I.1 STRATEGIC OVERVIEW

Vision

Transport, the Heartbeat of Economic Growth and Social Development!

Mission

To lead the development of efficient integrated transport systems by creating a framework of sustainable policies and regulators and implementable models to support government strategies for economic, social and international development.

Values

The core values of the Department are:

- ❖ Maintain fairness and equity in all our operations;
- ❖ Strive for quality and affordable transport for all;
- ❖ Stimulate innovation in the transport sector;
- ❖ Ensure transparency, accountability and monitoring of all operations; and
- ❖ Ensure sustainability, financial affordability, accessibility as well as the upholding of the *Batho Pele* Principles.

Mandate

To maximise the contribution of transport to the economic and social development goals of our country by providing fully integrated transport operations and infrastructure.

The main roles of the Department of Transport (DoT) and its public entities in relation to the transport sector are:

- ❖ Policy and strategy formulation in all functional areas;
- ❖ Substantive regulation in functional areas where DoT has legislative competence;
- ❖ Implementation in functional areas where DoT has legislative competence;
- ❖ Leadership, coordination and liaison in all functional areas;
- ❖ Capacity building in all functional areas;
- ❖ Monitoring and evaluation and oversight in all functional areas; and
- ❖ Stimulate investment and development across all modes.

I.2 LEGISLATIVE MANDATE

The Department of Transport is responsible for maximising the contribution of transport to the economic and social development goals of the society by providing fully integrated transport operations and infrastructure.

a) **National Land Transport Act, 2009 (Act No 5 of 2009)**

The Act provides for the further transformation and restructuring of public transport planning and regulation. It takes forward policy initiated by the National Land Transport Transition Act, 2000 (Act No. 22 of 2000), and it seeks to further empower the role of the municipal sphere in the provision of public transport.

b) **Civil Aviation Act, 2009 (Act No. 13 of 2009)**

The Act gives effect to the Republic's obligation to comply with the Regulations of the International Civil Aviation Organisation (ICAO). The Act provides for the establishment of a South African Civil Aviation Authority with safety and security oversight functions, and the establishment of an independent Aviation Safety Investigation Board in compliance with Annex 13 of the Chicago Convention.

GENERAL INFORMATION

for the year ended 31 March 2013

LEGISLATIVE CHANGES ENVISAGED IN 2012/13

a) Merchant Shipping (Civil Liability Convention Bill)

The purpose of this Bill is to enact the International Maritime Organization Protocol of 1992; to amend the International Convention on Civil Liability for Oil Pollution Damage of 29 November 1969 into law and to provide for matters connected therewith. The Bill creates the legal liability of the ship owner in the event of oil pollution in the sea.

b) Merchant Shipping (International Oil Pollution Compensation fund) (Contributions) Bill

The purpose of the Bill is to impose contributions on persons contemplated in Article 10 of the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, 1992; and to provide for matters connected therewith.

The contributions by the ship owner will be used to pay for damages caused by the oil spillage and also when the ship owner cannot satisfactorily compensate for the damages caused. The contribution will be used to pay the cleaning of the oil spill.

c) Merchant Shipping (International Oil Pollution Compensation Fund) Bill

The purpose of this Bill is to enact the International Maritime Organization Protocol of 1992; to amend the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage of 18 December 1971 into law. The Bill was published for public comments and was subsequently referred to the office of the State Law Advisers for scrutiny.

d) South African Maritime and Aeronautical Search and Rescue Amendment Bill

To incorporate the International Maritime Search and Rescue Act, 2002 (Act No. 44 of 2002); to give effect to the structural changes introduced to the South African Aeronautical Search and Rescue Organization. The purpose of this Bill is to harmonize the working relationship of committees as required by the organization, to align certain sections of the principal Act, to make way for the Act to comply with the current developments.

e) Maritime Transport Security Bill

The Bill proposes to repeal and replace the existing Merchant Shipping (Maritime Security) Regulations, 2004, made under the Merchant Shipping Act, 1951. The Bill's main purpose is to safeguard against unlawful interference with maritime transport. It seeks to achieve this purpose by continuing the risk-based and outcome-focused approach, first adopted in the 2004 regulations, of a regulatory scheme centred on the development of security plans for ships, ports, offshore facilities and other maritime transport operations.

f) Merchant Shipping Amendment Bill

The Bill's main object is to revise the limitation of liability provision; to modernize the law relating to ship owner's limitation by introducing a provision that is consistent with the provision of the 1976 Convention on Limitation of Liability for maritime claims and its 1996 Protocol; to introduce compulsory accident insurance for seafarer who suffered death or personal injury as a result of workplace accidents; and to give effect to the International Maritime Labour Convention. Once the convention is ratified by the Department of Labour, the Bill will then be introduced as it gives effect to the aforementioned Convention.

g) Transport Law Enforcement and Related Matters Amendment Bill

Amendment Bill

The Bill seeks to improve and facilitate law enforcement measures for collections of tolls and to include offences relating to the non-payment of tolls in the AARTO system.

GENERAL INFORMATION

for the year ended 31 March 2013

h) National Road Traffic Amendment Bill

This Bill addresses issues relating to the fitness of drivers, to address registrations and grading of licence testing centres, and to deal with matters connected therewith.

i) Merchant Shipping (Safe Containers) Convention Bill

The purpose of the Bill is to give effect to the International Convention for Safe Containers and for related matters. The Bill will maintain a high level of safety of human life in the transport and handling of containers by providing generally acceptable test procedures and related strength requirements. The Bill will facilitate transport of containers by providing uniform internal safety regulations, equally applicable to all modes of surface transport.

j) South African Maritime Authority Amendment Bill

This Bill amends the South African Maritime Safety Authority Act, 1998 (Act No. 5 of 1998). The Bill's purpose, generally, is to improve the functioning of the Authority and to harmonize the provisions of the principal Act with those of the current legislative developments

- South African Maritime Safety Act, 1998 (Act 5 of 1998)
- South African Maritime Safety Authority Levies Act, 1998 (Act 6 of 1998)
- Ship Registration Act, 1998 (Act 58 of 1998)
- Sea Transport Documents Act, 2000 (Act 65 of 2000)

POLICY MANDATES

a) National White Paper on Transport Policy, 1996

The vision of the White Paper on National Transport policy is to provide safe, reliable, effective, efficient, and fully integrated transport operations and infrastructure which will best meet the needs of freight and passenger customers at improving levels of service and cost in a fashion which supports government strategies for economic and social development whilst being economically and environmentally sustainable.

b) White Paper on National Policy on Airports and Airspace Management, 1997

This is a national policy response on airports and airspace management as a result of far-reaching changes which have occurred in recent years in South Africa in general and in civil aviation in particular.

c) National Commercial Ports Policy, 2002

This aim of this policy is to ensure an internationally competitive port system informed by the knowledge that efficient ports are known to be catalysts for increased trade, and thus provide a comparative advantage for international trade. Thus this policy aims to ensure affordable, internationally competitive, efficient and safe port services based on the application of commercial rules in a transparent and competitive environment applied consistently across the transport system. The importance of this policy is further highlighted by the fact that globalization pressures make

GENERAL INFORMATION

for the year ended 31 March 2013

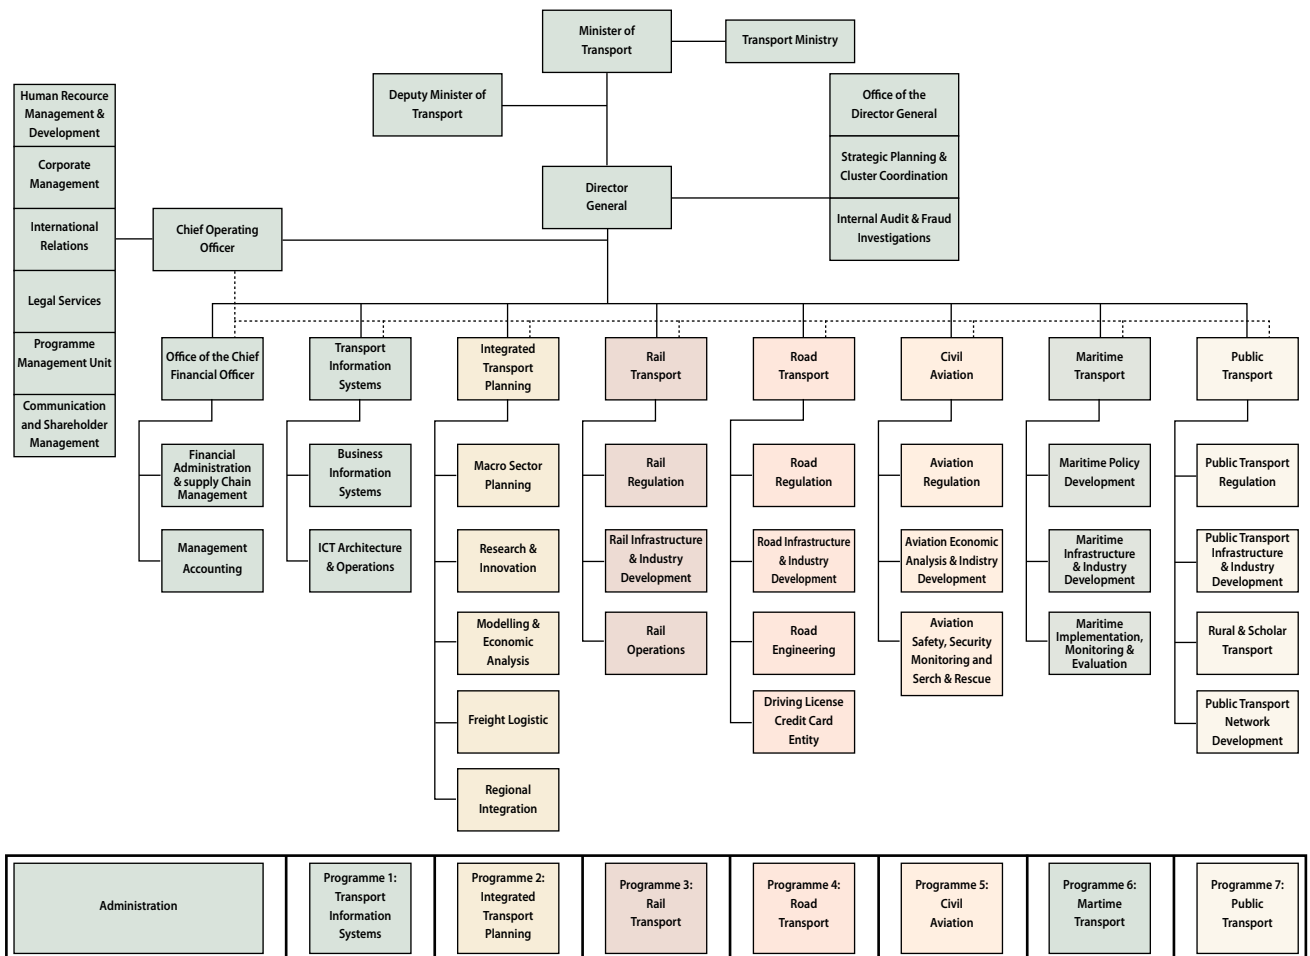

it essential that nations integrate their transport systems into the global logistics network. Ports are naturally being incorporated into this changing system and have to adjust to the new challenges and environment.

d) Taxi Recapitalization Policy, 2009

The Taxi Recapitalization Policy (TRP) is an intervention by Government to bring about safe, effective, reliable, affordable and accessible taxi operations by introducing New Taxi Vehicles (NTVs) designed to undertake public transport functions in the taxi industry.

I.3 ORGANISATIONAL STRUCTURE

Re-aligned Organisational Structure for the Department of Transport
May 2011

GENERAL INFORMATION

for the year ended 31 March 2013

I.4 ENTITIES REPORTING TO THE MINISTER

Name of entity	Legislative mandate	Financial relationship	Nature of operations
South African Civil Aviation Authority	South African Civil Aviation Act, 2009 (Act No. 13 of 2009)	Transfer payments	To provide control and regulate aviation within the Republic
Cross-Border Road Transport Agency	Cross-Border Road Transport (Act No. 4 of 1998)		To provide for cooperative and coordinated provision of advice, regulation, facilitation and law enforcement in respect of cross-border road transport by the public and private sectors
South African Maritime Safety Authority	South African Maritime Safety Act	Transfer payments	To provide for the establishment of SAMSA and to provide for matters connected therewith
Railway Safety Regulator	Railway Safety Regulator Act	Transfer payments	To provide for safety standards and regulatory practices for the protection of persons, property and the environment
Air Traffic and Navigation Services	Air Traffic and Navigation Services Act, 1993 (Act No. 25 of 1993)		To provide for the establishment of ATNS and to provide for the regulation of air traffic control
Road Accident Fund	Road Accident Fund Act, 1996 (Act No. 56 of 1996)		To provide for the payment of compensation for the loss or damages wrongfully caused by the driving of a motor vehicle
Airports Companies of South Africa	Airports Companies of South Africa Act, 1993 (Act No. 44 of 1993)		To operate the Republic's ten principal airports, providing airlines with world-class, secure infrastructure
Road Traffic Infringement Agency	Administrative Adjudication of Road Traffic	Transfer payments	To promote road traffic quality by providing for a scheme to discourage road traffic contraventions and adjudication of road traffic infringements and support the prosecution of road traffic offences
Road Traffic Management Corporation	Road Traffic Management Corporation Act, 1999	Transfer payments	To enhance the overall quality of road traffic services provision, and in particular ensure safety, security, order, discipline and mobility on the roads.
National Ports Regulator	National Ports Act, 2005 (Act No. 12 of 2005)	Transfer payments	To provide for the administration of certain ports by the National Ports Authority.
South African National Roads Agency	The South African Roads Agency Limited and National Roads Acts, 1998 (Act No. 7 of 1998)	Transfer payments	To manage and control the Republic's national roads system and take charge amongst others of the development, maintenance and rehabilitation of national roads within the framework of government policy
PRASA	Legal Succession to the South African Transport Services Act, 1989 (Act No. 9 of 1989) (as amended)		To ensure that, at the request of the Department of Transport, rail commuter services are provided within, to and from the Republic in the public interest and to provide, in consultation with the Department of Transport, for long-haul passenger rail and bus services within, to and from the Republic in terms of the principles set out in section 4 of the National Land Transport Transition Act, 2000 (Act No. 22 of 2000)

GENERAL INFORMATION

for the year ended 31 March 2013

I.5 FOREWORD BY THE MINISTER OF TRANSPORT

***Ms Dipuo Peters, MP
Minister of Transport***

Once more we have pleasure in presenting the Annual Report of the financial year 2012/2013 where we highlight the Department's achievements, plans, and challenges, and how we plan to deal with those challenges.

Top of this list is rail transport. We need to admit that our rail infrastructure has been ignored for far too long, and we have been paying the price for this neglect. The train crashes that took place and claimed people's lives and the suffering endured by train commuters risking their lives on a daily basis is a clear testimony to this.

The Department of Transport has developed a comprehensive draft Green Paper on National Rail Policy. The main thrust of the proposed policy focuses on investment in infrastructure and embraces new modern technology in rail. It addresses the regulatory framework required, particularly in areas of economic regulation, infrastructure and operations. Policy proposals made in the draft Green Paper include the investment required to restore rail to its desired state in the country's economy.

Another critical issue that continues to haunt us as a country and which can also limit our economy is the lack of both public transport and transport infrastructure in the rural areas of our country. This basically means that people in the rural areas are cut off from the major economic centres, and if they do manage to get there it is a 'mission' for them.

We cannot allow a situation like this to carry on without trying to alleviate it. The National Household Travel Survey has highlighted that a very large percentage of the population cannot afford transport costs.

The National Land Transport Act provides for different levels of government to be responsible for planning purposes, and in line with this phenomenon, the Department is currently looking at options to assist six district municipalities to develop their Rural Public Transport Network Plans through various funding models. This process will be rolled over to other district municipalities in the next financial years.

In this regard the Department is currently assessing the impact of the Rural Transport Strategy that was adopted in 2007. This process will be dovetailed into the formulation of the National Planning Guidelines for rural district municipalities' Public Transport Network Plans. This implementation intervention would address the multi-year planning and would streamline the various budgetary provisions. At the centre of this intervention is finding sustainable ways of strengthening and expanding the provision of public transport services in district municipalities.

Scholar transport is also being looked at as it is an important element that needs to be overhauled. In the short to medium term, the focus will be placed on obtaining approval of the National Scholar Transport Policy from Cabinet and constant monitoring of the implementation of the Scholar Transport Programme by the Department. Furthermore, the Department will be developing national operational guidelines to remedy operational challenges that provinces are facing with the implementation of the Scholar Transport Programme. These measures are aimed at ensuring that the Scholar Transport Programme is provided effectively and efficiently.

The Department will continue to mobilise South Africans to be active participants in our efforts to promote road safety and to reduce the death toll on our roads.

GENERAL INFORMATION

for the year ended 31 March 2013

We will spearhead the construction of pedestrian bridges, sidewalks and speed-calming measures such as speed humps and rumble strips in rural areas and townships. The Department will also introduce measures aimed at reducing fatalities caused by stray animals. We will also look at the number of law enforcement officers, and the capacity of critical agencies such as the Road Traffic Management Corporation (RTMC), the Road Accident Fund (RAF), the Cross-Border Road Traffic Agency (CBRTA) and the Road Traffic Infringement Agency (RTIA), which are responsible for enforcing the law on our roads.

As part of the 2012 campaign, we will prioritise certain roads that in the past have experienced many accidents. Twenty national and provincial roads have been identified as high priority areas. This does not mean that we should ignore local and municipality roads; this is a national campaign that should reach all communities in our country.

And lastly, South Africa is the only country in the BRICS partnership which has no maritime policy or strategy and that owns no ships. South Africa contracts other countries for transportation for all its outbound and inbound seaborne cargo which cost the country approximately R34 billion in 2012. The Ministry and Department of Transport, supported by the relevant agencies, need to address this strategic oversight by focusing on the critical delivery areas of the maritime domain during 2013/2014.

We need to finalise the Maritime Policy and fast-track through Parliament with the view to reform the sector and create an effective regulatory environment. We must finalise and adopt the Maritime Transport BBBEE Implementation Plan and appoint the Maritime Advisory Council.

We would like to thank the Department, Members of the Executive Council (MECs) responsible for transport in different provinces, the twelve agencies under the Department, local and international stakeholders, and the general public for their contribution in making it possible for us to implement our mandate.

Ms Dipuo Peters (MP)
Minister of Transport

GENERAL INFORMATION

for the year ended 31 March 2013

1.6 DEPUTY MINISTER'S STATEMENT

Deputy Minister Sindisiwe Chikunga, MP

We present the 2012/2013 Annual Report with the vision that we have a mandate to provide and report to Parliament on the milestones and interventions that we have developed in our efforts to provide reliable, safe, affordable and efficient transport services to all South Africans.

Through our work as a transport family we have experienced so much and there is still so much more to do to ensure safety and security in our oceans and skies, and on our roads and railways. We have much work to do to align our transport infrastructure and services with the relevant modes of transport to enable investment and economic growth and job creation projects. Transport infrastructure and services make the economy work.

Safety and security is a very critical instrument of our democracy, and is enshrined in the Constitution of the Republic. In the 2013/14 financial year, we have committed R60 million for maritime services to improve safety on ship repair and to reduce casualties in the Indian and Atlantic Ocean waters.

Our Maritime Safety and Security Development Programme is investing in boating and inland water safety projects. The target market is the high inland waterway casualty and incident zones as well as vulnerable communities. This project will also embark on an education and awareness campaign while increasing access to surveyor's examinations.

In 2012, SAMSA won the Africa Maritime Agency of the Year based on its contribution in Maritime Skills Development Programmes.

In 2012 the entity also won the Best Public Service Organization Award. The Department of Transport and its agencies, on behalf of South Africa, hosted the Diplomatic Conference on behalf of the International Maritime Organization (IMO) in Cape Town. This conference led to the successful adoption of an Agreement on the Implementation of the Torremolinos Protocol of 1993 relating to the 1977 Torremolinos International Convention for the Safety of Fishing Vessels. This is a resounding historic success for South Africa who led an effective and intense lobbying process to ensure the final adoption of this Agreement which took 30 years for countries to finally adopt. Providing safety and secure waters is one of the primary roles of the South African Maritime Safety Authority.

In this regard, R15 million has been allocated to reduce deaths at sea and rescue human life through the Maritime Rescue Coordination Centre (MRCC).

We are mindful of our commitments as a country towards the achievement of the targets encompassed in the United Nations Decade of Action for Road Safety, but more so our duty to provide a safe environment to all our citizens. As a department of transport we do have an operational 2006 National Road Safety Strategy which is based on the objectives of the Millennium Development Goals and other policy precepts.

However, as there have been major developments with the UN Decade of Action 2011-2020 and the NDP, we are reviewing the National Road Safety Strategy. We have come up with a plan to implement the 365 Days Road Safety Programme throughout the country.

Our road safety approach is comprehensive, coordinated, inclusive and integrated, and has effectively addressed and

GENERAL INFORMATION

for the year ended 31 March 2013

dealt with the challenge of fragmentation and duplication of functions between the Department and its agencies.

We are spearheading the construction of pedestrian bridges, sidewalks and speed-calming measures in rural areas and townships. The Department will also introduce measures aimed at reducing fatalities caused by stray animals. We are also looking at the number of law enforcement officers, and the capacity of critical road agencies.

The Road Traffic Infringement Agency (RTIA) has crafted a practical and efficient plan to embark on the national roll-out of AARTO in this current financial year. This roll-out will be preceded by the AARTO National Summit, planned to be hosted by the RTIA and the Department in 2013. For the Road Accident Fund (RAF), the enactment and implementation of the Road Accident Benefit Scheme (RABS) legislation will signal a major policy shift in post-apartheid South Africa.

The new dispensation will present an opportunity for the simplification of the claims process by removing the burden to prove guilt or contributory fault on the part of another driver.

During the 2012/2013 financial year, the Road Accident Fund saw a conscious improvement in customer-centricity, with initiatives such as the "RAF on the Road" campaign. The last "RAF on the Road" campaign seeks to cut the time spent and distances travelled by people to process claims. It also prevents claimants from being cheated by unscrupulous legal processes.

RAIL

One of our priority areas is rail safety; we are seriously concerned and affected by rail related accidents which claim lives in numbers. Rail fatalities in South Africa are yet another silent killer, except when many people are involved. Through PRASA's rolling stock programme we aim to improve public transport safety and efficiency, as a significant number of our commuters rely heavily on rail transport.

The Department is working hard with PRASA and the Rail Safety Regulator in making sure that our commuters are provided with the best safety in trains travelling in various provinces and routes.

AVIATION

To promote environmental protection, ATNS is currently in the implementation phase of the sustainability and climate strategy and environmental plan. ATNS has allocated R385 million to rigorously upgrade the communication, navigation and surveillance infrastructure.

The national government, through the Department of Transport and the South African Civil Aviation Authority (SACAA), bears responsibility for the safety and security of the entire network of airports, in terms of legislation and international conventions on safety and security. To enhance organizational efficiencies and address the challenge presented by manual record-keeping, SACAA will be moving to an integrated Electronic Business System (EBS).

In July 2013, SACAA participated and passed the International Civil Aviation Organization (ICAO) safety and security audit. This audit is a prerequisite for South Africa as a member state to be internationally recognized and given a clear status on civil aviation safety and security. We want to assure South Africa that SACAA is ready for the audit.

The ongoing collaboration and cooperation between US-TSA and the South African Civil Aviation Authority (SACAA) is critical to the enhancement of international air cargo security. This recognition agreement is the first on the continent and a major milestone in terms of cooperation with other states on aviation security matters.

South Africa, through SACAA, has been appointed as Vice-Chair for the ICAO/CAPSCA Technical Advisor Programme for the African Continent. This is in line with the requirement to ensure Africa's presence in all aviation structures, in the interest of a safer Africa.

GENERAL INFORMATION

for the year ended 31 March 2013

Further to South Africa being a member state and council member at the ICAO, our country has been newly elected as Vice Chairman of the Aviation Security Panel for the period April 2013 to March 2014. This election implies that we are able to influence the agenda on aviation security matters globally.

Women Empowerment

The transport sector is one of the most male dominated industries – whether it be road, rail, maritime or aviation – the same phenomena prevail. To this end, we formed a Women's Forum within the Department within which there is an Advisory Committee that deals on a day-to-day basis with, amongst others, women empowerment, transformation, skills and capacity development as well as equity matters.

We have revived the South African National Women in Transport (SANWIT) project, which is an all-modes-inclusive structure that drives the emancipation of women into the economic development agenda in the transport sector.

Women in Rail

One of our outstanding initiatives for women empowerment is the Women in Rail Programme which is PRASA's response to the broader government agenda on economic inclusion of women. Through this programme we aim to improve representation and facilitate technical skills development and support.

The Women in Rail (WIR) Programme is allocated R1 billion, and as its patron, we have committed to provide leadership and close monitoring where necessary. During 2012/2013, SANRAL trained 21 034 people in road-building projects at a cost of about R23 million, of which 9 470 were women. The Department of Transport and its agencies took decisive actions to invest heavily in the development and promotion of critical skills in the various sectors.

In this regard, we have established Centres of Development (CODs) which constitute 13 universities. We have also developed and introduced the Transport Curriculum in eight Further Education and Training (FET) Colleges. SACAA, ATNS and ACSA will together invest R52,4 million on a robust scarce and critical aviation skills development programme. To further address the challenge of attraction and retention of skills in the aviation industry, SACAA has entered into an agreement with the University of Pretoria to participate in the training of students in aerospace medicine, and the first 10 degrees were conferred in March 2013.

Our aviation agencies, in conjunction with the Department of Transport and relevant stakeholders, are currently developing an all-inclusive Civil Aviation Transformation Strategy; which is the first in the country, and aimed at addressing transformation issues which currently record a devastating figure of about 4% pilot licence holders being from previously disadvantaged individuals (PDIs).

In this regard, on 08 August 2013, the DoT hosted a ground-breaking Letsema in Gauteng with the intention of forging closer working relations between ourselves towards the growth and transformation of the aviation industry, and yes, we can! Key investments in our infrastructure, such as the much maligned but highly successful Gauteng Freeway Improvement Project (GFIP), will continue to drive South Africa's growth and cement our position as Africa's economic leader – a position we have to work hard for.

Ms Sindisiwe Chikunga (MP)
Deputy Minister of Transport

GENERAL INFORMATION

for the year ended 31 March 2013

1.7 OVERVIEW OF THE ACCOUNTING OFFICER

Dr. Maria du Toit
Acting Director-General
Department of Transport

Policy Interpretation

The Department of Transport is responsible for overseeing how the effective implementation of transport legislation, policies and programmes that are aimed to better the lives of our people and stimulate social and economic growth, is enhanced. It has a mandate to oversee the implementation of projects by the entities under its ambit.

As we strive to advance this mandate, we cannot ignore the global and domestic economic challenges which have a direct and indirect impact on South Africa's broad performance on economic growth. We, however, have the view that in spite of various challenges, we are bound to carry out responsibilities that should improve our lives, such as infrastructure development, rural development, and safe, reliable and sustainable transportation services. Through this we need to reflect the objectives and vision of the National Development Plan.

In the light of current economic issues, our focus is to ameliorate investment opportunities, job creation and economic growth. We remain determined that, through various rail and road projects, our 2012/2013 financial year should be able to create a significant number

of jobs. Through the PICC's Strategic Infrastructure Projects (SIP2 and SIP4) our vision to have a transformed transport system is a dream come true.

The National Travel Survey of 2005 and the Public Transport Strategy that Cabinet approved in 2006 are documents that are at the core of our planning and will guide us in delivering a sustainable and efficient public transport system that should enhance South Africans to realize the benefits of their independence. Through the Presidential Infrastructure Coordination Commission (PICC) and the Infrastructure Development Cluster (IDC), we remain committed to building infrastructure in roads; ports, rail, energy and telecommunication as part of South Africa's infrastructure spend objectives of billions of rand over the next five years. As our road network is marked to grow and the proclaimed network standing at over 535 000 km, we anticipate that SANRAL, municipalities and provinces will work together to develop a sound and sustainable road network.

