## FOREWORD BY THE MINISTER

**Dr BE Nzimande, MP**

Minister of Higher Education, Science and Technology

The 2018/19 financial year marked yet another successful year for the Department of Science and Technology (DST), with the highlight being the approval by Cabinet of the White Paper on Science, Technology and Innovation.

The new White Paper identifies the fourth industrial revolution (4IR) as a key focus. The new technologies associated with the 4IR – including artificial intelligence, robotics, the Internet of Things, and genetic engineering – are poised to have a hugely disruptive impact on the place of humans in economic production.

By placing STI at the centre of South Africa's development agenda, the White Paper gives us an opportunity to prepare for what lies ahead and ensure that the country becomes a global centre of science, technology and innovation.

With a budget of R7,958 billion for the reporting period, the Department continued to enhance service delivery, using its 2018/19 Annual Performance Plan as an implementation instrument for contributing to the government's Programme of Action, as informed by the Medium-Term Strategic Framework and the National Development Plan.

The main focus of the Department in the reporting period was to create an environment in which the national system of innovation (NSI) contributed to the reduction of poverty, inequality and unemployment in South Africa, and provided marginalised communities

with more and better opportunities to participate fully in the economy.

The DST continues to engage other departments through bilateral agreements and joint projects to ensure uptake and sustainability of its interventions. In partnership with the national Department of Human Settlements (DHS), the DST is advancing the deployment of innovative technology solutions in the human settlements sector. The DHS has developed a framework that will guide the deployment of innovative technologies. The framework is key in terms of delivering on the Cabinet resolution on the deployment of locally developed technologies. Furthermore, through the Technology Innovation Agency, the DST is piloting an innovative financing instrument, the Technology Adoption and Deployment Fund, a tool intended to contribute towards enhancing market access primarily for locally developed innovative technology solutions that respond to development challenges and priorities.

Education remains key to people's prospects for improving their opportunities in the labour market and realising their socio-economic goals. As part of our human capital development initiatives, the Department supported a total of 13 154 students, comprising 4 572 pipeline (honours and final-year BTech), 5 202 master's and 3 380 doctoral students.

The STI-related services provided by the Department include knowledge-generation stimulus packages in the form of research grants. To ensure equal access for

### 3. FOREWORD BY THE MINISTER (CONTINUED)

all, grants are provided through various instruments designed to strengthen research capacity at universities, including the South African Research Chairs Initiative and the Centres of Excellence Programme.

The DST, through the National Research Foundation (NRF), awarded research grants to 4 633 researchers, 40% of whom were black and 39% women. In terms of the production of new knowledge, over 9 159 research articles were published by funded researchers and cited in the Thomson Reuters Web of Science Citation Database.

The NRF also awarded 35 research infrastructure grants to the total value of R703,015 million. One of the funded research facilities, the iThemba Laboratory for Accelerator-Based Science, celebrated the 10th anniversary of South Africa's collaboration with CERN, the European Organization for Nuclear Research. This partnership has created invaluable opportunities for the South African research community to achieve excellence in the field of particle physics.

The National Intellectual Property Management Office (NIPMO) continued to provide financial and non-financial support to researchers, investing R47,8 million in the establishment and maintenance of offices of technology transfer, rebates for intellectual property protection and maintenance costs, and incentives for intellectual property creators.

The number of actionable disclosures received by NIPMO has increased to a total of 1 800 since the enactment of the Intellectual Property Rights from Publicly Financed Research and Development Act, 2008, with 311 new disclosures received in 2018/19.

During the reporting period, the Department launched another of the 13 large research infrastructures that fall under the South African Research Infrastructure Roadmap. Based at Nelson Mandela University, the Shallow Marine and Coastal Research Infrastructure will provide vital data for growing the blue economy, especially in the key sectors of fishing, aquaculture, oil and gas, shipping, mining and coastal development.

The blue economy has been identified as the next major contributor to South Africa's GDP, with the potential to create up to a million direct jobs and contribute up to R177 billion to the country's economy by 2030.

South Africa is continuously making its mark as a global destination for astronomy development. During the reporting period, the 64-antenna MeerKAT radio telescope, a precursor to the Square Kilometre Array, was completed and commissioned for science operations. The MeerKAT has since revealed an extraordinary detail in the region surrounding a supermassive black hole at the centre of the Milky Way, confirming its status as one of the most advanced scientific instruments in the world.

