CHAPTER 4

MANAGEMENT OF PROTECTED AREAS 5

Application of Chapter

37. Except where expressly stated otherwise in this Chapter, this Chapter only applies to a protected area which is a special nature reserve or nature reserve, and the expressions “protected area”, “national protected area”, “provincial protected area” and “local protected area” must be construed accordingly in this Chapter. 10

MEMORANDUM ON THE OBJECTS OF THE NATIONAL ENVIRONMENTAL MANAGEMENT: PROTECTED AREAS BILL, 2003

Legal-technical background of Bill

1. This Bill (the “current Bill”) contains part of the envisaged National Environmental Management: Protected Areas Act. The Bill which was initially submitted to Parliament (“the consolidated Bill”) dealt with the full spectrum of protected areas in both national and provincial spheres and was to be dealt with in terms of section 76 of the Constitution (functional area of concurrent national and provincial legislative competence). It was later found to be a “mixed” Bill, including elements to be handled in terms of both section 75 (functional area of national legislative competence) and section 76 of the Constitution. Due to its mixed character, the Speaker of the National Assembly requested the Executive to split the consolidated Bill, which has now been done. The provisions of the consolidated Bill which will apply to the national government have been removed and, consequently, the current Bill only contains matters which have to be dealt with in terms of section 76 of the Constitution. The numbering of the consolidated Bill has, however, been retained, hence the gaps in the current Bill, indicated by “*****”. As soon as the current Bill is enacted, an amendment Bill containing the matters which apply to the national government only (“the amendment Bill”) will be introduced. The amendment Bill will have to be dealt with in terms of section 75 of the Constitution. The amendment Bill will complete the current Bill by inserting the provisions which deal with national parks and marine protected areas as part of the general scheme of protected areas of the Republic.

General background and overview

2. The National Parks Act, 1976 (Act No. 57 of 1976), is outdated and some sections are in conflict with the Constitution. The National Environmental Management: Protected Areas Bill (“the consolidated Bill”) seeks to bring the system of protected areas in line with the new constitutional and legal order, as well as the policies and programmes of Government. The *White Paper on the Conservation and Sustainable Use of South Africa’s Biological Diversity* (1997) provides the primary policy for conservation in South Africa. The consolidated Bill provides one of the tools for the implementation of this policy by consolidating and rationalising existing legislation dealing with protected areas. It aims to deal with the system of protected areas more broadly than the National Parks Act, 1976, and the Environmental Conservation Act, 1989 (Act No. 73 of 1989), and seeks to ensure that the system of conservation and protected areas management is linked with the current policies and programmes of Government, and brings tangible benefits to all South Africans, in particular local communities. The consolidated Bill provides for the establishment of a representative system of protected areas as part of the national strategy to protect South Africa’s biodiversity and to ensure that the sustained biodiversity benefits future generations. It further provides for the participation by communities in conservation and its associated benefits, and for co-operative governance in the management of protected areas.

The consolidated Bill forms part of a suite of legislation established to manage the environment. The framework is provided for in the National Environmental Management Act (NEMA), in which environmental management principles are set out. Sections common to the other legislation in the suite will be included in NEMA by the proposed amendments to that Act.

Analysis of current Bill

3. Chapter 1 defines certain words and expressions used in the current Bill and sets out its objectives. It establishes the State as guardian of protected areas in South Africa. It further sets the framework for the application of the envisaged Act in relation to the National Environmental Management Act, the envisaged National Environmental Management: Biodiversity Act and other legislation. Chapter 2 establishes the system of protected areas in South Africa. The following types of protected area are declared in terms of this Chapter, *viz.* special nature reserves, nature reserves and protected environments. (The envisaged amendment Bill referred to in paragraph 1 will add national parks to the list.) The following protected areas are recognised and their relationship to the current Bill established: Protected areas declared in terms of the

World Heritage Convention Act (world heritage sites), the National Forest Act (specially protected forest areas, forest nature reserves and forest wilderness areas) and the Mountain Catchment Areas Act (mountain catchment areas). In terms of the amendment Bill marine protected areas, declared as such in terms of the Marine Living Resources Act, will also be recognised. All protected areas are to be included in a register of protected areas. The declaration of different types of protected areas and the purposes for establishing them are provided for in Chapter 3. Procedures for consultation are set out, and the need for concurrence of the relevant Cabinet members is established. Three types of protected areas can be declared in terms of the current Bill:

A special nature reserve is declared to—

- (a) protect highly sensitive, outstanding ecosystems, species or geological or physiological features; and
- (b) be made primarily available for scientific research or environmental monitoring.