Public Transport

As part of South Africa's Public Transport Strategy (PTS) we are moving towards an improved quality integrated Mass Rapid Public Transport Network which includes rail, taxi and bus services.

The intention and objectives of the White Paper on National Transport Policy, Moving South Africa and the Public Transport Strategy are the provision of public transport that is reliable, affordable, safe and integrated, and that meets customer needs.

Integrated Public Transport Networks

We have integrated public transport networks which are being rolled out in 12 cities, namely Johannesburg, Cape Town, Tshwane, Nelson Mandela Bay, Buffalo City, Mangaung, eThekweni, Polokwane, Mbombela, Rustenburg, Pietermaritzburg and Ekurhuleni.

Rail infrastructure

We are embarking on a comprehensive rail upgrade that intends placing rail at the centre of our freight and commuter movement. As rail is the future backbone of our public transport system, we will, over the next few years, invest billions of rand in passenger rail infrastructure and services.

GENERAL INFORMATION

for the year ended 31 March 2013

Our major challenge is that the bulk of our rail infrastructure has reached the end of its economic lifespan. New investments in new infrastructure which include signalling and rolling stock are an absolute necessity that will go a long way in positioning rail as the mode of choice, and a reliable and efficient mass mover in both the commuter and long-distance space.

Recapitalizing the rail business of the Passenger Rail Agency of South Africa (PRASA) also means that we must reinvest in both the existing rail network and in new lines in order to respond in a decisive way to new post-apartheid spatial and economic dynamics. A focused rail revitalization programme will become a key activity over the medium term, working with other departments in the economic cluster, and with our domestic and international partners in the private sector.

Road safety

Road safety remains a key challenge faced by the Department and society as a whole. The implementation of the United Nations Decade of Action for Road Safety will enable us to reduce road fatalities which remain one of our priority areas of concern. Our experience to date is that road safety campaigns must be conducted throughout the year through the 365 Days Road Safety Programme. We have to be more stringent in the application of regulations that regulate road transport operations, law enforcement on issues such as vehicle and driver fitness, driver hours behind the wheel, and speed. The implementation of these measures must be regarded as a priority by provincial and local authorities.

Rapid public transport infrastructure

A good transport infrastructure is a driver of economic growth and development. In the past few years, significant strides have been made to improve public transport across the country, especially in metropolitan areas. Johannesburg and Cape Town attest to this. It is important that the roll-out of infrastructure is not just confined to the major urban and metropolitan areas. We have a responsibility to redress the apartheid spatial patterns.

Through the Sihamba Sonke project we envisage to speed up the creation of jobs. Consultations with the provinces are ongoing; this includes the audit of roads that require maintenance. A consolidated national strategy will be completed in the near future. Plans are also underway to engage the taxi industry to find ways to enhance the economic efficiency of the industry. The Department is considering innovative ways to ensure that the taxi industry also benefits from the bus subsidies.

Freight Logistics and Industrial Corridor Development

Freight Logistics forms a very important element of the economic growth in the country, the SADC, the African Continent and the Global Village. In this regard, we undertake various freight logistics programmes.

As part of this planning process, freight logistics is taking centre stage, in that it forms part of the overall integrated planning objective as articulated in the planning document. The plan has identified key freight corridors within South Africa linking them to SADC and the overall Continent. This therefore enhances the streamlining process of freight flows across the borders within the country, its regions and the Continent.

Durban-Free State-Gauteng Logistics and Industrial Corridor

Through the Port of Durban as the gateway port for Africa, the Durban-Free State-Gauteng Logistics and Industrial Corridor remains a critical corridor for Africa. Its institutionalization forms part of the following workstreams:

- The Planning and Infrastructure Workstream, which deals with identification of infrastructure projects, planning thereof and the implementation process. Key to these projects is the Port of Durban expansion, and in this regard, the Old Durban Airport sale between Transnet and ACSA has been finalized.
- The development of the Cato Ridge area suitable to a logistics developmental environment, with the intention to contribute to the value chain within the corridor.
- The Harrismith Freight Logistics Conceptual Framework, suitable to be a strategic area for freight distribution and industrialization towards the upliftment of the livelihood of the community within the area and traffic

GENERAL INFORMATION

for the year ended 31 March 2013

growth to the corridor.

- The City Deep Container Terminal as a Regional Hub for Africa and the various options for its expansion, e.g. Centarand, Tambo-Springs, etc. and all other strategic inland terminals around the Gauteng province.
- Policy, Regulation and Environment Workstream, which deals with generic policy intervention and decision, which might impact on regional freight flow and environmental issues.
- Funding and Finance Workstream, which is currently developing a funding framework for this important corridor, which options might need to be shared with strategic stakeholders within the Continent.
- The Communication Workstream, of which the core function and responsibility is to develop an aligned and expanded internal and external communication strategy for the corridor to encapsulate issues of the African Transport Agenda.

It is therefore imperative that this corridor be seen as one of the busiest in the Southern Hemisphere both in terms of value and tonnage, and the critical role it would play in complimenting the regional and continental sea ports as well as inland ports and landlocked countries within Africa.

Maritime safety and industrial development

Maritime safety remains one of the key strategic focus areas. The Department has identified the need to upgrade the existing infrastructure along our coast to ensure the safety of life at sea. Various options are being considered to create a lasting solution. At the same time, the Department is developing a set of policies to increase investment and economic participation in the maritime shipping environment. We need to create an enabling environment for South Africans to participate actively in the entire value chain of the shipping business and industry.

Aviation

South Africa's aviation services are premised on the work of the South African Civil Aviation Authority, the Air Traffic Navigation Services and the Airports Company South Africa.

These three entities have an obligation to ensure that aviation safety and security, airports infrastructure development and air navigation services are efficiently carried out. The development and promotion of our air transport industry is dependent partly on the review of the current Airlift Strategy that was a 5-year strategy which has become a priority. The strategy will review an analysis that includes successes, challenges and obstacles faced in its implementation with a view of mitigating these challenges in the future.

Regulatory framework and institutional capacity

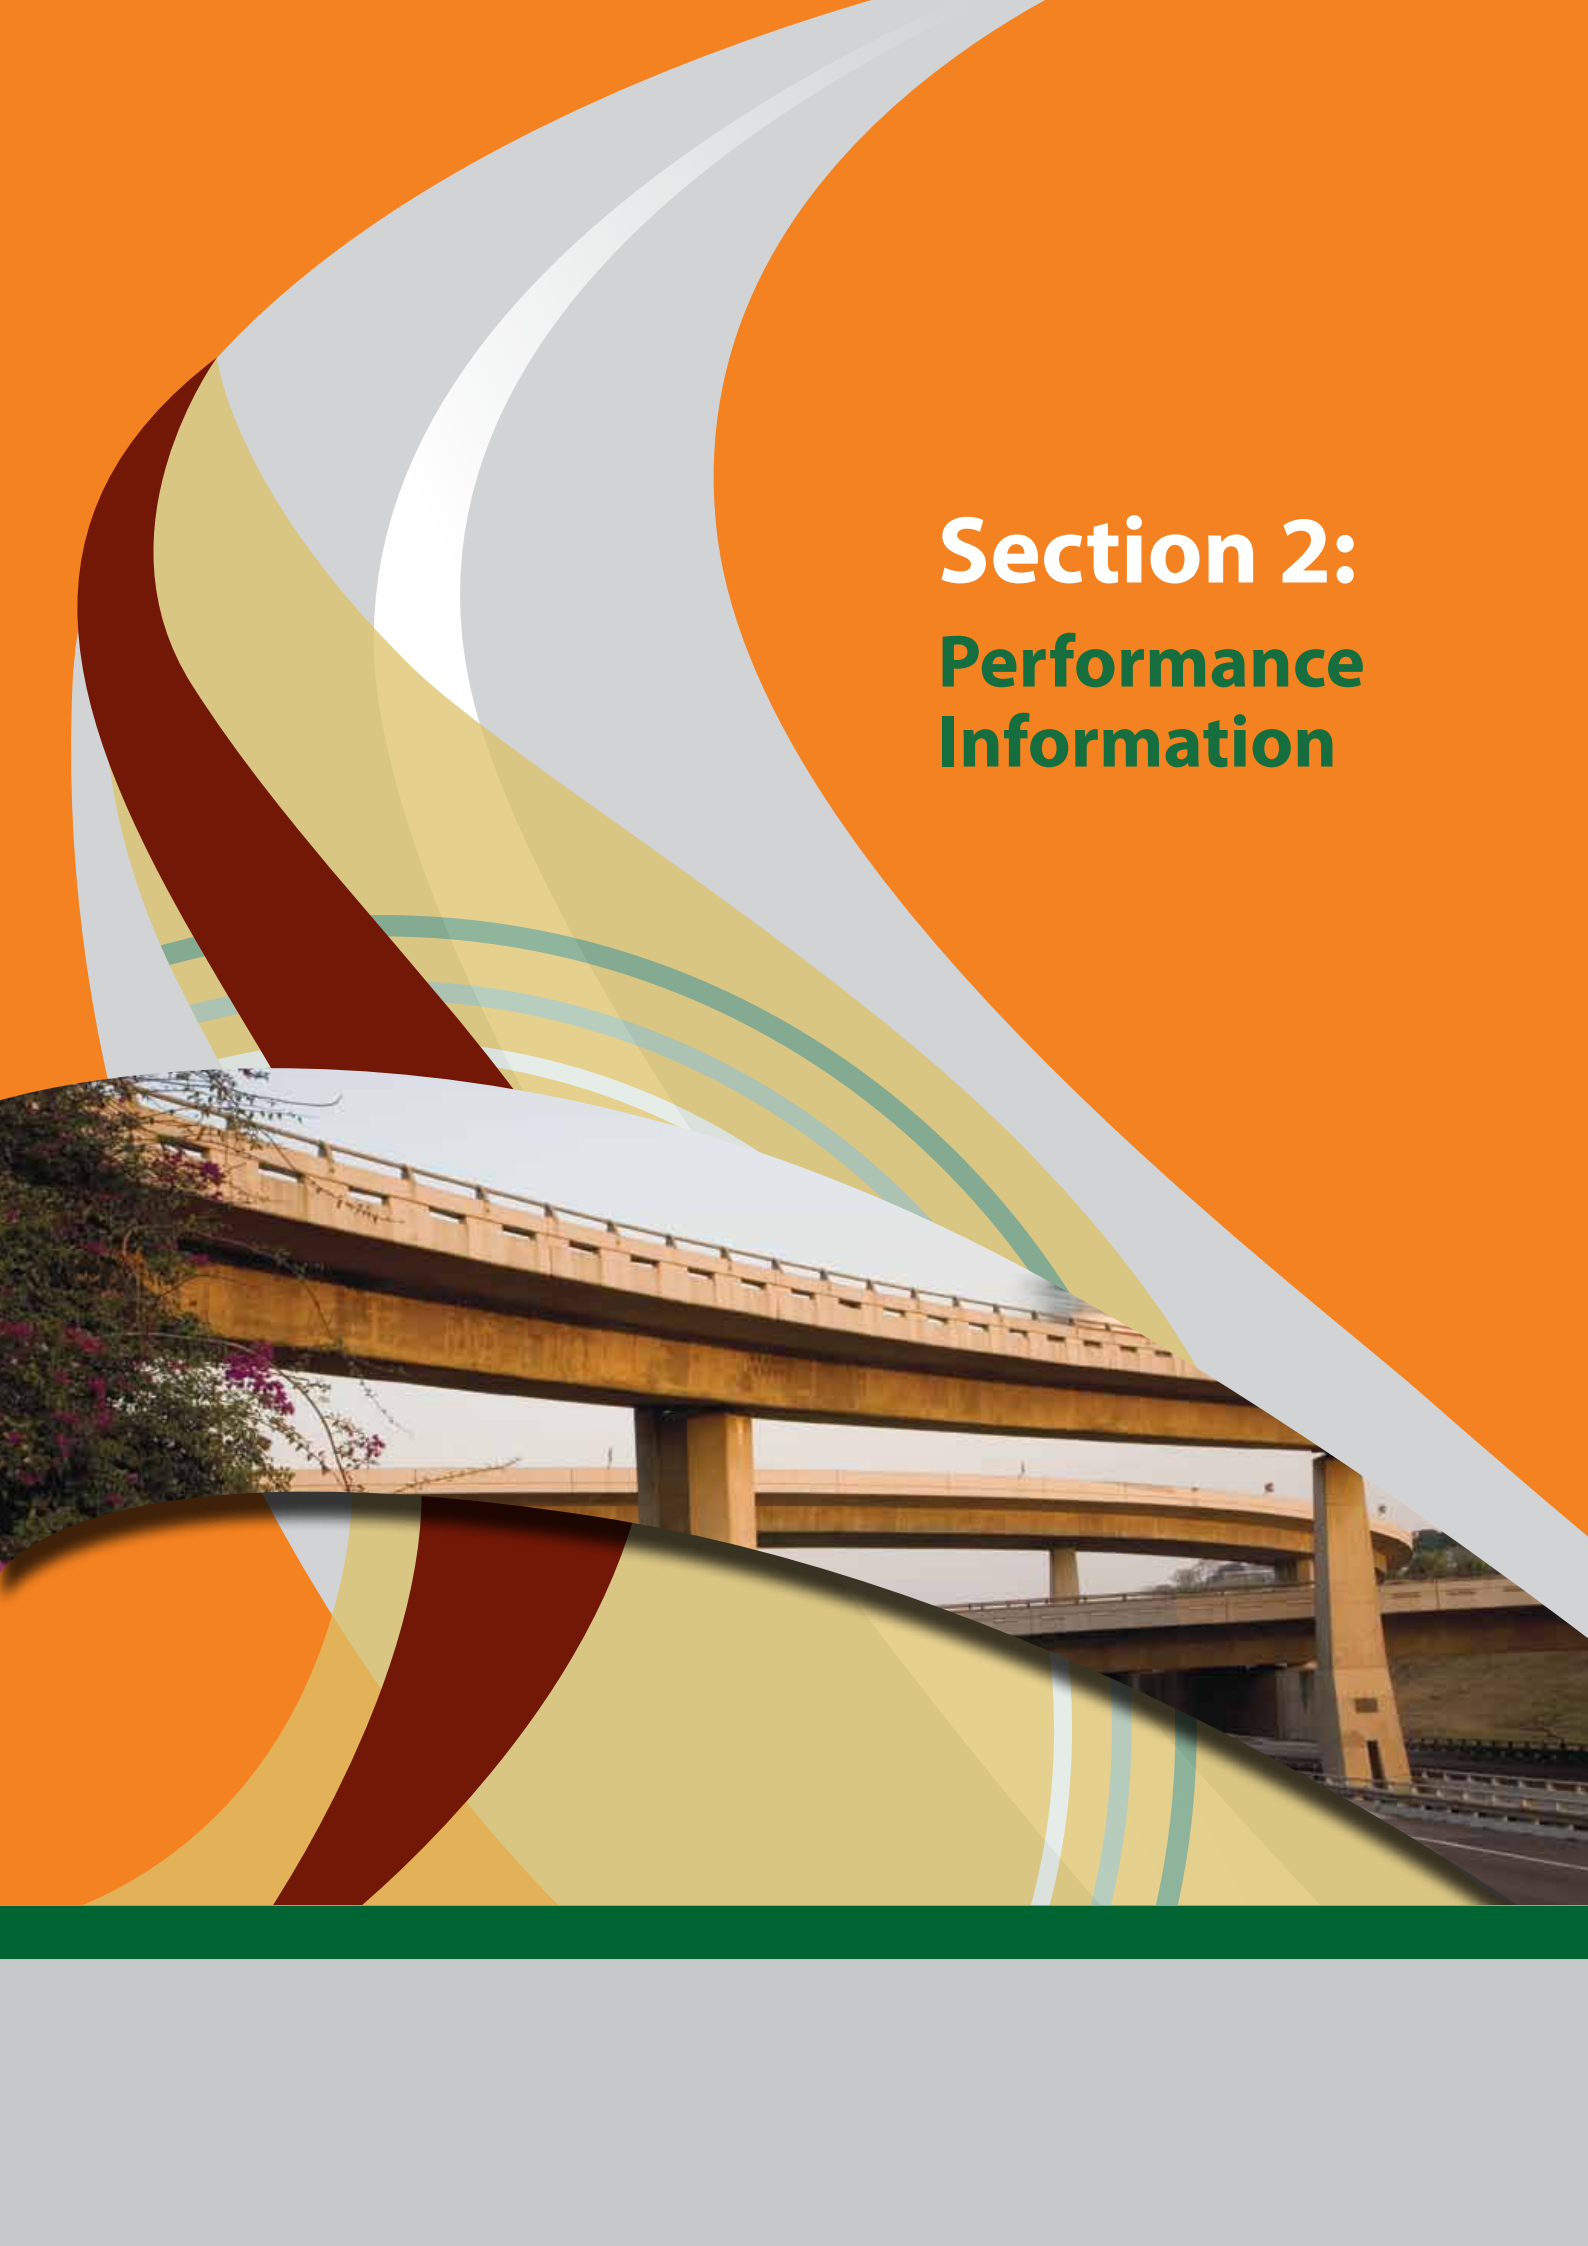

As transport is one of the most regulated industries in the economy, regulation becomes important for a number of reasons, including promoting efficiency, the safety of citizens, effective competition, and the provision of quality and affordable services. At the moment there are several regulators involved in the transport industry, and overlaps have been noted in terms of their mandates.

In order to streamline the regulatory model, the Department is investigating a new model which may entail merging various regulators. The outcome of this will be informed by studies being undertaken. This will also allow us to harmonize the regulation of tariffs across the transport industry, drawing lessons from established practices in energy, water and communications.

Dr Maria du Toit
Acting Director-General
Department of Transport

Date: 31 July 2013

Section 2: **Performance** **Information**

PERFORMANCE INFORMATION

for the year ended 31 March 2013

2.1 STATEMENT OF RESPONSIBILITY FOR PERFORMANCE INFORMATION FOR THE YEAR ENDED 31 MARCH 2013

The Acting Director-General is responsible for the preparation of the National Department of Transport's performance information and for the judgments made in this information.

The Acting Director-General is responsible for establishing and implementing a system of internal control designed to provide reasonable assurance as to the integrity and reliability of performance information.

In my opinion, the performance information fairly reflects the actual achievements against planned objectives, indicators and targets as per the strategic and annual performance plan of the Department for the financial year ended 31 March 2013.

The Department's performance information for the year ended 31 March 2013 has been examined by the external auditors and their report is presented on page 159.

The performance information of the Department set out on page 21 to page 101 was approved by the Executive Authority.

Dr. Maria Du Toit
Acting Director-General
National Department of Transport

Date: 31 July 2013

PERFORMANCE INFORMATION

for the year ended 31 March 2013

2.2 OVERVIEW OF DEPARTMENTAL PERFORMANCE

Service delivery environment

This report is presented against the backdrop of major strides made in various areas with regard to transport. Challenges related to public transport infrastructure and services remain daunting. In the 2011-14 Strategic Plan, the Department has taken a simplified strategic approach involving catalytic projects and regulatory issues. The programme structure has been modified by grouping related functions together, resulting in seven programme modes. These are Road Transport, Public Transport, Civil Aviation, Maritime Transport, Rail Transport, Integrated Transport Planning, and Transport Information Systems. The Department is of the view that these programmes not only set the agenda for the Department of Transport, but become sector-specific, including transport entities, provinces, municipalities and key private sector stakeholders. This approach suggests a need for convergence among all the stakeholders, and a seamless alignment in their delivery models. As part of this process, the Department has been engaging with provinces and local government in an attempt to streamline this approach and ensure responsiveness to realities on the ground.

Programme 1: Administration

This programme deals with key subjective weaknesses, challenges and issues within the entire sector, mainly organizational capacity challenges. These include, amongst others:

- Programme coordination across the sector
- Enterprise portfolio management (Project Management Unit)
- Critical sector information for decision-making
- Repositioning the Department in order to provide leadership in the sector

In this sector, various interventions have been identified. These include the Department's regulatory capacity in economic tariffs and safety across all modes, aimed at creating an environment conducive to increasing investment in this sector. Through the Corporate Services Programme, there is a need to define and better coordinate the Department's investment agenda which will in turn create certainty to the market and relevant investment for coordination and support of programmes and projects within the transport sector. Underfunding; increasing import costs, funding pressures and difficulties in critical areas such as engineering, project management and financial management remain a major challenge faced by transport entities.

Programme 2: Integrated Planning and Development

This programme is the heart of the sector and is responsible for the articulation of short, medium and long-term transport plans. There is a need to develop a shared agenda for the transport sector. This programme identified catalytic projects that would ensure that the sector delivers on its mandate. These include the following:

- Our planning term up to 2014
- Until 2025 – linked to the National Planning Horizon
- Transport Planning until 2050
- Investment and funding strategies
- Job creation and skills required
- Safety and regulatory issues
- Sector performance measures and instruments.

Programme 3: Rail Programme

This programme is responsible for the coordination and development of sustainable rail transport policies, rail economic and safety regulations, infrastructure development strategies and systems that reduce logistical costs and improve customer service.

PERFORMANCE INFORMATION

for the year ended 31 March 2013

This programme also monitors and oversees the Railway Safety Regulator (RSR) and the Passenger Rail Agency of South Africa (PRASA). The key strategic objectives of the programme are as follows:

- Upgrade and extend priority commuter rail corridors;
- Enhance the efficiencies and reliability of the rail transport sector;
- Ensure a safe railway and conducive regulatory environment; and
- Create jobs through manufacturing and maintenance in the rail sector.

During 2012/2013, PRASA delivered 540 million commuter trips through Metrorail, 1,4 million passenger trips through Mainline Passenger Services (MLPS) and 3,1 million long-distance bus passenger trips through Autopax. Urban commuter rail services cover more than 15% of the rail network in South Africa and currently provide over 2 million passenger trips every weekday within six metropolitan centres: Witwatersrand, Pretoria, Cape Town, Durban, Port Elizabeth and East London.

Significant achievements have been made towards outcome 6: An efficient, competitive and responsive economic infrastructure network, which relates to the Departmental outcome 5 of increased contribution to job creation. The procurement programme for the acquisition of new rolling stock follows the fleet programme process as set out in the government's Industrial Policy Action Plan (IPAP II). In December 2012, the preferred bidder for the design, manufacture and supply of new rolling stock fleet was announced. The bid will offer 3 600 vehicles delivered over a 10-year period (2015 to 2025), and creating 8 088 new direct jobs with a 69% local content by year 2.

The RSR has made significant achievements in establishing a railway safety regulatory framework. The regulatory obligations have in turn been embraced by railway operators in implementing their safety management systems. Progress has been made towards outcome 6: An efficient, competitive and responsive economic infrastructure network, which relates to the Departmental outcome 2 of a transport sector that is safe and secure. The 2011/12 State of Railway Safety report was presented to Cabinet in September 2012 and showed that there was a reduction in derailments by 11%, and collisions between trains and road vehicles were reduced by 26.6% compared to the previous year.

Programme 4: Road Transport

Since 1994, government has worked on more than 600 000 km of new roads. The Gauteng Freeway Improvement Scheme, which played a crucial role during the hosting of the 2010 FIFA World Cup in reducing traffic congestion between OR Tambo International Airport and Tshwane and between Johannesburg and Tshwane, will continue to play a major role in the transportation of people between the two cities. Delays in the implementation of the collection of tolls have had a negative impact on the credit ratings for SANRAL and continue to threaten the socio-economic stability of the country. However, progress has been made in addressing challenges that were identified by stakeholders in the sector and implementation is expected to commence in the 2013/14 financial year.

Rural roads in most of the provinces have been upgraded and constructed through labour intensive programmes. The Road Transport Programme is responsible for the coordination of our road infrastructure and traffic regulation functions. The Department has also mobilized other agencies like the Development Bank of Southern Africa (DBSA), the Council for Scientific and Industrial Research (CSIR) to be part of the Roads team charged with the responsibility of conceptualizing innovative solutions ranging from road infrastructure network funding to road maintenance. As we continue with the execution of our mandate, it is essential that we complete the synchronization of our projects and processes and also identify skills and capacity gaps throughout the delivery chain. Implementation of the following three flagship projects is underway:

- S'hamba Sonke Programme
- Establishment of Road Safety Councils
- Enforcement Campaign

PERFORMANCE INFORMATION

for the year ended 31 March 2013

The implementation of the Road Infrastructure Strategic Framework for South Africa (RISFSA), including the roll-out of an Asset Management System and the classification of the road network is underway. There are four big challenges within the road sector that the Department intends tackling over the medium term. These are:

- Ongoing and increased funding for Roads and Traffic Management
- Reducing road fatalities
- Implementation of AARTO
- Capacity building for road infrastructure maintenance at district and municipal levels.

Programme 5: Aviation

Aviation plays a very important role in economic development and tourism enhancement for international travellers. Our emphasis regarding the implementation of the Airlift Strategy and the Yamoussoukro Decision remains a priority in the aviation planning environment. This programme is responsible for the coordination of aviation infrastructure and operations.

Agencies sharing this responsibility are the Civil Aviation Authority of South Africa, Airports Company of South Africa, Air Traffic Navigation Services and the Regulation Committee. Challenges within the aviation sector include:

- Review and implementation of the Yamassoukrou Declaration
- Implementation of the Airports Development Plan

Identified areas of improvement in the sector are;

- Review and implementation of the Yamassoukrou Declaration
- Implementation of the Airports Development Plan

Identified areas of improvement in the sector are:

- Capacity challenges
- Convergence framework
- Strategic Lekgotla decisions required
- Institutional Reform
- Proposed future funding frameworks
- Standards/performance measures and sector performance
- Technical, community, economic growth and job creation
- Implementation and coordination of urban integration; corridor development strategies, capacity development, skills development, technology and programme management.

Programme 6: Maritime

This programme is responsible for maritime and ports development. It deals with the economic and safety regulatory issues, ports, coastal and shipping development. Its overall responsibility includes the general development of our maritime sector. It shares its responsibility with the South African Maritime and Safety Authority, the Ports Regulator and Transnet.

Challenges in the Maritime Sector include:

- No maritime policy for South Africa; we therefore cannot develop strategies and programmes
- We are still to finalize the African Maritime Charter which was adopted by the African Union Summit which took place during our October Transport Month 2009
- Coordination of roles and responsibilities on the National Ports Acts between the DoT, Department of Public Enterprises, Transnet and other stakeholders has not been resolved

Other key strategic issues:

- How to promote coastal shipping and coastal trading;

PERFORMANCE INFORMATION

for the year ended 31 March 2013

- How to promote local shipping and the development of a local register; and
- How do we position ourselves as a country which is regarded as an important gateway to Africa.

Programme 7: Public Transport

More than 65% of South Africans use public transport every day. This compels our rail, bus and taxi services to be affordable, efficient, safe and sustainable. The Public Transport Programme is responsible for the coordination of our public transport infrastructure and operations. This responsibility is also shared with provinces, municipalities, and the soon to be established National Public Transport Regulator. Strategic partners will be the Development Bank of Southern Africa, the Industrial Development Corporation, SANTACO, SA BOA and emerging bus organizations. Our observations have reflected key strategic issues that require attention, and these are:

- Critical review and implementation of the National Land Transport Act, particularly the allocation of functions and responsibilities;
- Resolution of the outstanding conversion of operating licences for taxis and buses;
- Coordination programme for new contracts for Public Transport Operation Grants (PTOGs);
- Review of the Public Transport Funding Framework – Public Transport Operation Grant, Taxi Recapitalization Programme and Public Transport Infrastructure and Systems (PTIS) Grant; and
- A Public Transport Empowerment Programme, specifically for the taxi industry and Small Bus Operators.