The Department also launched the MeerLICHT optical telescope, a collaboration between research institutions in the Netherlands, South Africa and the United Kingdom. The MeerLICHT will conduct observations in parallel with the MeerKAT, enabling astronomers to study stars and galaxies in two parts of the spectrum, optical and radio, at the same time.

To increase astronomy capacity at historically disadvantaged institutions, the DST provided funds to North-West University to build a dome for their newly established Mahikeng Astronomical Observatory, which houses a 16-inch Meade LX200GPS optical telescope that is used both for research by students and for outreach to local schools and the community.

The year under review saw the launch of a mining precinct aimed at supporting local innovations to provide solutions to the challenges faced by the mining industry in South Africa, including mineworkers' health and safety. This institution, named after former President Nelson Mandela, will help to position mining as a core driver of world-class technological and manufacturing capabilities and solutions for the development of the economy, embedding 4IR initiatives in its operations to reverse the decline in the sector.

The National Treasury allocated R63 million for the South African Mining Extraction Research, Development and

### 3. FOREWORD BY THE MINISTER (CONTINUED)

Innovation (RDI) Strategy in the 2018/19 financial year. An additional 50% in matching funds from the Minerals Council South Africa enabled substantial RDI programmes to be undertaken.

On the global front, the DST will continue to build on its successes in international relations, managing, monitoring and recommitting to meaningful international partnerships in STI to advance the mandate of the Department. A total of R517 009 000,00 in foreign funds were secured from international partners in support of South Africa's NSI. The European Union remains one of the largest contributors, with substantial contributions also received from philanthropic foundations.

The DST managed to secure R91 275,00 from international partners to support collaborative projects in Africa. The Department itself has invested in 93 jointly funded projects with African partners, and received endorsement from either the Southern African Development Community or the African Union for 17 initiatives.

The hosting of the 6th BRICS (Brazil, Russia, India, China and South Africa) STI Ministerial Meeting was a major highlight on the Department's calendar. The meeting focused on harnessing science, technology

and innovation to provide BRICS countries with a competitive advantage in the fourth industrial revolution.

On the legislative front, the National Research Foundation Amendment Bill and the Protection, Promotion, Development and Management of Indigenous Knowledge Bill were approved for signature by the President.

I would like to express my gratitude to the Portfolio Committee on Science and Technology, the Director-General and the staff of the Department of Science and Technology, and the science councils and industry and civil society stakeholders in the NSI, for their commitment towards our goal of placing South Africa on a growth trajectory in pursuit of an inclusive society

**Dr BE Nzimande, MP**

Minister of Higher Education,  
Science and Technology

### 3. ISENDLALELO SIKANGQONGQOSHE

Unyaka wezimali wezi-2018/19 uphinde waba ngomunye unyaka onempumelelo eMnyangweni Wezesayensi Nobuchwepheshe (i-DST), kube umsebenzi omkhulu kakhulu kube wukuthi iKhabhinethi ligunyaze uMthetho Odingidwayo wezeSayensi, Ubuchwepheshe Namasu Amasha.

Lo Mthetho omusha Odingidwayo uveza ukuthi kumele kugxilwe kakhulu kuguquko lwezimboni lwesine (i-4IR). Ubuchwepheshe obusha obuhambisana ne-4IR - obubandakanya ubuchwepheshe bemishini, amarobhothi, Ukuxhumana Kwezinsiza Zobuchwepheshe (i-Internet of Things), kanye nobuchwepheshe bokukhiqiza okusha ngokususela kulibofuzo - buvezwa njengokuzoba nomthelela ophazamisa kakhulu isikhundla sabantu emisebenzini yokwakha umnotho.

Ngokubeka i-STI kumongo wohlelo lwentuthuko lweNingizimu Afrika, lo Mthetho Odingidwayo unika abantu ithuba lokulungiselela okuzayo nokuqinisekisa ukuthi izwe liba yisikhungo sezesayensi, ubuchwepheshe namasu amasha somhlaba jikelele.

