

**NOTICE 215 OF 2010****DEPARTMENT OF PUBLIC WORKS  
AGRÉMENT SOUTH AFRICA**

(Approval of innovative construction products and systems)

Notice is hereby given that Agrément South Africa has, with effect from 29 July 2009, issued an Agrément certificate, details of which appear in the schedule hereto.

**SCHEDULE**

Agrément Certificate 2009/364

**Name of product:** FrictionPave Thin bituminous Road Surfacing system

**Certificate holder:** FrictionPave Partnership JV

**Description:**

Frictionpave is a thin bituminous road surfacing system with a nominal compacted thickness of between 16 and 25 mm. It consists of 9.5 or 13 mm nominal maximum aggregate size (72-80% passing), open graded, which is placed on tack coat using a self-priming paver. It is designed as a thin surfacing or re-sealing layer to provide the functional friction course and to preserve the underlying road base structure. The mix design, manufacturing and placing of the product is strictly controlled and under the supervision of a competent person and approved by the manufacturer's design Engineer.

FrictionPave was developed in South Africa, by FrictionPave, a joint Venture Partner between three road construction contractors, namely Rand Roads (division of G-LTA), Power Construction and Zebra Surfacing, and ARCUS GIBB civil engineering consultancy.

The Agrément certificate contains detailed information on the product and can be accessed at <http://www.agrement.co.za>
