Report on the National Senior Certificate Examination Results

Part 2

2009

The President of the Republic of South Africa, Jacob Zuma during the release of NSC 2009 results at Northern Cape said: "The results were also an indication of the rigour of the examinations. The question papers had been subjected to international scrutiny and benchmarked against equivalent international exams and been declared internationally comparable. These were not easy exams."

ANNEXURE E2: List of schools classified as Quantile Ranking 5	235

FOREWORD BY THE MINISTER OF BASIC EDUCATION

The writing of the 2009 National Senior Certificate (NSC) examination is a significant milestone for education in the democratic South Africa. The class of 2009 represents the second cohort of learners who have gone through twelve years of schooling based on the new curriculum that embodies the imperatives of the social and educational transformation in the country. The challenges associated with the new curriculum and assessments have more or less settled.

This year's Grade 12 examination and assessment processes have been characterized by a pursuit of excellence and the drive to institutionalize quality within every education institution. The Department of Basic Education continues to improve the quality of teaching and learning. Various initiatives and interventions such as the provision of teaching and learning support material, training of examiners and moderators, the development of the Integrated Examination Computer System (IECS) have all contributed to the establishment of an efficient examination and assessment system. It is no mean achievement to have three world renowned assessment agencies such as the Cambridge International Examination (CIE); the Scottish Qualification Authority (SQA) and the Board of Studies New South Wales (BSNSW) all declare that the NSC question papers are internationally comparable.

Of the 552073 learners that wrote the Grade 12 examinations in 2009, 328 394 successfully obtained the National Senior Certificate and are eligible for entry, either into Higher Education Institutions or the world of work. We are encouraged that 334718 learners that exit the schooling system, do so with mathematics or mathematical literacy as a subject. Despite this positive inclusion, there is still room for improvement in the performance of learners in Mathematics and Physical Science. It is quite obvious that curriculum and assessment innovations must still be consolidated into the teaching and learning processes. I am confident that results will begin to show an improvement over the next five years.

I am concerned with the overall drop in performance evident in this examination. My Ministry will take purposeful steps in 2010 to address the challenges revealed in this examination. Once more, the national examination system continues to be one of the reliable measures for the state of education in the Republic of South Africa.

My sincere congratulations to all officials, parents, teachers and communities who have supported and contributed to the successes of the class of 2009. My congratulations also to the learners who have successfully attained the National Senior Certificate. You have made the nation proud.

A handwritten signature in black ink, appearing to read 'A M Motshekga'.

A M Motshekga, MP
Minister of Basic Education
07 January 2010

The Minister of Basic Education, Mrs Angie Motshekga, MP challenges teachers to pursue the national goal for quality education and lifelong learning and development.

The Deputy Minister of Basic Education, Enver Surty, MP challenges learners to pursue educational excellence.

1. EXAMINATIONS IN SOUTH AFRICA

1.1 Introduction

The National Senior Certificate (NSC) examinations are written after twelve years of formal schooling and signify the end of the Further Education and Training band.

This report provides useful statistics on learners' performance in the National Senior Certificate across the nine provinces and districts. On the basis of the information provided, the report seeks to highlight the significant trends observed from the 2008 and 2009 NSC examinations. The Department of Basic Education will begin with a process of an inclusive and comprehensive analysis that will culminate into a programme of action to deal with identified systemic challenges. The statistics presented were subjected to a quality assurance process of Umalusi and they reflect on data as on 07 January 2010. Part 1 of the Report was presented at the press release on 07 January 2010 based on the database as on 06 January 2010, in the Union Building. This part 2 provides the latest statistical evidence and further quantile details and performances in different categories.

1.2 Origin and Context

First Formal Examinations 1858 – 1917

Examinations and assessment have made significant progress over the last 151 years since the first formal examination was conducted in South Africa under the University of the Cape of Good Hope in 1858. Since this first formal examination there have been significant advances in the examination and assessment field in South Africa and the candidature has changed in size and composition.

Joint Matriculation Board (1918 – 1992)

During the period 1918 – 1920 the Joint Matriculation Board (JMB) was the only examination body in the country. The matriculation certificate which was established by the JMB soon became the only exit certificate to universities and many professional careers, and was recognized by several foreign bodies. In 1921 eight departmental examinations were established and they were placed under the JMB as the arbitrator of standards. Standards were maintained by the provision of syllabi, curricular and moderation of question papers. The standard of the JMB examination was considered by learners and teachers to be difficult and the public became more critical about JMB standardization. In the face of this criticism, the JMB applied itself to perfecting the statistical technique in order to improve the reliability of the matriculation examination. During this period, the JMB wrestled with the decentralization of the examinations to provinces and the question of a post-secondary qualification. The university sector wanted a way of selecting students who would succeed in their academic careers, while the JMB claimed that success in the matric indicated that the student attained a desirable standard of general education. By 1980, the proliferation of education departments and the decentralisation of examinations aggravated the problems relating to control and standards.

The SAFCERT Era (1992 – 2001)

SAFCERT was established through South African Certification Council Act of 1986 (Act. No 85 of 1986). SAFCERT was established as a result of the findings of the research conducted by Human Sciences Research Council (HSRC) in 1977. SAFCERT had taken over from the JMB as a body responsible for overseeing of standards and certification. However, this body was accused of employing a selective approach to monitoring standards and of adjusting standards for different racial groups. During the SAFCERT era, the standard of the examination, especially from ex-Department of Education and Training (DET), continued to be a source of concern, in spite of the centralized certification process. This era was short-lived and extremely contested.

National Examinations and Assessment (2001 – 2010)

In 2001, the national Department of Education took on the setting of question papers and this move was driven by the needs to establish national standards across provinces. Five subjects i.e. Mathematics, Physical Science, Biology, Accounting and English Second Language were set nationally while the remaining subjects were set by provinces. The subject increased gradually to 11 subjects in 2007.

With the advent of National Curriculum Statement the National Department took on the setting of all question papers which culminated into 130 papers being set for 27 subjects. The cognitive demand of these question papers was increased to provide learners with the opportunity to demonstrate their potential for higher order thinking. The focus during this period is on setting of standards, that commenced with the curriculum setting process and this dimension is then reflected in every step of the teaching, learning and assessment process. This was regarded as a significant milestone in the history of education in South Africa.

Since 1996, the focus has been on epistemological, socio-cultural and physical access to quality education. This has resulted in a substantial increase in examination enrollments. In 1990, the total number of candidates that wrote the Senior Certificate examination was 360 452 and this has increased to 620 168 candidates in 2009, an increase of more than 70%. The imperative for high quality and standards in examinations and assessment has inspired the Department of Basic Education to ensure that examinations and assessment keeps abreast with international trends. In 2009, the Department of Basic Education has built on the lessons learnt in the 2008 examinations.

1.3 Governance

The national examination system in South Africa is managed by the Department of Basic Education supported by the nine Provincial Education Departments (PEDs). The NSC examinations are administered by the Chief Directorate: National Examination, Assessment and Measurement and coordinated through the inter-Provincial Examination Committee (IPEC), which was established in 1996. IPEC is a sub-committee of the Heads of Department Committee (HEDCOM), comprising provincial heads of examinations from both public and private examining bodies. The other role players are Higher Education South Africa (HESA), Umalusi, South African Qualifications Authority (SAQA), the Independent Examination Board (IEB) and the Teacher Unions. IPEC supports the DoBE in the administration and management of public examinations by implementing national norms and standards set by the DoBE.

National examinations in South Africa are conducted in accordance with the *Regulations Pertaining to the Conduct, Management and Administration of the National Senior Certificate*. The role of the DoBE is to monitor the implementation of these regulations, while the heads of examination in each province are responsible for ensuring that the regulations are implemented with precision in the provincial education department.

The DoBE currently sets all examination question papers for the NSC and monitors all examination processes including the printing, packing and distribution of these question papers to examination centres which are performed by provinces. The writing of the examinations are conducted under the supervision of the PED. Marking is also managed by the PED, while the DoBE standardizes the marking guideline at a national meeting which engages the expertise of the key role players to ensure that the marking system yields consistent scores across provinces. The marks are captured by the PED on the Integrated Examination Computer System (IECS) and the standardization and processing of these results is managed by the DoBE. All results are released on a common date by the Minister of Basic Education, in conjunction with the Members of the Executive Councils (MECs) in each province, responsible for education.

In keeping with the Ministers mandate to ensure that standards are maintained across the system, the DoBE monitors and supports the PEDs in their maintenance and improvement of their examination and assessment system.

1.4 The National Senior Certificate (NSC)

The National Senior Certificate is a new qualification based on the National Curriculum Statement (NCS) that was introduced for the first time in Grade 10 in 2006. To qualify for the writing of the NSC examination a candidate has to go through twelve years of schooling and must complete the programme requirements for Grade 10, 11 and 12 separately.

1.4.1 Requirements for the National Senior Certificate

To qualify for a National Senior Certificate, a learner must offer seven approved subjects and provide full evidence of School Based Assessment for each subject.

For a candidate to obtain a National Senior Certificate he/she must:

- (a) complete the programme requirements for Grades 10, 11 and 12 separately and obtain the distinct outcomes and associated assessment standards for all three years; and
- (b) comply with the internal assessment requirements for Grades 10, 11 and 12 and the external assessment requirements of Grade 12;
- (c) achieve 40% in three subjects, one of which is an official language at Home Language Level;
- (d) achieve 30 % in three subjects; and
- (e) provide full evidence in the school-based assessment component in the subject failed

The requirements are tabulated as follows:

Subject	Achievement Level
One Home Language	40 %
One Home or First Additional Language	} 2 x subjects with 40 % 3 x subjects with 30 % 1 x subject less than 30% (evidence of SBA)
Mathematics or Mathematical Literacy	
Life Orientation	
3 x subjects selected from the approved subject list	

The requirements enunciated above represent a much higher standard than those of the old Report 550 curriculum prescribed for the awarding of the old Senior Certificate, which are as follows:

- ◆ Aggregate of 720 marks
- ◆ Pass two approved languages, at least one at first language SG level, and the other at second language SG level,
- ◆ Pass at least three other subjects

To pass a subject, a candidate must a minimum of 100 marks in the subject, irrespective of the grade on which it was written.

1.4.2 Minimum achievement requirements for the awarding of the National Senior Certificate to candidates with special needs

Learners who experience barriers to learning are allowed to follow an alternative pathway to obtain a National Senior Certificate. Such candidates who experience barriers to learning are defined as learners with special educational needs. A number of concessions, related to the nature of the barrier to learning, identify permissible variants to the rules of combination allowed for the NSC. Barriers to learning identified in the policy include: visual, aural, and hearing impairment, aphasia, dyslexia and mathematical disorders such as dyscalculia.