Ngesabelomali sezigidigidi eziyi-R7, 958 sesikhathi okubikwa ngaso, uMnyango uqhubekile nokuthuthukisa ukuhlinzeka ngomsebenzi, ngoHlelo Lokusebenza Lonyaka wezi-2018/19 njengesakhi sokuqalisa izinhlelo ukuze ukwazi ukuba negalelo Ohlelweni Lokusebenza lukahulumeni, ngokususela kuHlaka Lwesu Lokusebenza Lwesikhathi Esimaphakathi Nonyaka kanye noHlelo Lwentuthuko Kazwelonke.

Kulesi sikhathi okubikwa ngaso uMnyango ugxile kakhulu ekwakheni indawo lapho uhlelo lukazwelonke lwamasu amasha (i-NSI) lube negalelo ekunciphiseni ububha, ukungalingani nokungabibikho kwamathuba omsebenzi eNingizimu Afrika, futhi luhlinzeke imiphakathi ekhishwe inyumbazane ngamanye amathuba angcono ukuze izibandakanye ngokugcwele emnothweni wezwe.

Imfundo yiyo esayisikhali esisemqoka ukuze abantu bathuthukise amathuba abo okuthola

imisebenzi nokufinyelela emigomweni yabo yezenhlokomnotho. Njengengxenywe yezinhlelo zethu zokuthuthukiswa kwezisebenzi, uMnyango useke abafundi basemanyuvesi abayizi-13 154, phakathi kwabo abayizi-4 572 ngasebephambili ngemfundo (abafundela iziqu ze-honours nabakunyaka wokugcina we-BTech), abayizi-5 202 abafundela iziqu ze-masters kanye nabayizi-3 380 abafundela iziqu zobudokotela.

Imisebenzi ehambisana ne-STI ehlinzekwe uMnyango ibandakanya izinhlelo zokwenza ucwaningo lokuthola ulwazi ngokusebenzisa izibonelelo zocwaningo. Ukuqinisekisa ukuthi bonke abantu bahlinzekelwa ngokulinganayo, izibonelelo zihlinzekwa ngezindlela ezinhlobonhlobo ezenzelwe ukuqinisa amandla okuqhutshwa kocwaningo emanyuvesi, okubandakanya Uhlelo Lozihlalo Bocwaningo eNingizimu Afrika kanye Nezikhungo Zohlelo Lobunyoinco.

I-DST, ngaphansi kwe-National Research Foundation (i-NRF), ikhiphe izibonelelo zocwaningo zanikwa abacwaningi abayizi-4 638, ama-40% abo okube abantu abamnyama futhi ama-39% abo ngabantu besifazane. Ngokokukhiqizwa kolwazi olusha, abacwaningi abaxhasiwe bashicilele ama-athikhili ocwaningo ayizi-9 161 futhi acashunwa ku-Thomson Reuters Web of Science Citation Database.

I-NRF iphinde yakhipha izibonelelo zengqalasizinda yocwaningo ezingama-35 ezibize izigidi ezingama-R703,015. Esinye sezikhungo zocwaningo ezixhasiwe, iThemba Laboratory for Accelerator-Based Science, sibungaze ishumiminyaka lokusebenzisana kweNingizimu Afrika ne-CERN, okuyiNhlangothi yase-Europe Yocwaningo Lwezenuzi. Lobu budlelwano budalele abacwaningi baseNingizimu Afrika amathuba amangalisayo ukuze kufinyeleleke kubunyoinco emkhakheni weze-particle physics.

IHhovisi Lokuphathwa Kwemikhiqizo Yobuhlakani Obusha Kazwelonke (i-NIPMO) liqhubekile nokweseka abacwaningi ngemali nangokungasiyo imali, latshala izigidi ezingama-R47,8 ukuze kusungulwe futhi kunakekelwe amahhovisi okudlulisa ubuchwepheshe,

### 3. ISENDLALELO SIKANGQONGQOSHE

izimbuyiselo zokuvikelwa kwemikhiqizo yobuhlakani obusha nezindleko zokunakekela, kanye nemihlomulo yabasunguli bemikhiqizo yobuhlakani obusha.

