	3.Assistant Surgeon (Maxillo-facial and periodontal surgery): The fee payable to a specialist assistant is determined as 1/3 (of the fee of the practitioner performing the procedure (Modifier 8001). The fee payable to a general dental practitioner assistant is determined as 15% (of the fee of the practitioner performing the procedure (Modifier 8007). The patient must be informed beforehand that another dentist/specialist will be assisting at the operation and that a fee will be payable to the assistant. The assistant's name must appear on the invoice rendered to the patient.	2005.02	-	-	-	-	-	-
	4.Surgical team (Maxillo-facial and oral surgery): The additional fee to all members of the surgical team for after hours emergency surgery shall be calculated by adding 25% to the fee for the procedure or procedures performed (Modifier 8008).	2005.02	-	-	-	-	-	-
010	Orthodontic guidelines: The documentation and first invoice to the patient/medical scheme regarding orthodontic services will include the following information: a. The treatment plan and type of treatment (treatment code number); b. A diagnostic code (ICD-10) and c. An orthodontic payment plan indicating the following: i. The total fee that will be levied for the treatment; ii. The total fee that will be levied for the treatment (retention period excluded); iii. The initial fee payable by the patient (approximately 20% of the total fee); and iv. The monthy payments of the balance of the fee.	2005.02 2006.03	-	-	-	-	-	-
	2. The fee for orthodontic treatment does not include a clinical oral evaluation and necessary diagnostic services. The fee for corrective therapy (i.e. codes 8861 to 8888) is an inclusive fee and no additional fees may be levied for intra-operative oral evaluations and preventive services. A pre-orthodontic treatment visit, an orthodontic retention, and an oral evaluation on completion of the treatment plan (retention phase included) are excluded and should be reported in addition to corrective orthodontic treatment as separate procedures (Code 8803 x3). Intra/post orthodontic treatment records consisting of radiographs/diagnostic images (limited to a cephalometric film and 5 oral/facial images) and diagnostic casts may be levied when a corrective orthodontic treatment plan is completed (retention phase included).	2005.02	-	-	-	-	-	-
	3. The fee for 'Fixed appliance therapy' (codes 8861 and 8865 to 8888), as determined by the individual practitioner, will be levied on a monthly manner over the treatment period (retention phase excluded).	2005.02	-	-	-	-	-	-
	4.When partial fixed appliance or preliminary orthodontic treatment (codes 8858, 8861, 8865 or 8866) is followed by full fixed appliance orthodontic treatment (codes 8873 to 8888) provided by the same orthodontist, the fees levied for the partial fixed appliance therapy or preliminary treatment will be deducted from the fee quoted for the full fixed appliance orthodontic treatment.	2005.02	-	-	-	-	-	-

	6.When the patient transfers to another practitioner during treatment, or treatment is terminated for any reason, the original treating practitioner must report the number of treatment months remaining and determine the balance of the fee by applying the following formula: Total payment (for treatment only) minus 20% of the total fee (for banding - when applicable) multiplied by the percentage of treatment remaining. For example, if the practitioner was paid R 10,000.00 for a 24-month treatment plan and 18 months of treatment were completed. The balance would be R 2,000.00 (or R 10,000.00 - R 2,000.00 x 6/24). The length of the treatment plan from the original request for authorisation will be used to determine the number of treatment months remaining. The practitioner continuing treatment will provide the information stipulated in paragraph 1 above. Report code 8891 (Orthodontic transfer) with the fee that will be levied for continuation of the treatment in addition to the appropriate orthodontic treatment code. The fee for continuous	2005.02			-	-		-				
	treatment is subject to prior authorisation by the patient's medical scheme. 7.When an established orthodontic patient requires re-treatment, the information stipulated in paragraph 1 above and the cause(s) for re-treatment will be provided. Report code 8892 (Orthodontic re-treatment) with the fee that will be levied for re-treatment in addition to the appropriate orthodontic treatment code. Orthodontic re-treatment is subject to prior authorisation by the patient's medical scheme.	2005.02		-	-	-		-				
	Dento-legal fees: Practitioners are entitled to remuneration if they are present at Court at the request of an advocate or attorney. Use code 8111 (Dental testimony) to report dento-legal work. The code is listed in the adjunctive general services sections in the code lists.	2005.02		-	-	-		-				
D. 012	Modifiers Modifiers Modifiers should be used with procedures identified throughout the NHRPL. Modifiers provide the means by which the reporting practitioner can indicate that a service or procedure that has been performed has been altered by some specific circumstance but not changed it its definition or code. The sensible application of modifiers obviates the necessity for separate procedure listings that may describe the modifying circumstance. Modifiers may be used to indicate to the recipient of the report that: a.A service or procedure was performed by more than one practitioner. b.A service or procedure has been increased or reduced. c.Only part of a service was performed. e.A service or procedure was performed. e.A service or procedure was performed. f.The fee/benefit was altered due to a financial agreement.	2006.03		-	-	-		-