The endorsed National Senior Certificate is offered to candidates who cannot, despite the concessions granted in the policy, meet the stipulated requirements and who will be awarded the Endorsed National Senior Certificate for learners with special educational needs. Despite the consensus provided in policy there are many checks and balances to ensure that the qualification retains an equivalent standard to the NSC for the main stream.

1.4.3 Assessment in the National Senior Certificate

Assessment in the NSC subjects is based on both the external examinations and internal assessment conducted by the school. The external examinations constitute 75% of the final promotion mark and the internal assessment constitutes 25%. In subjects like Art and Music with a practical component, the practical assessment constitutes 25% which implies that the external examination carries a weighting of 50% in these subjects.

Achievement in the NSC is recorded on a seven (7) point scale which is categorized as follows:

ACHIEVEMENT LEVEL	ACHIEVEMENT DESCRIPTION	MARKS %
7	Outstanding achievement	80 – 100
6	Meritorious achievement	70 – 79
5	Substantial achievement	60 – 69
4	Adequate achievement	50 – 59
3	Moderate achievement	40 – 49
2	Elementary achievement	30 – 39
1	Not achieved	0 – 29

An achieved rating in each subject is based on a minimum of either 30% (elementary achievement) or 40% (moderate achievement).

1.4.4 Minimum requirements for admission to Higher Education

Minimum Higher Education Admission requirements in accordance with the 3 levels of undergraduate programmes are as follows:

(a) Higher Certificate

The minimum admission requirement is a National Senior Certificate with a minimum of 30% in the language of learning and teaching of the Higher Education Institution as certified by Umalusi, the Quality Assurance Council.

Institutional and programme needs may require additional combinations of recognised NSC subjects and levels of achievement.

(b) Diploma

The minimum admission requirement to a Diploma is a National Senior Certificate with a minimum of 30% in the language of learning and teaching of the Higher Education Institution as certified by Umalusi, the Quality Assurance Council, coupled with an achievement rating of 3 (Moderate Achievement, 40 – 49%) or better in four (4) recognised NSC 20-credit subjects. Institutional and programme needs may require additional combinations of recognised NSC subjects and levels of achievement.

(c) Bachelor's Degree

The minimum admission requirement is a National Senior Certificate with a minimum of 30% in the language of learning and teaching of the Higher Education Institution as certified by Umalusi, the Quality Assurance Council, coupled with an achievement rating of 4 (Adequate achievement, 50 – 59%) or better in four subjects chosen from the following recognised 20-credit NSC subjects (which will be known as the designated subject list):

Accounting	Information Technology
Agricultural Science	Languages
Business Studies	Life Sciences
Consumer Studies	Mathematics
Dramatic Arts	Mathematical Literacy
Economics	Music
Engineering Graphics and Design	Physical Sciences
Geography	Religion Studies
History	Visual Arts

1.5 Quality and Standards

One of the main drivers of quality in the NSC is the setting of clearly defined standards which is fundamental in the design of the new curriculum. The National Curriculum Statement (NCS) is framed in terms of learning outcomes and assessment standards and these provide in descriptive terms the desired knowledge, skills, attitudes and values that must be demonstrated by the learners at the end of each grade. These learning outcomes and assessment standards are further elaborated in the Subject Assessment Guidelines (SAGs), Learning Programme Guidelines (LPGs) and in the Examination Guidelines.

There are various standard setting initiatives initiated by the DoBE in the examination and assessment process and these include setting of question papers, standardization of marking guidelines, and standardization of examination results. In addition to these processes, the Department of Education has undertaken an international benchmarking of Grade 12 question papers. These processes are critical quality assurance processes that are essential in enhancing integrity, credibility and public confidence in the NSC qualification.

1.5.1 Question paper

The DoBE provides the Subject Assessment Guidelines (SAGs), Learning Programme Guidelines (LPGs) and the Examination Guidelines as the basis for the standard and the coverage of the content to be examined. The centralisation of the setting of all question papers has allowed for a national norms and standards setting process, which enables national standard to filter through to teaching and learning across all schools in the country. To establish a common standard amongst examiners prior to the setting of question papers, examiners are trained in the setting of question papers and the policy statements are mediated by the Chief Directorate: National Examinations, Assessment and Measurement. Feedback from the marking guideline discussion, the marking process, reports from the Quality Assurance Council, Umalusi, and the benchmarking reports were shared with examiners. This process has bolstered the standard of papers and ensured consistency in the question papers. In 2010, the standard setting process, will once again consider feedback from the 2009 process and will be further strengthened by the formulation of clearer standards relating to the setting process.

1.5.2 Standardization of the marking process

The development of a marking guideline and the subsequent marking guideline discussions are critical to the standardization of the marking process. The setting of a marking guideline by the panel of examiners, provides a standard for the evaluation of learner responses. In order to ensure that this standard has national acceptance, subject experts who are leaders in their subject fields across provinces are carefully selected to refine the marking guidelines.

1.5.3 Standardisation of results

The examination process in South Africa culminates in the standardization of the results conducted by Umalusi in collaboration with the Department of Basic Education (DoBE). The standardization of the results is an international practice undertaken by all assessment agencies in the world to evaluate whether the examination has produced scores that are valid and reliable. The standardization of results has in the past years been dominated by statistics but in recent years more qualitative data is being considered to authenticate the statistical data. The process of standardization is based on the principle of equivalence of standards from year to year. The Quality Assurance Council, Umalusi, which is an independent body, establishes a norm for each subject based on the performance over the last five years. If the marks of learners increase beyond the norm, the DoBE must provide evidence of what caused the results to improve.

The DoBE organized a pre-standardization meeting on 28 and 29 December 2009 and prepared proposals for each subject, with supporting statistical and qualitative data to support the Umalusi standardization meeting.

1.5.4 International Benchmarking

The Department of Basic Education benchmarked the National Senior Certificate examination question papers with three reputable assessment bodies namely, Cambridge International Examinations in the United Kingdom, Scottish Qualification Authority (SQA) in Scotland and Board of Studies New South Wales in Australia. Seventeen (17) question papers for the ten high enrolment subjects which included Mathematics, Mathematical Literacy, Life Sciences, Physical Sciences, Accounting, Economics, Business Studies, History, Geography and English First Additional Language were forwarded to the three assessment bodies for evaluation.

The report produced by the three assessment bodies indicated that the standard of the question papers set by the Department of Basic Education (DoBE) in South Africa is comparable to that of the three countries.

1.5.5 Translation of Question Papers into African Languages.

The DoBE ensures that the examination system is fair and accessible to all learners. One way to achieve this objective would be to ensure that the language used in the question papers does not serve as a barrier to learners achieving their full potential. Therefore, the Department of Basic Education decided to undertake research on the implication of translating question papers into the nine African languages. This initiative by the Department of Basic Education was influenced by the current practice which favours candidates that are English or Afrikaans speaking, since question papers are only provided in English and Afrikaans.

Therefore, as part of this research, the Department translated question papers for four subjects into the nine official African Languages. The question papers were administered in 48 schools and data was collected and analyzed and this included questionnaires for teachers and learners on their attitude towards the translated question papers. The findings of the research are as follows:

- a) In the case of first language speakers, the question paper assesses one issue, namely, their subject knowledge, whereas for second language speakers the examination assesses two issues, namely their subject knowledge and their linguistic competency.
- b) According to J Ebedi (2002:246) learners' proficiency in the language of the examination has a greater impact on learner performance than family income and parent education.
- c) Complex language in content-based assessment for non-native speakers of English may reduce the validity and reliability of inferences drawn about knowledge. Therefore a lack of proficiency in the language of teaching and learning restricts the acquisition of knowledge and skills.
- d) Translated question papers were not accessible to second language learners because familiar concepts which were transliterated became more complex than the normal English words
- e) The translated paper did not improve the performance of learners because of a lack of scientific concepts in African languages and therefore translated question papers or code-switching became a barrier to learners in understanding examination question papers.

It was recommended that a language simplification process should be conducted to simplify the language of question papers. The Department of Basic Education responded to these recommendations and appointed a language specialist whose expertise is beyond that of a conventional editor to make questions accessible to learners. In this regard, the DoBE will tread carefully working with subject specialists to ensure that the language simplification process does not interfere with the technical genre of each discipline.

1.5.6 Grade 11 pilot project

In a bid to ensure that the question papers set for the new curriculum were of the appropriate standard, the Department of Basic Education appointed an independent evaluation team to assess the extent to which the Grade 11 NSC question papers complied with the requirements of the National Curriculum Statement. The objectives of the research were as follows:

- a) To investigate the appropriateness of the standard and quality of the Grade 11 examination question papers.
- b) To examine whether the forms of assessment, structure and format of the Grade 11 examination papers were in compliance with the National Curriculum Statements;
- c) To investigate whether teaching and learning in the classroom has adequately prepared learners to respond to the demands of the new curriculum;
- d) To establish the level of difficulty of questions in the Grade 11 examination papers.

According to the findings of this project, Accounting, Economics, Physical Sciences, Mathematics and Life Sciences were judged to be very difficult with 60% of the learners scoring less than 50%. The more able learners were able to grapple with this difficult standard while the majority of learners struggled. According to experts on item analysis, a question paper is of a high standard when the majority of the items are at moderate difficulty while only a small proportion comprises easy and difficult items. However, the standard of question papers for English First Additional Language was evaluated to be appropriate.

Items that were considered ambiguous and poorly formulated and which performed poorly during the pilot examination because they could not discriminate between learners who have the content knowledge and those that did not, were highlighted for consideration by examiners.

These findings were incorporated into the development of question papers and this empirical evidence assisted examiners in pitching items at the right intellectual level.

Girl learners ponder the future in confidence based on skills acquired through the National Curriculum Statement (NCS)

2. THE 2009 NATIONAL SENIOR CERTIFICATE (NSC) EXAMINATION

2.1 Introduction

This chapter seeks to provide better insight into the 2009 NSC examination cycle and the associated processes. The chapter also outlines quality measures that are involved in each of the processes that contributes to the administration of a credible examination in South Africa.

2.2 The magnitude and size of the NSC examination

The learners that wrote the 2009 NSC examinations enrolled in Grade 1 in 1997. This implies that the class of 2009 has had 12 years of schooling under the democratic government and was exposed to the 12 years of the world class national curriculum.