Isibalo sokudaluliwe okungathathelwa izinyathelo zomthetho esamukelwe yi-NIPMO sikhuphukile safinyelela ku-1 809 kusukela kwamiswa Amalungelo Emikhiqizo Yobuhlakani Obusha esuselwa kuMthetho Wocwaningo Oluxhaswe Wuhulumeni Nokuthuthukisa, 2008, lapho okwaba nokusha okudaluliwe okungama-311 okwamukelwa ngowezi-2018/19.

Ngesikhathi okubikwa ngaso, uMnyango wathula ezinye izingqalasizinda zocwaningo ezinkulu eziyi-13 ezingena ngaphansi Kohlelo Lwengqalasizinda Yocwaningo eNingizimu Afrika. Inqalasizinda Yocwaningo Lolwandle Olungashoni Kakhulu kanye Nogu, oluqhubeka eNyuvesi iNelson Mandela, luzohlinzeka ngemininingo esemqoka yokukhulisa umnotho wasolwandle, ikakhulukazi imikhakha ebalulekile yezokudoba, impilo yasolwandle, amafutha namagesi, ukuthutha ngomkhumbi, imayini nokuthuthukiswa kogu. Umnotho wasolwandle uhlonzwe njengokunye okunegalelo elikhulu ku-GDP yaseNingizimu Afrika, unamathuba okwakha imisebenzi engatholwa abantu ngqo engafinyelela kuzigidigidi futhi yaba negalelo elifinyelele kuzigidigidi eziyi-R177 emnothweni wezwe ngowezi-2030.

INingizimu Afrika iyaqhubeka nokuziveza njengendawo yomhlaba jikelele yokuthuthukisa isayensi yezomkhathi. Ngesikhathi okubikwa ngaso, besekuqedwe futhi kwagunyazwa i-64-antenna MeerKAT radio telescope, eyakhiwe kuqala kune-Square Kilometre Array, ukuze kuqhutshwe imisebenzi yesayensi. Kusukela ngaleso sikhathi i-MeerKAT seyiveze imininingwane emangalisayo esifundeni esizungeze i-black hole enkulu ngokumangalisayo emnyombweni we-Milky Way, okuqinisekisa isimo sayo njengesinye sezakhi zesayensi esithuthukiswe kakhulu emhlabeni.

UMnyango uphinde wathula i-MeerLICHT optical telescope, evele ngokusebenzisana kwezikhungo zocwaningo zase-Netherlands, eNingizimu Afrika

nase-United Kingdom. I-MeerLICHT izokwenza umsebenzi wokuqapha ngesikhathi esisodwa ne-MeerKAT, okuzokwenza osomkhathi bacwaninge izinkanyezi nama-galaxy ngezingxenye ezimbili zendawo, ngokubona kanye nemisindo yokuxhumana, ngesikhathi esisodwa.

Ukwandisa abantu abafunda izifundo zomkhathi ezikhungweni ebeziphucwe amathuba phambilini, i-DST ihlinzeke ngoxhaso eNyuvesi yase-North West ukwakha isakhiwo se-Mahikeng Astronomical Observatory esanda kwakhiwa, esiqukethe i-16-inch Meade LX200GPS optical telescope esetshenziselwa ucwaningo lwabafundi nokwelulela isandla ezikoleni zasendaweni nasemphakathini.

Kulo nyaka obuyekwezwayo kwethulwe isikhungo sezokuvukuzwa okuhloswe ngaso ukuthi kwesekwe amasu amasha asemiphakathini ukuhlinzeka ngezisombululo zezinselele imboni yezimayini ebhekene nazo eNingizimu Afrika, okubandakanya isimo sezempilo nezokuphepha eziqondene nezisebenzi zasezimayini. Lesi sikhungo, esiqanjwe ngowayenguMongameli uNelson Mandela, sizosiza ukumisa imboni yezokuvukuzwa njengomholi omkhulu womsebenzi nezisombululo zezobuchwepheshe nokukhiqiza okusezingeni lomhlaba ukuze kuthuthukiswe umnotho, kugxilisewe izinhlelo ze-4IR emisebenzini yayo ukushintsha ukuwa kwalo mkhakha.

Umgcinimafa Wezwelonke ukhiphe izigidi ezingama-R63 zabelwa Isu Lokusebenza Locwaningo, Intuthuko Namasu Amasha (i-RDI) Kwezokuvukuzwa Kwezimayini eNingizimu Afrika ngonyaka wezimayini wezi-2018/19. Kuphinde kwangezwa ama-50% oxhasomali olufanayo oluvele kuMkhandlu Wamaminerali waseNingizimu Afrika okwenze ukuthi kwenziwe izinhlelo ezinzulu ze-RDI.