Service Delivery Improvement Plan

Main services provided and standards

Main service	Actual customers	Potential customers	Standard of service	Actual achievement against standards
Driver's licences Licence Testing Centre (DLTC) Renewals, new applications for learner's tests, driver's tests, replacements for lost/stolen documents	The public, students, scholars South African citizens, foreigners	Pupils just turned sixteen	Based on Batho Pele Principles: Location and accessibility; visibility and signage; queue management and waiting times; dignified treatment; cleanliness; comfort and safety; complaint management system; sector-specific standards; minimum service standards for DLTCs	Monitoring and evaluation at 18 DLTCs in four provinces: Mpumalanga, Free State, Northern Cape Limpopo and Gauteng Monitoring and evaluation of the standard of services in DLTCs. Identified common challenges in testing centres. Compiled dashboard reports. Compiled final provincial DLTC reports

Consultation arrangements with customers

Type of arrangement	Actual customers	Potential customers	Actual achievement against standards
Helpdesks and/or information centres in DLTCs	All customers attending DLTCs	Pupils just turned sixteen	Complaints are addressed and attended to Providing guidance to customers on how application forms should be completed Guidance and assistance are available to point customers to the right queue

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Service delivery access strategy

Access strategy	Actual achievements
Accessibility	Some towns have clear directional signage to DLTCs Easy access to DLTCs: many DLTCs are located in surrounding communities and Central Business Districts
Ramps	The elderly and disabled people are able to access DLTCs as ramps have been built at entrances Special treatment given to the elderly and people with disabilities
Access control to staff areas	At most stations there is good access control to cashiers workstations

Service information tool

Access strategy	Actual achievements
Interviews	Organizational development team interviewed Station Managers, Chief Licensing Officers, staff and customers
	Interviews outlined challenges faced by DLTCs
	Customers provided valuable information that will assist in making progress towards Service Delivery.
Questionnaires	OD team distributed questionnaires to customers.

Complaints mechanism

Access strategy	Actual achievements
Complaint Management System	Staff are able to write letters of grievance or requests to the relevant municipalities, provincial and national departments of Transport
Suggestion box	Customer complaints are raised anonymously
	Only one Station Manager meets with his staff once a week to address queries
	Customers are given feedback on how services can be improved

Organizational environment

The new DoT organizational structure created 96 posts on the new organizational structure, which resulted in an increase of the staff complement from 677 to 773. The roll-out of the new organogram resulted in the vacancy rate being reduced from 33% to 26.78%. There are, however, still some challenges with regard to Employment Equity at SMS level. Disability status is at 1.9%.

There has been 77% compliance with the submission of performance agreements, and 43% with regard to half-yearly reviews. Lack of total buy-in from top management is identified as the real cause for failure to achieve 100%. Disciplinary steps will be taken against those who fail to comply.

Labour relations have proven to be very effective and efficient. This resulted in five policies being adopted at DBC.

An HR plan, developed along the lines of the new structure, was developed and approved by the Minister, and then submitted to the DPSA. It is currently being implemented. The secondment of employees to DoT agencies and provincial departments may be good to support the agencies and provincial transport departments. However, its unintended consequences result in shortage of capacity of HR in the Department.

PERFORMANCE INFORMATION

for the year ended 31 March 2013

The implementation of the transport sector HRD strategy is underway with the total training interventions attended by 438 (85%) officials. The Workplace Skills Plan was developed and is currently being implemented. The Department has noted an improvement with regard to staff attending skills development interventions. There is a total number of 438 staff, with 293 being at lower levels, and 46 JMS, 48 MMS and 51 SMS members. The DPSA threshold of employing interns based on total filled posts on the establishment is 5%. This figure was exceeded by 8%, resulting in a total of 13% of interns that were employed in the Department in 2012.

In addition, the skills development programme in the transport sector has seen the registration of 527 students to Centres of Development. More than 227 students have recently graduated. In as much as there are more funds required for the programme to enrol more students, the high drop-out level remains a critical matter. The number of those registered continued to grow to 527 in 2011, from 349 in the preceding year. All draft chapters of the transport sector strategy have been finalized. Through the Technology Research Activity Centres, 462 984 learners have been exposed to the programme.

Key policy developments and legislative changes

Envisaged Legislative Changes

The Department of Transport is responsible for maximizing the contribution of transport to the economic and social development goals of the society by providing fully integrated transport operations and infrastructure.

a) National Land Transport Act, 2009 (Act No 5 of 2009)

The Act provides for the further transformation and restructuring of public transport planning and regulation. It takes forward policy initiated by the National Land Transport Transition Act, 2000 (Act No. 22 of 2000), and it seeks to further empower the role of the municipal sphere in the provision of public transport.

b) Civil Aviation Act, 2009 (Act No. 13 of 2009)

The Act gives effect to the Republic's obligation to comply with the Regulations of the International Civil Aviation Organization (ICAO). The Act provides for the establishment of a South African Civil Aviation Authority with safety and security oversight functions, and the establishment of an independent Aviation Safety Investigation Board in compliance with Annex 13 of the Chicago Convention.

Legislative Changes Envisaged in 2012/2013

a) Merchant Shipping (Civil Liability Convention Bill)

The purpose of this Bill is to enact the International Maritime Organization Protocol of 1992; to amend the International Convention on Civil Liability for Oil Pollution Damage of 29 November 1969 into law and to provide for matters connected therewith. The Bill creates the legal liability of the ship owner in the event of oil pollution in the sea.

b) Merchant Shipping (International Oil Pollution Compensation fund) (Contributions) Bill

The purpose of the Bill is to impose contributions on persons contemplated in Article 10 of the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, 1992, and to provide for matters connected therewith.

The contributions by the ship owner will be used to pay for damages caused by oil spillage and also when the ship owner cannot satisfactorily compensate for the damages caused. The contribution will be used to pay the cleaning of the oil spill.

PERFORMANCE INFORMATION

for the year ended 31 March 2013

c) *Merchant Shipping (International Oil Pollution Compensation Fund) Bill*

The purpose of this Bill is to enact the International Maritime Organization Protocol of 1992: to amend the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage of 18 December 1971 into law. The Bill was published for public comments and was subsequently referred to the office of the State Law Advisers for scrutiny.

d) *South African Maritime and Aeronautical Search and Rescue Amendment Bill*

To incorporate the International Maritime Search and Rescue Act, 2002 (Act No. 44 of 2002); to give effect to the structural changes introduced to the South African Aeronautical Search and Rescue Organization. The purpose of this Bill is to harmonize the working relationship of committees as required by the organization, to align certain sections of the principal Act, to make way for the Act to comply with the current developments.

e) *Maritime Transport Security Bill*

The Bill proposes to repeal and replace the existing Merchant Shipping (Maritime Security) Regulations, 2004, made under the Merchant Shipping Act, 1951. The Bill's main purpose is to safeguard against unlawful interference with maritime transport. It seeks to achieve this purpose by continuing the risk-based and outcome focused approach, first adopted in the 2004 regulations, of a regulatory scheme centred on the development of security plans for ships, ports, offshore facilities and other maritime transport operations.

f) *Merchant Shipping Amendment Bill*

The Bill's main object is to revise the limitation of liability provision; to modernize the law relating to ship owner's limitation by introducing a provision that is consistent with the provision of the 1976 Convention on Limitation of Liability for maritime claims and its 1996 Protocol; to introduce compulsory accident insurance for seafarers who suffered death or personal injury as a result of workplace accidents; and to give effect to the International Maritime Labour Convention. Once the convention is ratified by the Department of Labour, the Bill will then be introduced as it gives effect to the aforementioned Convention.

g) *Transport Law Enforcement and Related Matters Amendment Bill*

The Bill seeks to improve and facilitate law enforcement measures for collections of tolls; and to include offences relating to the non-payment of tolls in the AARTO system.

h) *National Road Traffic Amendment Bill*

This Bill addresses issues relating to the fitness of drivers; to address registrations and grading of licence testing centres; and to deal with matters connected therewith.

i) *Merchant Shipping (Safe Containers) Convention Bill*

The purpose of the Bill is to give effect to the International Convention for Safe Containers and for related matters. The Bill will maintain a high level of safety of human life in the transport and handling of containers by providing generally acceptable test procedure and related strength requirements. The Bill will facilitate transport of containers by providing uniform internal safety regulations, equally applicable to all modes of surface transport.

j) *South African Maritime Authority Amendment Bill*

This Bill amends the South African Maritime Safety Authority Act, 1998 (Act No. 5 of 1998). The Bill's purpose, generally, is to improve the functioning of the Authority and to harmonize the provisions of the principal Act with those of the current legislative developments

PERFORMANCE INFORMATION

for the year ended 31 March 2013

The following policies were under consideration during the year in review:

- National Rail Policy
- National Scholar Policy
- National Non-Motorized Policy
- Maritime Policy
- National Aviation Policy
- National Road Transport Policy

The following pieces of legislation were tabled in Parliament during the 2012/2013 financial year:

- Road Accident Fund (Transitional Provisions) Act, 2012 (Act No. 15 of 2012)
- South African Maritime and Aeronautical Search and Rescue Amendment Bill
- Transport Laws and Related Matters Amendment Bill
- Merchant Shipping Safe Containers Act 2011 (Act No. 10 of 2011)

2.3 STRATEGIC OUTCOME-ORIENTED GOALS

Strategic outcome-orientated goals

The Cabinet Lekgotla held from 20 to 22 January 2010 adopted the following 12 outcomes:

- Improved quality of basic education;
- A long and healthy life for all South Africans;
- All people in SA are and feel safe;
- Decent employment through inclusive economic growth;
- A skilled and capable workforce to support an inclusive growth path;
- An efficient, competitive and responsive economic infrastructure network;
- Vibrant, equitable and sustainable rural communities with food security for all;
- Sustainable human settlements and improved quality of household life;
- A responsive, accountable, effective and efficient local government system;
- Environmental assets and natural resources that are well protected and continually enhanced;
- Create a better SA and contribute to a better and safer Africa and the world; and
- An efficient, effective and development-oriented public service and an empowered, fair and inclusive citizenship.

The Minister of Transport chairs Outcome 6 and has outlined the following areas in his performance and delivery agreement signed with the State President on 30 October 2010.

Ministerial Outputs

- Increase the market share of total freight to rail to an annualized 250 million tons from the current 178 million tons by 2014;
- Benchmarking cost of building and maintenance of roads to assess our efficiency and developing an appropriate funding model to ensure adequacy of supply and maintenance. An agreed methodology for assessing adequacy of supply is crucial to this output;
- Implementation of the Road Infrastructure Strategic Framework for South Africa (RISFSA);
- Implementation of the approved Rural Transport Strategy for South Africa;
- Road accident fatalities to come down from 14 600 by 2014 (a 5% per annum reduction) adjusted for total vehicle kilometres travelled;
- Ring-fencing of road maintenance funds, including construction and maintenance of rural roads;
- Development of Integrated Rapid Public Transport Networks (IRPTNs) in twelve cities and six rural districts;
- Completion of the Rail Policy and Rail Act;
- Establishment of a Rail Economic Regulator;

PERFORMANCE INFORMATION

for the year ended 31 March 2013

- Implementation of the National Freight Logistic Strategy;
- 10% of the identified new investment in rail should be PPP projects;
- Introduce private operators at branch level (secondary rail network);
- Implement the National Ports Act and create transparent cross-subsidies between port and rail infrastructure; and
- Introduce competition for the management of containers.

Departmental Outcomes

- **An efficient and integrated transport infrastructure network for social and economic development**
The Department will ensure the maintenance and strategic expansion of the road network, and support the development of road asset management system in rural and provincial authorities. In addition, the Department will support rail and ports efficiency and enhance capacity and competitiveness.
- **A transport sector that is safe and secure**
The Department will implement various policy interventions that seek to reduce the number of incidents in the road, rail, aviation and maritime environment.
- **Improved rural access, infrastructure and mobility**
The Department will improve rural access by assisting municipalities in developing road asset management systems, which will assist in the implementation of the Road Infrastructure Strategic Framework of South Africa.
- **Improved public transport systems**
Public transport is a critical strategic imperative in the Department's service delivery agenda. Over the medium term, the Department will implement measures to ensure an effective, efficient, affordable and accessible public transport system in both urban and rural areas through, among others, the implementation of integrated public transport networks, and establishment and strengthening of regulatory entities, acquisition of new rail rolling stock, and development and upgrading of priority passenger rail corridors.
- **Increased contribution to job creation**
The Department will prioritize job creation through the implementation of an industry empowerment model, the finalization and approval of the maritime policy underpinned by industry development, and broad-based black economic empowerment (BEE).
- **Increased contribution of transport to environmental sustainability**
The Department will implement measures aimed at reducing the impact of transport on climate change by supporting more energy efficient modes of freight and passenger transport and promote the use of cleaner fuels.

2.4 PERFORMANCE INFORMATION BY PROGRAMME

Integrated Transport Planning

This branch is responsible for ensuring that all functional areas and spheres of government undertake transport planning in a seamlessly integrated way underpinned by core principles articulated in the National Strategic Planning Framework to guide all transport planning effort in the country.

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Transport Information Systems

This branch is responsible for the development and execution of plans to utilize technology as a strategic resource in the transport sector. Massive investment in mission critical systems like E-Natis and the National Land Transport Information System require coherent and long-term strategic platforms in order to maximize value. The branch will also be responsible for developing, maintaining and implementing standards relating to Intelligent Transport Systems for the country.

Rail Transport

This branch is responsible for regulating rail transport and implementing relevant policies in the exercise of economic and safety regulation, optimization of the use of rail infrastructure and industry development. The branch exercises oversight over the Passenger Rail Agency of South Africa (PRASA) and the Railway Safety Regulator.

Road Transport

This branch is responsible for road infrastructure development and maintenance, road traffic regulation and safety, industry development as well as road engineering and related standards. The branch exercises oversight over the South African National Roads Agency Limited (SANRAL), Road Accident Fund (RAF), Cross-Border Road Transport Agency (CBRTA), Road Traffic Management Corporation (RTMC), the Road Traffic Infringement Agency (RTIA) and the Driving License Card Entity.

Civil Aviation

This branch is responsible for exercising oversight over the civil aviation sector through regulation, monitoring and evaluation of economic and safety regulation of the industry. The branch exercises oversight over the South African Civil Aviation Authority (SACAA), Airports Company of South Africa (ACSA) and the Air Traffic Navigation Services (ATNS).

Maritime Transport

This branch is responsible for exercising oversight over the maritime transport sector through regulation, monitoring and evaluation of economic and safety regulation, industry development and development of strategies to empower South Africans in the maritime sector. The branch exercises oversight over the South African Maritime Safety Authority (SAMSA).

Public Transport

This branch is responsible for developing and implementing interventions that seek to promote public transport over private car use underpinned by Integrated Public Transport Networks that are seamlessly integrated across all modes. It will also regulate public transport and implement strategies aimed at accelerating industry development focusing on the minibus-taxi industry and small bus operators. The branch will exercise oversight over the National Public Transport Regulator.

PROGRAMME 2: INTEGRATED TRANSPORT PLANNING (ITP)

Purpose

To support, manage and facilitate national transport planning underpinned by the strategic planning framework and relevant strategies, coordinate inter-sphere relations in relation to transport planning, support line functions and other spheres of Government in creating seamless integration in transport operations, coordinate efforts to integrate interventions in the region and continent, provide economic modelling and analysis of the sector, and develop indicators for monitoring the performance of the sector.

Strategic Objectives of the Programme

The following are the strategic objectives of the branch as it seeks to implement departmental outcomes as identified in the departmental strategic plan. These are:

- Enhance the coordination of integrated transport planning
- Ensure funding, economic performance and transformation of the transport sector
- Promote seamless movement of cargo across all modes and corridors
- Ensure and promote regional and continental integration of infrastructure and operations
- Ensure research, Innovation and monitoring of the transport sector for sustainability

Subprogrammes

The Integrated Transport Planning Administration Support provides administrative support services to the entire programme. The subprogramme is responsible for budget control, performance reporting and project administration to support subprogrammes in their execution of the agreed targets that are on the departmental strategic plan as well as on the annual performance plans. The administration also coordinates departmental work on the Infrastructure Development Cluster (IDC) and Economic Sectors and Employment Cluster (ESEC). It produces quarterly reports that are submitted to Ministerial Clusters and the Cabinet Committee. The last activity that administration does is the coordination of all Strategic Infrastructure Projects (SIPs).

Research and Innovation is responsible for coordinating and developing the transport sector response to climate change and environmental protection, providing research support and developing strategies that respond to and provide support for technological advancement and being innovative. The unit produced reports on the Transport Information Portal for use by everyone who wants to see the material that the Department has and a report on the rural deprivation index to measure rural access to transport and transport services.

Macro Sector Planning manages, coordinates and facilitates the implementation of the planning prescripts of the National Land Transport Act and provides planning guidelines and a national five-year strategic framework to inform provincial and municipal planning. The unit produced the National Transport Master Plan Synopsis report that was to be tabled before Cabinet for consideration. In making sure that planning is informed, the unit produced user requirements for the development of an integrated transport information databank. Lastly, the unit worked on helping the Deputy Minister in her role as a member of the Ministerial team on the Integrated Urban Development Framework (IUDF) that is meant to produce an integrated urban framework for South Africa.

Freight Logistics develops and coordinates the implementation of strategies aimed at unblocking bottlenecks in the national freight logistics system with particular emphasis on the integrating elements of the system across modes. The unit produced a series of documents for submission to the Presidential Infrastructure Coordinating Commission as part of its Durban-Free State-Gauteng Industrial Corridor. The second key deliverable in the unit was the refurbishment

PERFORMANCE INFORMATION

for the year ended 31 March 2013

and upgrade of the Mthatha runway. The runway upgrade was complete barring the laying of the ultra-thin friction course. The last key deliverable was the coordination of the Transport and Mobility Work Group as part of the KSD Presidential Intervention Project meant to revitalize and upgrade Mthatha's crumbling transport infrastructure.

Regional Integration manages, coordinates and facilitates the development of strategies for engagement in the SADC region and the continent. The unit delivered border optimization plans and has started to develop focused intervention strategies to deal with systemic challenges. As a result of that work, the team is now working on dealing with congestion challenges at the Maseru Border Post. The other key work that the team has been working on is the North South Corridor (NSC) that links with the Presidential Infrastructure Championing Initiative (PICI). The team has finalized the Memorandum of Understanding (MoU) for consideration by the Southern African Development Community (SADC) Minister responsible for Transport. The last work that the team started was the analysis and assessment of regional infrastructure to enable appropriate integration strategies.

Modelling and Economic Analysis undertakes financial and economic modelling and analysis of various policy options. The unit produced the pilot for the National Household Travel Survey, and final results were delayed due to the delay in the release of Census results and datasets. The Transport Bulletin has been done and now needs to be published. The team also produced a number of reports on a number of areas during the year. One of the most critical deliverables has been the work that the team has been doing on the Single Transport Economic Regulator (STER), which has met a number of milestones. The last key output was the establishment of the Broad-based Black Economic Empowerment Council. The advert for nominations was done and a shortlist for the conveners of subsector groups and their members was finalized.

The following tables set out subprogramme performance on the agreed targets as outlined in the Estimates of National Expenditure (ENE) and Annual Performance Plans (APPs).

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Subprogramme: Research and Innovation						
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance	
Development of Transport Energy Consumption Framework for climate change mitigation	White Paper on National Response Climate Change Strategy	Conduct a baseline study to ascertain levels of aggregate energy consumption along the major corridors in South Africa	Terms of reference done and scoping analysis done, and discussion document completed	Alignment with the Energy Consumptions Study of the Department of Energy. The EETMS has delayed the start for good reasons as both these sectors are the biggest consumers of energy and there was risk for duplication	The Energy Consumption Framework will commence in the 2013/14 period as a result of the unforeseen delays of the alignment process between DoE and DoT. The TOR have been developed and approved and steps are underway to appoint a service provider	
Development of Transport Greenhouse Gas Inventory		Develop a mitigation strategy to contribute towards the reduction of GHG by 34% as per UNFCCC commitment	Tier 1 work on modelling and inventory data collection has been done, and a Report and Database for the Tier 1 phase have been completed	Alignment with Department of Environmental Affairs Mitigation Potential work has in essence delayed the start of the project, but after completion, Tier 2 work will start thereafter	The GHG alignment process with DEA has been concluded and the project will start in the 2013/14 period. The TOR have been developed and approved	
Develop a sustainable transport information portal, accessible at all tiers of government		A sustainable transport information portal	The portal was developed	Due to security concerns, the portal is being converted from a DotNuke to a DotNetNuke environment.	Upon finalisation of the move to a new platform, then the project will be complete and final

Subprogramme: Research and Innovation						
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance	
Develop a rural accessibility/multi-deprivation index.	Rural Transport Strategy	Accessibility index conducted for 12 rural districts: Alfred Nzo, Amajuba, Amatole, Chris Hani, Joe Gqabi, O.R. Tambo, uGu, uMgungundlovu, uMkhanyakude, uMzinyathi, uThukela, and Zululand	A literature review report was completed	The service provider developed and tested the methodology, and thereafter will compute the index for all rural districts	- Capacity constraints	
Research on the impact of freight accidents on South Africa's roads	National Freight Databank	Discussion document on the impact of freight accidents on South Africa's roads	Restarted the process of appointing a service provider	Contract terminated with the initial bidder and a second round of the bidding process had to be run	The second round of the bidding process has commenced	
Review of Transport Innovation Research Strategy; and undertake a study on main technologies and innovations to reduce accidents on roads in South Africa		Reviewed Transport Innovation Research Strategy	None	This target was taken off from the performance plan	The abandonment of the targets was necessitated by the extended sick leave and eventual discharge of the concerned project manager on grounds of incapacity as a result of ill health following the Procedure on Incapacity Leave & Ill-health Retirement (PLIR).	

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Subprogramme: Research and Innovation						
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance	
Development of a Transport Sector Monitoring & Evaluation Framework		<ul style="list-style-type: none"> Development of an internal M&E discussion document Final M&E Framework developed 	<ul style="list-style-type: none"> Internal discussion document finalised Framework developed 	The Framework provisions are being constantly aligned with the National Treasury Guidelines on Provincial Performance Indicators in the sector	The Framework provisions are being constantly aligned with the National Treasury Guidelines on Provincial Performance Indicators in the sector	
Compilation of a Transport Sector Policy M&E Report for 2013/14		Approve M&E Framework and data collection	Did not undertake the project	Did not undertake the project	Coordination with the DPME and the new framework	
Subprogramme: Macro Sector Planning						
Approved NATMAP 2050 by Cabinet		Approval of the NATMAP by Cabinet by May 2012	<p>Synopsis report finalised</p> <p>As part of preparations to obtain Cabinet approval, NATMAP was presented to the Infrastructure Development Cluster</p>	The Strategic Management Committee (SMC) directed that before going to Cabinet, alignment between NATMAP and the Rail Policy must be sought	The need to align the NATMAP with the Rail Policy resulted in further delays with regard to seeking Cabinet approval. This resulted in further engagements	
Updated Transport Master Planning Framework.		Monitoring and review trends and projections for Macro Planning in Eastern Cape, North West, Northern Cape, Free State and Mpumalanga by March 2013.	<p>Limpopo, Free State, Mpumalanga and Kwa Zulu Natal participated to some extent on the process but later on raised concerns of updating the Framework before it was approved by Cabinet. Gauteng & Western Cape refused to engage due to the same concern.</p>	The process was dependent on the NATMAP 2050 approval by Cabinet.	Provinces were reluctant to proceed with the update of the framework before it was approved by Cabinet.	

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Subprogramme: Macro Sector Planning						
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance	
Consolidate Transport System Data Bank User Requirements Framework		Produce a user requirements framework report by March 2013	The service provider for the development of user requirements framework has been appointed	Late appointment resulted in not meeting the target	Internal consultation processes leading to the appointment of service provider took longer than anticipated	
National Transport Planning Forum established		Establish National Transport Forum by March 2013	<ul style="list-style-type: none"> - The ToRs were approved for the appointment of a preferred bidder; however, there was no appointable service provider - The process was restarted later 	Could not obtain a suitable bidder in two separate bidding processes	The initial bidding process for the appointment of the service provider failed to produce results. This led to the second round of the bidding process. The second process was concluded just after the end of the financial year. However, an appointable service provider was identified	
Integrated Transport Plan (ITP) minimum requirements reviewed and aligned with the NLTA		Produce a draft report on the review of the ITP minimum requirements for alignment with the NLTA by 2013	No progress made	Internal consultation process and alignment of roles and responsibilities took longer than initially anticipated	Delays on the decision to hand over the transport planning responsibilities from the Public Transport Branch to the ITP Branch

PERFORMANCE INFORMATION

for the year ended 31 March 2013

PROGRAMME 3: RAIL TRANSPORT

Purpose

Facilitate and coordinate the development of sustainable rail transport policies, rail economic and safety regulations, infrastructure development strategies and systems that reduce system costs and improve customer service. This programme monitors and oversees the Railway Safety Regulator (RSR) and the Passenger Rail Agency of South Africa (PRASA). The focus is also on the implementation of integrated rail services planned through the lowest competent sphere of government.

Strategic Objectives:

- Upgrade and extend priority commuter rail corridors
- Enhance the efficiency and reliability of the rail transport sector
- Ensure a safe railway and conducive regulatory environment
- Create jobs through manufacturing and maintenance in the rail sector

Performance indicators and targets:

Following Cabinet's approval of the feasibility study on the renewal of PRASA's rolling stock, the Department and PRASA embarked on a process to invite bids for the replacement of the fleet. Request for Proposals was advertised by PRASA in April 2012, inviting interested parties to submit bids for the replacement of half of the rolling stock fleet, at an estimated cost of R5.1 billion per year over a ten-year period.

The procurement programme for the acquisition of new rolling stock follows the fleet programme process as set out in the government's Industrial Policy Action Plan (IPAP II). The objective of the fleet procurement programme is to develop long-term procurement plans that establish predictable demand which will make investments in local supply industries attractive. The establishment of local manufacturing industries will result in substantial sustainable jobs over the twenty-year procurement period and the redevelopment of rail engineering capacity and skills that have been lost over decades of underinvestment in the local rail engineering industry.

On 5 December 2012, the Gibela Rail Transport Consortium was announced as the preferred bidder for the design, manufacture and supply of the PRASA new rolling stock fleet. The bid will offer 3 600 vehicles delivered over a 10-year period (2015 to 2025), with a cost implication of R51 billion; Maintenance, spares supply and technical support on vehicles over an 18-year period (2015 to 2033); 8 088 new direct jobs created; Ownership - 30% be set aside for equity partners; Spending of R797 million on skills development initiatives; R32.8 billion to be spent on subcontracting to black empowered entities; R5.3 billion to be spent on subcontracting to qualifying Small Enterprises and Exempted Micro Enterprises (SMMEs); R1.6 billion to be spent on subcontracting to entities owned by black women; Spending of R746 million on the development of enterprises in the rail sector; Spending of R273 million on Socio-Economic Development contributions and local content of 69% by year 2. The procurement process is on target with the delivery of the first batch of vehicles planned for the fourth quarter of 2015/16.

A draft Green Paper on the Rail Transport Policy was finalized in April 2012 to create a foundation and framework to stimulate discussion for the development and finalization of the National White Paper on the Rail Transport Policy. The Green Paper outlines the policy areas identified as key decision areas that require further discussion, consultation and debate. The main policy areas are investment, private sector participation, institutional arrangements, rail transport planning, skills development and job creation, regulation, rail safety management, and security management. The outcome of this Green Paper process is the clarification of Government's vision and policy position in rail transport. In addition, it will identify and/or confirm key policy development and implementation areas related to legislative amendments and developments, and refine Government's provisional approach on addressing inherent challenges in rail transport.