The 2009 NSC examination is different from the 2008 examination in that it includes repeater candidates, i.e. candidates that failed to meet one or more requirements of the NSC in 2008. The examination system and processes had to be adapted to accommodate 39 255 part-time repeat candidates. The full time enrollment for 2009 is 580 937. In total 620 192 candidates enrolled for the 2009 NSC examination, which is 30 433 more than the 2008 examination (total enrollment in 2008 = 589,759). The biggest increases in enrollment in 2009 are noted in the Eastern Cape (15.6% increase), Gauteng (4.3% increase), Limpopo (10.7 increase) and Western Cape (6.3%) provinces. There is a slight decline in the number of candidates who enrolled for the examination in North West compared to 2008, a decrease of 5.7%.

2.3 The Examination Cycle

The examination cycle is a sequence of processes relating to the preparation for the external examination, to ensure the delivery of a credible examination. The processes begin with the registration of examination centres and end with certification. In line with international standards, the examination cycle commences more than eighteen (18) months prior to the scheduled examination date.

The illustration below indicates the different examination processes:

Figure 1: Illustration of the Examination Cycle

2.3.1 Registration of examination centres

All public and independent schools wishing to conduct examinations are required to be evaluated three months prior to the year of the examination. In order to register as an examination centre, the centre must satisfy certain criteria which are listed in the *Regulations pertaining to the Conduct, Administration and Administration and Management of Assessment for the National Senior Certificate (29 August 2008)*. An audit is conducted by the PEDs of all centres desirous of offering the NSC examination, and centres that fail to meet the criteria are not registered as examination centres. Private providers are also required to complete a service contract with the Provincial Education Departments (PEDs) which binds the independent centre into a legal agreement which if violated will result in the examination status of the centre being withdrawn. Once the application for registration has been approved, an examination centre is issued with a centre number and registered on the Integrated Examination Computer System (IECS). Examination centres are audited annually in order to ensure that they maintain appropriate facilities to serve as examination centres.

In the event the examination centre is physically relocated from premises approved by the PED, such an examination centre, in keeping with the *Regulations pertaining to the Conduct, Administration and Administration and Management of Assessment for the National Senior Certificate of 29 August 2008*, will be deregistered. Examination centres are classified as full-time/part-time public, independent and special.

Report on the National Senior Certificate Examination Results

The table below provides an indication of centres across the country

Table 1: Examination Centres

Province		Public	Independent	Special	Total
Eastern Cape	Full-time	899	54	6	959
	Part-time	2	46	0	48
	Total	901	100	6	1007

	Part-time	1	0	0	1
	Total	521	15	0	536
North West	Full-time	378	16	3	397
	Part-time	4	1	0	5
	Total	382	17	3	402
Northern Cape	Full-time	143	4	1	148
	Part-time	0	6	0	6
	Total	143	10	1	154
Western Cape	Full-time	363	70	9	442
	Part-time	0	1	0	1
	Total	363	71	9	443
National	Full-time	6261	543	31	6835
	Part-time	318	101	0	419
	Total	6579	644	31	7254

The NSC was administered in 7254 examination centres across the country i.e. 6579 public, 644 independent and 31 special schools. KwaZulu Natal and Limpopo with 1795 and 1764 examination centres respectively, contribute almost half of the total number of the registered examination centres. Ironically, these are the two provinces which are predominantly rural, with the majority of schools ranked between quintile 1 – 3, as per the departmental school ranking.

Quintile Ranking of Schools

Schools in South Africa are ranked into quintiles based on the availability of resources in the schools. The quintile ranking takes into consideration the factors like income level, unemployment rate and or the level of education (literacy rate) of the surrounding community that determine the poverty index of a school. The table below indicates the distribution of schools and the quintiles per province.

Table 1: Quintile Ranking per Province

	Schools				Quintiles				
	Public	Independ-ent	Total		Q1 %	Q2 %	Q3 %	Q4 %	Q5 %
			No	%					
Eastern Cape	861	44	905	14.3	21.8	20.97	28.67	14.22	14.34
Free State	304	12	316	5.1	34.09	19.48	16.88	11.69	17.86
Gauteng	569	144	713	11.3	5.14	9.67	25.10	27.98	32.10
KwaZulu Natal	1 567	64	1 631	25.8	26.44	22.36	25.23	12.72	13.25
Limpopo	1286	86	1 372	21.7	36.64	26.49	28.26	6.40	2.21
Mpumalanga	466	20	486	7.7	16.87	19.56	26.89	19.07	17.60
North West	356	16	372	5.9	19.23	14.86	31.79	21.79	12.31
Northern Cape	126	04	130	2.1	13.33	20.95	23.81	17.14	24.76
Western Cape	368	39	407	6.4	3.26	5.04	19.88	25.52	46.29
Total	5 903	429	6 332	100	24.01	20.15	26.22	14.58	15.04

Limpopo, Free State and KwaZulu-Natal are provinces with most of poorest schools that lack basic infrastructural and other resources. These three provinces have 63.13%; 53.57% and 48.80% of their schools in the quintile ranking of 1 and 2 respectively. Western Cape and Gauteng have a very small share of the poorest schools with less than 15% falling in quintiles 1 and 2. Most of their schools, i.e. 71.81% and 60.08% respectively fall in quintiles 4 and 5. Research indicates that there is a correlation between the poverty index of a school or province, with learner attainment or school achievement. (Please refer to Annexure E for details).

2.3.2 Enrolment of learners

The 2009 cohort of Grade 12 candidates is a combination of full time candidates, full-time repeater candidates and part-time repeater candidates. The first two categories of learners are either based at public or independent schools offering a full complement of NSC subjects and the last category comprises all candidates that were unsuccessful in one or more subjects in the 2008 examination, and who were allowed to register for the 2009 examination as repeater candidates. They are only attached to an institution for examination purposes and do not offer a full complement of subjects.

Provincial Education Departments are responsible for registration of candidates and the administration of examinations. Candidates are registered on the IECS, in Grade 10 and issued with a unique computer generated number, and on successful completion of each grade, they are transferred to the next grade until they reach Grade 12. The computer system has eased the burden of annual registration in PEDs and is also utilized in the verification of completion of each grade by candidates. Only candidates attached to an examination centre are allowed to sit for the national examinations. Where this is not possible, special permission has to be obtained from the Head of Department to sit for the examination at another centre.

The following table compares the number of candidates that enrolled as full time and part time/repeater candidates in 2008 and 2009 per province.

Table 2: Number of candidates enrolled in the 2009 NSC Examination

Province	Full-time		Part-time/Repeaters		Total		Difference
	2008	2009	2008	2009	2008	2009	
Eastern Cape	62,982	71,115	0	3,516	62,982	74,631	11,649
Free State	31,205	30,462	1	919	31,206	31,381	175
Gauteng	103,836	101,269	931	8,265	104,767	109,534	4,767
KwaZulu Natal	151,778	139,908	18	12,546	151,796	152,454	658
Limpopo	90,368	93,409	4	7,820	90,372	101,229	10,857
Mpumalanga	58,459	55,729	32	2,982	58,491	58,711	220
North West	34,244	31,418	18	993	34,262	32,411	-1,851
Northern Cape	10,363	10,766	32	500	10,395	11,266	871
Western Cape	45,408	46,861	80	1,714	45,488	48,575	3,087
National	588,643	580,937	1116	39,255	589,759	620,192	30,433

The table indicates that there has been a significant increase in the enrolment for the 2009 NSC examinations. Eastern Cape and Limpopo has had increases of 11,649 and 10,857, respectively which (combined) contribute 74% of the 30,433 overall increases in enrolment in 2009. Gauteng and Western Cape experienced a steady increase in enrolment of 4,767 and 3,087 respectively, which is 26% of the total increase. Increases in the Free State, KwaZulu Natal, Mpumalanga and Northern Cape are not that significant in 2009, whilst North West was the only province that experienced a decrease in enrolment by more than 1,850.

Language enrolments in 2009

In the table below the enrollment for the languages in 2009 is compared with the enrollments in 2008, to establish if there are any significant trends.

Table 3: Enrolments in Languages

Subjects	Home Language (HL)		First Additional Language (FAL)		Second Additional Language (SAL)	
	2009	2008	2009	2008	2009	2008
Afrikaans	55,582	56,293	81,700	80,184	25,669	33,550
English	98,211	94,094	482,756	464,179	3	109
IsiNdebele	4,363	3,702	0	1	0	1
Sepedi	70,545	72,437	390	343	0	6
Sesotho	32,667	38,516	538	571	112	203
Setswana	44,130	48,187	173	134	48	36
SiSwati	16,539	18,052	259	119	0	1
Tshivenda	18,779	17,893	17	11	0	2
IsiXhosa	77,013	65,766	1,410	1,327	259	261
Xitsonga	27,565	25,340	8	32	0	3
IsiZulu	138,685	154,866	10,640	9,652	0	168

The table indicates that English and Afrikaans First Additional Languages have had high enrolments over the last two years, with a total of 482,756 and 81,700 learners enrolling for English and Afrikaans FAL, respectively. A similar trend is noticeable in the Home Languages, where IsiZulu (138,685); English (98,211) and Afrikaans (55,582) are the languages with the highest enrolments. With regard to the African Home Languages, IsiXhosa and Sepedi HL are more popular with more than 70,000 learners registered in the 2009 NSC examination. The other African Home languages are still under the 50 000 mark. Afrikaans still seems to be a popular language choice, with more than 25,000 enrolments in the Second Additional Language over the last two years.

In terms of the non-languages, it would appear that there are certain subjects which are popular and this is observed from the trend of subject choices over the last two years. The graph below indicates a list of subjects with enrollments of more than 25,000 candidates over the two year period.

Graph: 1: Individual Subject Enrollments

More learners have registered for Mathematics (296,659) compared to Mathematical Literacy (284,309). Business Economics (211,377); Geography (219,700); Life Sciences (304,788); and Physical Science (225,148) remain the subjects with the highest enrolments of more than 200,000. From this it is evident that greater advocacy is needed to be done to promote subjects that are of national significance but are still not offered on the desired scale. These include subjects like Agricultural Science, Information Technology, Computer Applications Technology, Accounting and Economics.

Table 4 depicts the enrollment of selected non-language subjects in the 2009 NSC examination. This table focuses on subjects that have registered more than 20,000 candidates.