A nature reserve is declared to—

- (a) supplement the system of national parks in South Africa;
- (b) protect areas with significant natural features, species, habitats or biotic communities;
- (c) protect a particular site of scientific, cultural, historical or archaeological interest;
- (d) provide for its long-term protection and the maintenance of its biodiversity;
- (e) provide for a sustainable flow of natural products and services to meet community needs;
- (f) enable a variety of traditional consumption uses;
- (g) provide for nature-based recreation and tourism opportunities.

A protected environment is declared to—

- (a) provide a buffer zone from undesirable development adjacent to national parks or nature reserves;
- (b) protect ecosystems needing protection outside of national parks and nature reserves;
- (c) protect areas which are sensitive to development due to either—
 - (i) their natural characteristics; or
 - (ii) aesthetic reasons; or
- (d) limit land use in an area to be included into a national park or nature reserve.

The amendment Bill will add national parks as a further type of protected area. **A national park** is declared to—

- (a) protect areas of national or international biodiversity significance;
- (b) protect a viable, representative sample of South Africa's natural systems and scenic areas;
- (c) protect the ecological integrity of one or more ecosystems;
- (d) exclude exploitation or occupation inconsistent with such protection;
- (e) provide a foundation for spiritual, scientific, educational, recreational and tourism opportunities which are environmentally compatible.

Chapter 4 provides for the management of protected areas. The assignment of the management of protected areas to management authorities, subject to the approval of management plans based on management criteria, is set out. Co-management of protected areas by agreement is provided for. Monitoring of management authorities, based on performance indicators and the termination of mandates, where warranted, by the Minister or MEC is provided for. Restrictions of access to protected areas and restrictions on activities which may adversely affect protected areas are provided for.

The amendment Bill referred to in paragraph 1 will insert Chapter 5 in the envisaged Act in terms of which the continued existence of South African National Parks is ensured. That Chapter will provide criteria for the selection and appointment of the governing board and will define the functions and operating procedures of the board and South African National Parks. Provisions regarding general administration and financial matters will be provided for. That Chapter will also establish the Minister's supervisory powers over South African National Parks.

The acquisition of land as protected areas by the State is provided for in the current Bill in Chapter 6. Provision is also made for the cancellation of servitudes on, or

privately held rights to, state land. Mineral rights may be acquired or cancelled by expropriation by the Minister in protected areas. Financial provisions are made for the acquisition of land or rights.

Administrative arrangements for the implementation of the Act, through regulations by the Minister and MEC, respectively, are set out in Chapter 7.

Offences and penalties are set out in Chapter 8.

The Schedule contains certain provisions which are being repealed and which are covered by the current Bill. The amendment Bill will amend the Schedule by inserting a list of Acts relating to national parks which need to be repealed. That Bill will also contain appropriate transitional provisions regarding national parks.

Effect on the provinces and local government

4. The envisaged Act will rationalise protected area legislation in South Africa. As such, it negates the need for each province to promulgate its own legislation on the declaration and management of protected areas. It should therefore streamline provincial governance.

The current Bill will have no direct implications on local government. However, the inclusion of protected areas into the integrated development plans of local governments will be necessary. The protected areas management plans will also need to take the integrated development plans into account without losing the integrity of the protected areas.

Other departments and bodies consulted

5. All national departments and provincial governments were consulted. The draft of the consolidated Bill was published in the *Gazette* in terms of section 154 of the Constitution. During the period when the draft Bill was open for comment—

- the Department of Environmental Affairs and Tourism hosted workshops on the draft Bill with all nine provinces, the South African National Parks and the Greater St Lucia Wetland Park Authority;
- Contact Trust organised a workshop on the draft Bill with civil society on the Department's behalf;
- the Department made a presentation on the draft Bill to the South African Local Government Association (SALGA);
- bilateral meetings on the draft Bill were held with the Department of Water Affairs and Forestry, the National Treasury, ESKOM and the Civil Aviation Authority; and
- some 66 written comments on the draft Bill, from a wide range of interested and affected parties, including NGOs, statutory bodies, state and provincial departments and representatives of communities, Bill were received and analysed by the Department.

FINANCIAL IMPLICATIONS FOR STATE

6. It is estimated that the implementation of the envisaged Act will cost the state in the region of R24 528 730 annually, of which R18 199 102 will be the cost to the provincial authorities.