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Subprogramme: Rail Infrastructure and Industry Development					
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance
1 390 rail coaches generally overhauled and upgraded	510 coaches completed	450 coaches completed	579 coaches completed	No variance – target achieved.	None
Completion of Phase 1: Gauteng Train Control Nerve Centre	Concept designs of GNC finalized. Phase 2 Tender scheduled in June 2012	5 of 6 sections completed	Detailed design approval completed. Bids awarded – excavation commenced and will be continuing into 2013/14		None
Moloto Development Corridor	-	Feasibility study	PPP Project Inception Report & Needs Analysis concluded	No variance – target achieved	None
Bridge City line extension	Construction work on earthworks and piling progressing as planned	Construction of stations and perway	Overall progress on construction of stations and perway are at 81%	Target achieved. Variance in project due to labour protest on site	None
Budget approval – Procurement of new rolling stock Request for Proposal (RFP) preparation	Needs and feasibility study completed and funds secured – Request for Proposals work in progress	Budget approved. Procurement and RFP preparation. RFP process and evaluation	Contract negotiations with preferred bidder completed. Evaluation of preferred bidder for Black Equity partner in progress	No variance – target achieved	None
Greenview – Pienspoort line extension	Doubling of the line stands at 95%. The contract for Mamelodi Gardens station has been awarded. Adjudication of tenders delayed due to review of original design	Construction of stations and perway 50% completed	Package 1 – Overall project is 80% completed. Track doubling and rail infrastructure completed. Package 2, 3 & 4 – construction of all station developments are delayed	Target achieved Variance due to construction delays - contractors for Package 1 – track doubling and rail infrastructure back on site. Construction of Mamelodi Gardens, Greenview and Pienspoort stations delayed due to the outstanding approval of the station drawings by the City of Tshwane. The relocation of the informal settlements at proposed Greenview station also delayed by the City of Tshwane	None

Subprogramme: Rail Operations					
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance
Performance Monitoring and Evaluation – successful development and implementation of National Service Level Agreement	-	Development of National Service Level Agreement and pilot DoT & PRASA	Final draft of Service Level Agreement concluded	No variance – target achieved	
Subprogramme: Rail Regulation					
Rail Policy Green Paper	Draft Green Paper developed	Green Paper published	Inter-governmental consultation commenced with key stakeholders. Cost Benefit Analysis commenced	Target not achieved – Green Paper not published – delay in internal stakeholder engagement process	Delays in stakeholder engagements
Established Interim Rail Economic Regulator (IRER)	Final draft Implementation Plan for IRER with Treasury and DPE for comments	Interim capacity established	Institutional arrangements, Memorandum of Understanding and Terms of Reference for the establishment of the IRER Task Team agreed with Treasury and DPE	- Target not achieved – IRER not established - IRER in the process of being established	Delays in stakeholder engagements
Finalised accident and incident status report	State of Safety Report 2010/2011 finalized and produced	Status quo report completed	Railway Safety State of Safety Report tabled before Parliament in September 2012	No variance – target achieved	None

PERFORMANCE INFORMATION

for the year ended 31 March 2013

PROGRAMME 4: ROAD TRANSPORT

Purpose:

Regulate road traffic management. Ensure the maintenance and development of an integrated road network through the development of standards and guidelines and oversight of the road agencies and provincial road expenditure. Ensure that all eligible drivers are in possession of driving licence cards.

Strategic Objectives:

- Facilitate the rehabilitation of roads by supporting the upgrading of 2 156 km of coal haulage roads by quarterly monitoring of spending by provinces and the South African National Roads Agency.
- Improve the condition of provincial roads by reducing those in poor to very poor condition from 65 966 km in 2009/10 to between 56 071 km and 52 773 km by 2014 through a targeted maintenance programme across the provinces.
- Contribute to halving unemployment by promoting industry development and labour intensive methodologies to create an additional 70 000 full-time equivalent jobs in the roads sector by 2011/12.
- Support the implementation of the road infrastructure strategic framework by ensuring the use of updated road asset management systems in all provinces by 2013 and the development of these systems at local government level.
- Improve rural access to road transport by assisting municipalities in developing non-motorised infrastructure in 21 district municipalities by 2014.
- Review and develop the Road Safety Strategy that will assist the Department to reduce road accident fatalities and serious injuries by 50 percent by 2020, in line with the Decade of Action and the Millennium Development Goals.
- Improve service at all road traffic customer contact centres, thereby reducing the period it takes to obtain a driver's licence and renew motor vehicle licences.
- Produce and deliver driver's licence cards within 24 days over the period 2013/14-2017/18.
- Manage and maintain 1 000 Live Capture Units (LCUs) at Driving Licence Testing Centres (DLTCs) over the five-year period ending 2017/18.
- Improve the financial position of the Driver's Licence Card Account to ensure its sustainability.
- Improve the governance of the Driver's Licence Card Account.

Road Regulation

The Amendments to the National Road Traffic Act and the Regulations have been effected, which would lead to the reduction of accidents on public roads, thereby creating safe movement and better protection in the transportation of persons on public roads. The implementation of learner and driver's licences programmes will enhance and improve driving skills of drivers and lead to improved service delivery. Implementation of periodic motor vehicle testing will increase safety of passengers in public transport motor vehicles. The Draft Road Safety Strategy has been completed; the strategy contains interventions that will enable the Department to reduce the number of accidents and fatalities on our roads, thereby ensuring that we achieve the Millennium Development Goals and those of the Decade of Action for Road Safety 2011–2020.

Road Engineering Standards (RES)

The Department of Transport, through the S'hamba Sonke Marshal Plan Document, developed a Road Asset Management Policy that will assist in quantifying and analysing the requirements of the road networks in South Africa. This includes "Knowing Your Network" (Extent of various road networks; Condition of road networks; Intervention on each road network; and Investment requirements on each road network). The Policy is at the draft stage and is currently being consulted with all interested and affected parties.

PERFORMANCE INFORMATION

for the year ended 31 March 2013

A new formula to allocate funds has been designed and is being applied to all provinces. The new formula is based on Extent; Condition; Topography; Road Traffic and Geo-climatic conditions. These factors reflect the different costs of maintaining road networks in each province.

In a drive to ensure efficient and effective investment in rural roads infrastructure, the Department of Transport has made grant funding available for 21 rural district municipalities (DMs) across the country to set up Road Asset Management Systems (RAMS). The grant funding is essentially for the standardised collection of road inventory data, including condition assessment and traffic data. About 120 young graduates have been put into an intensive Geographic Information System (GIS) and RAMS training programme, after which they will be equipped and placed in the districts for the implementation of the programme.

Revision of the following engineering standards are in progress:

- Road Asset Management Manual (TMH 22);
- Manual for the Management and Inspection of Highway and Road Structures; and
- Consolidation of Visual Assessment Manuals (Incorporating Flexible Pavements, Unsealed Roads, Concrete Roads and Block Pavements).

Road Infrastructure & Industry Development (RIID)

Through the S'haba Sonke Roads Programme, it can be reported that R8,114,871,000 has been spent from the Provincial Road Maintenance Grant as at 31 March 2013, which represents 93% of the R8,696,210,000 allocated in the 2012/2013 budget.

A total of 39,680 full-time equivalent (FTE) jobs were created, which implies that 44% of the 90 000 annual target was achieved.

In the absence of a budget approval to implement Pothole Hotline, the repairs of potholes were monitored by analysing physical work done instead of the turnaround time to undertake repairs. From 2013/2014, as a long-term solution to pothole problems, the Road Maintenance Grant allocations (already published in the DORA) will be prioritised, based on Road Condition Assessment data. This will commit road authorities to undertake preventative maintenance and thus prevent potholes.

Driving Licence Card Account (DLCA)

The Driving License Card Account has improved the financial position of the entity from negative cash flows and the going concern crisis that were reported by the Auditor-General, by negotiating a decrease in card production cost and LCU maintenance cost with the service provider, resulting in R7 million savings per annum.

The trading entity has managed to strengthen its financial position by recovering 85% of debts that have been outstanding for more than five years, and has a healthy liquidity of R45 million.

The entity has also improved governance by establishing and implementing entity-specific policies, governance structures/committees: MANCO, Risk Committee, Audit Committee and reporting frameworks. The turnaround time of 15 days for production of driver's licence cards has been achieved versus the contractual 24 days. The entity's financial management that was outsourced to consultants (Deloitte) since 2008 is now being performed internally by the entity. Also, it has achieved a surplus of 24% and its bank balance has grown from R11 million to R87 million.

The entity also managed to:

- Resolve all the AG audit findings;
- Obtain a clean audit report for 2011/12 ;
- Restore Auditor-General trust on DLCA & DoT management; and
- Build internal capacity with 70% of posts filled

PROGRAMME 5: CIVIL AVIATION

Purpose:

To facilitate the development of an economically viable air transport industry that is safe, secure, efficient, environmentally friendly and compliant with international standards through regulation and investigation and to oversee aviation public entities (and oversee and manage the national aviation and maritime search and rescue regime).

Sub – Programmes

Aviation Regulation
Aviation Infrastructure and Industry Development
Aviation Safety and Security

Strategic objectives, performance indicators and planned targets

- To effectively regulate air transport
- To ensure effective air transport regulation
- To improve airfreight services
- To revise the National Civil Aviation Policy
- To develop the National Strategy for Airport Infrastructure
- To enhance civil aviation regional and international cooperation
- To continuously improve civil aviation safety
- To continuously improve civil aviation security
- To integrate aviation search and rescue regimes, services and systems within the region
- To implement the Medium Earth Orbit Search and Rescue (MEOSAR) satellite system as a regional initiative
- To facilitate and enhance programme that seek to transform and develop the industry at downstream
- To improve airport/airspace efficiency at congested airports
- To minimise aviation emissions
- To monitor performance of three (3) aviation public entities with the legislative framework, annually.

Significant Achievements

Airport/Airspace Slot Coordination Framework: In 2012/2013, the Programme developed a draft slot coordination framework aimed at improving efficiencies at Slot Coordinated Airports and the appointment of a Slot Coordinator. The Programme embarked on the process of drafting regulations to govern the use and management of slots at congested airports. The aim of such regulations is to increase efficiencies at congested airports to streamline slot utilisation and to sweat the existing capital infrastructure. On completion of the draft regulations, the document was submitted to the Civil Aviation Regulations Committee (CARCOM) for further consideration and consultation with industry and the wider public; prior to submitting the consulted regulations to the Minister of Transport for approval. The Airport Slot Regulations, 2012, made in terms of section 155 of the Civil Aviation Act, 2009, were subsequently promulgated on 22 February 2013. In terms of these Regulations, the Air Traffic and Navigation Services Company (ATNS) has been appointed as the Slot Coordinator for South Africa.

Aviation Security: South Africa recently passed an aviation security audit conducted by the United States of America. The passing of this audit is very critical for South Africa as it facilitates the continuation of flights to the USA by South African Airways.

Independent Aircraft Accident and Incident Investigation Body: A Memorandum of Understanding (MoU) between the South African Civil Aviation Authority (SACAA) and the Department of Transport has been drafted and submitted to the Minister of Transport for signature. This MoU facilitates the separation of the aircraft accident and

PERFORMANCE INFORMATION

for the year ended 31 March 2013

incident investigation function from the SACAA. This is an International Civil Aviation Organisation (ICAO) requirement which calls for the separation of the aircraft accident and incident investigation function from the scope of work of the SACAA.

National Airports Development Plan (NADP): In the preparation of the finalisation of the NADP, the Department undertook a programme of consultation with the provinces and stakeholders. To date, thorough consultations were done with the Gauteng and Mpumalanga provinces. The issues of application by the two provinces of more international airports being Inkangala, Rand and Grand Central Airports were discussed.

International Civil Aviation Day and Industry Development: The Programme hosted a resoundingly successful International Civil Aviation Day (ICAD) 2012 that is celebrated annually on 07 December by all member states of the International Civil Aviation Organization (ICAO) in fulfilment of the ICAO's Assembly Resolution A29-1. It was hosted by the North West Provincial Government at Mafikeng Airport in partnership with the various stakeholders in the aerospace industry organized under the banner of Joint Aviation Awareness Program (JAAP) of which the DoT is a partner.

The purpose of the annual celebration is a) to establish and reinforce worldwide awareness of the importance of international civil aviation in the social and economic development of States; and b) to highlight the role of ICAO in promoting the safety, efficiency and regularity of international air transport. Its aim is to reach out to people in communities, which are less exposed to aviation. The format of ICAD 2012 celebration entailed a two-day aviation career expo held at Mafikeng Airport. Sixteen exhibition stands were erected by the aviation industry stakeholders wherein 154 educators and 2 270 Grade 10–12 learners from 79 schools were exposed to a range of careers available in the aviation industry.

These learners were invited from the schools falling within the various districts of the North West province. Worthy to mention, 120 of the invited learners are those living with minor disabilities and they were from the schools adjacent to Mafikeng Airport. The main day, being ICAD, was reserved for the formal programme wherein the Honourable Premier of the North West province, Ms Thandi Modise delivered the key note address to approximately 500 invited dignitaries and guests. The day ended with a magnificent airshow display performed by the pilots from the South African Air Force (SAAF), the South African Airways (SAA) and the South African Police Service (SAPS).

As the ICAD is celebrated yearly on 07 December, it summits the ongoing Promotion of Aviation Amongst Learners as a Career of Choice. The latter seeks to contribute towards unwinding the legacy of the past, namely marginal participation of previously disadvantaged individuals (PDIs) in the aviation industry. This is addressed through month-to-month aviation career awareness campaigns that bring together aviation role players to pursue and achieve transformation of the aviation industry by ensuring that historically disadvantaged youth have access to aviation as a discipline and also play a part in the initiatives aimed at educating, raising awareness and career development.

During the 2012/2013 financial year, the Programme, working together with the JAAP Member Organizations, managed to reach out to 214 schools across the nine provinces of the country. This number has surpassed the target of 70 schools, which was set at the beginning of the current financial year. In an attempt to take the promotion of aviation career awareness amongst learners to new heights and also to upscale critical skills in the aviation industry, the ICAD 2012 event succeeded in identifying three student pilots from one of the local aviation partners, namely the Afrika Union Aviation Academy (AUAA) for whom sponsorship is being sought to support them further in their training towards attaining their Commercial Pilots Licences (CPL) during the 2013/2014 financial year.

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Programme: Civil Aviation					
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Reason for variance	
Reviewed Airlift Strategy	Draft Airlift Strategy	Approval by Cabinet	The draft Airlift Strategy has been finalized and is ready for submission to Cabinet for approval.	Role players and stakeholders were not readily available during the consultation process	
Negotiated and reviewed bilateral air services agreements	Strategic Planning Committee meetings	Identify and engage a minimum of 8 key countries	Signed Air Services frameworks with South Korea, Namibia, Maldives and Nigeria	Moratorium on International Travel	
Liberalized air services frameworks at SADC and in Africa	Strategic Planning Committee meetings	Facilitate the establishment of the institutional framework	Ongoing implementation of the Yamoussoukro Declaration (YD)	Moratorium on International Travel/Late confirmations of dates for consultations	
Reviewed regulatory framework for ACSA and ATNS	A Funding Model and Regulations for the Airports Company South Africa and the Air Traffic and Navigation Services	Incorporate the funding model and regulations into the Permission Application Processes	The funding model completed and adopted in principle by the industry. The Airports Company Act Draft Bill and the Air Traffic and Navigation Services (ATNS) Act Bill are ready for consultation with the industry	The delay with the appointment of the Regulating Committee	
Forecast and planning framework	Forecasting and Planning Framework in place	Collect and analyse data to monitor industry performance/forecast industry performance	<ul style="list-style-type: none"> - Benchmark and continuous collaboration with stakeholders are currently underway - Data is continuously collected and tested against the different approach to forecasting and planning 	The delays in the procurement of the specialized forecasting computer software licence	
Managed Permission Application Process for ACSA and ATNS	Approved Permission for the 2013/14 to 2017/18 and the Gazetted Correction Factor for the year ended 31 March 2012	Facilitate the "Approach to the Permission" process and the Permission Application Process	The regulated companies (ACSA and ATNS) accepted the tariffs as approved by the regulator for the 2010/11 to 2014/15 fourth and fifth year	The delay with the appointment of the Regulating Committee	
Developed Airfreight Strategy	Project was not implemented due to a lack of funding	Developed Airfreight Strategy	Project was not implemented due to a lack of funding	The delay is due to a lack of funding	
National Civil Aviation Policy reviewed	The Draft White Paper (DWP) has not yet been approved by Cabinet during the period under review	Cabinet approval and completion of Parliamentary processes	<ul style="list-style-type: none"> - The draft White Paper on National Civil Aviation Policy (DWP) was Due to the lapse in time and the appointment of senior managers in the newly restructured Branch Civil Aviation, the document was subjected to further internal review Systems. 	<ul style="list-style-type: none"> - Additional work done on the DWP revealed that additional inputs and consultation would be required to address the new developments relating to environmental matters (domestic and notably at the International Civil Aviation Organization (ICAO)) as well as Unmanned Aircraft Systems

PROGRAMME 6: MARITIME TRANSPORT

Purpose

Coordinate the development of a safe, reliable and viable maritime transport sector by developing policies and monitoring and exercising oversight of maritime public entities.

Strategic Objectives:

- To develop maritime transport policy and legislation
- To improve Maritime safety and security
- To create jobs through improved capacity and systems to develop and train seafarers
- To reduce levels of pollution at sea
- To promote catalytic initiatives in the Maritime transport sector

Performance indicators and targets:

In the area of policy and legislation development, the following key performance indicators have been achieved:

The Ballast Water Bill that will give effect to the Ballast Water Convention that SA acceded to has been drafted and consulted extensively with stakeholders in the maritime transport sector. This Bill will prevent pollution of SA ports by effective ballast water treatment.

Two conventions on prevention of pollution by ships, MARPOL Annex IV and VI, have been approved for ratification by Cabinet. The ratification and adoption of these conventions into domestic laws will enable South Africa to comply with international standards and rules.

The Maritime Labour Convention of 2006 and its accompanying Bill have been approved for domestic legislation by the NEDLAC. This convention empowers the seafarers and gives them access to fair labour conditions internationally.

The IMO technical cooperation working group agreed to provide the branch with an expert that would assist with the revamping of the Merchant Shipping Bill of 1957.

The Inland Waterways Strategy has been introduced to the Small Vessels committee of stakeholders. If adopted by the relevant stakeholders, this strategy will assist with curbing the number of incidents in our inland waterways and dams.

Successful progress was made to reduce the SEL1 wreck in Blouberg Strand, at no cost to the DoT. The wreck reduction has resolved the threat of interdepartmental dispute with the City of Cape Town and all issues raised by the Public Protector.

The audit of ports security as per ISPS code was initiated and the ports of KwaZulu-Natal as well as Eastern Cape have been fully audited for compliance with the ISPS code. The results of these audits will be available in the 2013/14 financial year.

The Diplomatic Conference on the Torrelimonos Convention was successfully held in Cape Town in October 2012. The conference resulted in the adoption of the Convention after more than 30 years of negotiation. This Convention seeks to protect the life of seafarers on fishing vessels and thus reduce the number of incidents and fatalities at sea within the fishing community.

The World Maritime Day was successfully hosted in the Eastern Cape. During this event more than 100 students from disadvantaged communities were given an overview of career and skills development opportunities that exist in the maritime transport sector.

Programme: Maritime Transport					
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance
Position paper on the trends in port efficiencies, operations and management		Papers on the current levels of port efficiency and recommendations on best practices and regulatory measures to be adopted	A study of economic participation at SA ports have been completed by Ports Regulator. It was agreed that Ports Regulator will propose measures for adoption	Ports Regulator to lead based on capacity and experience	None
Study on effectiveness of administration and services of current ship registry	<ul style="list-style-type: none"> - Analysis of proposal in previous studies. Workshop with key stakeholders in government - Comparison of open and closed ship registers in selected countries 	Increase in the number of ships registered in the South African Register	A workshop was held with three major shipping lines to understand reasons for not registering in SA. The findings have led to a broader survey with SASOA and will inform the draft policy	Actual increase in ships on register is the mandate of SAMSAs. DoT can only provide a stimulating legislative environment and that part of the work has been completed through the policy	Entity still to implement
Evaluate implementation of Ports Act and proposed amendments	Discussion at NPCC level to get consensus on proposed amendment	Approved amendments on section 3(2) of the National Ports Act	The proposed amendments have been submitted to the Minister and the comments are being implemented	Project is now closed since the Ports Act has been fully endorsed for implementation in MTSF 2012-17	None
Evaluate efficiency of freight logistics and cargo tracking	Desktop research completed	Freight Logistics Database developed	ToR developed. Service provider not yet appointed	The freight logistics database project is being done in ITP branch and has hence been handed over to ITP	Delays in SCM processes
Develop a Green Paper on Maritime Shipping Policy (coastal, trans-shipment, ship repair registration, recycling, etc.)	A study on the economic trends and analysis of the maritime transport sector was completed in 2011	Green Paper on shipping policy approved and ready for launch	Green Paper on Maritime Shipping completed and consultations took place. Decision taken to complete Maritime Transport policy through a Steering Committee	The Green Paper process has been completed. The next step is the update of the overall policy	None
Review of SAMSAs Act	Comparison of mandate of the entity with actual performance	Approved amendments on SAMSAs Act	Proposed amendment drafted. Consultations took place at various levels	Decisions reached to not proceed with amendment till policy finalised	Delays in finalisation of Maritime Policy
Review draft merchant shipping by completing IOPC, CLC, Ballast Water Act, safety regulations, MLC 2006 legislation	Consultation with various departments and NEDLAC in progress	Approved IOPC and CLC Bill and compliance to IMO Conventions	IOPC and CLC Bills approved by Minister and NT for tabling at Cabinet.	The Bills have been drafted in compliance with IMO conventions	None
<ul style="list-style-type: none"> - Development of MoU with relevant stakeholders on Djibouti Code of Conduct - National Coordination Strategy 	Consultation on the Djibouti Code with the State Security agencies and Dept of Home Affairs	Djibouti Code of Conduct signed and RSA ready for implementation	The Minister of Transport signed the Code in May at IMO. Implementation workshop with state security agencies held in December	<ul style="list-style-type: none"> - No variance - Code signed as targeted and being implemented 	None

Programme: Maritime Transport					
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance
ISPS Code Awareness Campaigns	Awareness campaign in all ports	ISPS Code communicated nationally	Communication held at various events and during port security audits	No variance Communication took place as targeted	None
Develop an Inland Waterway Strategy	Strategy development in progress	Inland waterway strategy ready for publication	Inland waterway strategy has been completed	Comments from some key stakeholders outstanding before publication	Awaiting comments from stakeholders
Audit & evaluate implementation of safety regulations and compliance with international conventions and standards	Analysis of VIMS Audit findings from IMO	Maritime Transport Safety Compliance established	Framework for safety compliance audits developed and discussed with stakeholders. MoUs drafted for implementation	None	None
Framework for reporting on safety incidents defined and quarterly report available	Analysis of report from MRCC	Maritime Transport safety report established	Framework for safety report at various level of management developed. Implementation in 13/14. Safety report currently exists	None	None
Develop and monitor regional agreement on LRIT	SAMSA delegated the responsibility for LRIT agreements	Regional cooperation on maritime safety in place	The LRIT agreements have been developed by SAMSA as delegated	No variance	None
Promote career awareness in maritime transport sector	Previous World Maritime Day was hosted by SAMSA in Richard's Bay	Increase awareness and participation in the Maritime Sector. Promote the Port of Ngqura as the new deep water port in the Southern Africa	World Maritime Day 2012 successfully hosted in PE. Attended by more than 100 school learners as well as the leading maritime transport CEOs	No variance	None
Audit rate of employment creation in maritime transport sector over past 3 years and ongoing trend (emphasis on seafarers)	Skills audit and career workshop held by SAMSA in Richard's Bay	Report on rate of job creation in maritime transport sector	Fact finding on all studies done in that area – SAMSA's study, TETA's research and research by universities collated. In-depth analysis in progress	Lack of resources	None
Negotiate bilateral agreements to improve rate of employment of seafarers globally	Various bilateral and multilaterals in progress – ITEC, EU-SA, IBSA, India, etc.	Leverage globalisation to improve SA maritime transport sector and develop the industry locally and internationally	Drafted bilateral with Russia and Panama to improve training opportunities for SA seafarers. Leverage BRICS workshop in terms of strategy to get investment in maritime industry	Several initiatives take place at multi-lateral and bilateral levels to leverage opportunities for the development of this industry	None

PERFORMANCE INFORMATION

Programme: Maritime Transport					
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance
Develop business case for a coastal shipping line between Ngqura and Richard's Bay (type of cargo, duration, cost, benefits)	Analysis of findings from study on economic trends in maritime transport	To establish feasibility of domestic coastal shipping	Agreement with HESA to source university for this research. Nelson Mandela University responded and its proposal was accepted. Single source tender process followed. Appointment to be final in May. Several meetings held with University's coordinator to refine the scope of the project	Not enough budget and expert required	Lack of capacity
Develop business case for ship acquisition and operations (sustainability based on cargo, crew, destinations, ROI, etc.)	Analysis of findings from study on economic trends in maritime transport	To establish financial sustainability of ship ownership and operations	Discussion with CSIR. CSIR not yet responded with a proposal based on the project scope	No budget and no expertise in-house	Lack of capacity
Study on carbon footprint in SA maritime domain	Analysis of outcome of IMO MEPC committee on ways to curb GHG by ships	Report on the extent of pollution by ship transportation in SA waters	ToR drafted and rejected by BIDCOM as too narrow. Desktop research to improve on project scoping	To avoid duplication with ITP, it will be a subset of a similar ITP project. Inputs have been forwarded to ITP	Duplication of roles in Department
Facilitate the implementation of multilaterals on environmental protection within maritime transport	Bid by SAMSA to host the RCC for the Indian Ocean regional committee	Regional cooperation on marine environmental protection established	Legal opinion obtained from SLA of Department of Justice and DIRCO. Both argued against the proposed Host Country agreement due to lack of financial information for sustainability and the issue around foreign officials	In its current state of the agreement, the RCC cannot proceed forward. Workshop with DIRCO and SAMSA to resolve the impasse and protect the interest of the State	Stakeholders engagements still in process
Development of salvage tug ownership and operations model	Analysis of feasibility study done by SAMSA	A Salvage Strategy with recommendation on the ownership and operations model for the State	ToR for existing operations has been submitted to Bidcom and bid advertised in March. Request for extension by prospective bidders. Committee for new tug boat model launched with key stakeholders		
Ratification of: MARPOL Annex IV and V Bunker Fuel Ship Wreck Removal	Cab memo prepared and redrafted for Annex IV and V	Compliance with international conventions (IMO) on marine environmental protection	Cab memo successfully approved by Cabinet for ratification of MARPOL Annex IV and V in September. The Ship Wreck Removal cab memo has been drafted and on its way to Cabinet. The Bunker Fuel cab memo has to be aligned with the decision by NT on collection and administration of funds for international organisations	NT has taken very long to finalise on administration of international funds. Their administration Bill that will give guidance on how to ratify on future conventions related to Fund, is still pending	Delays in finalisation of funding

PERFORMANCE INFORMATION

for the year ended 31 March 2013

PROGRAMME 7: PUBLIC TRANSPORT

Purpose

To promote a safe, reliable, effective, efficient, coordinated, integrated and environmentally friendly public transport system by developing norms and standards as well as regulations and legislation to guide the development of public transport for rural and urban passengers. The branch also regulates inter-provincial public transport and tourism services and monitor and evaluate the implementation of the public transport strategy and the National Land Transport Act.