	Frequency of benefits.	2005.02				_	_		_	_				
	The South African Dental Association recommends to medical schemes, where considered	2000.02						_	_	-				
	necessary and appropriate, that contract limitations on the frequency of providing care for certain													
	services be stated as "twice a calendar year" rather than once in every six months.													
	Radiographs and records.	2005.02		-		-	-		-	-				
	Radiographs should be taken only for clinical reasons as determined by the treating dentist.	2000002												
	Postoperative radiographs should only be required as part of dental treatment. When a dentist													
	determined it is appropriate to comply with a third-party payer's request for radiographs, a													
	duplicate set should be submitted and the originals retained by the dentist. Any additional costs													
	incurred by the dentists in copying radiographs and clinical records for claims determination should													
	be reimbursed by the third-party payer or the patient.													
	New vs. established patient.	2005.02		-		-	-	· -	-	-				
	A new patient is one who has not received any professional services from the dentist or another													
	dentist of the same speciality who belongs to the same group practice, within the past three years.													
	An established patient (patient of record) is one who has received professional services from the													
	dentist or another dentist of the same speciality who belongs to the same group practice, within the													
	past three years.													
	In the instance where a dentist is on call for or covering for another dentist, the patient's encounter													
	will be classified as it would have been by the dentist who is not available.

	further dental care that may be required. CLINICAL ORAL EXAMINATIONS													
	The purpose of oral examinations is to observe and record pertinent information, past and present,	2006 03		-		-	-		-	-				
	necessary to arrive at a diagnosis and treatment plan (when treatment is indicated). A treatment	2000.03		-		-	-	-	-	-				
	plan is a list of procedures or services the dentist proposes to perform on a dental patient based on													
	the results of the examination and diagnosis. Often more than one treatment plan is presented.													
	Oral examinations may require the integration of information that is acquired through additional													
	diagnostic procedures, which should be reported separately. The oral examination, diagnosis, and													
	treatment planning are the responsibility of the dentist. The collection and recording of some data													
	and components of the oral examination may however be delegated. Oral examinations and													
	consultations include the issuing of prescriptions where medication is required.

	Diagnostic radiographs/diagnostic images include interpretation.	2006.03		-		-		-		-		-		-				
	Radiographs/diagnostic images should only be taken for clinical reasons as determined by the																	
	dentist and practitioners should comply with the Regulations concerning safe radiological practice																	
	and take the necessary precaution to minimise radiation of patients. Radiographs/diagnostic																	
	images are part of the patient's clinical record, should be of diagnostic quality, properly identified																	
	and dated. The dentist should retain the original images and only copies should be used to fulfill																	
	requests made by patients or third party funders.																	
	A complete series of intra-oral radiographs/images for diagnostic purposes is required once per																	
	treatment plan only. A second series may be required in exceptional cases e.g., following

	teeth, injured or destroyed by trauma or disease. Restorative services/procedures intend to restore																
	the function of a natural tooth.																
	Anterior teeth include incisors and canines. Posterior teeth include premolars and molars.																
	The number of tooth surfaces restored, i.e. mesial, occlusal (or incisal), distal, lingual, or vestibular																
	(buccal or labial), is used to determine the appropriate procedure code. A one surface restoration																
	for example, involves only one of the surfaces, while a two-surface restoration extends to two of																
	the five surfaces. With a four-or-more-surfaces anterior restoration involving four tooth surfaces																
	and the incisal angle is involved.																
	Limitations on amalgam and resin-based composite restorations:																
	(1) The reporting of two separate restorations of the same material (e.g., a MO and DO amalgam																
	restoration) on the same tooth is appropriate. Some medical schemes however, have a clause in																
	its dental plan(s) that restricts coverage of the same tooth surface, such as an occlusal, twice on																
	the same day and may require the reporting of a MOD restoration instead of a separate MO and																
	DO restoration.
