FILM AND PUBLICATION BOARD

CLASSIFICATION GUIDELINES FOR THE CLASSIFICATION OF FILMS, INTERACTIVE COMPUTER GAMES AND CERTAIN PUBLICATIONS

Approved by the Council of the Film and Publication Board in consultation with the Minister of Home Affairs in terms of section 4A(1)(a) read with section 31(3) of the Films and Publications Act No.65 of 1996.

GUIDELINES TO BE REFERRED TO IN THE CLASSIFICATION OF FILMS, INTERACTIVE COMPUTER GAMES AND CERTAIN PUBLICATIONS

1. INTRODUCTION AND APPLICATION OF GUIDELINES

The Films and Publications Act, Act No. 65 of 1996 ("the Act") requires certain films, games, and publications to be classified by the Film and Publication Board ("FPB"). Once classified the distribution is subject to the conditions imposed by the FPB. "Distribution" includes screening in public, selling, hiring out, offering or keeping for sale or hire, handing or exhibiting such material to a person under the age of 18 years in certain circumstances and the failure to take reasonable steps to regulate access to films, games or certain publications.

In the case of child pornography the FPB Act also directly prohibits the possession and distribution of child pornography under criminal sanction. Such a sanction also follows upon the distribution of sexually explicit material to a person under the age of 18, unless the material amounts to a bona fide documentary or is of scientific, literary or artistic merit or is on a matter of public interest.

The purpose of classification is to provide consumer advice to enable individuals to make informed viewing, reading and gaming choices for themselves as well as for children in their care; and protect children from exposure to disturbing and harmful materials and from premature exposure to adult experiences.

All legitimate material that meets the criteria of a film and game as defined in the Act falls within the jurisdiction of the FPB. This includes films exhibited at cinemas, DVDs, Blu Rays, videos on demand, mobile content (in so far as it does not amount to broadcast content) and the internet.

All publications that are not bona fide newspapers published by a member of a body, recognised by the Press Ombudsman and which subscribe and adhere to a code of conduct, enforced by that body, fall within the jurisdiction of the FPB.

2. DEFINITIONS

1. PURPOSE OF GUIDELINES

To provide guidelines that allow for the examining of a film, game or publication in accordance with, amongst others, the following rights:

- (1) right to freedom of expression;
- (2) right of access to information;
- (3) right of children to be protected against maltreatment, neglect, abuse or degradation;
- (4) right to freedom of security which includes being protected from unsolicited exposure to materials which a reasonable person may find offensive;
- (5) right to equality; and
- (6) right to human dignity.

To recognize that no right is absolute and that it may be limited in terms of the law of general application when it is reasonable and justifiable in an open and democratic society based on human dignity, equality and freedom, taking relevant factors, including the nature of the right, the importance of the purpose of the limitation, the nature and extent of the limitation, the relation between the limitation and its purpose and any other less restrictive means to achieve the purpose, into account.

To provide general guidelines to ensure:

- the consistent classification of material;
- that no content which is prohibited in terms of this Act is merely classified;
- content created through the commission of a criminal offence is appropriately channelled to the relevant authorities by the Film and Publication Board;
- classification of material reflects public opinion;
- material does not cause any moral harm in the category in which it was classified.

To protect children from exposure to potentially disturbing or harmful materials and from premature exposure to adult experiences, as well as to provide such information as will allow adult South Africans to make informed viewing, gaming and reading choices, both for themselves and for children in their care.

In making their decisions, classification committees, consistent with the principle that in all matters concerning children, the best interests of children are paramount, must aim to strike a reasonable balance between competing interests and the protection of children from potentially disturbing, harmful and age-inappropriate material.

The guidelines provide for the consideration of artistic, dramatic or scientific merit as but one of the considerations in making a classification decision. Accordingly, it should not be elevated above other factors to be considered in making a classification decision.

When interpreting and applying these guidelines cognisance shall be taken of the country's cultural diversity and effect shall be given thereto.

Classifiers when applying and interpreting these guidelines must also take cognisance that classification guidelines cannot be comprehensive in the identification of all potentially disturbing and harmful content. In addition there may be material or content which may not be disturbing or harmful, but may be age inappropriate and unacceptable to the community in general.

