MEMORANDUM ON THE OBJECTS OF THE MINE HEALTH AND SAFETY AMENDMENT BILL, 2008

1. BACKGROUND

1.1 The setting, monitoring and enforcement of health and safety standards within the South African mining industry is regulated under the Mine Health and Safety Act, 1996 (Act No. 29 of 1996), which came into force in 1996 (MHSA). The MHSA promotes the objective of protecting the health and safety of persons at mines.

1.2 The MHSA is premised on the principle that the responsibility for health and safety lies with the employers (owners of mines), hence the outcome-based approach, which focuses on outputs (results) rather than the rule-driven, prescriptive approach of the previous regulatory system under the now repealed Minerals Act, 1991 (Act No. 50 of 1991).

1.3 The enforcement and the ordering of compliance with the MHSA form the core business of the Mine Health and Safety Inspectorate (MHSI). In enforcing the MHSA the Chief Inspector of Mines and various other inspectors have wide statutory powers. Inspectors are empowered to enter any mine at any time, conduct inspections of places of work, question persons and examine documents. If dissatisfied with conditions at mines, inspectors may order compliance, issue instructions requiring the improvement of conditions within a specified time, conduct further investigations and where necessary recommend prosecution where an offence has been committed.

2. OBJECTS OF BILL

2.1 The Bill seeks to amend the MHSA so as to review the enforcement provisions, simplify the system, tighten offences and strengthen penalties. It also seeks to substitute and remove ambiguities in certain definitions and expressions and effect certain amendments necessary to ensure consistency with other laws, particularly the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002).

2.2 The Bill further seeks to harmonise the administrative processes in the MHSA with the sound administrative practices and the objects of the Promotion of Administrative Justice Act, 2000 (Act No. 3 of 2000).

2.3 The Bill further amends section 47 of the MHSA to allow for the continued existence of the Mine Health and Safety Inspectorate as a juristic person with powers to generate and administer its own funds in terms of the Public Finance Management Act, 1999 (Act No. 1. of 1999).

3. CONSULTATION

The amendments have been canvassed with all the stakeholders within the Department and were fully supported. The stakeholders within the mining and minerals sector were consulted with regard to the proposed amendment to the MHSA.

4. FINANCIAL IMPLICATIONS FOR STATE

The Bill proposes the relocation of the Mine Health and Safety Inspectorate which was incorporated within the Mine Health and Safety Council. Relocation and operational costs will be required on commencement of the Act.

5. COMMUNICATION IMPLICATIONS

The proposals contained in the Bill were canvassed with affected stakeholders within the industry, and it is envisaged that further communication will be dealt with in accordance with the departmental chains of command and parliamentary procedures.

6. PARLIAMENTARY PROCEDURE

6.1 The State Law Advisers and the Department of Minerals and Energy are of the opinion that this Bill must be dealt with in accordance with the procedure established by section 75 of the Constitution since it contains no provision to which the procedure set out in section 74 or 76 of the Constitution applies.

6.2 The State Law Advisers are also of the opinion that it is not necessary to refer this Bill to the National House of Traditional Leaders in terms of section 18(1)(a) of the Traditional Leadership and Governance Framework Act, 2003 (Act No. 41 of 2003), since it does not contain provisions pertaining to customary law or customs of traditional communities.