Table 4: Enrolment in Non-Language subjects

Subject	2008		2009	
	Total enrolment	% contribution	Total enrolment	% contribution
Accounting	176,078	29,85	177,947	28,69
Agricultural Sciences	85,668	14,52	92,258	14,87
Business Studies	204,799	34,72	211,377	34,08
Computer Applications Technology	47,302	08,02	52,546	08,47
Consumer Studies	30,763	05,21	33,196	05,35
Economics	153,833	26,08	157,358	25,37
Engineering Graphics and Design	25,018	04,24	26,024	4,19
Geography	213,369	36,17	219,700	35,42
History	93,666	15,88	92,573	14,92
Life Orientation	571,085	96,83	580,990	93,67
Life Sciences	297,417	50,43	304,788	49,14
Mathematical Literacy	263,464	44,67	284,309	45,8
Mathematics	298,821	50,66	296,659	47,83
Physical Sciences	218,156	36,99	225,148	36,30
Tourism	68,752	11,65	76,782	12,38

2.3.3 Examination Timetabling

The development of the examination timetable for the National Senior Certificate is the responsibility of the Department of Basic Education. Consultation with all stakeholders that have interest in education is key to the success of this initiative. The Inter-Provincial Examinations Committee (IPEC), where Provincial Education Departments (PEDs), Labour organizations, Higher Education South Africa (HESA), Umalusi and other examining bodies such as Independent Examinations Board (IEB) and Onafhanklike Afrikaanse Eksamen Raad (OAER) are represented, provides the appropriate forum for consultation and discussion of the examination timetable. The timetable is finally submitted to the Heads of Department Committee (HEDCOM) and approved by the Council of Education Ministers (CEM). All examinations time tables are published a year before the commencement of examinations.

2.3.4 Setting of Question Papers

Question papers remain one of the most critical instruments assessing knowledge and skills acquired by learners and therefore the assessment instruments that are used in the examination must be of the highest quality and standard. A total of 130 question papers was set by the Department of Basic Education for the November 2009 examination. In addition, based on a contractual arrangement with the Independent Examination Board (IEB), 67 question papers for all non official languages were set by the IEB. In order to cater for learners with special needs, a total of 57 question papers were adapted into Braille, and 48 question papers were adapted for deaf learners.

A further 130 question papers for the March 2010 supplementary examination were concurrently set, internally and externally moderated. These papers were set simultaneously to ensure a comparable standard between the November and March examinations, given that these two examinations are regarded as one sitting.

All question papers were provided in English and Afrikaans, with the exception of question papers for the 11 official languages. The Literature (Language P2) Home languages and First additional Languages were also set by the Department of Education for the first time in 2009. Only in the case of Second Additional Languages (SAL) are the literature set works still provincially determined and therefore this section of the paper was set by the nine PEDs and then incorporated into the nationally set paper. This arrangement will remain until 2011, when a list of common prescribed set works for Second Additional Languages will be issued.

The panel of examiners and moderators consist of experienced and qualified subject specialists, teachers and university lecturers. A total of 192 examiners and 38 internal moderators were appointed to set and moderate the 2009 Grade 12 NSC examinations. Each panel of examiners carefully studied and considered comments from teachers, chief markers and the reports from the 2008 marking guideline discussions, internal moderators' reports from all provinces in the 2008 marking, and these provided valuable input and feedback to the panels on the strengths and weaknesses of the 2008 question papers, and formed a benchmark on which the 2009 question papers were developed.

The validity and reliability of the questions are of high importance during the setting and moderation of the NSC question papers. Special attention was paid to the weighting in terms of the Learning Outcomes and Assessment Standards, mark allocation, inclusion of a variety of skills as well as cognitive levels to ensure that all learners are adequately catered for. Questions were carefully set to ease learners confidently into every examination. Every question paper was developed with an accompanying memorandum and an analysis grid showing the spread in terms of the types of questions, mark allocation, coverage of learning outcomes and assessment standards as well as the cognitive levels.

The question papers had a substantial number of critical thinking and problems solving questions. This shift in the cognitive demand of the question papers has challenged learners who are not proficient in the language of teaching and learning. This is a matter that is being prioritized by the Department of Basic Education, to ensure that candidates can access the language of the question paper. In 2008 and 2009, a special language specialist was appointed to review the question papers with a particular focus on simplifying the language level of the paper. This has contributed significantly to making the question papers more accessible to candidates. This process will be extended in scope and size in 2010.

In order to ensure a better understanding of the scope and depth of the content to be examined, and to assist and guide teachers and learners in their preparation for the 2009 examinations, examination guidelines were developed for all subjects and papers. These were handed over to PEDs for printing and distribution to schools in February 2009. Further, exemplars were provided in selected subjects,

namely, Agricultural Management Practices and Agricultural Sciences since the format and structure of the question papers for these subjects changed substantially in the 2009 examination, compared to that of 2008. In addition, exemplars were provided for Literature (Language P2) for the 11 official languages at Home languages and First additional Languages since these papers were being nationally set for the first time.

2.3.5 Quality Assurance of Question Papers

Various quality assurance measures are in place to ensure that the question papers are of high quality and standard and are valid and reliable instruments of assessment. These include a rigorous process of internal moderation, editing, language simplification and proofreading. In addition, question papers are evaluated against a set of criteria by Umalusi before they are approved to be used for examination purposes.

The following set of criteria developed by Umalusi was used to evaluate the question papers by both internal moderators and external moderators:

- (a) adherence to Assessment Policies/Guideline Documents
- (b) content coverage
- (c) cognitive skills
- (d) language and bias
- (e) predictability
- (f) marking memorandum/guideline
- (g) technical criteria
- (h) internal moderation
- (i) overall impression of the paper.

According to the internal and external moderators' reports, the papers set were of appropriate standards and covered the prescribed content. The cognitive levels of these question papers were very demanding and accommodated problem solving and critical thinking as demanded by the curriculum. The language used by most question papers was accessible, except for Computer Applications Technology, History and Geography which were considered to contain inappropriately difficult terminologies. All 130 question papers were subjected to rigorous internal and external moderation based on the above criteria.

Once the Chief Examiner and panel of examiners have completed the setting, the examination paper, marking guideline and analysis grid are submitted to the internal moderator whose responsibility is to review the question papers according to the agreed criteria. The Umalusi criteria for evaluation of question papers, (listed in 4.2.5.1), are adapted and used by the internal moderators to review and moderate the NSC question papers. Question papers are restructured in line with comments of the internal moderator and upon approval by the internal moderator the paper is then submitted to Umalusi, the external quality assurance council, for external moderation.

Except for a few subjects where the panels were unable to complete the setting within the scheduled time, all question papers for the November 2009 and March 2010 were set and moderated concurrently to ensure comparable standards. External moderators from Umalusi verified, evaluated and approved all question

papers for the November 2009 NSC examination. The rigorous external moderation process certainly contributed to ensuring that the question papers were of a high quality and an appropriate standard for grade 12 learners.

Of the 130 question papers set by the DoBE for the November 2009 examinations, a total of 44 were approved at first moderation and a further 73 conditionally approved indicating an improvement in the quality of internal moderation. The remaining 13 question papers were approved after subsequent moderations.

2.3.6. Printing and distribution of Question Papers

Printing, packaging and distribution of question papers is done by Provincial Education Departments (PEDs). Question papers were handed over to PEDs in monthly consignments from 30 May to 30 July 2009 with the exception of the literature question papers which were handed to PEDs in August 2009. In order to ensure that the question papers in all provinces comply with the required standards set by the DoBE, the finalization of the master copies and printing was monitored by officials from the DoBE. The provinces visited include Mpumalanga, KwaZulu-Natal, Northern Cape, Limpopo, North West and Western Cape. The DoBE is satisfied with the standard and print quality of the question papers for the 2009 examinations as there were no errors in any of the question papers that compromised the writing of the examination.

Most PEDs commenced with the printing of question papers from June and completed by mid-October 2009. The packing of question papers across all PEDs commenced in mid September 2009. This is an area that PEDs have mastered over the years and the only risk is errors that creep in during the packing process. PEDs have put in place additional measures, such as scanning of question paper batches, to ensure that the packing process was executed without any errors.

Except for four Provinces namely Limpopo, Mpumalanga, Eastern Cape and Free State that outsourced the printing of their question papers, all other PEDs have developed efficient, secure and well managed in-house printing facilities. This allows for full control by the DoBE and minimizes risks and PEDs are encouraged to establish their own in-house printing.

2.3.7 The conduct of the 2009 National Senior Certificate (NSC)

In all provinces, except for the Western Cape Education Department (WCED), school principals are appointed as chief invigilators and teachers are appointed as invigilators. In the case of the (WCED), members of the community are appointed. The WCED has developed a stringent set of criteria to be complied with before an individual is appointed as an invigilator. All those who are appointed are issued with appointment letters and sign contracts with the WCED. The DoBE is satisfied with the way in which all provinces appointed and trained invigilators for the NSC examination.

The chief invigilators are trained on a yearly basis by provinces, and are in turn expected to train the invigilators at the examination centres. This training of invigilators focuses on the procedure to be followed prior to, during and post the writing of the examinations. The training of invigilators has resulted in minimizing the number of irregularities and also ensuring that the correct procedures are followed where an irregularity is detected.

The writing of the Grade 12, 2009 NSC examination commenced on 07 October 2009 and ended on 04 December 2009. The timetable of subjects and papers to be written was designed to allow for maximum teaching time. This schedule allows for the examination to be concluded in four weeks, thus minimising the time spent on examinations.

The writing of the examination was monitored extensively across all provinces and this exercise was undertaken by the PEDs, the DoBE and Umalusi. Monitoring commenced as early as 18 months ago when the setting of question papers began. Monitoring is undertaken to ensure compliance with the minimum requirements as stipulated in the examination policy. The monitoring also included a DoBE monitoring of all PEDs to determine the state of readiness to administer the NSC examination. Thereafter, the monitoring was intensified in the writing and marking sessions. The monitoring and support provided to PEDs, their district offices and schools has resulted in the improved administration of examinations across all levels in the system.

In order to co-ordinate the management of examination irregularities, all PEDs established Provincial Examinations Irregularities Committees (PEIC). Some of the PEDs have also established District Assessment Irregularities Committees (DAIC). PEDs are also required to establish School Assessment Irregularities Committees (SAIC). All the provinces have established SAICs and this was confirmed by district offices and schools visited during the state of readiness monitoring by the DoBE.

2.3.8 Processing and Resulting of Marks on the Integrated Examination Computer System (IECS)

The DoBE embarked on a major project of developing a new computer system for the management of the entire examination process which includes, inter alia, the registration of candidates, capture, processing and resulting of candidates' results. The system was implemented in the 2008 examination and has been enhanced in 2009 to cater for repeat candidates.