Strategic Objective

- To regulate public transport
- Public transport industry development
- Efficient and effective scholar transport system
- Development of integrated rapid public transport networks in 12 cities

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Subprogramme: Public Transport Regulation						
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance	
NLTA Amendment Bill	Amendment Bill developed and processed through parliament	Process Amendment Bill through Parliament	Draft Amendment Bill developed. Commenced stakeholder consultation	In addition to the provincial contracting function many more issues and comments emerged in the consultation process.	Consultations on the crafting of solutions took far more time than anticipated	
Establish national (NPTR) and provincial (PRE) and municipal (MRE) regulatory entities	2 PREs	3 PREs and 1 national. Continue studies towards establishment of MREs	<ul style="list-style-type: none"> - The NPTR was established. The Minister signed the establishment on 22 February 2013. Three PREs were supposed to be established, However, only one PRE was established in North West province. Other provinces do not have the capacity or resources to establish their PREs - This is a provincial function and the Department has provided guidelines on the establishment of PREs. The MREs are merely studies by municipalities. Cape Town has completed its study and eThekweni will complete their study in 2013 	Lack of capacity and resources in provinces to establish PREs. To date 5 PREs have been established since 2011	The function of the Department is to provide support to provinces in the establishment of PREs. Where they lack capacity the province delays the PRE establishment	
Train and place interns in municipalities and district municipalities		15	Initially, there were 19 intern intakes. However, 4 found employment in the course of the year. Hence, 15 interns were fully trained. Based on request by district municipalities, the programme was extended by 3 months and ended in June 2013	15 interns fully trained.	The target was met	

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Subprogramme: Public Transport Regulation						
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance	
Number of interprovincial and tourism OL applications processed by the national regulatory entity		500	The number of operating licences could not be processed as the sign off for the establishment of the NPTR only occurred on 22 February 2013 as indicated above	The NPTR was only established in February 2013. Hence processing of applications will only occur in late 2013	Due to change of Minister in July 2012, the establishment of the NPTR was significantly delayed	
Number of appeal cases resolved	18	24	The number of appeals cases resolved could not take place as the Minister only signed off TAT establishment on 4 July 2013. However, 19 appeals were received in 2012/2013. These are now backlogs which the Department will have to resolve in 2013	The TAT was only established in July 2013. Hence appeal applications will only start in August 2013	Due to change of Minister in July 2012, there was significant delay in the establishment of the TAT	
Transport Forums are local municipal functions		17	The function was changed to Research and Investigations in the second quarter of 2012. This function will become operational once the Transport Appeal Tribunal (TAT) becomes operational in August 2013	This function does not exist anymore, as transport forums are municipal functions. The function has been replaced with Research and Investigations	This function has been replaced with Research and Investigations. The new function becomes activated once the TAT starts processing appeals in August 2013	
Subprogramme: Public Transport Industry Development						
Developed systems to ensure full participation of small bus operators in the public transport operations	Strategy and standard constitution for Small Bus Operators developed	Convene a national elective conference for small bus operators	The Conference was held with the exclusion of one province (Mpumalanga)	Legal action taken by some operators in Mpumalanga regarding the elective process in the province posed a risk of delaying the process of formalization and empowerment of Small Bus Operators. Two seats were reserved for the province at the national level pending the settlement of their disputes	The target was achieved including accommodating Mpumalanga on the national council

Subprogramme: Public Transport Industry Development					
Key performance indicator	Baseline (actual output) 2011/2012	Planned target 2012/2013	Actual achievement 2012/2013	Deviation from planned target to actual achievement 2012/2013	Reason for variance
Managed and monitored the public transport contracts and institute subsidy management systems	Draft report (strategy) for sustainable funding of subsidized public transport services was developed	Approval of final funding strategy	A final funding (Public Transport Operations Grant) report for future road based public transport was released in December 2012. The aim of the report is to substantiate the viability of different funding options and the rationale for choosing the proposed funding solution as well as the expected outcomes, benefits and risks associated with the proposed funding option. A stakeholder meeting was convened where the report was presented to branches within the Department, provinces and municipalities	The funding report (Business Case) was more responsive and provided practical reasons for choosing a proper funding solution in conformity with existing policies rather than a strategy	None
Developed taxi industry empowerment implementation plan to support the TR3 2020 Strategy	Established a panel of experts	Implement TR3 2020 Strategy and finalize Terms of Reference to appoint service provider to develop a Cooperative Strategy for Public Transport	Drafted Terms of Reference for the appointment of a service provider to develop a Cooperative Strategy for Public Transport	None	None
Managed roll-out and monitoring of taxi recapitalization project and introduce environmentally friendly taxi vehicles	7 630 taxis to be scrapped	7 857 taxis to be scrapped.	6 457 taxis scrapped	Treasury reduced target to 6 000 vehicles for the financial year and budget reduced accordingly	None
Developed a public transport conflict resolution strategy	Appointed service provider to develop the conflict resolution strategy	Develop and workshop the strategy amongst stakeholders and finalize its development	Final document of the public transport conflict resolution strategy produced	None	None

Programme Expenditure

Administration

Invoices were not yet received from suppliers for the development of a Monitoring and Evaluation Tool (R235,000), for operational plans done for the Africa Cup of Nations tournament (R3 million), and for the Department's contribution towards the upgrade of premises (R6 million).

Funds were committed but remained unspent for the supply and installation of a PABX system (R5.7 million), supply and installation of microphones in Board Rooms (R468,000), supply and installation of door numbers and names (R615,000), the development of a policy for the Road Accident Benefit Scheme (R6.1 million), the appointment of transaction advisors for new premises (R3.6 million), and a public private partnership for a new fleet management services contract (R4.8 million). Transfers to universities and technikons was underspent by R242,218, because one university discontinued its programme. This amount, if a rollover is approved, will be paid to another university. All of the above was requested to be rolled over to the next financial year. The programme saved R554,000 on the procurement of furniture and equipment because posts could not be filled.

Integrated Transport Planning

Underspent on the development of a Transport Sector Economic Regulator (R686,000), consolidating the National Transport Databank (R2 million), completing a study on the Macro Economic Impact of Transport (R628,000), developing a Macro Planning Framework (R1.5 million), developing a Transport Greenhouse Gas Inventory (R1 million), and developing an Energy Consumption Framework (R1.5 million). Underspent R326,000 because posts could not be filled, and saved R703,000 on the procurement of furniture and equipment because posts could not be filled. The programme requested a rollover of R1.5 million to develop a Transport Rural Accessibility/Multi Deprivation Index for South Africa.

Rail Transport

The programme underspent R8 million on a feasibility study for the Moloto Corridor, which was committed and requested as a rollover. It also underspent R1.5 million set aside to develop a Service Level Agreement with the Passenger Rail Agency of South Africa to facilitate an institutional reform for rail, and saved R638,000 on the development of a Rail Policy and Act, which will continue over the medium term. The programme saved R70,000 on the procurement of furniture and equipment because posts could not be filled, and saved R849,000 on operational expenditure.

Road Transport

Road Transport underspent R485,000 because posts could not be filled, and saved R89,000 on the procurement of furniture and equipment because posts could not be filled. R765,000 was saved on investigations on issuing of fraudulent roadworthy certificates. An amount of R2.6 million was requested to be rolled over for investigations on the issuing of fraudulent roadworthy certificates.

Civil Aviation

An amount of R104.8 million was underspent on the upgrade of the Mthatha Airport Runway, because the timing of expenditure was miscalculated on the Adjusted Budget allocations. The programme also underspent on funding the Regulating Committee for determining tariffs for the Airports Company Ltd. and the Air Traffic and Navigation Services Company Ltd. (R2.9 million), the establishment of an Aviation Safety Investigation Board (R2.15 million), and the establishment of an Appeals Committee (R1.325 million). These amounts were requested to be rolled over to the next financial year.

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Maritime Transport

Saved R9.5 million on additional funds allocated to remove the Seli 1 shipwreck from the Bloubergstrand beach because the Navy undertook to remove the wreck, and saved R1.1 million on foreign memberships due to over budgeting for these items. Saved R243,000 on the procurement of furniture and equipment because posts could not be filled.

Public Transport

Underspent the Public Transport Infrastructure and Systems Grant by R103.7 million because the amount was stopped for the City of Johannesburg due to consistent underexpenditure. Underspent R5.874 million because fewer taxis were scrapped than anticipated. Funds were committed but remained unspent for developing a National Public Transport Regulator (R7 million), implementing the Taxi Recapitalization 2020 Strategy (R6 million), the oversight of Integrated Rapid Public Transport Networks (R5 million), and the development of National Land Transport Information Systems (R15 million). These funds were requested as rollovers to the next financial year. The programme underspent on the development of a Scholar Transport Framework (R1.5 million), a Migration Plan for Scholar Transport (R1.5 million), and implementing the "Shova Kalula" (bicycle transport) programme in provinces (R1.689 million).

PERFORMANCE INFORMATION

for the year ended 31 March 2013

Capital investment, maintenance and asset management plan

Capital investment and maintenance (building and property assets):

Not applicable to the Department

Asset Management:

Capital investment and maintenance (building and property assets):

Not applicable to the Department

Asset Management:

Details as to how asset holdings have changed over the period under review, including information on disposals, scrapping and loss due to theft.

Asset holdings of investments did not change during the year. Fixed assets that were required constitute equipment and furniture.

Measures taken to ensure that the Department's asset register remained up to date during the period under review.

An asset management system is in place. Assets are allocated to individuals and recorded on an asset register against the Personal numbers of staff. Physical verification took place at least once in the year. Monthly reconciliations are done between capital expenditure on the BAS and LOGIS systems.

The current state of the Department's capital stock, for example what percentage is in good, fair or bad condition.

The Department does not keep capital stock.

Major maintenance projects that have been undertaken during the period under review.

Not applicable

Facilities that were closed down or down-graded during the period under review.

Not applicable

Projects that will be carried forward to the forthcoming financial year.

Not applicable

New projects that will commence in the forthcoming financial year.

Not applicable

Processes in place for the tendering of projects.

The Department follows normal procurement procedures, and does not tender for major acquisition of assets.

Progress made in addressing the maintenance backlog during the period under review.

Not applicable

Section 3: Governance

GOVERNANCE

for the year ended 31 March 2013

Introduction

Commitment by the Department to maintain the highest standards of governance is fundamental to the management of public finances and resources. Users want assurance that the Department has good governance structures in place to effectively, efficiently and economically utilize the state resources, which is funded by the tax payer.

Risk Management

Nature of risk management

Risk management is recognized as an integral part of sound organizational management. Risk management in the Department of Transport derives its mandate from the Public Finance Management Act (PFMA).

The Public Finance Management Act stipulates in section 38 that:

The accounting officer of a Department must ensure that the Department has and maintains:

- (i) Effective, efficient and transparent systems of financial and risk management and internal control; and
- (ii) A system of internal audit under the control and direction of an audit committee..“

In line with best practice, the governance structures are in place to ensure effective management of risk both at Strategic & Operational level.

The Risk Management and Security Committee held 3 meetings, and 1 risk management workshop was held during the financial year.

Risk management has been incorporated into the performance management system of the Department as well as quarterly reporting to the Audit Committee. Risk Management is also a standing item on the agenda at Executive Committee Meeting. Risk mitigation measures were incorporated into the strategic plan of the Department.

Risk management strategies to identify risks and manage the risks

The risk management strategy of the Department is derived from the COSO (best practice model) risk management model. The Department has a risk register for both strategic risks and operational risks including the risk response plans. The top risks as identified by Risk Owners are prioritized in terms of their importance and are being managed and reported on accordingly.

Progress made in addressing risks identified

DoT has a risk management plan, an important part of maintaining a successful and responsible department. Key controls and mitigation strategies/plans have been identified and are being implemented for both strategic and operational risks to ensure that risks are kept within the Department's acceptable levels.

Fraud and Corruption

The Department's Fraud Prevention Plan is premised on three legs; these being the following:

- Prevention;
- Detection; and
- Fraud Response.

GOVERNANCE

for the year ended 31 March 2013

Fraud Prevention

Prevention aspects of the plan recognise that prevention is better than cure. Several initiatives intended to foster fraud awareness are embarked upon.

Fraud Detection

Fraud Detection becomes relevant where prevention fails. The primary detection mechanism or tool that the Department depends on to detect fraud and corruption is its employees.

Fraud Response

Whenever fraud and corruption occur a preliminary investigation is conducted to verify whether there is any basis for alleged acts of fraud and corruption. Where there is a basis for a fully-fledged investigation, such is conducted culminating in an investigation report. These are represents for approval to their accounting officer and COO for implementation.

Whistle-blowing

Alleged acts of fraud and corruption are reported both internally and externally. The most commonly used avenues for reporting corruption are the national corruption hotline (office of the Public Service Commission) and the Public Protector.

Internally, fraud is reported at times anonymously through letters and also some employees directly/personally approach the investigation unit in the Department.

Handling of reported cases

Upon receipt of allegations of fraud or corruption, a preliminary investigation is conducted. Where it is so warranted a fully-fledged investigation follows.

Minimising Conflict of Interest

The Department has implemented a number of measures/processes to minimise conflict of interest in supply chain management (SCM) that includes:

- The implementation of Standard Bidding Documents, including the SBD 4 Form – Declaration of Interest – for all procurement as a measure to minimize conflict of interest in SCM and the SBD 9 Form – Supplier's Previous Performance with Government. These SBD forms are required for all procurement above R500,00.00. All prospective suppliers/service providers that submit proposals to the Department are required to declare any interest and previous performance and this information is taken into consideration in the evaluation and adjudication process of price quotations and bids;
- Members of the Departmental Bid Evaluation and Departmental Bid Adjudication Committees are also required to sign the necessary Declaration of Interest forms prior to participating in the evaluation and adjudication processes pertaining to bids that have been invited by the Department. Where interest is declared, the respective member is requested to recuse themselves from participating in the SCM process; and
- Security Services is in the process of vetting all SCM officials for security clearances, who have not yet been vetted.

GOVERNANCE

for the year ended 31 March 2013

Code of Conduct

Health Safety and Environmental Issues

The Occupational Health and Safety (OHS) Act set out a legal framework for workplace health and safety. The importance of such a programme is to create and maintain a healthy and safe working environment that is without risks to health and safety of employees and others. Section 7 of the Act requires that the employer develops an OHS policy and procedures guided by the nature and the description of the business.

- The OHS policy and procedures are part of a framework for effective health and safety management (such policy has been developed and approved).
- The purpose of such policy is to provide a regulatory framework for the execution of OHS program at DoT and demonstrate the commitment of the legal duties to be complied with.

Both the employer and employees have a role to play in ensuring the health and safety of employees and others in the workplace.

Health hazards in the workplace are considered to be potentially harmful as they might cause injuries to employees, and therefore the OHS Committee is mandated to advise and make recommendations to the employer on remedial actions to be fulfilled.

Health and safety awareness programmes and induction demonstrate the level of education on health hazards attached to the working activities and provide a broader knowledge on the concept of OHS.

Availability of a first-aid service is to ensure that all injured personnel receive prompt first aid treatment whilst at work.

The emergency preparedness plan serves as a tool to outline all procedures to be followed in an emergency situation. Previous evacuation drills were successfully conducted and were incident-free.

The need for a health and safety programme is determined through the hazard identification and risk assessment and detailing all risk control measures to be fulfilled to manage and ensure a safe working environment.

All health and safety-related complaints are addressed by this unit as the OHS Act aims at protecting the health and safety of persons at work and others who may be exposed to hazards arising out of or in connection with the work activities.

Health and safety is also involved in events management hosted by the Department to oversee the safety of erected temporary structures and legal compliance with disaster management; fire safety and health regulations.

Internal Control Unit

During the financial year, the Directorate: Internal Control and Compliance played a vital role in facilitation of audits conducted by office of the Auditor-General. The Internal Control and Compliance unit managed the administration of audit queries issued by the Auditor-General, and developed action plans to address weaknesses identified in the final management report of the Office of the Auditor-General for the previous financial year. It followed up on the implementation of the action plans to address weaknesses and reported the progress on the implementation of the action plans to the Audit Committee and Executive Committee. The Directorate also coordinated Audit Steering Committee meetings during the audit as an when requested by the Office of the Auditor-General.

GOVERNANCE

for the year ended 31 March 2013

The Directorate: Internal Control and Compliance also performed compliance reviews on compliance with the Public Finance Management Act, Treasury Regulations, financial policies and Supply Chain Management prescripts in the form of post-checking of payment batches and compliance checklists. The consolidated internal control manual which includes all departmental circulars, policies and procedures, business flow charts and forms was developed and posted on the intranet for easy access to all staff.

The Directorate: Internal Control and Compliance also facilitated meetings of the Loss Control Committee and followed up resolutions taken by the Committee. The directorate also managed the safekeeping of payment batches.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Audit Committee
for the year ended 31 March 2013

We are pleased to present our report for the financial year ending on 31 March 2013

Audit Committee Members and Attendance:

The Committee met seven times this financial year as per its approved terms of reference. It consists of the following members:

Name of member	Number of meetings attended
D. Coovadia (Chairperson)	7
D. Block	7
B. Mwelase	7
R. Haman	3
J. Mabala	6

The Committee's meetings were regularly attended by the accounting officer or his/her delegate, internal auditors, the chief financial officer (CFO), management and by the representatives from the office of the Auditor-General South Africa (AGSA) and National Treasury.

Audit Committee Responsibility

The Committee reports that it has operated and performed its oversight responsibilities independently and objectively in compliance with section 38(1) (a) of the PFMA and Treasury Regulations 3.1.13. The Committee has adopted appropriate formal terms of reference as its Audit Committee Charter, which have been approved by the Accounting Officer. The Committee has also regulated its affairs in compliance with the Charter and has discharged its responsibilities as contained therein. The Audit Committee is an advisory Committee of the Department operating with an independent and objective stance.

The effectiveness of internal control

The system of internal control applied by the Department over financial and risk management is effective. In line with the PFMA and the King III Report on corporate governance requirements, internal audit provides the Audit Committee and management with assurance on the appropriateness and effectiveness of the internal controls. This is achieved by means of the risk management process, as well as the identification of corrective actions and suggested enhancements to the controls and processes.

From the reports of the Auditor-General South Africa, we noted that there were some matters reported that indicated material deficiencies in internal control. Despite the challenges of capacity and budget constraints, there was concerted effort and hard work from management and officials to implement the business plan and to achieve the mandate.

However, a number of control deficiencies were reported both by the AGSA and internal auditors during the period under review. Despite these control inadequacies, the Audit Committee is of the view that the system of internal control on financial statements was satisfactory.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Audit Committee
for the year ended 31 March 2013

Internal Audit

During the year under review, internal audit continued to face capacity constraints, which caused a delay in the completion of the planned audits.

Submission of in-year management and monthly/quarterly reports in terms of the Public Finance Management Act

As per discussion with management, management confirmed that the content and quality of monthly and quarterly reports prepared and issued by the Accounting Officer during the year under review were properly formulated and have complied with the PFMA and Treasury Regulations in this regard.

Evaluation of Annual Financial Statements

The Audit Committee has:

- Reviewed and discussed the Annual Financial Statements to be included in the Annual Report with the Auditor-General and the Accounting Officer;
- Reviewed the Auditor-General South Africa's management letter and management's responses thereto;
- Reviewed changes in accounting policies and practices; and
- Reviewed significant adjustments resulting from the audit.

The Audit Committee concurs and accepts the Auditor-General's conclusions on the annual financial statements, and is of the opinion that the audited annual financial statements be accepted and read together with the report of the Auditor-General South Africa.

D Coovadia
Chairperson: Audit Committee

Date: 31 July 2013

Introduction

Organizational environment

The new DoT organizational structure created 96 posts on the new organizational structure, which resulted in the increase from 677 to 773 staff complement. The roll-out of the new organogram resulted in the vacancy rate being reduced from 33% to 26.78%. There are, however, still some challenges with regard to Employment Equity at SMS level. Disability status is at 1.9%.

There has been 77% compliance with the submission of performance agreements, and 43% with regard to half-yearly reviews. Lack of total buy-in from top management is identified as the real cause for failure to achieve 100%. Disciplinary steps will be taken against those who fail to comply.

Labour relations have proven to be very effective and efficient. This resulted into five policies being adopted at DBC.

A HR plan, developed along the lines of the new structure was developed and approved by the Minister, and then submitted to the DPSA. It is currently being implemented. The secondment of employees to DoT agencies and provincial departments may be good to support the agencies and provincial transport departments; however, its unintended consequences result in shortage of capacity of HR in the Department.

The implementation of the Transport sector HRD strategy is underway with the total training interventions attended by 438 (85%) officials. The Workplace Skills Plan was developed and is currently being implemented. The Department has noted an improvement with regard to staff attending skills development interventions. There is a total number of 438 staff, with 293 being those at lower levels, and 46 JMS, 48 MMS and 51 SMS members. The DPSA threshold of

HUMAN RESOURCES MANAGEMENT

for the year ended 31 March 2013

employing interns based on total filled posts on the establishment is 5%. This figure was exceeded by 8% resulting in a total of 13% of interns that were employed in the Department in 2012.

In addition, the skills development programme in the transport sector has seen the registration of 527 students to Centres of Development. More than 227 students have recently graduated. In as much as there are more funds required for the programme to enrol more students, the high drop-out level remains a critical matter. The number of those registered continued to grow to 527 in 2011, from 349 in the preceding year. All draft chapters of the transport sector strategy have been finalized. Through the Technology Research Activity Centres, 462 984 learners have been exposed to the programme.

4.1 Employment and Vacancies

The tables in this section summarise the position with regard to employment and vacancies.

The following tables summarise the number of posts on the establishment, the number of employees, the vacancy rate, and whether there are any staff that are additional to the establishment.

This information is presented in terms of three key variables:

- programme
- salary band
- critical occupations

Departments have identified critical occupations that need to be monitored. In terms of current regulations, it is possible to create a post on the establishment that can be occupied by more than one employee. Therefore, the vacancy rate reflects the percentage of posts that are not filled.

Table 4.1.1 *Employment and vacancies by programme*

Programme	Number of posts on approved establishment	Number of posts filled	Vacancy Rate	Number of employees additional to the establishment
Programme 1	376	286	23.94%	36

Notes

The CORE classification, as prescribed by the DPSA, should be used for completion of this table.

4.2. Job Evaluation

Within a nationally determined framework, executing authorities may evaluate or re-evaluate any job in his or her organisation. In terms of the Regulations all vacancies on salary levels 9 and higher must be evaluated before they are filled. The following table summarises the number of jobs that were evaluated during the year under review. The table also provides statistics on the number of posts that were upgraded or downgraded.

Table 4.2.1 Job Evaluation by Salary band

Salary band	Number of posts on approved establishment	Number of jobs evaluated	% Of posts evaluated by salary bands	Number posts upgraded	% Of posts evaluated	Number posts downgraded	% Of posts evaluated
Lower Skilled (Levels 1-2)	0	0	0	0	0		
Skilled (Levels 3- 5)	64	3	4.68	0	0		
Highly skilled production (Levels 6-8)	245	8	19.6	0	0		
Highly skilled supervision (Levels 9-12)	317	34	10.72	0	0

4.8. HIV/AIDS & Health Promotion Programmes

Table 4.8.1 Steps taken to reduce the risk of occupational exposure

Contracting HIV & related diseases (if any)	
Units/categories of employees identified to be at high risk of contracting HIV & related diseases (if any)	Key steps taken to reduce the risk
All employees are classified as being at high risk of contracting HIV and related diseases, that is why all irrespective of their employment levels are provided with Employee Health and Wellness cards to access counselling services.	Truck Drivers have access to the clinic and counselling services at major Truck Depots such as Harrismith where they receive treatment and advice
Access to VCT and other family, financial and legal matters are provided to all employees indiscriminately	All staff members in DoT and their immediate family members have access to Voluntary Counselling and Treatment (VCT). They have Employee Health and Wellness Cards with a number that they can call to access all the counselling services
Workshops and Seminars are arranged for all categories of employees indiscriminately. Strategic Planning sessions for SMS members are used to provide VCT and other services such as determining Cholesterol, Glucose levels so that they are advised to control and or consult their doctors	Workshops and Seminars are always arranged for staff where they are provided with information related to high risk associated with HIV and Related illnesses.

Table 3.8.2 Details of Health Promotion and HIV/AIDS Programmes (tick the applicable boxes and provide the required information)

Question	YES	NO	Details, if yes
1. Has Department designated a member of the SMS to implement the provisions contained in Part E of Chapter 1 of the Public Service Regulations, 2001? If so, provide her/his name and position.	✓		<ul style="list-style-type: none"> - Every year the Employee Health and Wellness operational plan is developed and reviewed by all stakeholders in the transport sector. - The Monitoring and Evaluation tool developed by DPSA is submitted in terms of progress made on the Operational Plan. - Post-health promotion programme evaluation forms also assist to evaluate the impact. - Trends of the Health Risk Assessments Statistics indicate impact of health promotion programme - E-mails of appreciation from the service users are received - Quarterly EHW Reports (ICAS)
2. Does the Department have a dedicated unit or has it designated specific staff members to promote the health and well-being of your employees? If so, indicate the number of employees who are Involved in this task and the annual budget that is available for this purpose.	✓		<p>3 Staff members</p> <p>The Budget is R 297 500 (Grossly insufficient)</p>
3. Has the Department introduced an Employee Assistance or Health Promotion Programme for your Employees? If so, indicate the key elements/services of this Programme.	✓		<ul style="list-style-type: none"> - The Department has a comprehensive integrated Employee Health and Wellness programme in place which is mainly aimed at enhancing the wellbeing of its employees through a range of wellness interventions such as health education, face-to-face counselling, dealing with loss and trauma. And other proactive programmes such as sports, nutrition, financial management, stress management and family care matters. Total	512	0	305	259	564	

Training provided 1 April 2012 to 31 March 2013

Internal Training

- 438 employees trained which is more than 100% of the set target.
- 21 SMS trained on Governance /King 111; 48 MMS, 46 JMS and 293 on lower levels were trained bringing the total number of all staff who have been exposed to training to 438
- 13% of staff establishment in terms of interns were trained in DOT.
- 61% from previous group got permanent appointment.
- 8 out of 68 got permanent appointments from the current group in and outside DOT.
- 19 interns were also placed in the 14 District Municipalities and have completed their internship programme.
- 8 interns were also placed at RTMC which demonstrates success in terms the job creation opportunities on this programme.
- In total the number of interns placed in DOT, District Municipalities, Prasa and Metrorail (Some of our Agencies is 95 for 2012).
- 120 bursaries were awarded, 10 completed studies, 4 in sciences and critical skills, e.g. (post graduate degree in Maritime and 3 in transport related).

External Training

- 497 FET students were registered, in 5 FET Colleges.

3 more FET Colleges were brought on board, and actively participating in the programme, namely Cape Town College, Montee and Letaba, which has broadened access to the Rural communities to transport and increased the number of Colleges to 8 and the number of registered students from 497 to 1037.

- 462 984 learners have been exposed to the Training and Development through the Transport Research Activity Centre (TRAC) programme whereby 1145 TRAC learners have been registered in Science, Engineering and Technology with 164 in B Eng; 169 Bsc, 356 registered for Diplomas in Engineering.

HUMAN RESOURCES MANAGEMENT

for the year ended 31 March 2013

Section 5:

Financial Information

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

Report by the Accounting Officer to the Executive Authority and Parliament of the Republic of South Africa.

5.1. General review of the state of financial affairs

Important policy decisions and strategic issues facing the Department

Developed transport networks in road, rail, aviation and maritime remain catalysts for economic development and for participation of the majority of our people in the economy. Investments in transport infrastructure across all modes will continue to protect the country's economy and to facilitate access to transport and the movement of people, goods and services.

A focus area will be to attract investments into a number of areas including the maintenance of infrastructure, provision of new infrastructure in rural areas and urban areas of our country. Urban mobility and rural access, including labour intensive road maintenance programmes are some of the key areas of focus over the medium term.

The public transport strategy is still being implemented to reach the ultimate goal of affordable and safe mass public transport networks. It guides public transport subsidy reform, mode rationalisation, the implementation of the taxi recapitalisation programme and integrated rapid public transport networks, which include Bus Rapid Transit systems and priority rail corridors. As the plan is being implemented, it contributes to improving mobility and access to safe transport for more people.

Major challenges persist in the transport sector, notably the backlogs in road maintenance and rail infrastructure. Road maintenance continues to be prioritised through the S'hamba Sonke project through labour-intensive forms of road maintenance.

As an intervention by the National Department of Transport, the Provincial Road Maintenance Grant was secured to "supplement provincial road infrastructure investments". The S'hamba Sonke Programme (SSP) was developed as a framework to implement the Provincial Road Maintenance Grant and was adopted by a Transport MINMEC meeting on 1 February 2011. The SSP is based on the principle of empowerment. Communities, emerging contractors and local suppliers will not only benefit from use of the improved infrastructure provided, but will be considered for jobs, skills development and business opportunities.

The S'hamba Sonke Programme (SSP), through the Provincial Roads Maintenance Grant (PRMG), consists of three budget components. The largest component enables provinces to expand their maintenance activities. The other components allow provinces to repair roads damaged by floods and to rehabilitate roads for coal haulage activities in Mpumalanga and Gauteng.

A focused rail revitalisation programme continues to be a key activity over the medium term to address investment needs in infrastructure such as rolling stock, permanent way, signalling, telecommunications and electrical systems. The Passenger Rail Agency of South Africa Ltd. is proceeding with a turnaround plan to strengthen its financial position, reduce operational costs and to reverse the under investment and under funding in passenger rail, which should have an impact on service delivery and capacity.

Some strategic issues regarding roads facing the Department are:

- Review of the current Road Safety Strategy and the implementation of new strategy geared at achieving a reduction of accidents and the implementation of the Decade of Action by 2020.
- Improvement of service delivery at Driving Licence Testing Centres and Registering Authorities, to increase the output on the acquisition of driving licences and the licensing of motor vehicles.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

- Regulation of the Driving Schools Industry to enhance and improve the driving skills of drivers thereby reducing the number of accidents on public roads. The Department will continue implementing various policy interventions that seek to reduce contributory factors to roads accidents.