Classifiable elements are indicated by alphabetic symbols or words and alert the public to particular elements which are noteworthy and may be potentially disturbing, harmful or inappropriate for children below a specified age.
- (2) Consumer advice should be indicated together with classification information on the outside of all material as applicable:

Mandatory consumer advice:

- a) **"D"** alerts to scenes of substance (drugs and alcohol) abuse.
 - (i) Any scenes of substance abuse are classifiable elements and must be considered in the allocation of an appropriate age restriction.

 - (iii) The deliberate flaunting of human sexuality or the undue exposure of intimate parts is a classifiable element and must be considered in the allocation of an appropriate age restriction based on the context and impact.
- (g) **"P"** warns of scenes or language that is biased or prejudiced with regard to race, ethnicity, gender, religion, sexual orientation or other group-identifiable characteristics;

 - "B"** warns consumers that content may be religiously sensitive.
 - (i) Blasphemy is not treated as a classifiable element determining age restrictions, but as a matter of appropriate consumer information if it has a moderate, strong, or very strong impact. Within the context, the taking of God's name in vain may amount to blasphemy. The sensitivities of certain religions, especially with regard to precepts and practices which may be unique to certain of them, should be noted appropriately.
 - (ii) An expression which does not amount to blasphemy but which may constitute religious prejudice is a classifiable element and must be considered in the allocation of an appropriate age restriction.
 - (iii) Any advocacy of hatred based on religion that constitutes incitement to cause harm, outside of bona fide drama, art, science or documentary material will be regarded as refused material and, where the said exemptions justify it, be subject to an appropriate age restriction.

- (l) **“Photo or pattern sensitivity, motion sickness and reactions to low frequency sound”**
 - (i) It is recognised that the exact nature of the stimulus or stimuli that triggers seizures of flicker vertigo for photo or pattern sensitivity varies from one person to another, as does the nature of the effect; therefore it is not treated as a classifiable element determining age restrictions but as a matter for appropriate consumer information provided on a voluntary basis.
 - (ii) As a general guide, the patterns are usually very high in luminance contrast (bright flashes of light alternating with darkness, or white bars against a black background). They flash more than 3 times in any 1 second.
 - (iii) Motion sickness occurs when motion is detected by the visual system and hence the motion is seen, but no motion or little motion is sensed by the vestibular system (i.e. bouncing-camera movies). Similar to motion sickness is simulation sickness, or simulator sickness but this is caused by playing computer/simulation/video games (i.e. first-person-perspective games and virtual reality setups). It is recognized that it may be identified subjectively and is not treated as a classifiable element determining age restrictions, but as a matter for appropriate consumer information provided on a voluntary basis.
 - (iv) Low frequency noise (LFN) is generally taken to mean noise below a frequency of about 100 to 150 hertz. It is recognized that a low-frequency signal can go from being barely audible to annoying, with a relatively small change in pressure level, and that it may be identified subjectively and is not treated as a classifiable element determining age restrictions, but as a matter for appropriate consumer information provided on a voluntary basis;
 - (v) Photo or pattern sensitivity, motion sickness and reactions to low frequency sound may be indicated voluntarily and are not mandatory advice.
- (3) Consumer advice may be combined with age restriction categorization of material in order to inform the public regarding the content of material.

5. DISTRIBUTION CATEGORIES

- (1) Films are classified as unrestricted distribution, restricted distribution and refused categories.
- (2) Unrestricted distribution material may be distributed or exhibited by registered distributors and exhibitors in accordance with any age-restriction or condition which may be imposed by the FPB.
- (3) Restricted distribution material is indicated by the letter "X18" in the classification system and may only be distributed from or exhibited in licensed premises to persons older than eighteen and not be distributed or exhibited otherwise at all.
- (4) Refused categories contain material that is prohibited by the Films and Publications Act and is classified as XX.

- (iii) Competitive intensity is heightened by the degree of interactivity of a game.

(b) "Criminal Techniques"

- (i) Criminal techniques and instructional details of illegal or dangerous acts that may be life threatening and detailed enough to be re-enacted or self-instructional, must be treated as a classifiable