The registration of candidates is fundamental to ensuring accurate resulting on the IECS. Any shortcoming in the registration database will result either in inaccurate results or incomplete results. Candidate registration was completed in September 2009, after which the DoBE did an audit on provincial registration databases to ensure that when mark sheets are generated, the database is ready for capturing of marks. Each PED received a formal letter of approval of the registration database before they continued with the printing of mark sheets.

The DoBE monitored very closely the moderation, collection and capture of SBA marks. A special policy directive was issued to PEDs on the control and management of SBA marks. During the capture of SBA marks, the DoBE, on a weekly basis monitored the capture process to ensure that all marksheets are captured. An audit on the quality of marks captured and the use of special codes was done for the first time in 2009. Through this process, the DoBE ensured that

where a candidate was marked as absent with a valid reason, the necessary documentation was submitted from the school. The PEDs for the first time also used the code 444 which represents candidates that were absent from the examination without a valid reason. Any outstanding marks were collected from schools before they closed on 11 December 2009 to ensure that no candidates that presented themselves for the Internal and External assessments have outstanding marks in the resulting process.

The capture of the examination marks was also rigorously monitored by the DoBE to ensure that the Umalusi requirement of 95% capture per subject is complied with. The process of mark capture was concluded on 21 December 2009, with all PEDs having met the 95% requirement in all subjects. The data for the standardization meeting was prepared to ensure accuracy and reliability of data. After the standardization decisions were finalized, these were captured on the IECS and checked by Umalusi. All the results of the candidates were processed and the preliminary result schedules were checked by all school principals to ensure that none of their learners were erroneously resulted.

2.3.9 Final Declaration and Release of results

Umalusi, the Council for Quality Assurance in General and Further Education and Training, in conjunction with the Director-General, approved the National Senior Certificate results for final publication. This approval process was based on reports from the various quality assurance initiatives that focused on all components of the examination system. Special attention was paid to the irregularities that may have compromised the examination.

The results of candidates were released on 7 January 2010 by the Minister of the Department of Basic Education to the Heads of provincial education department. Learners collected their results from schools on the same day. The results were also made available to the electronic and print media for the release after candidates had received their results from the school.

2.3.10 Re-marking and rechecking

Subject to the provisions of the *Promotion to Access of Information Act, 2000 (Act No. 2 of 2000)*, a candidate, a candidate's parent, guardian or their representative should be allowed to view the examination script of a candidate under stipulated conditions.

In keeping with the above provisions and the *Regulations pertaining to the Conducting, Administration and Management of Assessment for the National Senior Certificate as published in Government Gazette No. 31337 of 29 August 2008*, a candidate may apply for the re-marking or rechecking of his or her examination answer scripts, within twenty (21) calendar days of the official release of the results. The information regarding the fees for re-checking and re-marking may be obtained from the Provincial Education Departments (PED). However, learners from no-fee schools and learners whose parents have applied and have been granted concessions on the payment of school fees, are exempt from paying the above fees.

2.3.11 Dealing with Irregularities

All PEDs have established Provincial Examinations Irregularities Committees (PEIC). The PEDs have also established District Assessment Irregularities Committee (DAIC). This has improved PEDs competence in identifying and appropriately dealing with irregularities.

In terms of the *Regulations pertaining to the Conduct, Administration and Management of Assessment for the National Senior Certificate*, PEDs are also required to establish School Assessment Irregularities Committees (SAIC). All provinces have established SAICs.

Furthermore, to ensure added credibility to the way irregularities are reported and the conduct of examinations and assessment, a national register of irregularities was implemented with effect from the 2008 October/November examinations, where each irregularity reported was allocated a computer-generated number. A summary of reported irregularities captured daily on the national register of irregularities and a weekly summary of irregularities was forwarded to the DoBE throughout examination.

Except for the stolen question papers in Mpumalanga, most irregularities that occurred in the Nov 2009 examinations were in the main technical in nature.

2.3.12 Certification

Certification is the formal recognition of a full qualification or subject achieved by a candidate. Where a candidate has met the minimum requirements for awarding the qualification, the National Senior Certificate will be issued. Where a candidate has not met the minimum requirement for the award of the qualification a subject statement for one or more subjects will be issued. Once a candidate has obtained the minimum credits for the award of the certificate, such a candidate can apply for the combination of the subject credits for the award of the National Senior Certificate.

After the release of results, candidates who have sat for the examination will receive statements of results. Higher Education Institutions do accept the statement of results as a valid document for registration, prior to the issuing of the certificate. The statement of results is also acceptable for entry to the workplace.

2.3.13 Historical Records

The Department of Basic Education has embarked on a project to convert the historical certification records dating back as far as 1914 into electronic format. These records were housed at the provincial education departments that were linked to the previous ex-departments of education. The Department of Basic Education had to first re-locate all these records at a central venue in Pretoria, where the hard copy records were scanned and electronically archived. In addition, the hard copy records were re-bound so that the pages of the booklets could be preserved. These books have all been re-bound and archived at the offices of the Chief Directorate; National Examinations and Assessment. PEDs, will soon have electronic access to all these records and this will expedite the request for replacement or duplicate certificates by members of the public, which is a function that is currently managed by the DoBE for records issued prior to 1992.

3. MARKING OF THE NATIONAL SENIOR CERTIFICATE EXAMINATIONS

3.1 Introduction

The critical process of marking the scripts of candidates that wrote the 2009 NSC examination commenced on 4 December at the 114 marking centres across the PEDs and this was concluded by Wednesday, 16 December 2009. The marking of the scripts of candidates is regarded as the most important process in the examination cycle, since this is where the final judgment is made on the performance of the candidate. The DoBE devotes much of its attention to ensuring that this process delivers an outcome of the highest quality and standard. *The Regulations on the Conduct, Administration and Management of the NSC examinations* has been rigidly applied and the marking was monitored in the 2009 NSC examinations.

3.2 Establishment of Marking Centres

In keeping with the *Regulations pertaining to the Conduct, Administration and Management of the NSC Examination*, the provinces have selected suitable marking centres that complied with policy requirements. The marking centres selected adhered to the policy criteria with regard to suitable accommodation, ablution, storage and catering facilities. All markers are accommodated at marking centres and unauthorized persons are prohibited from the marking centres. There were 114 marking centres across provinces and these were monitored by provincial, national and Umalusi monitors to ensure that they comply with the following prescriptions:

- (a) registration of centre as a registered education institution
- (b) suitability of venue to accommodate markers for parking/marketing rooms
- (c) security – to prevent access to unauthorised persons
- (d) health and fire services clearance
- (e) provision of proper lighting/alternative power supply
- (f) sufficient number of cleaning staff
- (g) availability of water/ablution facilities
- (h) communication facilities – fax, telephone, e-mail
- (i) strong room or safe for storage of examination material
- (j) suitable kitchen and cold room facilities for bulk catering
- (k) proper sanitation and hygienic controls.

If the number of markers exceeds six hundred (600), a decentralised approach to marking is adopted and marking can be decentralised in terms of geographical regions or groups of subjects. The establishment of marking centres must be approved by the Head of Department in the province.

3.3 Selection and appointment of markers

Officials involved in the marking, including the chief markers and internal moderators, are appointed based on the requirements articulated in the Personnel Administrative Measure (PAM) document. These include extensive experience in the teaching of Grade 12 and high subject knowledge. In addition, chief markers must have extensive experience as markers and examiners. The deputy chief markers and senior markers are appointed on the basis of outstanding performance as markers and high subject knowledge.

Vacancies for appointment as markers were advertised in provincial circulars and all specialists who had demonstrated integrity in assessment were considered for appointment. All Grade 12 teachers who satisfied the requirements for appointment were given the opportunity to apply. Applications were scrutinized by principals and circuit managers before they were handed over to the Provincial Departments to make final decisions. The chief markers and subject advisors play a critical role in the selection of competent markers, senior markers and deputy chief markers. In 2009 every attempt was made to ensure that only markers who are of the highest calibre are appointed and in cases where erroneous appointments were made, these were identified at the marking centre and were not allowed to engage in the marking process.

To ensure that competent markers are appointed the following year, markers are evaluated at the end of the marking process and a database is created that categorises markers according to their performance. The markers are ranked into three categories, i.e. excellent, average and poor markers. The excellent markers will be automatically appointed in the 2010 marking process and those that are average will only be appointed in case of shortages and would be rigorously trained and supervised throughout the marking process. Poor markers will not be appointed in the 2010 marking process.

3.4 Standardisation of Marking

Given that question papers are set nationally by the DoBE, it is deemed necessary to engage expert chief markers and internal moderators from across all provinces to refine the common assessment tool (the marking guideline) which is used to mark learners' scripts across provinces. The rationale for the standardization of the marking guideline by all provincial representatives is to ensure that the marking guideline is comprehensive and accommodates all correct responses that emanated from Grade 12 learners. Chief markers come to the standardization after having completed the following preparation:

- a) each chief marker and internal moderator must mark 20 scripts prior to the standardization meeting
- b) the scripts must include high, average and low achievers and must also include urban, peri-urban and rural schools
- c) chief markers must also solicit the views of education specialists and teachers in the province
- d) the chief markers must develop a comprehensive report which accommodates all the additional responses and analysis of the question papers.

A total of 130 different subject standardization meetings were conducted and this brought together 1950 chief markers and internal moderators, 200 external moderators and 250 examiners.

3.5 Training of Markers

After the standardization at the marking guidelines meeting, chief markers were trained. The training programme encompassed the marking of five common exemplar scripts by chief markers. The scripts were selected randomly from the current examination. The chief markers and internal moderators marked the same scripts using the same marking guideline. Variances between chief markers were ironed out and the reasons for the discrepancies were debated. The chief markers marked the second and third scripts until they reached consistency. As they mark the exemplar scripts they continued to refine the marking guideline until this tool was valid and capable of yielding consistent results across provinces. Chief markers were then deployed to various marking centres across the country to implement the common standard developed at the standardization meeting. It has been reported that a high level of consistency in marking was achieved in most subjects across marking centres in the nine provinces.

The national training was replicated across all marking centres and this was conducted in a staggered manner, starting with deputy chief markers and senior markers on the first day. The results of the training assisted the chief markers in the allocation of questions to the markers. Complex questions were allocated to competent markers and less complex questions were allocated to less experienced markers.

