- (b) to minimise the demand for immovable assets, alternative service delivery methods that do not require immovable assets must be identified and considered; 15
- (c) in relation to an acquisition, it must be considered whether—
 - (i) a non-immovable asset solution is viable;
 - (ii) an immovable asset currently used by the state is adequate to meet a change in its service delivery objectives; and 20
 - (iii) the cost of the immovable asset as well as operational and maintenance cost throughout its life cycle justifies its acquisition in relation to the cost of the service;
- (d) immovable assets that are currently used must be kept operational to function in a manner that supports efficient service delivery; 25
- (e) when an immovable asset is acquired or disposed of best value for money must be realised;
- (f) in relation to a disposal, the custodian must consider whether the immovable asset concerned can be used— 30
 - (i) by another user or jointly by different users;

MEMORANDUM ON THE OBJECTS OF THE GOVERNMENT IMMOVABLE ASSET MANAGEMENT BILL, 2006

1. BACKGROUND

- 1.1 The Government Immovable Asset Management Bill, 2006 (the Bill), seeks to introduce measures to ensure a uniform framework for the management of immovable assets that are held and used by a national or a provincial department and its coordination with the service delivery objectives of a national or a provincial department.
- 1.2 Historically, immovable asset management practices in government resulted in immovable assets slipping into disrepair due to improper funding and maintenance. In general, the culture of replacement rather than maintenance eventually cost government significantly more than what ongoing preventative maintenance would have cost. These practices in government were the result of a non-uniform governance framework and the lack of monitoring and evaluation systems.
- 1.3 The Government Immovable Asset Management Bill, 2006, outlines a framework of basic principles in accordance with which national and provincial government departments must manage the immovable assets that they use in delivering the services that they are mandated to deliver.
- 1.4 In drafting the Bill, the Department of Public Works took past experiences into account namely—
- * The lessons learnt from managing immovable assets owned by government through history;
 - The lessons learnt from implementing the Construction Industry Development Board Act, 2000 (Act No. 38 of 2000), incrementally for government departments.

2. OBJECTS

The Bill seeks to—

- (i) limit its scope of application to national and provincial government;
- (ii) determine the following objects:
 - (a) Providing a uniform immovable asset management framework to promote accountability and transparency within government;
 - (b) ensuring effective immovable asset management within government;
 - (c) ensuring alignment of **use of** immovable assets with service delivery objectives of a national or provincial department and the efficient utilisation of immovable assets;
 - (d) optimising the cost of service delivery through prudent allocation of limited state resources in relation to—
 - * the accountability for capital and recurrent works;
 - the acquisition, re-use and disposal of an immovable asset;
 - the maintenance of existing immovable assets;
 - protecting the environment and the cultural and historic heritage; and
 - improving health and safety in the working environment;
- (iii) clarify the role of custodians and users in relation to immovable assets owned or leased by the state;
- (iv) outline the principles of immovable asset management to be maintained by government;
- (v) impose a duty on the accounting officer of every user and custodian to submit immovable asset management plans in coordination with the Public Finance Management Act, 1999 (Act No. 1 of 1999), and the Public Service Act, 1994 (Act No. 104 of 1994);
- (vi) determine the minimum content of immovable asset management plans;

- (vii) determine the legal status of an immovable asset management plan;
- (viii) provide for the administration of the Act, such as exemptions, delegation and assignment, offences and penalties, as well as for the Minister to issue standards and guidelines for immovable asset management, with the concurrence of the Ministers of Finance and Public Service (the legal status of these standards and guidelines are also determined); and
- (ix) enable the Minister to make regulations, and to regulate the matter in the transitional period by suspending requirements if and where necessary.

3. BODIES CONSULTED

The Department consulted with all the national and the provincial departments on the policy and incorporated the comments in the policy and draft legislation. In particular, the Department consulted with National Treasury to ensure consistency with the PFMA and its regulations, National Treasury's Asset Management Guideline and the Infrastructure Delivery Improvement Programme.

4. FINANCIAL IMPLICATIONS FOR STATE

Whilst in the short term this Act will have financial implications for the various departments, whether custodian or user, in the long term it will have the effect of a saving for the State as it is intended to lead to improved management and maintenance of government immovable assets, which will render a better return on the State's investment in immovable assets.

5. PARLIAMENTARY PROCEDURE

- 5.1 The State Law Advisers and the Department of Public Works are of the opinion that this Bill must be dealt with in accordance with the procedure established by section 75 of the Constitution since it contains no provision to which the procedure set out in section 74 or 76 of the Constitution applies.
- 5.2 The State Law Advisers are of the opinion that it is not necessary to refer this Bill to the National House of Traditional Leaders in terms of section 18(1)(a) of the Traditional Leadership and Governance Framework Act, 2003 (Act No. 41 of 2003), since it does not contain provisions pertaining to customary law or customs of traditional communities.