Emazweni omhlaba, i-DST izoqhubeka nokwakhela phezu kwempumelelo yayo kwezobudlelwano bamazwe ngamazwe, ukuphatha, ukuqapha nokuzibophezela kabusha ebudlelwani bamazwe ngamazwe obuzwakalayo kwi-STI ukuthuthukisa umsebenzi woMnyango. Selulonke luyizi-R517

### 3. ISENDLALELO SIKANGQONGQOSHE

009 000,00 uxhasomali lwakwamanye amazwe olutholakele kozakwethu bakumazwe ngamazwe ukweseka i-NSI yeNingizimu Afrika. I-European Union kusayiyo engumxhasi omkhulu, njengoba inikele ngemali eningi nayo etholakale ezinhlanganweni zabantu abasiza abantu.

I-DST ikwaze ukuthola izi-R91 275,00, kozakwethu bakumazwe ngamazwe ukweseka imisebenzi ehlanganyelwe e-Afrika. UMnyango ngokwawo ufake utshalomali kumisebenzi ehlanganyelwe engama-93 nozakwethu base-Afrika, futhi wathola ukwesekwa yiNhlangotho yokuThuthukisa Amazwe aseNingizimu ne-Afrika noma iNhlangotho yase-Afrika ngezinhlelo eziyi-17.

Ukusingathwa koMhlangano we-STI Wongqongqoshe abaku-BRICS (i-Brazil, Russia, India, China neNingizimu Afrika) yikho okwahamba phambili ekhalendeni loMnyango. Umhlangano wagxila ekusebenziseni isayensi, ubuchwepheshe namasu amasha ukuhlinzeka amazwe e-BRICS ngethuba lokuzuza kwezokuncintisana kuguquko lwezimboni lwesine.

Kwezomthetho, kwagunyazwa imithethosivivinywa emibili, uMthethosivivinywa Oyisichibiyelo Wesikhungo Sezocwaningo Kuzwelonke noMthethosivivinywa Wezokuvikela, Ukukhuthaza, Ukuthuthukisa Nokuphatha Ulwazi Lwezendabuko, ukuze isayinwe wuMongameli.

Ngithanda ukubonga iKomidi Lemisebenzi Yezesayensi Nobuchwepheshe, Umqondisi-Jikelele nezisebenzi zoMnyango Wezesayensi Nobuchwepheshe, kanye nemikhandlu yezesayensi nababambiqhaza basembonini nabezinhlangano zomphakathi ku-NSI, ngokuzinikela kwabo emgomweni wethu wokubeka iNingizimu Afrika ethubeni lokukhula kuphokophelwe emphakathini obandakanyayo.

**Dkt. BE Nzimande, i-MP**

UNgqongqoshe Wezemfundo Ephakeme, Ezesayensi Nobuchwepheshe

### 3. KETAPELE KA TONA

## 4. STATEMENT BY THE DEPUTY MINISTER

**Mr KB Manamela, MP**

Deputy Minister of Higher Education, Science and Technology

Science, technology and innovation play a crucial role in enhancing productivity, growing a sustainable and inclusive economy, and improving socio-economic conditions in the country.

During the reporting period, the Department of Science and Technology (DST) made significant progress in the demonstration of innovative technology solutions in support of improved access and quality of service delivery. The South African Sanitation Technology Demonstration Programme continued to contribute to increased access to decent and appropriate sanitation services, especially for rural households. At the same time, the programme was refocused to strengthen its contribution to industrialisation and technology localisation within the context of the Industrial Policy Action Plan. The programme created a viable technology platform for supporting a pipeline of alternative sanitation technologies to deliver on priorities such as the sanitation backlog in schools and rural areas.

A diverse set of players, including research institutions, municipalities, the South African Bureau of Standards, eThekweni Municipality and the South African Local Government Association (SALGA), partnered in the development of an international standard (ISO 30500) for non-sewered sanitation systems. The adoption of this standard will enable South Africa to play a greater role in the innovative sanitation technologies space.