In addition to the training session, various provinces used other innovative strategies to promote quality in the assessment of learners' scripts. Gauteng requested all its Accounting markers to answer certain sections of the question paper. The results of the performance of teachers to these sections of the paper were used to identify their strengths and weaknesses and markers were deployed to mark items that are consistent with their abilities. In the North West province all markers were required to come to the marking centre with a worked out marking guideline. This assisted markers in coming to the marking centre fully prepared on the possible answers that may be presented by candidates

3.6 Marking procedures

A pyramidal structure consisting of the internal moderator at the pinnacle, followed by the chief marker, deputy chief marker, senior markers, and markers, was established and implemented across all 114 marking centres. In terms of this structure, every 5 -7 markers are supervised and moderated by one senior marker, and every 5 -7 senior markers are supervised by a deputy chief marker. This allows for four levels of moderation and control with the senior marker serving as the first level of moderation, and the internal moderator as the final arbiter of standards at each of the marking centre.

In addition to the internal moderation and control measures adopted at the marking centre, the DoBE appointed national moderators to conduct on-site moderation of marking. These moderators were deployed to marking centres across the provinces. The prime objective of the national moderators was to ascertain compliance with the national directives and national marking guidelines. The report from these moderators has confirmed that a high quality of marking has been maintained across the marking centres, and where there were minor aberrations, these were corrected. The overall comment from the moderators is that there has been a significant improvement in the quality of marking compared to 2008.

In addition, Umalusi, the Quality Assurance Council has conducted centralized moderation of learners' scripts. A randomly selected sample of learners' scripts was forwarded to Umalusi offices for external moderation. Preliminary reports from the Umalusi moderators also confirm a significant improvement in the marking standards and this is being attributed to the standardization meetings conducted by the DoBE, the training conducted at the marking centres coupled with the internal moderation processes.

The DoBE monitored the marking centres across all provinces. The monitoring focused on the management and administrative processes at each of the marking centres. The national monitors were impressed with the efficient management of the marking centres and the ease with which PEDs were able to successfully assemble the large number of markers at each of these venues and make sure that the requirements and comforts of the markers are adequately accommodated.

An important innovation in the 2008 and 2009 marking process, is the sample analysis of learner responses conducted by the internal moderator at the marking centre. For each subject at each marking centre, the internal moderator conducts a per question analysis of learner responses. This will assist in identifying areas in which learners are not doing well in the examination so that this feedback can be used by subject specialists in the training of teachers in the 2010 academic year.

The marking process provides an opportunity for experts across provinces to evaluate each item on the question paper, in terms of its clarity, relevance, appropriateness, validity and precision. All items that comply with these criteria are considered to be of acceptable standard and those that do not are identified and highlighted for the examination panel to note. This feedback will ensure the creation and delivery of quality question papers to candidates.

4. SCHOOL BASED ASSESSMENT (SBA)

4.1 Introduction

SBA comprises forms of assessment which are conducted by the teacher at the school level. This includes assignments, projects, simulations, research and tests. In other subjects with a practical component and in the case of languages with an oral component, SBA includes assessment of the practical skills and in the case of languages, assessment of the oral skills, respectively.

This chapter outlines the general requirements and the moderation and monitoring processes of school based assessment. Finally, the chapter describes the moderation of Life Orientation.

4.2 General requirements of the School Based Assessment

The school based assessment (SBA) constitutes 25% of the final promotion mark in most of the subjects offered as part of the National Senior Certificate (NSC). The composition of SBA for each subject is set out in the Subject Assessment Guideline. In the case of subjects with practical components, practical assessment tasks and orals for languages are administered in addition to the other internal assessment components. In the case of Life Orientation, the final promotion mark will be based on internal assessment which must be externally moderated. The DoBE and Umalusi determine the monitoring and moderation mechanism.

4.3 Moderation of SBA

Moderation ensures that the quality and standards of the internal assessment as contemplated in the *Subject Assessment Guidelines* have been met. Moderation of school based assessment mark is conducted at school, district, provincial and at national level to ensure credibility of the SBA. Moderation is conducted at each of these levels to:

- (i) confirm the validity, fairness and practicability of the assessment instrument
- (ii) establish whether assessment was conducted in a fair and consistent manner
- (iii) establish the reliability and fairness of the assessment result
- (iv) provide feedback on the moderation findings with a view to improving the quality of SBA.

The national guidelines were developed to establish a national system of moderation in which the standard and quality of SBA is comparable across all schools and they were Implemented in all schools and districts in the nine provinces. These guidelines provided directives to officials of the department, subject specialists, and principals of schools, teachers, learners and parents on the moderation of school based assessment.

A minimum of 10% sample of portfolios was moderated at school, and 3 – 5% at district and provincial level. This moderation included moderation of assessment tasks and learner evidence. It is compulsory for schools, districts and provinces to make available the learner portfolio, teacher portfolio and all other appropriate documentation to the moderator(s) during moderation process and when required. Moderation of school based assessment focuses on moderation of the assessment instruments and moderation of learner evidence.

4.4 Moderation of Life Orientation

Life Orientation is one of the compulsory subjects in the National Senior Certificate and assessment for this subject is completely school based. In the absence of an externally set component in this subject, the standards of assessment vary from one school to the other and the validity of scores emanating from the assessment are always a concern. The DoBE chief directorate: National Examinations and Assessment conducted the moderation of Life Orientation in 2008 to ascertain compliance with the five tasks prescribed for Life Orientation assessment. It was found that the level of compliance was between 80% and 90% across provinces. However, in 2009 the moderation process was expanded to include the quality of assessment tasks.

Experts and experienced practitioners of Life Orientation, were appointed as moderators. The moderators were rigorously trained in a training organised by the DoBE. During the training session, exemplars of evidence of learner performance were used to standardise the moderation approach across provinces. This training was a standard setting exercise. The criteria for moderation were incorporated into the moderation guidelines which was discussed and agreed upon by all experts.

The DoBE followed a two pronged approach in the moderation of Life Orientation, namely, a centralized and a decentralized method. Four provinces, namely, Western Cape, Northern Cape, Free State and Eastern Cape were moderated in a centralized approach in which ten portfolios from low, medium and high achievers representing evidences of learner performance from urban, peri-urban and rural schools, were forwarded to the chief directorate. The evidences of learner performance accompanied by teacher portfolios were moderated. Five provinces namely Limpopo, Gauteng, Mpumalanga, Kwazulu-Natal and North West were moderated onsite. Moderators developed comprehensive reports for each province.

The findings of the 2009 moderation process are that the quality of Life Orientation Assessment has improved beyond compliance and that there are examples of best practices across provinces. In 2010 the DoBE will visit the nine provinces at the beginning of the new year to set standards for the assessment of Life Orientation. This standard setting process will embody exemplars of best assessment tasks selected from the 2009 moderation and schools will be supported to emulate there best practices.

4.5 Monitoring the Implementation of SBA

In terms of the *Regulations Pertaining to the Conduct, Administration and Management of Assessment for National Senior Certificate, section 5 (1) and (2)*, all internal assessment must be subject to monitoring and moderation by the DoBE and Umalusi. Monitoring should determine whether the minimum requirements for internal assessment in a particular subject have been met in terms of the frequency and components. Monitoring structures were established at national, provincial and district levels to monitor policy compliance during the implementation of SBA in schools.

In their monitoring, monitors established the following:

- (i) teachers are in possession of the required policy documents i.e. National Curriculum Statement (NCS), Subject Assessment Guideline (SAG), Learning Programme Guideline (LPG) and the National Protocol on Assessment for Reporting and Recording (NPRR)
- (ii) teachers have developed Formal Programme of Assessment for specific subject at the required grade
- (iii) the school assessment policy/plan conforms to the requirements for learners who qualify for concessions relating to specific needs without compromising the required standards
- (iv) teachers are provided with exemplars of assessment tasks required by the SAG
- (v) teachers have received training in developing and administering assessment instruments
- (vi) the assessment tasks are marked and recorded accordingly
- (vii) the number of assessment tasks to be administered in each term/quarter in accordance with the Subject Assessment Guidelines, has in fact been administered
- (viii) there is evidence of moderation of assessment tasks by the head of department, senior teacher or a principal.

It was expected of the district to conduct a minimum of one monitoring visit per school per quarter, per subject. The findings of the monitoring visit were provided in a written report which was submitted to the principal of the school and relevant officials at district level. It is the responsibility of the principal to ensure that the shortcomings identified during the monitoring visit are attended to in accordance with the time frames provided in the report.

The class 2009 look forward to opportunity to contribute to nation building and Socio-economic development

5. SUPPORT PROGRAMMES FOR GRADE 12 TEACHING AND LEARNING

5.1 Introduction

The Department of Basic Education planned several activities to support the implementation of the National Curriculum Statement, specifically for Grade 12 learners. These intervention strategies were divided into the ones based on national priorities and those that were directed specifically at Grade 12. The chapter provides a description of key initiatives of the DoBE, which include the following:

5.2 Dinaledi Schools Project

The initiative to improve the quality of, and participation in Mathematics and Science, started in 2002 with 102 schools being designated as Dinaledi Schools. This number has increased to 500 schools in 2008 and this number has been retained in 2009. The goal of the National Strategy for Mathematics, Science and Technology Education (NMSTE) is to double the number of learners passing high level mathematics in the country.

Each of the 500 Dinaledi Schools was supported via the provision of the necessary learning and teaching materials and, in particular, textbooks to the value of R12 million, for every learner in English, First Additional Language (FAL), Mathematics, Mathematical Literacy and Physical Sciences. An additional 100 000 copies of these textbooks were distributed to schools in the nine provinces. Supervision and support were provided to teachers in the Dinaledi Schools by subject advisors in Mathematics and Science.

These schools received special support which included a teacher survey to identify areas of support needed, intensive monitoring and support, teacher training and increased participation in the Olympiad competition.

(a) Teacher Survey

In February 2009, the Department of Basic Education conducted a Teacher Survey in the 500 Dinaledi Schools. The survey was intended to investigate the number of Mathematics, Mathematical Literacy and Physical Science educators at these schools. Furthermore, the survey gathered information on the teacher qualifications, level of specialization and the number of years in the profession.

The results of the survey prompted the Department to devise and implement strategies to support teachers teaching Mathematics and Physical Science, hence the training of teachers in subject content.

(b) Teacher Training

In July 2009 the Department of Basic Education trained 658 Mathematics and 658 Physical Science Teachers from Dinaledi schools. In September 2009 an additional 585 Mathematics and 585 Physical Science teachers were trained. Therefore a total of 2486 teachers teaching Mathematics and Physical Science (combined) in Dinaledi Schools were trained in specific areas of the subject content.