Ministerial outputs over the medium term include:

- Increasing the market share of freight to rail.
- Benchmarking the cost of building and maintenance of roads to assess our efficiency and to develop an appropriate funding model.
- Implementation of the Road Infrastructure Strategic Framework for South Africa (RISFSA), which addresses the priority of road maintenance.
- Implementation of the Rural Transport Strategy for South Africa.
- Implementation of road safety interventions and promote road safety to inculcate safe road usage to reduce of road accident fatalities.
- Benchmarking the cost of building and maintenance of roads to assess our efficiency and to develop an appropriate funding model.
- Implementation of the Road Infrastructure Strategic Framework for South Africa (RISFSA), which addresses the priority of road maintenance.
- Implementation of the Rural Transport Strategy for South Africa.
- Reduction of road accident fatalities.
- Development of Integrated Rapid Public Transport Networks.
- Finalization of Green Paper on National Rail Policy and stakeholder consultation.
- Establishment of an Interim Railway Economic Regulatory Capacity as a precursor to an envisaged Single Transport Economic Regulator in future.

To execute its mandate, the Department identified the following strategic outcomes over the medium term:

- An effective and integrated infrastructure network that serves as a catalyst for social and economic development: The Department will ensure the maintenance and strategic expansion of the road network, and support the development of road asset management systems in rural and provincial authorities. In addition the Department will support rail and ports efficiency and enhance capacity and competitiveness.
- Develop and implement legislative amendments to support road safety interventions.
- A safe and secure transport sector: The Department will implement various policy interventions that seek to reduce the number of accidents and incidents in the road, rail, aviation and maritime environment.
- An effective and integrated infrastructure network that serves as a catalyst for social and economic development: The Department will ensure the maintenance and strategic expansion of the road network, and continue to support the development of road asset management systems in rural and provincial authorities. In addition the Department will support rail and ports efficiency and enhance capacity and competitiveness.
- A safe and secure transport sector: The Department will implement various policy interventions that seek to reduce the number of accidents and incidents in the road, rail, aviation and maritime environment.
- Improved public transport systems: Over the medium term, the Department will implement measures to ensure an effective, efficient, affordable and accessible public transport system in both urban and rural areas through, among others, the implementation of integrated public transport networks, and establishment and strengthening of regulatory entities, acquisition of new rail rolling stock, and development and upgrading of priority passenger rail corridors.
- Increased contribution to job creation: The Department will prioritise job creation through the implementation

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

of an industry empowerment model, the finalisation and approval of the maritime policy underpinned by industry development, and broad based black economic empowerment (BEE).

- Increased transport contribution to environmental protection and streamlining of the strategy and regulatory environment: The Department will implement measures aimed at reducing the impact of transport on climate change by supporting more energy efficient modes of freight and passenger transport and promote the use of cleaner fuels.

Key policy developments over the medium term include:

- A draft Green Paper on Rail Transport policy was finalized in April 2012 to create a foundation and framework to stimulate discussion for development and finalization of the National White Paper on Rail Transport Policy. The Green Paper is currently in consultation with key internal stakeholders within Government.
- Road Accident Benefit Scheme Policy and Bill: The draft policy was approved by Cabinet for publication in November 2009, and published in the Government Gazette in February 2010. In terms of an envisaged fundamental overhaul, the draft policy proposes that the Road Accident Fund be replaced by the Road Accident Benefit Scheme Administrator and that the current adversarial system be replaced with a scheme based on the principle of social security. The Department will continue the development of the Road Accident Benefit Scheme Policy along with the development of accompanied legislation and relevant communications about the policy.
- Aviation policy: The purpose of the national civil aviation policy is to address aviation safety and security; institutional arrangements; aviation infrastructure; air transport; general aviation; unmanned aircraft systems; aircraft operations and the environment; human resource development and training; and research and development. In addition the policy will ensure South Africa's compliance with the Convention on International Civil Aviation and address South African and regional civil aviation needs and requirements.
- Maritime transport policy: The intention of this policy is to promote the growth and transformation of the maritime shipping industry and transport sector in general. It seeks to realize regional and continental vision on maritime transport; create jobs throughout the maritime value chain; and grow the economy through efficient port and freight logistics.
- The Department, through the S'hamba Sonke road maintenance plan, developed a draft Road Asset Management Policy that will assist in quantifying and analysing the requirements of the road networks in South Africa. This includes "Knowing Your Network" (Extent of various road networks; Condition of road networks; Intervention on each road network; and Investment requirements on each road network). The policy is at the draft stage and is current being consulted with all interest and affected parties. The policy has been presented in the Road Asset Management Systems Sub-committee of the Committee of Transport Officials (COTO).
- A new formula to allocate funds for roads has been designed and is being applied to all provinces. The new formula is based on extent of road network and its condition; topography; road traffic and weather conditions. These factors reflect the different costs of maintaining road networks in each province. Future allocations will also depend on satisfactory use of the road asset management systems from 2013/14. The grant requires provinces to follow best practices for planning and to use and regularly update road asset management system.
- The Transport Laws and Related Matters Amendment Bill, which deals with amendments related to the Cross-Border Road Transport Act, 1998 and the South African National Roads Agency Limited and National Roads Act, 1998 was taken through the parliamentary processes. The Bill empowers the Cross-Border Road Transport Agency to collect toll on behalf of the South African National Roads Agency Limited. Furthermore, this Bill provides for the differentiation in respect of the amount of toll that may be levied; provides that the regulations made by the Minister must be published by notice in the Gazette; provides for the Minister to make regulations relating to specified toll-related matters; provides for the Minister to publish draft regulations in

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

the Gazette calling for public comment; to provide for certain presumptions relating to the driving, operation and use of vehicles on a toll road and the use of electronic evidence to prove an alleged contravention of the South African National Roads Agency Limited and National Roads Act. This Bill was approved by the National Assembly in March 2013, and sent through for concurrence by the National Council of Provinces (NCOP) in April 2013.

- The Scholar Transport Policy shall be finalised to provide clear guidelines with regard to the transporting of learners in the country. This function is performed by different departments in the various province and a clear migration plan will be developed to address function shift challenges where migration is preferred.

5.1.2 Significant events that have taken place during the year

- The Passenger Rail Agency of South Africa (PRASA) has initiated a project for the acquisition of new rolling stock over a period of twenty years. The tender for the first phase was advertised in April 2012. Bids were received on 30 September 2012 and the preferred bidder was announced by the Minister on 5 December 2012. The contract will see the local manufacture of 3,600 vehicles over a period of ten years at a cost of R51 billion plus escalation. The preferred bidder is Gisela Rail Transport Consortium.
- International Civil Aviation Day: The Programme: Civil Aviation hosted a resoundingly successful International Civil Aviation Day (ICAD) that is celebrated annually on 07 December by all Member States of the International Civil Aviation Organization (ICAO) in fulfilment of the ICAO's Assembly Resolution A29-1:
 - o It was hosted by the North West Provincial Government at Mafikeng Airport in partnership with the various stakeholders in the aerospace industry organized under the banner of Joint Aviation Awareness Program (JAAP) of which the Department is a partner.
 - o The purpose of the annual celebration is; a) to establish and reinforce worldwide awareness of the importance of international civil aviation in the social and economic development of States; and b) to highlight the role of ICAO in promoting the safety, efficiency and regularity of international air transport.
 - o Its aim is to reach out to people in communities, which are less exposed to aviation. A total of 154 educators and 2 270 Grade 10–12 learners from 79 schools were exposed to a range of careers available in the aviation industry. These learners were invited from the schools falling within the various districts of the North West province. Worth mentioning is that 120 of the invited learners are those living with minor disabilities and they were from the schools adjacent to Mafikeng Airport.
 - o As the ICAD is celebrated annually on 07 December it summits the ongoing Promotion of Aviation Amongst Learners as a Career of Choice. The latter seeks to contribute towards unwinding the legacy of the past namely marginal participation of previously disadvantaged individuals in the aviation industry. This is addressed through month-to-month aviation career awareness campaigns that brings together aviation role players to pursue and achieve transformation of the aviation industry by ensuring that historically disadvantaged youth have access to aviation as a discipline and also play a part in the initiatives aimed at educating, raising awareness and career development.
- During the financial year, the Programme: Civil Aviation, working together with the JAAP Member Organizations managed to reach out to 214 schools across the nine provinces of the country. This number has surpassed the target of 70 schools. In an attempt to take the promotion of aviation career awareness amongst learners to new heights and also to upscale critical skills in the aviation industry, the ICAD 2012 event succeeded in identifying three student pilots from one of the local aviation partners namely the Africa Union Aviation Academy for whom sponsorship is being sought to support them to further their training towards attaining their Commercial Pilots Licenses during the 2013/2014 financial year.
- Launch of SIP 2 by Ministers Martins, Gigaba and Patel
- SIP 2 Ministerial engagements in Harrismith and Durban

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

- The International Maritime Organisation held a conference of the maritime industry in Cape Town.
- A National Road Safety Debate was held, which included a Learner's National Road Safety Debate. Each province was represented by five learners and prizes were awarded.
- A National Safety Seminar was held on civil aviation safety.
- Road safety campaigns were held across provinces:
 - o The launch of the Festive season road safety campaign and Remembrance Day for victims of road accidents was held at Emalahleni in November 2012.
 - o Festive season road safety activations of implementation plans for December 2012 to January 2013 were done in Limpopo, Mpumalanga, Eastern Cape and Western Cape. and KwaZulu-Natal.
 - o The launch of the Easter Campaign for road safety took place in Polokwane on 10 March 2013.
 - o Road safety activations of implementation plans for the Easter Campaign took place in KwaZulu-Natal, Eastern Cape, Western Cape and in Polokwane.
- An international road safety conference was held.
- A Provincial Roads Infrastructure Summit was held to develop an integrated approach to address road infrastructure challenges.
- The Zenani Mandela Scholarship certification ceremony for road safety was held at Mthatha on 17 July 2012
- On the maritime transport issues, the following major events took place in 2012/2013:
 - o The Djibouti Code of Conduct was signed by the Minister of Transport in May 2012 at the International Maritime organization (IMO) headquarters. This code provides a framework for preventing acts of piracy at sea.
 - o The Diplomatic Conference on the Torrelimonos Convention was successfully held in Cape Town in October 2012. The conference resulted in the adoption of the Convention after more than 30 years of negotiation. This Convention seeks to protect the life of seafarers on fishing vessels and thus reduce the number of incidents and fatalities at sea within the fishing community.
 - o The World Maritime Day was successfully hosted in the Eastern Cape. During this event more than 100 students from disadvantaged communities were given an overview of career and skills development opportunities that exist in the maritime transport sector. The private sector provided bursaries for two students from disadvantaged communities to further their studies in maritime transport during the event.
 - o For the first time, the Department through the maritime transport branch has successfully sponsored the development of an Assistant Director: Legislation and Policy Development, at the International Maritime Law Institute in Malta.

5.1.3 Major projects undertaken during the year:

- Framework for Airport Slot Coordination:

The development of a formal slot coordination framework received priority attention during the period under review in order to address the growing congestion at the coordinated airports, requiring higher levels of efficiency as well as greater discipline around the usage of slots. South Africa currently has three airports which have been declared fully coordinated, namely O. R. Tambo International Airport, Cape Town International Airport and King Shaka International Airport.

The Slot Coordination Working Group, consisting of the Department of Transport, Airports Company South Africa, Air Traffic and Navigation Services Company, South African Civil Aviation Authority, Airline Association of South Africa, Board of Airline Representatives of South Africa, Commercial Aviation Association of South Africa, and Aircraft Owners and Pilots Association was formed as a consultative forum to assist the development of a suitable South African framework. Following extensive consultations, draft regulations were developed

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

which would govern the use and management of slots at fully coordinated airports. These regulations have undergone the prescribed processes, including consideration by the Civil Aviation Regulations Committee and was submitted to the Minister for approval. The formal slot coordination framework was subsequently established following the promulgation of the Airport Slot Coordination Regulations, 2012, through publication in the *Government Gazette* on 22 February 2013.

- The National Household Travel Survey commenced:
 - o Sample selection process completed.
 - o Definitions in the Training Manual for Survey Officers finalised.
- Single Transport Economic Regulator:
 - o Completed international best practice exercise for rail, maritime and aviation; and multi-sector regulator.
 - o Consulted State Owned Enterprises and private sector companies to help complete a situational analysis.
 - o Conducted research on legislative design options.
- Durban-Free State-Gauteng Logistics and Industrial Corridor [Strategic Infrastructure Project (SIP) 2]:
 - o Northern Cluster (Gauteng): Tambo Springs in design or contracting stage (duration 2012 to 2019); Pyramid in pre-feasibility stage (duration 2011 to 2018); City Deep Container Terminal in construction stage (duration 2012 to 2013).
 - o Central Cluster (Harrismith): Agro-Logistics Hub Infrastructure in concept stage; Fuel Distribution Centre in construction stage.
 - o Southern Cluster (KwaZulu-Natal): Durban Port Container Terminal excluding Rail and Terminals in construction stage; Multi-Product Pipeline in construction stage (duration 2009 to 2014).
- A final report was submitted on Freight Movement Optimisation Plans.
- A study was done on the macro economic impact of transport.
- An economic analysis study on global competitiveness for transport was completed.
- The National Freight Corridor Framework was updated.
- Transport planning was done for the Gauteng-Durban corridor and public transport corridors as part of integrated public transport networks.
- Public Transport Vehicle Conversion from petroleum to compressed natural gas (CNG):
 - o Site visits were completed.
 - o Concluded tentative collaboration mechanisms with service providers that will convert public transport vehicles for their engines to run on both LPG and Compressed Natural Gas.
- Institutional Framework and Arrangements for Interim Rail Economic Regulator done.
- The Passenger Rail Agency of South Africa (PRASA) has initiated a project for the acquisition of new rolling stock over a period of twenty years. The tender for the first phase was advertised in April 2012. Bids were received on 30 September 2012 and the preferred bidder was announced by the Minister on 5 December 2012. The contract will see the local manufacture of 3 600 vehicles over a period of ten years at a cost of R 51 billion plus escalation.
- The Moloto Corridor Development project is registered as a logistical corridor under the Strategic Infrastructure Projects 1 (SIP 1), unlocking the Northern Mineral Belt, of the Presidential Integrated Coordinating Committee (PICC). The project has been registered as a Public Private Partnership (PPP) with Treasury, a project manager within the Department has been appointed as well as service providers appointed in October 2012. The feasibility study is currently on schedule and planned to be completed in March 2014. A final report will include the suitable and preferable transport solution and submission of Treasury Approval 1 (TA 1).
- A study was done on the devolution of the rail function to metropolitan areas.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

- The draft Green Paper on the Rail Policy was reviewed and the development of legislation commenced. The draft Green Paper position was consulted with key internal stakeholders – National Treasury, Department of Trade and Industry, Department of Public Enterprises, Transnet, Passenger Rail Agency of South Africa and the Railway Safety Regulator.
- The Accelerated Rolling Stock Upgrade Programme was started for rail, including the replacing of Signaling systems, upgrading of train stations and accompanied infrastructure.
- A new Provincial Road Maintenance Grant allocation formula was introduced, incorporating Network Extent; Network Condition; Traffic Volumes, Geo-climatic and Topographic factors.
- Provinces were assisted to implement the S’hamba Sonke road maintenance programme.
- The Traffic Sign Manual for the Southern African Development Countries was reviewed.
- Road safety:
 - o Finalised the development of a Task Team for Service Delivery Standards at Driving Licence Testing Centres.
 - o Developed a Road Safety Strategy/Road Safety Councils draft Policy.
 - o Rolled out a successful 2012/2013 Festive Season Road Safety Campaign.
- Consultations continued on the National Airport Development Plan:
 - o Consultations were held with Gauteng and Mpumalanga provinces on the applications for international status.
 - o Extensive consultations were held with the South African Civil Aviation Authority and Airports Company South Africa Ltd. and are ongoing.
- Developed a draft National Road Traffic Amendment Act and published the regulations for comments.
- Finalised the draft legislative amendments dealing with the regulation of driving schools.
- Finalised the process of appointment of a service provider to investigate the issuance of fraudulent roadworthy certificates.
- Finalised the development of the draft minimum service delivery standards to ensure improved service delivery at all customer contact centers.
- The refurbishment of Mthatha airport continued.
- A draft Green Paper on Maritime Transport Policy was completed, and will be further consulted.
- The Ballast Water Management bill that will give effect to the Ballast Water Management Convention has been drafted and consulted extensively with stakeholders in the maritime transport sector. This Bill will prevent pollution of SA ports by effective ballast water treatment.
- Two conventions on prevention of pollution by ships, MARPOL Annex IV and VI, have been approved for ratification by Cabinet. The ratification and adoption of these conventions into domestic laws will enable South Africa to prevent pollution at sea by ships.
- The Maritime Labour Convention of 2006 and its accompanying bill have been approved for domestic legislation by the NEDLAC. This convention empowers the seafarers and gives them access to fair labour conditions on par with global standards.
- The Inland Waterways Strategy has been introduced to the Small Vessels Committee of Stakeholders. If adopted by the relevant stakeholders, this strategy will assist with curbing the number of incidents and accidents in our inland waterways and dams.
- The wreck reduction of the SELI1 wreck in Bloubergstrand successfully took place with assistance of key role players, at no cost to the DoT. The wreck reduction has resolved the threat of interdepartmental dispute with the City of Cape Town and all issues raised by the Public Protector. The method applied to reduce the wreck has saved the Department a possible R40 million.
- The audit of ports security as per ISPS (International Ship and Port Facilities Security) code has been initiated

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

and all the major commercial ports have been fully audited for compliance with the ISPS code. The findings and report of these audits will be available in the 2013/14 financial year.

- Review of the draft Merchant Shipping Act: Negotiated and agreed with the International Maritime Organisation (IMO) to provide technical assistance. The draft Amendment Bills have been drafted and are ready for presentation to Cabinet and Parliament.
- Review of the draft Ballast Water Act: The final stakeholder consultation meeting was held. The draft Bill and Regulations have been submitted to the Departmental Legal Services for processing.
- Oil pollution prevention services and watch keeping services for search and rescue continued.
- A total of 6 457 taxis were scrapped.
- The technical support and verification of bus contract and road infrastructure payments in provinces was started and 98% completed.
- The National Land Transport Act was reviewed.
- A study was completed on automated fare collection for public transport.
- Establishment of a National Public Transport Regulator, Provincial Public Transport Regulators and Municipal Regulatory entities:
 - 1 Provincial Public Transport Regulator was established in North West.
 - The establishment of the National Public Transport Regulator is underway.
 - 17 Interns were trained and placed in District Municipalities.
- Facilitate and Develop Integrated Public Transport Networks (IPTNs):
 - Rea Vaya Phase 1B: Buses were ordered and initial batch is due to be delivered in June 2013. Industry pre-negotiations are proceeding with full negotiations starting in 2013.
 - My CITi Partial Phase 1: On track – 16 km in operation from May 2011. 2 km additional already constructed but not operational. Additional 7 km to be constructed by Sept 2013. Added to the 2 km already completed this additional 9 km will be in operation by December 2013.
 - Nelson Mandela Bay (NMB) Phase 1: The Mayor launched the 25 bus pilot initiative in November and full operations have commenced.
- Develop Integrated Rapid Public Transport Networks in 12 cities by 2014 - Underway in four cities:
 - Ekurhuleni completed plans but new demand surveys are being undertaken.
 - Msunduzi is three quarters through their Operational Plan and are undertaking Business, Marketing and Communication Plans.
 - Mangaung redrafted Operational Plan tender specifications.
 - Rustenburg commenced infrastructure construction in October 2012.
 - Rea Vaya Phase 1B was launched.
- A second draft document on scholar transport safety norms and standards was developed.

5.1.4 Spending trends

The Department underspent its budget by R319 million against the adjusted budget for the year of R39.3 billion, an underexpenditure of 0.8%. A transfer payment from the Public Transport Infrastructure and Systems Grant amounting to R103.7 million was stopped due to consistent underspending by a municipality, and R104, 8 million was underspent against an additional amount allocated on the adjusted budget for the upgrade of the Mthatha Airport, because of the timing of the expenditure. These two items make up 65% of the under expenditure.

Projects amounting to R 73.4 million were delayed or could not be completed, invoices were late in the amount of R18.3 million, and savings of R9.5 million were realised on goods and services and R1.9 million on capital expenditure.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

Fewer taxis were scrapped than budgeted for, resulting in savings of R5.9 million. Compensation of employees was underspent by R1.5 million due to posts that could not be filled.

Explanations for the under expenditure can be viewed in Note 4 to the Appropriation Statement.

Rollovers of unspent funds were requested as detailed below:

Rollovers requested	R'000
Programme 1: Administration:	
Programme Management Unit monitoring and Evaluation tool	235
Programme Management Unit operational plans for the Africa Cup of Nations 2013	3,013
Supply and installation of the PABX system	5,679
Supply and installation of microphones in the Boardrooms	468
Supply and installation of door numbers and names	615
Appointment of a Transaction Advisor for new premises	3,593
Transaction Advisor for a new Public Private Partnership for fleet management services	4,766
Road Accident Benefit Scheme Policy	6,116
Transfer to University of Stellenbosch	242
Office Accommodation	6,000
Sub total	30,727
Programme 2: Integrated Transport Planning:	
Development of a transport rural accessibility/multi-deprivation index for South Africa	1,510
Programme 3: Rail Transport:	
Moloto Development Corridor	8,000
Programme 4: Road Transport	
Conducting investigations into the issuance of fraudulent roadworthy certificates	2,600
Programme 5: Civil Aviation:	
Establishment of the Aviation Safety Investigation Board	2,150
Appeals Committee	1,325
Regulating Committee	2,900
Mthatha Airport refurbishment	104,762
National Airports Development Plan	926
Sub total	112,063
Programme 7: Public Transport:	
National Public Transport Regulator	7,000
Taxi Recapitalisation 2020 (TR3 2020) strategy	6,000
Oversight of Integrated Rapid Public Transport Networks	5,000
National Land Transport Information Systems	15,000
Sub total	33,000
Total of rollovers requested	187,900

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

5.1.5 Adjusted budget and virements

A budget of R38,828,952,000 was allocated to the Department. In its Adjusted budget, additional amounts totalling R818,276,000 were allocated to the Department. This brought the total revised allocation to R39,647,228,000. The additional amount was made up as follows:

Details of budgets	R'000	R'000
Original budget		38,828,952
Funds rolled over from the previous year:		80,376
National Household Travel Survey	34,900	
Development of rail policy and act	2,308	
Technical support and verification of bus contract payments	8,500	
Technical support and verification of road infrastructure payments	30,200	
S'Hamba Sonke Programme Management support	4,468	
Significant and unforeseeable economic and financial events:		3,130
Higher personnel remuneration increases than the main budget provided for	3,130	
Unforeseeable and unavoidable expenditure		470,000
Removal of the Seli 1 wreck from the Bloubergstrand beach near Table Bay	20,000	
Refurbishment of Mthatha Airport	450,000	
Self financing amounts:		297,000
Transaction fees for vehicle registrations	297,000	
Savings		(32,230)
Underspending on taxi recapitalisation transfer	(32,230)	
Total of Adjusted Budget		<u><u>39,647,228</u></u>

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

5.1.6 Other material matters

Gauteng Freeway Improvement Project

The implementation of electronic tolling (e-tolling) on the improved Gauteng Freeways was delayed. In the event that the South African National Roads Agency Ltd. (SANRAL) may not be able to meet its financial commitments, its creditors may call up the guarantees that were provided by government, and government shall have to settle the commitments. Any expenditure that may be incurred by government as a result of guarantees that are called up by creditors, shall constitute unauthorised expenditure for the Department. Financial guarantees that were issued are listed on Annexure 3A to the Annual Financial Statements.

Card production contract

The card production contract has been extended and the Department is investigating the validity of the extension with the intention of disputing the extension.

Irregular contracts concluded

Officials of the Department entered into irregular contracts without following any procurement procedures and for which the cost was not budgeted for. The Department is in a process of disputing the legality of these contracts and investigating these cases. Two cases are listed below:

- A contract was entered into for software that is not required by the Department at a cost of R39.4 million over three years.
- An agreement was entered into for the replacement of a PABX at a cost of R12.4 million while the Department already awarded a bid for the replacement of the PABX.

Unauthorised expenditure:

Unauthorised expenditure of R1.2 billion was incurred in 2008/09 and 2009/10 as overexpenditures of the budgets of Programme 7, due to bus subsidy claims. According to procedure, National Treasury was requested to advise Parliament regarding the approval or otherwise of the unauthorised expenditure.

The national bus subsidy budget was moved to Conditional Grants under the Division of Revenue Act (DORA) from 2009/10 onwards, so that expenditure on bus subsidies can be limited and better managed to ensure that there is no future overexpenditure on bus subsidies.

Fruitless and wasteful expenditure:

Statement of Financial Position and Note 9 to the Annual Financial Statements:

An amount of R469,771 that was included in Other debtors in prior financial years was moved to Fruitless and wasteful expenditure. The expenditure was as a result of the fraudulent delivery and collection of printer cartridges, and is deemed to be fruitless and wasteful due to an act or omission of an official who released the items and because the Department did not yet investigate the case or reported the criminal case to the South African Police Services.

The Department will ensure that the case is investigated and will lodge a criminal case with the South African Police Services.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

Disclosure Note 28 to the Annual Financial Statements:

The Department incurred fruitless and wasteful expenditure of R643,942 during the financial year as a result of “no shows” on vehicle hire and accommodation and services paid for not rendered, of which R1,070 was transferred to debts. A total of R108,119 was written off, including cases from previous financial years. Of the remaining cases amounting to R643,941 at the end of the financial year, R96,601 is in the process of being recovered, R38,529 was included in provisions because the amounts will be written off, and R547,608 is under investigation. Amounts are written off when it is not recoverable because the “no show” was not as a result of a fault of the traveller or officials who made travel arrangements.

Irregular expenditure:

Also refer to Note 27 to the Annual Financial Statements.

Irregular expenditure of R347,369,954 was incurred during 2012/2013 as follows:

- Further expenditure incurred on “site refresh” costs on sites that is managed by a service provider on behalf of the Department without inviting competitive bids, amounting to R1,606,088 in 2012/2013 and R41,852,448 in previous financial years. The matter was investigated, and a disciplinary process is underway.
- Publications were arranged without inviting competitive bids amounting to R492,412. The matter was investigated and a disciplinary process is underway.
- The least expensive quotation was accepted for R60,392 instead of the quotation that scored the highest points. The matter is being investigated.
- Bids were not invited for a construction project amounting to R345,237,479. The National Treasury condoned the expenditure before it was incurred.
- An amount of R26,417 incurred in a previous financial year was recovered.

Four cases of irregular expenditure, amounting to R347,653,828 were condoned. In two cases, disciplinary steps could not be taken because the responsible officials left the employ of the Department. One case is under investigation.

Measures that were put in place detected the incidents of irregular expenditure, and are aimed at preventing irregular expenditure. In some cases control measures cannot prevent irregular expenditure, such as:

- A component receives quotations from Supply Chain Management for approval, but contacts the service provider that scored the highest points directly to commence with the work or deliver the goods without obtaining an official order.
- Although an order was issued to a service provider, the relevant component approved additional work without obtaining prior authorisation.
- Cases in which a component does not obtain quotations and authorises work without following procurement procedures.

Measures that were put in place to prevent and / or detect irregular expenditure are as follows:

- All cases are referred to the Department’s legal services to determine whether any official can be held liable and relevant managers are requested to take disciplinary steps.
- The Bid Adjudication Committee will not consider condoning irregular expenditure until a legal opinion has been obtained where applicable and disciplinary steps were considered.
- The contract management system monitors all payments against orders that are placed, and will detect payments that exceed the contract value.
- The contract management system will detect any payments that are approved for processing for which no order was placed.
- Payments for all procurements must be processed via Supply Chain Management so that any irregular procurement can be detected before payment.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

- To prevent the occurrence of not completing the internal order and requisition forms, the Supply Chain Management component does not make any approval documents or letters of acceptance available until the internal order and requisition forms are completed.
- Initiatives to train all officials who are involved in the approval of procurement matters will continue.

