 2009

The following reference price list is not a set of tariffs that must be applied by medical schemes and/or providers. It is rather intended to serve as a baseline against which medical schemes can individually determine benefit levels and health service providers can individually determine fees charged to patients. Medical schemes may, for example, determine in their rules that their benefit in respect of a particular health service is equivalent to a specified percentage of the national health reference price list. It is especially intended to serve as a basis for negotiation between individual funders and individual health care providers with a view to facilitating agreements which will minimise balance billing against members of medical schemes. Should individual medical schemes wish to determine benefit structures, and individual providers determine fee structures, on some other basis without reference to this list, they may do so as well.

In calculating the prices in this schedule, the following rounding method is used: Values R10 and below rounded to the nearest cent, R10+ rounded to the nearest 10cent. Modifier values are rounded to the nearest cent. When new item prices are calculated, e.g. when applying a modifier, the same rounding scheme should be followed.

VAT EXCLUSIVE PRICES APPEAR IN BRACKETS.

DRAFT NATIONAL REFERENCE PRICE LIST FOR SERVICES BY DENTAL THERAPISTS EFFECTIVE FROM 1 JANUARY 2009

The following reference price list is not a set of tariffs that must be applied by medical schemes and/or providers. It is rather intended to serve as a baseline against which medical schemes can individually determine benefit levels and health service providers can individually determine fees charged to patients. Medical schemes may, for example, determine in their rules that their benefit in respect of a particular health service is equivalent to a specified percentage of the national health reference price list. It is especially intended to serve as a basis for negotiation between individual funders and individual health care providers with a view to facilitating agreements which will minimise balance billing against members of medical schemes. Should individual medical schemes wish to determine benefit structures, and individual providers determine fee structures, on some other basis without reference to this list, they may do so as well.

In calculating the prices in this schedule, the following rounding method is used: Values R10 and below rounded to the nearest cent, R10+ rounded to the nearest 10cent. Modifier values are rounded to the nearest cent. When new item prices are calculated, e.g. when applying a modifier, the same rounding scheme should be followed.

VAT EXCLUSIVE PRICES APPEAR IN BRACKETS.

Code	Description	Ver	Dental Therapy	M P	Lab	T C
	An assessment performed on a new or established patient (patient of record) to determine the patient's dental and medical health status involving a comprehensive examination, diagnosis and treatment plan. It is a thorough assessment and recording of the patient's past and current state of oral health (extraoral and intraoral hard and soft tissues), risk for future dental disease as well as assessing general health factors that relate to the treatment of the patient. A comprehensive examination includes treatment planning at a separate appointment where a diagnosis is made with information acquired through study models, full-mouth x-rays and other relevant diagnostic aids. It includes, but is not limited to the evaluation and recording of dental caries, pulp vitality tests of the complete dentition, plaque index, missing and unerupted teeth, restorations, occlusal relationships, periodontal conditions (including a periodontal charting and bleeding index), hard and soft tissue anomalies (including the TMJ). The patient shall be provided with a written comprehensive treatment plan, which is a part of the patient's clinical record and the original should be retained by the dentist. No further oral examination fees shall be levied until the treatment plan resulting from this assessment is completed (See Rule 008)

This type of assessment is conducted on patients who present with a specific problem or during an emergency situation for the management of a critical dental condition (e.g., trauma and acute infections). It includes patients who have been referred for the management of a specific condition or treatment such as the removal of a tooth, a crown lengthening or isolated grafting procedure where there is no need for a comprehensive assessment. Comment: This code should not be reported on established patients who present with specific problems/emergencies which is part of and/or a result of the patients' current treatment plan, e.g., recementation/replacement of temporary restorations, pain relief during root canal treatment, etc.					
8189	Re-examination - existing condition	06.03	50.40 (44.20)			B
	An assessment performed on an established patient (patient of record) to assess the status of an untreated previously existing condition involving an examination and evaluation, limited to the previously existing condition. This type of assessment is conducted on patients (1) with a traumatic injury where no treatment was rendered but the patient needs follow-up monitoring; (2) requires evaluation for undiagnosed continuing pain after a limited oral examination and diagnostic tests did not reveal any findings; and (3) with soft tissue lesions such as a leukoplakia observed on a previous visit that require follow-up monitoring of pathological changes. Comment: (1) A re-examination is not a post-operative visit.

	Includes visits to nursing homes, long-term care facilities, hospice sites, institutions, etc. Report in addition to appropriate code numbers for actual services rendered. A consultation requires and includes a written report to the practitioner or patient who requested the consultation. It involves an examination, diagnosis and treatment proposal. The dentist may initiate further diagnostic or therapeutic services (oral examinations excluded). Comment: A referral is the transfer of the total or specific care of a patient from one dentist to another and does not constitute a consultation. When the consulting dentist assumes responsibility for the continuing care of the patient, any service rendered by him/her will cease to be a consultation, and an appropriate oral examination code should be reported.
