Short title and commencement

36. This Act is called the Petroleum Pipelines Act, 2003, and comes into operation on a date determined by the President by proclamation in the *Gazette*.

MEMORANDUM ON THE OBJECTS OF THE PETROLEUM PIPELINES BILL, 2003

1. BACKGROUND

A network of pipelines is used to transport crude oil and petroleum products between the port of Durban, the Durban refineries, the crude and synthetic fuels refineries in Gauteng and Mpumalanga and between depots.

The petroleum industry is highly dependent on this network. The pipeline network is thus of strategic importance to the economy as the economy depends on the stable supply of liquid fuels and hence the ongoing effective operation of the petroleum pipeline and storage infrastructure.

To date, the state has managed the operation of much of the pipeline network. It has now become a possibility that parties other than national Government may become active in the ownership and operation of petroleum pipelines. It is therefore incumbent on Government to introduce regulatory measures to ensure the efficient operation of the pipelines network and the orderly development of the network in future.

To respond to the need for regulatory intervention, a Petroleum Pipelines Bill has been drafted. The main features of the Bill are as follows:

- (a) The establishment of a petroleum pipeline regulatory authority and its—
 - (i) powers and duties;
 - (ii) constitution;
 - (iii) staffing;
 - (iv) funding, accounting and reporting.
- (b) The requirements for licensing or registration in respect of the construction and operation of, and the provision of prescribed commercial services in relation to, a crude oil pipeline, petroleum product pipeline or an off-leading facility.
- (c) The process of licensing or registration and the conditions of licence.

2. OBJECTS OF BILL

The objects of the Bill are to—

- (a) promote competition in the construction and operation of petroleum pipelines, loading facilities and storage facilities;
- (b) promote the efficient, effective, sustainable and orderly development, operation and use of petroleum pipelines, loading facilities and storage facilities;
- (c) ensure the safe, efficient, economic and environmentally responsible transport, loading and storage of petroleum;
- (d) promote fair and equitable access to petroleum pipelines, loading facilities and storage facilities.
- (e) facilitate investment in the petroleum pipeline industry;
- (f) provide for the security of petroleum pipelines and related infrastructure;
- (g) promote companies in the petroleum pipeline industry that are owned or controlled by historically disadvantaged South Africans by means of licence conditions to enable them to become competitive;
- (h) promote the development of competitive markets for petroleum products; and
- (i) promote access to affordable petroleum products.

3. FINANCIAL IMPLICATIONS FOR STATE

The administration of the Bill will require the establishment of a Regulator. Cabinet has directed that a rationalised Energy Regulator be established for the regulation of various aspects of the energy sector. Discussions are currently underway to establish such an "Energy Regulator", which will essentially entail a broadening of the remit and capacity of the existing National Electricity Regulator. This process will be finalised in close consultation with the Ministries for Public Service and Administration and of Finance, as directed by Cabinet on 4 April 2001.

The Department will be assisting National Treasury in the drafting of a money Bill to empower the Regulator to collect levies for the purpose of meeting the general administrative and other costs of the Regulator and the functions performed by the

Regulator. There will be no financial implications for the State, except that the levy will release the State from the financial burden of funding the Regulator.

4. CONSULTATION PROCESS

In the drafting of the Bill, key stakeholders, inter alia the petroleum industry associations, Petronet and other government departments were consulted at several workshops. The draft Bill was also published for comment before the version approved by Cabinet was submitted for introduction in Parliament. Comments were received from Groundwork (Environmental NGO); Cosatu (Labour); Petronet (Transnet subsidiary); the South African Institution of Civil Engineering, as well as private individuals and individual oil companies.

5. PARLIAMENTARY PROCEDURE

The State Law Advisers and the Department of Minerals and Energy are of the opinion that this Bill should be dealt with in accordance with the procedure established by section 75 of the Constitution since it contains no provisions to which the procedures set out in section 74 or 76 of the Constitution apply.