Electronic National Traffic Information System (eNaTIS) transaction fees

The Department is responsible for the maintenance and operations of the eNaTIS system. Transaction fees on the renewal of motor vehicle licenses were introduced in June 2007 to fund the cost of eNaTIS maintenance and operations, and were earmarked for this purpose.

In 2007, National Treasury issued a Practice Note stipulating that the Road Traffic Management Corporation (RTMC) must collect the transaction fees and pay all of the transaction fees that it collected over to the Department. The Department must transfer all the fees received from the RTMC into the National Revenue Fund. Income from transaction fees that was paid into the National Revenue Fund is requested back on the Adjusted Budget of the Department as a self-financing allocation to cover the cost of maintaining the eNaTIS system.

During 2009/10, the RTMC did not pay all of the transaction fees that it collected over to the Department and irregularly used an amount of R200.5 million to fund projects of the RTMC. This amount is included in receivables (claims recoverable) of the Department as an amount owing to the Department by the RTMC on Note 12.1 and Annexure 4 to the Annual Financial Statements. The amount was also included in Disclosure Note 32 as an impairment to debtors in the Annual Financial Statements because the amount may not be recovered from the RTMC.

In turn, the amount of transaction fees that the RTMC used for its own purposes is due to be paid over to the National Revenue Fund as soon as the funds are collected. The amount of R200,5 million that the Department owes to the Revenue Fund is included in payables in Note 17.2 to the Annual Financial Statements.

During the financial year, the RTMC stopped paying over transaction fees that it collected to the Department. Currently the Department does not have evidence that the RTMC spent any of the money on other projects, and therefore the further amounts that was withheld by the RTMC is not included in receivables and payables. Included in receivables in Note 12.4 to the Annual Financial Statements, is the cost of eNaTIS maintenance that was incurred by the Department, amounting to R705 million, that was not yet recovered. No recoverable amounts remain in the National Revenue Fund, because the RTMC stopped paying over the transaction fees.

Although all efforts will be made to recover transaction fees collected by the RTMC, the cost that was incurred on eNaTIS maintenance for which no funds were collected by the Department is included as an impairment to debtors in disclosure note 32 to the Annual Financial Statements.

5.2 Services rendered by the Department

5.2.1 Programmes

Programme 1

The programme provides for the strategic leadership and corporate support to the Minister and the Department's senior management, as well as for various activities associated with organising, managing and administering the Department. The programme also plays a role in building capacity, supporting identified centres of development among the tertiary institutions that provide transport-related education, and supporting the Transport Sector Education and Training Authority. The programme is also responsible for promoting the efficient use of Government motor transport and for determining policy for Government's subsidised motor transport scheme.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

Programme 2

Integrated Transport Planning manages and facilitate national strategic planning including the planning for new projects, and conducts research and formulates national transport policy, including for the cross-modal area of logistics. It also coordinates international and inter-sphere relations.

Programme 3

Facilitate and coordinate the development of sustainable rail transport policies, rail economic and safety regulatory frameworks, infrastructure development strategies and systems that reduces system costs and improves customer service. This programme monitors, and oversees the Railway Safety Regulator (RSR) and the Passenger Rail Agency of South Africa (PRASA). The focus is also on the implementation of integrated rail services planned through the lowest competent sphere of government.

Programme 4

Road Transport ensures safety and security on public roads by the regulation of road traffic management and ensuring the maintenance and development of an integrated road network, through the development of roads related safety and infrastructure standards and appropriate guidelines. The programme also oversees that road based agencies implement the strategic priorities of the department and the government, and ensures that provincial road expenditure is implemented in accordance with government priorities.

Programme 5

Civil Aviation facilitates the development of an economically viable air transport industry that is safe, secure, efficient, environmentally friendly and compliant with international standards through regulation and investigation and to oversee aviation public entities.

Programme 6

Maritime Transport coordinates the development of a safe, reliable and economically viable maritime transport sector through the development of policies and legislation, and through monitoring and oversight of maritime public entities.

Programme 7

Public Transport develops norms and standards as well as regulations and legislation to guide the development of public transport for rural and urban passengers. It regulates interprovincial public transport and tourism services, and monitors and evaluates the implementation of the public transport strategy and the National Land Transport Act (2009).

5.2.2 Tariff policy

The Department does not charge tariffs. A range of tariffs and levies are, however, charged by Public Entities and the Trading Entity under the control of the Department. The Minister of Transport and National Treasury approve these tariffs and levies.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

5.2.3 Free Services

The Department does not render free services.

5.2.4 Inventories

Inventory at the end of the financial year comprised of stationery that was valued at cost on the first in first out basis, amounting to R29,080 (2012 R39,860).

5.3 Capacity constraints

Major capacity constraints and their impact on programmes and service delivery in the transport sector remain as follows:

- The demand for road and rail transport far outstrips the capacity of Government to fund these needs.
- The provincial and local Government's road infrastructure is collapsing through lack of maintenance. Backlogs in road maintenance limit the expansion of the road network, the maintenance of the road network and increases road transportation costs. This is exacerbated by an inability from Roads Authorities, particularly lower order municipalities, to effectively quantify the extent and condition of their network within their jurisdiction. This is attributable to a range of factors including lack of technical engineering skills, budgetary constraints and either poorly maintained or no information technology systems in place to ensure effective asset management. Through the Provincial Road Maintenance Grant provinces were allowed to use up to R10 million per annum to hire technical staff, and up to R1,000 per km per year for paved roads and R500 per km per year for gravel roads of the grant to conduct visual condition assessments for a defined km of road network. Provinces that wanted to use these funds approached the Department for assistance.
- The bulk of the rail infrastructure has reached the end of its economic life. This has severe implications for the punctuality of rail services where frequent breakdowns limit the number of operational rolling stock available due to ongoing maintenance and refurbishment.
- Airport infrastructure needs to keep pace with demands of passenger volume increases. This will require, inter alia, optimising current assets through improving operational efficiency.
- Capacity of ports and the efficiency of port operations need to keep pace with the demands of the economy.
- Serious capacity constraints are being experienced in the roll out of the Public Transport Strategy and Action Plan. Limited public transport planning, business planning and operational (logistical) capacity are available at Provincial and Local levels.
- South Africa requires a maritime transport policy to position itself in the global maritime network and to ensure economic development, job creation and transformation in the maritime industry.
- With regard to anti-piracy measures, the Department has signed the Djibouti Code of Conduct in May12 at the International Maritime Organisation headquarters . The Department now has to ensure that the code is implemented by the various stakeholders within the NATJOINTS and other State Security agencies.
- Within the context of the maritime transport policy, South Africa requires a Coastal Shipping strategy and well-defined transshipment strategy to create opportunities and jobs for South Africans in the maritime transport sector.
- The International Oil Pollution Fund Bill (IOPC) and the Civil Liability Convention Bill (CLC) need to be approved by Parliament in order to protect the South African government against major claims should a major oil spill disaster occur in our waters.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

- The multilateral African Union (AU) Yamoussoukro Declaration of 1988 and the Decision Relating to the Implementation of the Yamoussoukro Declaration Concerning the Liberalisation of Access to Air Transport Markets in Africa of 2000 aim to promote more efficient aviation services across Africa by liberalising air transport for all intra-Africa air services and to harmonise air transport policies in Africa. To date, the Declaration and Decision have only been partially implemented across the continent, mainly through bilateral air services agreements.
- The Department has identified scarce and critical skills in the areas of engineering, logistics, aviation, maritime and road transport (law enforcement officers, incident managers) in collaboration with other partners and stakeholders in the transport sector.
- There are shortages of qualified maritime staff to deliver on strategic outputs such as the development of a maritime transport policy and a maritime security strategy.

Some of the activities that were undertaken to reduce the impact of these capacity constraints are:

- The implementation of the Road Infrastructure Strategic Framework for South Africa addresses road maintenance as well as the roll-out of a road asset management system and the re-classification of the road network, which will inform the prioritisation of roads to be maintained.
- A preferred bidder for the provision of new rolling stock for PRASA over the next ten years was announced.
- The development of the National Airports Development Plan to ensure the airport infrastructure is kept in line with demand to address the rapid increase in air passenger volumes and airport infrastructure.
- The growing congestion at the three fully coordinated airports, requiring higher levels of efficiency as well as greater discipline around the usage of slots, will be addressed through the implementation of the Airport Slot Coordination Regulations, 2012.
- The development of a Freight Logistics Strategy, National Transport Master Plan, Public Transport Strategy and National Passenger Rail Plan.
- Monitoring the outcome, effectiveness and impact of policies on the performance of the transport system.
- Developing a national strategic transport infrastructure framework for all modes of transport.
- Developing and implementing an integrated infrastructure investment plan.
- Developing transport planning requirements, guidelines and standards for alignment of transport plans with other sector plans.
- Development and facilitation of an inter sphere strategic implementation framework for national programmes.
- In addressing the scarce skills, the Department continues its skills development interventions through partnerships with the Centres of Development (COD's), COD-Alumni initiative, Prague Scholarship Programme, internships and learnerships. Officials also participated in specialised training programmes, both in and outside of the country.

5.4. Utilisation of donor funds

The United Nations Development Programme made R1,8 million available over a period of two years, to annually support the stipends of young graduates within the Department across various transport areas. Funding was further made available to assist the unemployed graduates in the State Owned Enterprises to acquire workplace based experience within the scarce skill and critical areas, to strengthen the skills base in areas where skills shortages exist within the respective entities. The Road Traffic Management Corporation and the Cross Border Road Transport Agency have benefited from the funding. 19 Unemployed graduates were further supported to strengthen the capacity base of 14 district municipalities in transport planning. An amount of R601,821 was provided to the Department to support

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

young professionals. Over and above that, a separate allocation of R2.3 million was provided to Programme 7: Public Transport, to advance this capacity building initiative, of which R1.3 million was spent in the year. It is expected that the balance will be spent by June 2013. The Transport Education and Training Authority has also contributed an amount of R265,000 to support department interns through its mandatory grant.

5.5. Trading entities and public entities

Also refer to Annexure 2A to the Annual Financial Statements.

Passenger Rail Agency of South Africa Ltd.

(Chapter 5 of the Legal Succession to the South African Transport Services Act, 1989 (Act No. 9 of 1989))

The main function of the Passenger Rail Agency of South Africa is to ensure that rail commuter services are provided in the public interest at the request of the Department of Transport or any local government body designated as a transport authority. The Agency inherited all assets (land and properties) in and around commuter stations and corridors from the South African Transport Services for the purpose of commercialising them in order to reduce the Government subsidy for commuter rail. The property portfolio is managed by Intersite Property Management Services, a wholly owned subsidiary of the Agency, which was established in 1992. The Agency successfully merged with Metrorail Services in 2007/08, formerly a division of Transnet, to provide commuter rail services. These services are provided in six regions: Gauteng, Tshwane, Cape Town, Durban, Port Elizabeth and East London.

The second phase of merging rail services was completed in March 2009 with the incorporation of Shosholozza Meyl into the Agency. The Agency also took over Autopax from Transnet to increase public transport services, initially for the 2010 Soccer World Cup event.

The financial performance of the Agency can influence the level of public transport subsidies needed to sustain rail commuter subsidies. The enhancement and maintenance of rail infrastructure is key to the policy of promoting a fair playing field for various modes of transport, particularly for public commuter transport subsidies. A major backlog still exists in the rail capital infrastructure.

Government issued guarantees to the Passenger Rail Agency of South Africa of R1.216 billion to guarantee the obligations of Autopax (Pty) Ltd. for the provision of inter-city buses. The remaining guarantee amounts to R133 million at 31 March 2013.

South African National Roads Agency Limited

(The South African National Roads Agency Limited and National Roads Act, 1998 (Act No. 41 of 1998))

The purpose of the South African National Roads Agency is to maintain and develop South Africa's national road network and to manage assets relating to the national road network. The enabling Act charges the Agency, a company registered in terms of the Companies Act, with the following principal tasks:

- Strategically plan, design, construct, operate, rehabilitate and maintain the national roads.
- Deliver and maintain a world-class primary road network.
- Generate revenues from the development and management of assets.
- Undertake research and development to enhance the quality of roads.
- Advise the Minister of Transport on matters relating to roads.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

- Upon request from the Minister of Transport and in agreement with a foreign country, to finance, plan, construct, acquire, provide, operate and maintain roads in that country.

The financial performance of the Agency, with respect to its Public-Private Partnerships, is crucial for the generation of alternative funding mechanisms for the creation and maintenance of national road infrastructure. The Agency's ongoing maintenance of existing national road infrastructure and participation in overloading control initiatives contribute to maintaining transport infrastructure, reducing the need for major future road refurbishment and reducing damage to roads, thereby improving road safety.

Government issued guarantees to the South African National Roads Agency to cover capital market loans of R31.91 billion, bonds and money market loans of R 6 billion, a loan for construction work on the N1 for an amount of R 800 million, and a loan for R1.147 billion.

Road Accident Fund

(The Road Accident Fund Act, 1996 (Act No. 56 of 1996))

The Road Accident Fund compensates victims of vehicle accidents on terms and conditions provided for in various Acts. The Fund receives a dedicated Road Accident Fund levy, which is imposed on petrol and diesel.

The financial performance of the Road Accident Fund impacts on the public's expectation of to what extent they will be compensated for personal injury and fatalities due to certain road accidents. It therefore influences the portion of the fuel levy allocated to the Fund and also influences the concerns of stakeholders and Government regarding the sustainability of the Fund to meet its future commitments.

Cross-Border Road Transport Agency

(The Cross Border Road Transport Act, 1998 (Act No. 4 of 1998))

The Agency regulates and controls access to the cross-border road market by the road transport industry. It facilitates the establishment of cooperative and consultative relationships and structures between public and private sector institutions with an interest in cross-border road transport.

Air Traffic and Navigation Services Company Limited

(The Air Traffic and Navigation Services Company Act, 1993 (Act No. 45 of 1993))

The Air Traffic and Navigation Services Company is responsible for the safe, orderly and expeditious flow of air traffic, and navigational and associated services in its area of control. It provides extensive air traffic information services and related aeronautical support services in the major airspace corridors and at 21 airports throughout South Africa. The company's Aviation Training Academy is a well-established facility currently used by South African students and a large number of African countries for air traffic services training, as well as technical training for equipment support. The company currently manages approximately 10 percent of the world's airspace.

The financial performance of the Company has an impact on cost of the efficiency and effectiveness of aviation safety and the concomitant reliance placed on aviation safety measures in the country and in the SADC region.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

South African Maritime Safety Authority

(The South African Maritime Safety Authority Act, 1998 (Act No. 5 of 1998))

The South African Maritime Safety Authority aims to ensure the safety of life and property at sea, to prevent and combat pollution of the maritime environment by ships, and to promote South Africa as a maritime nation. The financial performance determines the rate at which Maritime safety regulations can be promulgated and implemented.

South African Civil Aviation Authority

(The Civil Aviation Act, 2009 (Act No. 13 of 2009))

The primary purpose of the Civil Aviation Authority is to promote, regulate and support high levels of safety and security throughout the civil aviation industry. Its core activities relate to aviation safety and security oversight of operations, aircraft, personnel, airports and airspace. The Authority also renders aircraft accident and incident investigation services on behalf of the Department of Transport.

The performance of the authority can determine the rate at which Aviation safety regulations can be promulgated and implemented.

Airports Company South Africa Limited

(The Airports Company Act, 1993 (Act No. 44 of 1993))

The Airports Company of South Africa's main operational activities is in three areas:

- Airport services, including the provision and maintenance of runways, taxi-ways and aprons together with terminal facilities, security, fire and rescue services
- Retail and commercial landlord activities, including the provision of space within terminals to appropriate retailers (generally through turnover-related concessions) and the provision of other sites to operators such as car hire firms, banks and advertisers.
- Property activities, including the development of airport infrastructure, retail and office premises and car parking facilities.

The financial performance of the Company influences the rate at which airport infrastructure and operations can be improved and maintained to comply with safety and security regulations and needs.

Road Traffic Management Corporation

(Road Traffic Management Corporation Act, 1999 (Act No.20 of 1999))

The Corporation is responsible for road traffic law enforcement, training of traffic personnel, vehicle registration, licensing and roadworthiness testing, driver testing and licensing, management of traffic information systems, accident investigation and recording and public road safety awareness communication.

The financial performance of the Road Traffic Management Corporation influences the effectiveness and funding needs for all spheres of Government involved in road traffic law enforcement.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

Railway Safety Regulator

(National Railway Safety Regulator Act, 2002 (Act No.16 of 2002))

The Railway Safety Regulator (Regulator) was created in order to:

- Provide for and promote safe railway operations;
- Encourage the collaboration and participation of interested and affected parties in improving railway safety;
- Recognise the prime responsibility and accountability of railway operators in ensuring the safety of railway operations;
- Facilitate a modern, flexible and efficient regulatory regime that ensures the continuing enhancement of safe railway operations; and
- Promote the harmonisation of the railway safety regime of the Republic of South Africa with the objectives and requirements for safe railway operations of the Southern African Development Community.

Ports Regulator

National Ports Act, 2005 (Act No. 12 of 2005)

Main functions of the Ports Regulator:

- Prevent abuse of power by the Ports Authority;
- Ensure equality of access to the provision of port services;
- Monitor the business relationship between Transnet and the Ports Authority to ensure that Transnet does not derive an unfair advantage over other transport companies; and
- Ensure that revenues generated by the Ports Authority are used to the benefit of the Authority and its customers.

Driving License Card Account

The Driving Licence Card Account is a trading entity established to manage bank accounts into which Driving Licence Testing Centres pay funds for the manufacturing of credit card driving licences, and from which the cost of manufacturing these cards are paid.

The primary functions of Driving Licence Card Account are:

- The management of driving licence card fee bank accounts.
- Billing and collection of card fees from all provinces
- Management of the contract for the card production of driving licence cards.
- Overseeing the manufacturing and delivery of driving licence cards.
- Managing live capture units deployed in all provinces used for processing applications for driving licence cards.

The South African Search and Rescue (SASAR) Organisation

(South African Maritime and Aeronautical Search and Rescue Act, 2002 (Act No. 44 of 2002))

SASAR is not a public entity or trading entity, but a cooperative organisation that coordinates search and rescue services.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

SASAR was established to ensure a coordinated and effective provision of maritime and aeronautical search and services within the South African search and rescue regions.

The primary functions of SASAR are to co-ordinate available resources to:

- Search for, assist and, where appropriate, effect a rescue operation for:
 - o Survivors of aircraft crashes or forced landings;
 - o The crew and passengers of vessels in distress;
 - o Survivors of maritime accidents or incidents; and
 - o Survivors of any military aircraft or vessel accident or incident if such aircraft or vessel is not engaged in an act of war.
- Coordinate the evacuation of a seriously injured or ill person from a vessel at sea where the person's condition is such a nature that he or she must obtain medical treatment sooner than that vessel would be able to get him or her to a suitable medical facility.

Air Services Licensing Council (ASLC)

The Air Service Licensing Council (ASLC) is a statutory body established in terms of Section 3 (1) of the Air Services Licensing Act No.115 of 1990. The Air Services Licensing Act, 1990, regulates access to the domestic air services market based on airlines' ability to operate safe, secure and reliable air services. No economic regulation is applicable for entry into the domestic market.

The purpose of the Air Service Licensing Council is:

- To adjudicate the applications for operation of Domestic Air Services;
- The licensing and control of air services; and
- The monitoring of air services to ensure safety and reliability.

International Air Services Council (IASC)

The International Air Services Council (Council) is a statutory body, established in terms of Section 3 of the International Air Services Act 60 of 1993. The Council is responsible for adjudicating applications for licenses and permits to operate International Air Services to and from South Africa.

The purpose of the International Air Service Council is:

- To adjudicate the applications for operation of International Air Services;
- Promote trade with, and tourism to and from, the Republic;
- Promote competition between persons who operate International Air Services;
- Promote a high standard of safety in the operation of International Air Services;
- Promote the development and interest of the local International Air Services industry; and
- Promote the interest and needs of users, or potential users, of International Air Services in the Republic.

Regulating Committee for ACSA and ATNS ("The Regulating Committee")

The Regulating Committee is a statutory body and was established through the promulgation of the Airports Company Act, 1993 (Act No. 44 of 1993). The mandate of the Regulating Committee is the economic and service standards regulation of both the Airports Company South Africa (ACSA) and the Air Traffic and Navigation Services Company (ATNS), to ensure that they do not abuse their monopoly positions.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

The Regulating Committee is expected to perform its duties in terms of the Airports Company Act, 1993, and the Air Traffic and Navigation Services Company Act, 1993 (Act No. 45 of 1993), in such a manner as is best, calculated to:

- Restrain ACSA and ATNS from abusing their monopoly positions, in such a manner as to not place undue restrictions on their commercial activities;
- Promote the reasonable interest and needs of the users of ACSA owned airports, navigation infrastructure, air traffic services and air navigation services;
- Promote the safe, efficient, economical and sustainable operation of the ACSA owned airports, navigation infrastructure, air traffic services and air navigation services;
- Encourage the timely improvement of facilities at ACSA owned airports and air navigation infrastructure so as to satisfy anticipated demands by users; and
- Ensure that ACSA and ATNS, after taking into consideration any compensation paid, or to be paid, to them by the State, are able to finance their obligations and have a reasonable prospect of earning a commercial return.

5.6 Organisations to whom transfer payments have been made

Transfer payments are reported on in Note 6 in the Notes and Note 36 of the Disclosure Notes to the Annual Financial Statements and are listed in Annexures 1A to 1I to the Annual Financial Statements.

Entities to whom transfer payments were made	Amount R'000	Reason for transfer
Departmental agencies	9,910,198	
South African National Roads Agency Ltd.	9,728,055	National roads
Railway Safety Regulator	39,349	Railway safety
South African Civil Aviation Authority	17,025	Aviation safety
South African Maritime Safety Authority	9,288	Maritime safety
Road Traffic Management Corporation	82,412	Road traffic management
Ports Regulator	15,069	Ports regulation
Road Traffic Infringements Agency	19,000	Road traffic infringements
Foreign Governments and international organisations	8,693	
Membership Fees: African Civil Aviation Commission	2931	Membership fees

Accountability Arrangements

The relevant Acts, Memoranda of Understanding, Shareholder Compacts and Performance Agreements govern the accountability arrangements for transfer payments to public entities under the control of the Department, and accountability arrangements with Provinces and Local government to which transfer payments are made. Public entities are also required to submit quarterly reports on performance to the Minister of Transport, and recipients of conditional grants must comply with the provisions of the Division of Revenue Act.

For all transfers, written assurances were obtained from the entities in terms of section 38(1)(j) of the Public Finance Management Act that the entity implements effective, efficient and transparent financial management and internal control systems.

Quarterly financial reports and performance reports of public entities are reviewed, analysed and reported on to the Minister of Transport. These reports are considered before transfer payments are made to public entities that receive transfer payments from the Department.

a Division of Revenue Act Committee meets regularly to ensure that recipients of conditional grants comply with the requirements of the Division of Revenue Act. A compliance matrix is updated monthly for purposes of monitoring compliance with the Act, and to inform the compliance certificate that is sent to National Treasury on a monthly basis.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

5.7 Public private partnerships (PPP)

A Transport Fleet Services Public Private Partnership was entered into during November 2006 to render vehicle fleet services to six Government departments. The contract has since been extended for a period of two years until November 2013. Services that are provided for in the contract include long-term vehicle rentals, short-term day-to-day vehicle rentals, short medium term vehicle rentals, a 24-hour Call Centre, chauffeur and point-to-point driven services, an internet based fleet management system with an electronic log book, and a fuel management system. Also refer to Note 31 in the financial statements.

The PPP contract has been extended for a period of 2 years, up until November 2013, in order to conclude the procurement of a new PPP. There are currently 12 National Government user Departments participating on the contract.

5.8 Corporate governance arrangements

The Internal Audit component is firmly established with the Chief Audit Executive responsible for the overall management of the unit.

The current Audit Committee was appointed in May 2010 for a period of three years. The Department is satisfied with the service rendered by the Audit Committee.

The Risk Management and Security Committee held three meetings, and no risk management workshops were held during the financial year.

Risk management has been incorporated into the performance management system of the Department as well as quarterly reporting to the Audit Committee. Risk mitigation measures were incorporated into the strategic plan of the Department.

An Investigations and Forensics Directorate was established since August 2008.

The Department has a fraud prevention policy, of which the high level objectives are:

- The creation of an anti-fraud culture
- The maximum deterrence/prevention of fraud and corruption
- The prompt and successful detection of fraud and corruption which could not be prevented
- The professional investigation of detected or reported fraud and corruption
- Effective remediation actions including imposition of appropriate sanctions in disciplinary proceedings, civil recouping of funds or assets siphoned from the Department as well as reporting criminal cases to the South African Police Services

The Audit Committee held three special and four regular meetings during the financial year.

5.9 Discontinued activities/activities to be discontinued

None.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

5.10 New/proposed activities

The new activities were or will be undertaken within the Department's budget allocations. Some new activities continue to address capacity constraints in the transport sector and aim to promote the achievement of stated objectives. The operations of the Department are adapted to address the activities.

New activities undertaken during the financial year include:

- The Energy Consumption Study;
- The conversion of Public Transport vehicles to use Compressed Natural Gas (CNG)
- The technical support and verification of bus contract and road infrastructure payments in provinces was started.

New activities to be undertaken during the financial year include:

- Completion of the Road Reclassification Process.
- Development of National Road Asset Management System (RAMS).
- Development and Updating Roads Engineering Standards.
- Development of S'Hamba Sonke Model for road maintenance.
- Development of a Road Safety Audit Programme.

5.11 Asset management

All assets have been captured in the asset register. A proper fixed asset register was established during 2004/05, and an asset management unit was established within the Supply Chain Management component of the Department during that year. The Department complied with the minimum requirements of the asset management reforms since 2004/05.

5.12 Events after the reporting date

None.

5.13 Performance information

Programmes submit and present performance information for each quarter to the office of the Director-General, which consolidates the information and submits it to the Minister of Transport for review.

5.14 Scopa resolutions

Nil

5.15 Prior year audit report

Mechanisms put in place to resolve matters reported by the Auditor-General in the previous financial year are as follows:

- Material underspending of the budget: The Department could again not prevent the stopping of a grant payment to a municipality late in the financial year, which resulted in an under expenditure of R103.7 million. The Department secured additional funds on the budget from 1 April 2013 onwards to create a total of 58

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Accounting Officer
for the year ended 31 March 2013

additional posts on the establishment to improve on corporate governance, oversight over public entities and conditional grant monitoring. These posts are in the process of being filled, and should result in closer monitoring of conditional grant expenditure by provinces and municipalities, to enable the stopping and re-allocation of conditional grants earlier in the year to prevent under expenditure on conditional grant allocations.

- Not all planned targets were met: Performance reports have been completed for each quarter, and were tabled at Executive Committee and Audit Committee meetings.
- Irregular expenditure: Investigations for three of the four cases for which investigations commenced in the previous financial year were completed, and disciplinary processes for these three cases are underway. New investigations were commenced on irregularities for which expenditure was not yet incurred, and legal processes have been started to dispute irregular procurements that took place. Mechanisms were in place to prevent irregular expenditure as detailed in paragraph 1.6, but under certain circumstances irregular actions by individuals cannot be prevented. The disciplinary processes that are underway should serve as a deterrent to officials to comply with laws and regulations.
- The Bid Adjudication Committee, adopted the approach that no submissions for condoning irregular expenditure will be considered unless a legal opinion has been obtained where appropriate and disciplinary steps have been considered, because the Public Finance Management Act does not leave disciplinary steps to the discretion of the Accounting Officer in such cases, but makes it mandatory.
- A progress report on the implementation of mechanisms to resolve matters reported by the Auditor-General is presented to the Audit Committee quarterly.
- Audit reports were regularly tabled for consideration by the Executive Committee. Special meetings were held to consider audit issues and this initiative will be continued to ensure that internal control weaknesses are highlighted and addressed.

5.16 Exemptions or deviations received from the National Treasury

None.

5.17 Interim Financial Statements

Interim financial statements were submitted to the National Treasury on or before the due dates one month after the end of each quarter of the financial year.

5.18 Approval

The Annual Financial Statements set out on pages 163 to 187 have been approved by the Accounting Officer.