(c) Intensive Monitoring and Support

The DoBE engaged in an intensive monitoring and support of the Dinaledi schools with special focus on the 54 Dinaledi schools that had obtained below 20% in Mathematics in the 2008 NSC examinations. Special focus was also paid to the 220 Dinaledi schools with a low quality of passes in Mathematics (i.e. schools which had high number of learners passing but few passing Mathematics at 50% or more).

As at 30 September 2009, 254 Dinaledi schools including the 54 schools that performed below 20% were visited and monitored with support given in the areas of difficulties identified.

(d) Participation in the 2009 Mathematics Olympiad

The Mathematics Olympiad is a national competition which aims at developing mathematical talent and a positive image of mathematics amongst the youth of South Africa. As a national test it serves as a suitable benchmark of performance in mathematics at this level. The Department of Basic Education paid for 100 learners of the Dinaledi schools and the top performing schools to participate in the first round of the South African Mathematics Olympiad (SAMO).

The participation of learners in these competitions has created an interest in mathematics. It is hoped that the increased participation of schools in this competition would further improve the performance of learners in Mathematics.

(e) Adopt a School Project

The project is designed to provide a cost-effective way of channeling scarce resources in the context of competing priorities and limited resources. The project is a short term approach to provide adequate learning and teaching facilities to limited schools with potential to address the objectives of the MST Strategy.

The purpose of the project is to:

- mobilise resources for Dinaledi schools to support teaching and learning
- coordinate private sector support to Dinaledi schools for equitable distribution of resource
- support the promotion of quality teaching and learning primarily in maths, science and languages
- encourage increased participation and performance in mathematics and science.

The following table indicates the various sponsors and the number of schools sponsored:

SPONSOR	NUMBER OF SCHOOLS
ABSA	10
ANGLO AMERICAN	17
IDC	30
NOKIA/SIEMENS	3
NORTH WEST UNIVERSITY	5
OLD MUTUAL	4
EPOCH AND OPTIMA	45
STANDARD BANK OF SA	114
TRANSNET	11
UCT/MEEPT	5
UNIVERSITY OF PRETORIA	10
WITS UNIVERSITY	28
WBHO	2
WOOLWORTHS	10
ZENEX FOUNDATION	36
TOTAL	330

The following are the benefits of the project:

- the partners contribute resources that promote teaching and learning especially in mathematics, science and languages
- the partnership enhances the capacity of the school to plan and monitor resources
- the coordinated approach offers integration and sustainability of interventions beyond the stay of the partnership.

(f) Textbook Survey

In October 2008, the Department conducted a survey of textbooks in mathematics, science and languages in Dinaledi schools. The survey indicated that there was a shortage of textbooks in Grades 10 and 11 in selected Dinaledi schools. The availability of textbooks in Dinaledi schools was also investigated during the monitoring of Dinaledi schools between March and May 2009. The monitoring reports confirmed the shortage of Grade 10 and 11 textbooks and other resources (science laboratories and libraries) in Dinaledi schools. Based on the survey and the monitoring reports, the Department distributed 9000 textbooks to 20 Dinaledi schools that had reported shortages during the monitoring visits.

(g) Provision of Learner and Teacher Support Materials

The DoBE has advocated that each learner in Grades 10, 11 and 12 must have at least 7 textbooks. In 2008 the DoBE supplied 452 of the 500 Dinaledi schools that responded to the DoBE textbook survey with Grade 12 textbooks. The textbooks were purchased with R12 million from the Royal Netherlands Donor Funds. The DoBE carried out another survey in October 2008 to determine the availability of textbooks in schools. Subsequent to the results of the textbook survey the Department distributed 50 000 copies of Grade 11 and 12 Maths 911 to 500 Dinaledi schools. In June 2009, copies of mathematics (1210), physical science (914), life sciences (441) and English (6388) textbooks were distributed to 20 Dinaledi schools.

In partnership with Liberty Life, 125 000 copies of Grade 11 and Grade 12 Maths 911 were distributed to 250 Dinaledi schools in May 2009. Additional copies of Maths 911 will be made available to the remaining Dinaledi schools.

5.3 Provision of Learning and Teaching Support Material to Schools

As part of its support to schools the DoBE developed, printed and distributed the following documents to districts and schools:

- 8000 copies of Accounting booklets; schools received a copy each;
- 21 000 copies of Life Orientation Teacher Guide; schools received 3 copies each;
- 7000 copies of soil module in Agriculture Science; schools received a copy each; and
- 7000 copies of Agriculture Management guideline; schools received a copy each.

In addition to the above listed learner and teacher support material, the following assessment and examination support material was made available to all learners.

- exemplar question papers and memoranda for those subjects where there were changes to the Examination Guidelines.
- November 2008 National Senior Certificate examination papers and memoranda in all 29 subjects.
- March 2009 supplementary papers and memoranda

- subject advisor training materials May/June 2009
- examination guidelines for all 29 subjects.

5.4 Development, Supply and Distribution of Electronic and Print Media Support Materials

The Department of Basic Education in partnership with businesses, publishers and independent newspapers, developed, supplied and distributed packages of support materials, in both electronic and print media format. These included:

- more than 500 000 *Study Mate and Studiepêl* distributed to schools
- distribution of 2000 free copies of Tourism book and DVD (Partnership between DEAT and DBED)
- publication by Avusa Media of a more than 1 million of a 48-page tabloid book comprising exemplar examination papers and memoranda for Grade 12 learners in the *Sunday Times* on the 13th of September 2009 and in the *Sowetan* on the 18th of September 2009
- Liberty Life and Independent Newspapers funded by Dinaledi School Project developed and distributed 125 000 copies of *Maths 911* for Grades 11 and 12
- the Department of Education together with SABC Education launched *Study mate TV*, a revision programme, for Grade 11 and 12 learners on the 1st of June 2009. The broadcasts were from Monday to Friday on SABC 1 from 14h00 to 15h00 with repeat broadcasts from 24h00 to 01h00 on SABC 2 and again from 05h00 to 06h00 on SABC 1. There were also broadcasts every Saturday and Sunday from 05h00 to 06h00 on SABC 1
- support on the Thutong and DoBE websites
- Nasou Via Afrika supplied free *Accounting Study Guides* to all provinces for the NSLA schools.
- the *Sowetan Power Your Future* supplement provided support for Grade 10 -12 learners
- the *Sunday Times – Read Right Edition* also provided material for Grade 10 -12 learners
- *Matric Matters – Independent Newspapers* also provided material for Grade 10 -12 learners
- *Mindset* also provided tuition daily on DSTV.

5.5 Monitoring and Support of Underperforming Schools

Schools that performed below 60% in the 2008 NSC examinations were declared underperforming schools. Provinces were required to take an interventionist approach in supporting these schools to improve. Therefore each province developed and implemented intervention strategies to monitor and support these underperforming schools, with schools that performed below 20% receiving more focused attention. The table below provides the number of schools that performed below 60% in the 2008 NSC examinations:

The number of schools performing below 60% in to 2008

Performance in different categories					
PROVINCE	0	1-19.9	20-40	41-59.9	TOTAL
EC	5	156	238	170	569
FS	0	0	20	60	80
GP	0	3	39	102	144
KZN	5	148	410	390	953
LP	9	113	329	329	780
MP	4	45	128	129	306
NW	1	6	38	88	133
NC	0	3	10	19	32
WC	0	1	15	57	73
TOTAL	24	475	1227	1344	3070

In 2008 there were more than 3070 schools that performed below 60%. The three larger provinces, i.e. KwaZulu Natal (953), Limpopo (780) and Eastern Cape (569) have the highest number of schools performing below 60%. This constitutes 75% (2302) of the total number of underperforming schools.

The Department of Basic Education engaged in robust monitoring and support in 4 provinces that performed below the national average in the 2008 National Senior Certificate namely Mpumalanga, Limpopo, KwaZulu-Natal and the Eastern Cape. In 2009, the Department of Basic Education focused more on the 898 schools that performed between 40 – 60% with a view to providing support to these schools to improve their performance in the 2009 NSC examinations. This intervention is part of the strategy for increasing learner attainment for Grade 12 learners, and included:

- visits to 35 districts in four provinces. 492 district officials attended the meetings and workshops that were conducted to meet the objectives of the monitoring process
- visits to 766 schools by subject specialists including afternoon cluster meetings where the Grade 12 package of support was shared with school management teams. The target set of 701 schools was exceeded by 64 schools.

5.6 Subject Advisor Training

In May and June 2009 the Department of Basic Education conducted subject advisor training for all the 29 subjects of the National Curriculum Statement. The training took place over 5 days and a total of 2137 subject advisors were trained. The table below indicates the number of subject advisors that were trained during May – June 2009:

Province	Number of Participants
EC	452
FS	127
GP	164
KZN	189
LP	510
MP	181
NC	82
NW	257
WC	175
TOTAL	2137

The subject advisor training was informed by the 2008 National Senior Certificate results, reports of Chief Markers and identified content knowledge gaps displayed by the provincial subject advisors.

The training in each subject was specific. However, the subject advisor training focused on the following aspects:

- (i) to strengthen the problematic subject content knowledge, skills and assessment in all the National Senior Certificate subjects
- (ii) to enable subject advisors to assist teachers to teach all the National Senior Certificate subjects in Grades 10-12 with confidence
- (iii) to enable provinces to share good practice in assessment and moderation practices to avoid curriculum overload caused by assessment practices
- (iv) to assist subject advisors in assessing Practical Assessment Tasks.

5.7 Support in the teaching and assessment of Life Orientation

Life Orientation is one of the four fundamental subjects within the seven subject package that learners must offer to qualify for the National Senior Certificate (NSC). It is a unique subject in that it applies a holistic approach to the personal, social, intellectual, emotional, spiritual, motor and physical growth and development of learners. Life Orientation was implemented for the first time in Grade 12 in 2008 and there were no standards that existed against which to evaluate learners' performances in 2008.

The national moderation team, which was deployed in 2008, collected examples of good practice in the form of good quality tasks and marking memoranda. These tasks were made available to schools in the form of a booklet and assisted in the benchmarking of standards for the subject after the three year cycle of implementation (2009 – 2011).

The support for teaching and assessment for Life Orientation included the following:

- (i) in May 2009, 121 Subject Advisors were trained on content areas; development of assessment tasks; designing instructions for the three movement section of the Physical Education (PET) and in the implementation of internal moderation.
- (ii) development and distribution of Grade 12 Life Orientation Teacher Guide 20 000 copies were printed and distributed to all schools in all nine provinces.

