

NOTICE 486 OF 2014**DEPARTMENT OF PUBLIC WORKS****AGRÉMENT SOUTH AFRICA**

(Approval of innovative construction products and systems)

Notice is hereby given that Agrément South Africa has, with effect from 06 November 2013, issued an Agrément certificate, details of which appear in the schedule hereto.

SCHEDULE**Agrément Certificate 2013/448**

Name of product: Friction Pave Ultra-Thin Bituminous Surfacing System

Certificate holder: Friction Pave Partnership JV

Description: Frictionpave is a thin bituminous surfacing system with a nominal compacted thickness of between 16 and 25 mm. The system consists of 9.5 or 13 mm nominal maximum aggregate size (72-80% passing), open graded, Ultra Thin Friction Course (UTFC) which is placed on tack coat by using a self-priming paver.

The tack coat provides a seal to the existing surface and ensures a high tensile bonding between the FrictionPave mix and the existing surface. The FrictionPave has been designed as a thin surfacing or re-sealing layer to provide the functional friction course and to preserve the underlying road base structure.

The mix design, manufacturing and placing of the product is strictly controlled and under the supervision of a competent person and approved by the manufacturer's design Engineer. The mix proportions may vary slightly from site to site, depending on the traffic, actual grading received from the stone supplier and the substrate (road base) conditions and must meet specifications with respect to grading, strength, shape, polished stone value and aggregate/ bitumen compatibility etc.

FrictionPave was developed in South Africa, by FrictionPave, a joint Venture Partner between three road construction contractors, namely Rand Roads (division of G-LTA), Power Construction and Zebra Surfacing, and ARCUS GIBB civil engineering consultancy.

The Agrément certificate contains detailed information on the product and can be accessed at <http://www.agrement.co.za>