Dr. Maria du Toit

Accounting Officer

**DEPARTMENT OF TRANSPORT
VOTE 37**

Report of the Accounting Officer
for the year ended 31 March 2013

**ACCOUNTING OFFICER'S STATEMENT OF RESPONSIBILITY FOR ANNUAL
FINANCIAL STATEMENTS**

Statement of Responsibility for the Annual Financial Statements for the year ended 31 March 2013

The Accounting Authority is responsible for the preparation of the Department of Transport annual financial statements and for the judgments made in this information.

The Accounting Authority is responsible for establishing, and implementing a system of internal control designed to provide reasonable assurance as to the integrity and reliability of the annual financial statements.

In my opinion, the financial statements fairly reflect the operations of the Department for the financial year ended 31 March 2013.

The external auditors are engaged to express an independent opinion on the AFS of the public entity.

The Department of Transport annual financial statements for the year ended 31 March 2013 have been audited by the external auditors and their report is presented on page 159 to 162.

The Annual Financial Statements of the Department of Transport set out on page 163 to page 187 have been approved.

Dr Maria du Toit
Acting Director-General
National Department of Transport

Date:

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Auditor-General to Parliament
for the year ended 31 March 2013

REPORT OF THE AUDITOR-GENERAL TO PARLIAMENT ON VOTE 37: DEPARTMENT OF TRANSPORT

For the year ended 31 March 2013

REPORT ON THE FINANCIAL STATEMENTS

Introduction

1. I have audited the financial statements of the Department of Transport set out on pages 163 to 187, which comprise the appropriation statement, the statement of financial position as at 31 March 2013, the statement of financial performance, statement of changes in net assets and the cash flow statement for the year then ended, and the notes, comprising a summary of significant accounting policies and other explanatory information.

Accounting Officer's responsibility for the financial statements

2. The accounting officer is responsible for the preparation and fair presentation of these financial statements in accordance with the Departmental financial reporting framework and the requirements of the Public Finance Management Act of South Africa, 1999 (Act No. 1 of 1999) (PFMA) and Division of Revenue Act of South Africa, 2012 (Act No. 5 of 2012) (DoRA), and for such internal control as the accounting officer determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor-General's responsibility

3. My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with the Public Audit Act of South Africa, 2004 (Act No. 25 of 2004) (PAA), the General Notice issued in terms thereof and International Standards on Auditing. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.
4. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.
5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Opinion

6. In my opinion, the financial statements present fairly, in all material respects, the financial position of the Department of Transport as at 31 March 2013, and its financial performance and cash flows for the year then ended in accordance with the Departmental financial reporting framework and the requirements of the PFMA and DoRA.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Auditor-General to Parliament
for the year ended 31 March 2013

Emphasis of matters

7. I draw attention to the matters below. My opinion is not modified in respect of these matters.

Significant Uncertainty

8. With reference to note 12.4 to the financial statements, the department is the defendant in a lawsuit concerning the extension of a contract to manage and maintain one of its information technology systems. The ultimate outcome of the matter cannot presently be determined and no provision for any liability that may result has been made in the financial statements.
9. As disclosed in note 12.4 to the financial statements the other debtors account balance includes an amount of R704 million in Electronic National Traffic Information System (eNaTIS) transaction fees to be recovered from the Road Traffic Management Corporation (RTMC). There is currently a dispute between the department and the RTMC on the accounting treatment of the transaction fee and thus there is an uncertainty as to whether the department will recover the receivable. At the date of this report this matter was still not resolved.

Additional matters

10. I draw attention to the matters below. My opinion is not modified in respect of these matters.

Unaudited supplementary schedules

11. The supplementary information set out on page 214 to 227 does not form part of the financial statements and is presented as additional information. I have not audited these schedules and, accordingly, I do not express an opinion thereon.

Financial Reporting Framework

12. The financial reporting framework prescribed by the National Treasury and applied by the department is a compliance framework. The wording of my opinion on a compliance framework should reflect that the financial statements have been prepared in accordance with this framework and not that they "present fairly". Section 20(2) (a) of the PAA, however, requires me to express an opinion on the fair presentation of the financial statements. The wording of my opinion therefore reflects this requirement.

Report on other Legal and Regulatory Requirements

13. In accordance with the PAA and the General Notice issued in terms thereof, I report the following findings relevant to performance against predetermined objectives, compliance with laws and regulations and internal control, but not for the purpose of expressing an opinion.

Predetermined objectives

14. I performed procedures to obtain evidence about the usefulness and reliability of the information in the annual performance report as set out on pages 21 to 101 of the annual report.

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Auditor-General to Parliament
for the year ended 31 March 2013

15. The reported performance against predetermined objectives was evaluated against the overall criteria of usefulness and reliability. The usefulness of information in the annual performance report relates to whether it is presented in accordance with the National Treasury's annual reporting principles and whether the reported performance is consistent with the planned objectives. The usefulness of information further relates to whether indicators and targets are measurable (i.e. well defined, verifiable, specific, measurable and time bound) and relevant as required by the National Treasury Framework for managing programme performance information.

The reliability of the information in respect of the selected programmes is assessed to determine whether it adequately reflects the facts (i.e. whether it is valid, accurate and complete).

16. There were no material findings on the annual performance report concerning the usefulness and reliability of the information.

Additional matter

17. Although no material findings concerning the usefulness and reliability of the performance information was identified in the annual performance report, I draw attention to the following matter below. This matter does not have an impact on the predetermined objectives audit findings reported above.

Achievement of planned targets

18. Of the total number of 288 targets planned for the year, 136 of targets were not achieved during the year under review. This represents 47% of total planned targets that were not achieved during the year under review. This was as a result of the lack of effective monitoring of the achievement of targets on a quarterly basis.

Compliance with laws and regulations

19. I performed procedures to obtain evidence that the entity has complied with applicable laws and regulations regarding financial matters, financial management and other related matters. My findings on material non-compliance with specific matters in key applicable laws and regulations as set out in the General Notice issued in terms of the PAA are as follows:

Procurement and Contract Management

20. Goods and services of a transaction value above R500 000 were procured without inviting competitive bids as per requirements of TR 16A.6.4 and PN 8 of 2007/08.

Human resource management and compensation

Management of vacancies

21. Positions in senior management were vacant for more than 12 months and were not advertised within 6 months which is a non-compliance in terms of paragraph C.1A.2 of the Public Service Regulations, 2001 (PSR).

DEPARTMENT OF TRANSPORT VOTE 37

Report of the Auditor-General to Parliament
for the year ended 31 March 2013

Expenditure Management

22. The accounting officer did not take effective and appropriate steps to prevent irregular expenditure as disclosed in note 27 to the financial statements, as per the requirements of section 38(1) (c) (ii) of the PFMA.

Internal control

23. I considered internal control relevant to my audit of the financial statements, annual performance report and compliance with laws and regulations. The matters reported below under the fundamentals of internal control are limited to the significant deficiencies that resulted in the basis for unqualified opinion, the findings on the annual performance report and the findings on compliance with laws and regulations included in this report.

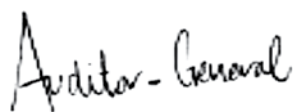

Leadership

24. Lack of coordination and effective oversight on a major capital project that involved different tiers of government.
25. Lack of effective human resource management to ensure that adequate and sufficiently skilled resources are in place.

OTHER REPORTS

Investigations

26. Various investigations are being conducted to evaluate compliance with supply chain management practice notes and regulations in the awarding of certain tenders. The investigations aims to establish whether there were any gross irregularities in the tender process. The investigations were still ongoing at reporting date.

DEPARTMENT OF TRANSPORT VOTE 37

APPROPRIATION STATEMENT
for the year ended 31 March 2013

1. Detail of transfers and subsidies as per Appropriation Act (after Virement):

Detail of these transactions can be viewed in the note on Transfers and subsidies, disclosure notes and Annexure 1 (A-H) to the Annual Financial Statements.

2. Detail of specifically and exclusively appropriated amounts voted (after Virement):

Detail of these transactions can be viewed in note 1 (Annual Appropriation) to the Annual Financial Statements.

3. Detail on payments for financial assets

Detail of these transactions per programme can be viewed in the note to Payments for financial assets to the Annual Financial Statements.

4. Explanations of material variances from Amounts Voted (after Virement):

4.1 Per programme:

	Final appropriation	Actual expenditure	Variance	Variance as a % Of final approp.
	R'000	R'000	R'000	%

Administration	390,899	359,582	31,317	8%
----------------	---------	---------	--------	----

Invoices were not yet received from suppliers for the development of a Monitoring and Evaluation Tool (R235,000), for operational plans done for the Africa Cup of Nations tournament (R3 million), and for the Department's contribution towards the upgrade of premises (R6 million).

Funds were committed but remained unspent for the supply and installation of a PABX system (R5.7 million), supply and installation of microphones in Board Rooms (R468,000), supply and installation of door numbers and names (R615,000), the development of a policy for the Road Accident Benefit Scheme (R6.1 million), and the appointment of transaction advisors for new premises (R3.6 million) and a public private partnership for a new fleet management services contract (R4.8 million).

Transfers to Universities and Technikons was underspent by R242,218, because one university discontinued its programme. This amount, if a rollover is approved, will be paid to another university.

All of the above was requested to be rolled over to the next financial year.

The programme saved R554,000 on the procurement of furniture and equipment because posts could not be filled.

Integrated Transport Planning	110,094	103,480	6,614	6%
-------------------------------	---------	---------	-------	----

Underspent on the development of a Transport Sector Economic Regulator (R686,000), consolidating the National Transport Databank (R2 million), completing a study on the Macro Economic Impact of Transport (R628,000), developing a Macro Planning Framework (R0.7 million), developing a Transport Greenhouse Gas Inventory (R1 million), developing an Energy Consumption Framework (R0.5 million). Underspent R326,000 because posts could not be filled, and saved R703,000 on the procurement of furniture and equipment because posts could not be filled. The programme requested a rollover of R1.5 million to develop a Transport Rural Accessibility/Multi Deprivation Index for South Africa.

Rail Transport	10,297,633	10,286,554	11,079	0.1%
----------------	------------	------------	--------	------

The programme underspent R8 million on a feasibility study for the Moloto Corridor, which was committed and requested as a rollover. It also underspent R1.5 million set aside to develop a Service Level Agreement with the Passenger Rail Agency of South Africa to facilitate an institutional reform for rail, and saved R638,000 on the development of a Rail Policy and Act, which will continue over the medium term. The programme saved R70,000 on the procurement of furniture and equipment because posts could not be filled, and saved R849,000 on operational expenditure.

DEPARTMENT OF TRANSPORT VOTE 37

APPROPRIATION STATEMENT for the year ended 31 March 2013

Final appropriation	Actual expenditure	Variance	Variance as a % Of final approp.
R'000	R'000	R'000	%

Road Transport	18,230,705	18,229,358	1,347	0%
----------------	------------	------------	-------	----

Road Transport underspent R485,000 because posts could not be filled, and saved R89,000 on the procurement of furniture and equipment because posts could not be filled. R765,000 was saved on investigations on issuing of fraudulent roadworthy certificates. An amount of R2.6 million was requested to be rolled over for investigations on the issuing of fraudulent roadworthy certificates.

Civil Aviation	520,807	411,788	109,019	9%
----------------	---------	---------	---------	----

An amount of R104.8 million was underspent on the upgrade of the Mthatha Airport Runway, because the timing of expenditure was miscalculated on the Adjusted Budget allocations. The programme also underspent on funding the Regulating Committee for determining tariffs for the Airports Company Ltd. and the Air Traffic and Navigation Services Company Ltd. (R2.9 million), the establishment of an Aviation Safety Investigation Board (R2.15 million), and the establishment of an Appeals Committee (R1.325 million). These amounts were requested to be rolled over to the next financial year.

Maritime Transport	137,097	124,666	12,431	9%
--------------------	---------	---------	--------	----

Saved R9.5 million on additional funds allocated to remove the Seli 1 shipwreck from the Bloubergstrand beach because the Navy undertook to remove the wreck, underspent R1.5 million on the development of a ship clearance system and saved R1.1 million on foreign memberships due to over budgeting for these items. Saved R243,000 on the procurement of furniture and equipment because posts could not be filled.

Public Transport	9,959,993	9,812,787	147,206	1%
------------------	-----------	-----------	---------	----

Underspent the Public Transport Infrastructure and Systems Grant by R103.7 million because the amount was stopped for the City of Johannesburg due to consistent under expenditure. Underspent R5.874 million because less taxis were scrapped than anticipated.

Funds were committed but remained unspent for developing a National Public Transport Regulator (R7 million), implementing the Taxi Recapitalisation 2020 Strategy (R6 million), the oversight of Integrated Rapid Public Transport Networks (R5 million), and the development of National Land Transport Information Systems (R15 million). These funds were requested as rollovers to the next financial year.

The programme underspent on the development of a Scholar Transport Framework (R1.5 million), a Migration Plan for Scholar Transport (R1.5 million), and implementing the "Shova Kaluala" (bicycle transport) programme in provinces (R1.689 million).

DEPARTMENT OF TRANSPORT VOTE 37

ACCOUNTING POLICIES
for the year ended 31 March 2013

The Financial Statements have been prepared in accordance with the following policies, which have been applied consistently in all material aspects, unless otherwise indicated. However, where appropriate and meaningful, additional information has been disclosed to enhance the usefulness of the Financial Statements and to comply with the statutory requirements of the Public Finance Management Act, Act 1 of 1999 (as amended by Act 29 of 1999), and the Treasury Regulations issued in terms of the Act and the Division of Revenue Act, Act 1 of 2010.

I. Presentation of the Financial Statements

1.1 Basis of preparation

The financial statements have been prepared on a modified cash basis of accounting.

Under this basis, the effects of transactions and other events are recognised in the financial records when the resulting cash is received or paid. The "modification" results from the recognition of certain near-cash balances in the financial statements as well as the revaluation of foreign investments and loans and the recognition of resulting revaluation gains and losses.

In addition supplementary information is provided in the disclosure notes to the financial statements where it is deemed to be useful to the users of the financial statements.

1.2 Presentation currency

All amounts have been presented in the currency of the South African Rand (R) which is also the functional currency of the Department.

1.3 Rounding

Unless otherwise stated all financial figures have been rounded to the nearest one thousand Rand (R'000).

1.4 Comparative figures

Prior period comparative information has been presented in the current year's financial statements. Where necessary figures included in the prior period financial statements have been reclassified to ensure that the format in which the information is presented is consistent with the format of the current year's financial statements.

1.5 Comparative figures - Appropriation Statement

A comparison between actual amounts and final appropriation per major classification of expenditure is included in the Appropriation Statement.

2. Revenue

2.1 Appropriated funds

Appropriated funds comprises of departmental allocations as well as direct charges against revenue fund (i.e. statutory appropriation).

Appropriated funds are recognised in the financial records on the date the appropriation becomes effective. Adjustments made in terms of the adjustments budget process are recognised in the financial records on the date the adjustments become effective.

DEPARTMENT OF TRANSPORT VOTE 37

ACCOUNTING POLICIES

for the year ended 31 March 2013

Unexpended appropriated funds are surrendered to the National/Provincial Revenue Fund. Any amounts owing to the National/Provincial Revenue Fund at the end of the financial year are recognised as payable in the statement of financial position.

Any amount due from the National/Provincial Revenue Fund at the end of the financial year is recognised as a receivable in the statement of financial position.

2.2 Departmental revenue

All departmental revenue is recognised in the statement of financial performance when received and is subsequently paid into the National/Provincial Revenue Fund, unless stated otherwise.

Any amount owing to the National/Provincial Revenue Fund at the end of the financial year is recognised as a payable in the statement of financial position.

No accrual is made for amounts receivable from the last receipt date to the end of the reporting period. These amounts are however disclosed in the disclosure notes to the annual financial statements.

Direct Exchequer receipts

All direct exchequer receipts are recognised in the statement of financial performance when the cash is received and is subsequently paid into the National/Provincial Revenue Fund, unless stated otherwise.

Any amount owing to the National/Provincial Revenue Funds at the end of the financial year is recognised as a payable in the statement of financial position.

2.3 Direct Exchequer payments

All direct exchequer payments are recognised in the statement of financial performance when final authorisation for payment is effected on the system (by no later than 31 March of each year).

2.4 Aid assistance

Aid assistance is recognised as revenue when received

All in-kind aid assistance is disclosed at fair value on the date of receipt in the annexures to the Annual Financial Statements

The cash payments made during the year relating to aid assistance projects are recognised as expenditure in the statement of financial performance when final authorisation for payments is effected on the system (by no later than 31 March of each year)

2.5 The value of the assistance expensed prior to the receipt of funds is recognised as a receivable in the statement of financial position.

Inappropriately expensed amounts using aid assistance and any unutilised amounts are recognised as payables in the statement of financial position.

All CARA funds received must be recorded as revenue when funds are received. The cash payments made during the

DEPARTMENT OF TRANSPORT VOTE 37

ACCOUNTING POLICIES
for the year ended 31 March 2013

year relating to CARA earmarked projects are recognised as expenditure in the statement of financial performance when final authorisation for payments effected on the system (by no later than 31 March of each year)

Inappropriately expensed amounts using CARA funds are recognised as payables in the statement of financial position. Any unutilised amounts are transferred to retained funds as they are not surrendered to the revenue fund.

3. Expenditure

3.1 Compensation of employees

3.1.2 Salaries and wages

Salaries and wages are expensed in the statement of financial performance when the final authorisation for payment is effected on the system (by no later than 31 March of each year).

Other employee benefits that give rise to a present legal or constructive obligation are disclosed in the disclosure notes to the financial statements at its face value and are not recognised in the statement of financial performance or position.

Employee costs are capitalised to the cost of a capital project when an employee spends more than 50% of his/her time on the project. These payments form part of expenditure for capital assets in the statement of financial performance.

3.1.2 Social contributions

Employer contributions to post employment benefit plans in respect of current employees are expensed in the statement of financial performance when the final authorisation for payment is effected on the system (by no later than 31 March of each year).

No provision is made for retirement benefits in the financial statements of the Department. Any potential liabilities are disclosed in the financial statements of the National Revenue Fund and not in the financial statements of the employer department.

Employer contributions made by the Department for certain of its ex-employees (such as medical benefits) are classified as transfers to households in the statement of financial performance.

3.2 Goods and services

Payments made during the year for goods and/or services are recognised as an expense in the statement of financial performance when the final authorisation for payment is effected on the system (by no later than 31 March of each year).

The expense is classified as capital if the goods and/or services were acquired for a capital project or if the total purchase price exceeds the capitalisation threshold (currently R5, 000). All other expenditures are classified as current.

Rental paid for the use of buildings or other fixed structures is classified as goods and services and not as rent on land.

3.3 Interest and rent on land

Interest and rental payments are recognised as an expense in the statement of financial performance when the final authorisation for payment is effected on the system (by no later than 31 March of each year). This item excludes rental

DEPARTMENT OF TRANSPORT VOTE 37

ACCOUNTING POLICIES

for the year ended 31 March 2013

for the use of buildings or other fixed structures. If it is not possible to distinguish between payment for the use of land and the fixed structures on it, the whole amount should be recorded under goods and services.

3.4 Payments for financial assets

Debts are written off when identified as irrecoverable. Debts written-off are limited to the amount of savings and/or underspending of appropriated funds. The write off occurs at year-end or when funds are available. No provision is made for irrecoverable amounts but an estimate is included in the disclosure notes to the financial statements.

All other losses are recognised when authorisation has been granted for the recognition thereof.

3.5 Transfers and subsidies

Transfers and subsidies are recognised as an expense when the final authorisation for payment is effected on the system (by no later than 31 March of each year).

3.6 Unauthorised expenditure

When confirmed unauthorised expenditure is recognised as an asset in the statement of financial position until such time as the expenditure is either approved by the relevant authority, recovered from the responsible person or written off as irrecoverable in the statement of financial performance.

Unauthorised expenditure approved with funding is derecognised from the statement of financial position when the unauthorised expenditure is approved and the related funds are received.

Where the amount is approved without funding it is recognised as expenditure in the statement of financial performance on the date stipulated in the Act.

3.7 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is recognised as expenditure in the statement of financial performance according to the nature of the payment and not as a separate line item on the face of the statement. If the expenditure is recoverable it is treated as an asset until it is recovered from the responsible person or written off as irrecoverable in the statement of financial performance.

3.8 Irregular expenditure

Irregular expenditure is recognised as expenditure in the statement of financial performance. If the expenditure is not condoned by the relevant authority it is treated as an asset until it is recovered or written off as irrecoverable.

4. Assets

4.1 Cash and cash equivalents

Cash and cash equivalents are carried in the statement of financial position at cost.

Bank overdrafts are shown separately on the face of the statement of financial position.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held, other short-term highly liquid investments and bank overdrafts.

DEPARTMENT OF TRANSPORT VOTE 37

ACCOUNTING POLICIES
for the year ended 31 March 2013

4.2 Other financial assets

Other financial assets are carried in the statement of financial position at cost.

4.3 Prepayments and advances

Amounts prepaid or advanced are recognised in the statement of financial position when the payments are made and are derecognised as and when the goods/services are received or the funds are utilised.

Prepayments and advances outstanding at the end of the year are carried in the statement of financial position at cost.

4.4 Receivables

Receivables included in the statement of financial position arise from cash payments made that are recoverable from another party (including departmental employees) and are derecognised upon recovery or write-off.

Receivables outstanding at year-end are carried in the statement of financial position at cost plus any accrued interest. Amounts that are potentially irrecoverable are included in the disclosure notes.

4.5 Investments

Capitalised investments are shown at cost in the statement of financial position.

Investments are tested for an impairment loss whenever events or changes in circumstances indicate that the investment may be impaired. Any impairment loss is included in the disclosure notes.

4.6 Loans

Loans are recognised in the statement of financial position when the cash is paid to the beneficiary. Loans that are outstanding at year-end are carried in the statement of financial position at cost plus accrued interest.

Amounts that are potentially irrecoverable are included in the disclosure notes.

4.7 Inventory

Inventories that qualify for recognition must be initially reflected at cost. Where inventories are acquired at no cost, or for nominal consideration, their cost shall be their fair value at the date of acquisition.

All inventory items at year-end are reflected using the weighted average cost or FIFO cost formula.

4.8 Capital assets

4.8.1 Movable assets

Initial recognition

A capital asset is recorded in the asset register on receipt of the item at cost. Cost of an asset is defined as the total cost of acquisition. Where the cost cannot be determined accurately, the movable capital asset is stated at fair value. Where fair value cannot be determined, the capital asset is included in the asset register at R1.

All assets acquired prior to 1 April 2002 are included in the register R1.

DEPARTMENT OF TRANSPORT VOTE 37

ACCOUNTING POLICIES
for the year ended 31 March 2013

Subsequent recognition

Subsequent expenditure of a capital nature is recorded in the statement of financial performance as “expenditure for capital assets” and is capitalised in the asset register of the Department on completion of the project.

Repairs and maintenance is expensed as current “goods and services” in the statement of financial performance.

4.8.1 Immovable assets

Initial recognition

A capital asset is recorded on receipt of the item at cost. Cost of an asset is defined as the total cost of acquisition. Where the cost cannot be determined accurately, the immovable capital asset is stated at R1 unless the fair value for the asset has been reliably estimated.

Subsequent recognition

Work-in-progress of a capital nature is recorded in the statement of financial performance as “expenditure for capital assets”. On completion, the total cost of the project is included in the asset register of the Department that is accountable for the asset.

Repairs and maintenance is expensed as current “goods and services” in the statement of financial performance.

4.8.1 Intangible assets

Initial recognition

An intangible asset is recorded in the asset register on receipt of the item at cost. Cost of an intangible asset is defined as the total cost of acquisition. Where the cost cannot be determined accurately, the intangible asset is stated at fair value. Where fair value cannot be determined, the intangible asset is included in the asset register at R1.

All intangible assets acquired prior to 1 April 2002 can be included in the asset register at R1.*

Subsequent expenditure

Subsequent expenditure of a capital nature is recorded in the statement of financial performance as “expenditure for capital asset” and is capitalised in the asset register of the Department.

Maintenance is expensed as current “goods and services” in the statement of financial performance.

Liabilities

4.9 Payables

Recognised payables mainly comprise of amounts owing to other governmental entities. These payables are carried at cost in the statement of financial position.

4.10 Contingent liabilities

Contingent liabilities are included in the disclosure notes to the financial statements when it is possible that economic benefits will flow from the Department, or when an outflow of economic benefits or service potential is probable but cannot be measured reliably.

DEPARTMENT OF TRANSPORT VOTE 37

ACCOUNTING POLICIES
for the year ended 31 March 2013

4.11 Contingent assets

Contingent assets are included in the disclosure notes to the financial statements when it is probable that an inflow of economic benefits will flow to the entity.

4.12 Commitments

Commitments are not recognised in the statement of financial position as a liability or as expenditure in the statement of financial performance but are included in the disclosure notes.

4.13 Accruals

Accruals are not recognised in the statement of financial position as a liability or as expenditure in the statement of financial performance but are included in the disclosure notes.

4.14 Employee benefits

Short-term employee benefits that give rise to a present legal or constructive obligation are disclosed in the disclosure notes to the financial statements. These amounts are not recognised in the statement of financial performance or the statement of financial position.

4.15 Lease commitments

Finance lease

Finance leases are not recognised as assets and liabilities in the statement of financial position. Finance lease payments are recognised as a capital expense in the statement of financial performance and are not apportioned between the capital and the interest portions. The total finance lease payment is disclosed in the disclosure notes to the financial statements.

Operating lease

Operating lease payments are recognised as an expense in the statement of financial performance. The operating lease commitments are disclosed in the disclosure notes to the financial statement.

4.16 Impairment

The Department tests for impairment where there is an indication that a receivable, loan or investment may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. An estimate is made for doubtful loans and receivables based on a review of all outstanding amounts at year-end. Impairments on investments are calculated as being the difference between the carrying amount and the present value of the expected future cash flows/service potential flowing from the instrument.

4.17 Provisions

Provisions are disclosed when there is a present legal or constructive obligation to forfeit economic benefits as a result of events in the past and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the obligation can be made.

DEPARTMENT OF TRANSPORT VOTE 37

ACCOUNTING POLICIES
for the year ended 31 March 2013

5. Receivables for departmental revenue

Receivables for departmental revenue are disclosed in the disclosure notes to the annual financial statements. These receivables are written off when identified as irrecoverable and are disclosed separately.

6. Net Assets

6.1 Capitalisation reserve

The capitalisation reserve comprises of financial assets and/or liabilities originating in a prior reporting period but which are recognised in the statement of financial position for the first time in the current reporting period. Amounts are recognised in the capitalisation reserves when identified in the current period and are transferred to the National/Provincial Revenue Fund when the underlying asset is disposed and the related funds are received.

6.2 Recoverable revenue

Amounts are recognised as recoverable revenue when a payment made in a previous financial year becomes recoverable from a debtor in the current financial year. Amounts are either transferred to the National/Provincial Revenue Fund when recovered or are transferred to the statement of financial performance when written-off.

7. Related party transactions

Specific information with regards to related party transactions is included in the disclosure notes.

8. Key management personnel

Compensation paid to key management personnel including their family members where relevant, is included in the disclosure notes.

9. Public private partnerships

A description of the PPP arrangement, the contract fees and current and capital expenditure relating to the PPP arrangement is included in the disclosure notes.

**DEPARTMENT OF TRANSPORT
VOTE 37**

NOTES TO THE ANNUAL FINANCIAL STATEMENTS
for the year ended 31 March 2013

The fruitless and wasteful expenditure of R470,000 was incurred in 2010/11 due to the fraudulent delivery and collection of inkjet cartridges, and was included in Other debtors in prior years. Although the supplier reported the case to the South African Police Services, the Department did not. The Department also did not investigate the case. The Department will ensure that the case is investigated and will lodge a criminal case with the South African Police Services. The amount was included in Provisions in Disclosure Note 33 to the Annual Financial Statements pending the finalisation of the investigation.

It is certified that all the amounts were paid into the primary bank accounts of the Municipalities. In some cases, the amounts that were spent exceed the amount of grants transferred to the recipient. In these cases, additional amounts were spent on the initiatives by the municipalities from their own resources.