6. Analysis of the 2009 National Senior Certificate Results

6.1 National results

6.1.1 Overall performance of candidates in the 2009 NSC examination

	2008		2009	
PROVINCE	Total wrote	Total Achieved	Total wrote	Total Achieved
EC	60294	30496	68129	34731
FS	29963	21503	29808	20680
GP	92723	70822	98659	70871
KZN	136743	78747	132176	80733
LP	84614	45958	83350	40776
MP	42153	21815	53978	25854
NW	33157	22554	30665	20700
NC	9948	7230	10377	6356
WC	43966	34479	44931	34017
NATIONAL	533561	333604	552073	334718

Graph 1: Analysis of Overall Performance

The total number of candidates who wrote the NSC in 2009 is marginally higher than the number of candidates who wrote in 2008. However, in the first two years of NSC implementation, the system has produced a total 661 978 NSC graduates.

Graph 2: Analysis of Overall Performance in terms of University Admission

The number of learners who have attained admission to higher certificate, diploma and bachelor studies has remained constant over the last two years.

6.1.2 Comparison of provincial performance (2008 and 2009)

Total Number of learners that wrote the NSC examination (2008 and 2009)

The number of learners who wrote the NSC in 2009 in five provinces is higher than in 2008.

Comparison of the Overall Provincial Performances

It is encouraging to note that the performance of learners in seven provinces in 2009 is higher than the performance of learners in 2008.

Six of the nine provinces have performed above the national average of 60.6. Only two of the nine provinces have improved their achievement rates from 2008.

6.1.3 Analysis of overall performance per quintile ranking

This Graph indicates that more than 75% of the schools offering the NSC are in quintiles 1, 2 and 3 while 25% are in quintiles 4 and 5. This is an indication that most of the schools in the system are less resourced.

It is encouraging to note that 23 schools in Quintile 1 obtained a 100% achievement rate and 173 schools in this category obtained between 80 and 99. These schools that have been classified in the lowest level in the poverty ranking, and are therefore severely under-resourced and yet these schools have done well. These schools should be the focus of an intensive study to establish, how they are able to achieve such good results and these practices should be replicated in other schools. The 677 schools that performed between 20 and 49% have the potential to do well, and should therefore be the focus of the National Strategy for Learner Attainment (NSLA).

Report on the National Senior Certificate Examination Results

List of 19 Schools with 100% pass rate in quintile 1 is as follows:

Province name	Region name	Disctrict name	Quintile	Centre name	Dinaledi	Total Entered	Total Wrote	Total Passed	Pass %
FREE STATE	Fezile Dabi	Region 2	1	NAMPO ASS	N	21	21	21	100.0

The number of schools in quintile 2 that obtained 100% is lower than the number schools in Quintile 1 that obtained 100%.

The Graph indicates that 840 schools have performed above 50%, and 588 schools performed below 50%.

256 schools in this category performed below 50% and the number of schools that obtained 100% is not consistent with the high expectation of schools in this category.

Schools in this quintile are well resourced and are therefore expected to perform above the 80% level. However, it is a matter of serious concern that 144 schools in this category are performing between 0 and 49

List of 19 Schools with a pass rate below 20% in quintile 5 is as follows:

ProvinceName	Region name	Disctrict name	Quintile	Centre name	Dinaledi	Total Entered	Total- Wrote	Total Passed	Pass %

Analysis of schools, per quintile ranking that obtained 100%

6.1.4 Analysis of overall performance per gender

The number of males and females that wrote in 2008 and 2009 is relatively stable and the achievement between the two gender groups is fairly constant.

6.1.5 Results in different categories of performance

1662 schools obtained an achievement rate of between 40% and 59%, which is the highest in these categories. The outstanding performance exhibited by the 420 schools is heartening.

6.1.6 Analysis of results of schools that have been underperforming

Performance of schools in different categories								
	0 %	1 - 19.9 %	20 - 39.9 %	40 - 59.9 %	60 - 79.9 %	80 - 99.9 %	100 %	TOTAL

6.1.6.1 Comparison of schools that performed below 60% - 2008 and 2009

There is an increase in the number of learners that performed between 20% and 40% and this resulted in the number of schools that performed below 20% being decreased from 499 to 453.

6.2 Subject Analysis

6.2.1 Overall Analysis of National selected subjects

It is encouraging to note that the performance in Business Studies, Economics, Geography and History and Mathematical Literacy, at the 30% achievement level, is above 70%. There is a need for an intensive intervention in Mathematics and Physical Science which are notably lower than the other subjects.

6.2.2 Performance in subjects with high enrolments – 2008 and 2009 compared

The performance in Accounting is relatively stable in 2008 and 2009 and the same trend is also observed with learners that achieved at 40%.

The significant increase of learners that achieved at 40% compared to 2008 is extremely encouraging.

The number of learners that passed at 40 percent has increased by 3% which is indicative of improved performance.

The performance of learners passed is encouraging, but the performance at the 40% level needs attention.

Performance at the 40% level confirms that the intervention programme in Geography needs strengthening.

The performance of learners in 2009 is higher than the performance of learners in 2008. It is also encouraging to note there is a significant increase in the number of learners that passed at 40%.

The performance of Life Orientation is fairly constant over a two year period. The support and moderation initiatives undertaken by the DoBE and PEDs, is beginning to bear fruit.

There is relative stability of performance at the 40% level over the two year period.

It is heartening to note that 581620 learners wrote Mathematics in 2008 and 2009. The number of learners that performed at 30% level is 265 020, and 168572 at the 40% level.

It is inspiring to note that the number of learners who wrote Physical Science has increased over a two year period. The number of learners who achieved the Physical Science at 30% is 201179 and it is encouraging that 107982 learners have achieved the NSC at 40% thereby satisfying the requirements for admission to Higher education.

The Graph shows that the performance of learners in 2009 is lower than the performance of learners in 2008. This is attributed to the challenging paper which teachers are still struggling to keep up with and it is envisaged that the situation will change over a period of five years.

The Graph indicates that the number of learners that performed well in 2008 and 2009 is fairly stable. The number of learners who passed at 40% is also constant.

6.2.3 Analysis of performance in the languages of teaching and learning

The performance of learners who passed the NSC at 40% in 2008 is slightly higher than the performance in 2009.

The performance of learners who passed the NSC at 40% in 2008 and in 2009 is relatively stable.

The performance of learners who passed the NSC at 40% in 2008 and in 2009 is consistent.

The number of learners that performed at 30% is consistent over the two year period. It is encouraging that 69.56% of learners passed at 40%.

6.3 Provincial Results

6.3.1 EASTERN CAPE

The total number of learners who wrote the NSC in 2009 is higher than the learners who wrote in 2008 and this trend is also observed in the performance of learners over the two year period.

Comparisons of achievements in different categories

6.3.2 FREE STATE

Comparison of the total number of candidates that achieved in the Free State - 2008 and 2009

Comparisons of achievements in different categories

6.3.3 GAUTENG

The number of learners that wrote in 2009 is higher than the number of learners who wrote in 2008. The number of learners who passed in 2009 is stable over a period of two years.

Comparisons of achievements in different categories

6.3.4 KWAZULU NATAL

Although the graph shows a drop in the number of candidates who wrote the 2009 NSC examination in comparison with the learners in 2008, Kwazulu-Natal contributes the highest number of learners compared to other provinces. The percentage pass rate of this province has improved significantly and this is attributed to the intervention strategies employed by the province.

Comparisons of achievements in different categories

Comparison of district performance in the KwaZulu Natal province

6.3.5 LIMPOPO

Comparison of the number of candidates that achieved in Limpopo - 2008 and 2009

The number of learners who wrote in 2009 is lower than the number of learners that wrote in 2008. The performance of learners in 2009 is marginally lower than the performance of learners in 2008.

Comparisons of achievements in different categories

The performance of learners in Vhembe is notably higher than other districts.

6.3.6 MPUMALANGA

The number of learners who wrote the NSC in 2009 is higher than the number of learners who wrote in 2008 and the performance is consistent with this trend.

Comparisons of achievements in different categories

Comparison of district performance in Mpumalanga province

6.3.7 NORTH WEST

The number of learners who wrote the NSC in 2008 and in 2009 is relatively stable and the performance of learners is consistent with this trend.

Comparisons of achievements in different categories

Comparison of district performance in the North West

6.3.8 NORTHERN CAPE

Comparison of the total number of candidates that achieved in the Northern Cape - 2008 and 2009

The number of learners who wrote the NSC in 2009 is slightly higher than number of learners who wrote in 2008 and the performance of learners in 2009 is slightly lower than the performance of learners in 2008.

Comparisons of achievements in different categories

Comparison of district performance in the Northern Cape

6.3.9 WESTERN CAPE

Comparison of the total number of candidates that achieved in the Western Cape - 2008 and 2009

This Graph indicates that the number of learners who wrote in 2008 and in 2009 is relatively constant. The performance of learners is also stable over two years.

Comparisons of achievements in different categories

The number of learners that wrote the 2009 NSC in Metropole North and Metropole Central is higher than in other districts. The number of pass is also consistent with this trend.

6.4 Provincial Subject Analysis

In the analysis of Mathematics and Science in all the provinces it is observed that the performance on Life Sciences and Mathematics Literacy is higher than the performance in Mathematics and Physical Science. There has been a significant drop in the performance of Physical Science in 2009.

No matter what the circumstances are, with hard work, determination and pursue of educational excellence the South African education and training system shall succeed.

7. Conclusion

Although, the examination system in South Africa is run by the Department Basic Education, the examination chief directorate is given a measurable degree of independence to run its process with integrity. The DoBE has achieved significant strides in the setting of quality question papers and it is envisaged standard of these papers will drive teaching and learning in the classrooms towards the achievement of higher order thinking skills.

The monitoring of the examination processes across districts by the DoBE and PEDs has enhanced credibility in the running of examination across the system. A strategic oversight of these processes by the DoBE has raised the stakes and officials are working tirelessly and vigilantly to stamp out malpractices. The irregularities that occurred in Mpumalanga were effectively dealt with in accordance with the policy and the integrity of examination in South Africa is vindicated by the decisions of the DoBE and Umalusi.

The performance of the 2009 learners reflects a normal distribution curve which shows consistency of the results in the two year period. Once the system matures in respect of the new curriculum, the results will improve. A systemic intervention is essential in ensuring that the standard of examination question papers and the standard of teaching and learning in the classrooms are consistent.