Under the DST-Hitachi Engineer Exchange Programme, six engineers under the age of 35 working at municipalities or water utilities across South Africa spent two months in Japan learning about how water is managed there at municipal level. In the process, they were exposed to new water technologies that could be adapted for use in their local working environments. The exchange programme has been highly successful, leading to the creation of the Young Engineers “Changemakers” Programme, a partnership between SALGA and the Water Technologies Demonstration Programme of the DST and the Water Research Commission.

Through the Sector Innovation Fund, the DST has supported a portfolio of seven industries, namely horticulture, post-harvest innovation, viticulture, forestry, mineral processing, paper manufacturing, and agroprocessing.

Small-scale agroprocessing initiatives in South Africa are still facing major challenges. The structural constraints facing such initiatives are exacerbated by historical, natural and financial factors. The challenge is to co-design ways to manage these constraints effectively through innovation.

To address some of the challenges of the agricultural bioeconomy, the DST, in collaboration with the Technology Innovation Agency, supports the

#### 4. STATEMENT BY THE DEPUTY MINISTER (CONTINUED)

Agricultural Bioeconomy Innovation Partnership Programme (ABIPP). In the 2018/19 financial year, ABIPP funded a number of existing and new initiatives. One of these is the Wheat Breeding Platform, which focuses on developing drought-tolerant and pest-resistant varieties. During the reporting period, 270 lines were made available to different breeding companies, of which 161 were selected by the Agricultural Research Commission (ARC), 27 by Sensako and 18 by Corteva (Pannar). Since 2015, 27 new cultivars have been released by the breeding companies, one by the ARC, eight by Sensako and 18 by Pannar.

Several initiatives were also undertaken to promote co-operatives and agroprocessing initiatives. Fifteen community-based initiatives were supported through the construction and equipping of pilot pre-processing facilities. The Innovation Hub (BioPark) incubated 14 SMMEs, supporting business development and entrepreneurship in RDI-based natural products.

During the reporting period, SolarTurtle, a spin-off company of the Renewable Energy Hub and Spoke Programme at the University of Stellenbosch, built on its previous experiences with alternative energy sources in rural areas. The company deployed 10 SolarTurtle energy kiosks in Lesotho to support rural women in their business initiatives. This solution is based on a DST-funded solar energy programme. The Mini SolarTurtles were produced for the Lesotho highlands as part of a European Commission programme to empower women entrepreneurs with renewable energy.

Considerable progress was also made with the DST's Grassroots Innovation Programme, which provides technical and financial support to enable social entrepreneurs and innovators working in townships and rural areas to develop solutions to social challenges facing their communities. These entrepreneurs and innovators typically lack access to formal training or research institutions. During the year under review, a call for grassroots innovations was issued and over 100 qualifying local innovators are being enrolled in the programme, which will help them to develop

their concepts, commercialise their ideas, and create prototypes.

The Department strives to increase the number of high-level graduates in the country, as well as improve their representivity. The Centre for High Performance Computing Student Cluster Competition team, supported by the DST, secured third place for South Africa at the 2018 International Student Cluster Competition in Germany. In this competition, students are judged on their ability to design a supercomputer cluster that meets strict power constraints and high-performance benchmarks.

The DST also co-sponsored the 2018 Deep Learning Indaba, with the aim of increasing African participation and contribution to advances in artificial intelligence and machine learning, and addressing the issue of diversity in these fields. The DST funded the participation of four honours, 19 master's and seven doctoral students at the event.

I wish to express my sincere gratitude to the leadership within the national system of innovation, as well as to the dedicated staff in the Department and its entities, centres of excellence and science councils, for making sure we achieve the goals we have set for improving our society and growing our economy through science, technology and innovation.

**Mr KB Manamela, MP**  
Deputy Minister of Higher Education,  
Science and Technology

## 5. REPORT OF THE ACCOUNTING OFFICER

**Dr MP Mjwara**  
Accounting Officer

### 5.1 Introduction

It is an honour for me to present the Department of Science and Technology 2018/19 Annual Report. The report indicates the implementation of our mandate which is to coordinate the development of the National System of Innovation (NSI) as articulated in the 1996 White Paper on Science and Technology.

This report highlights the achievements of the 2018/19 financial year and provides an account of our financial and non-financial performance, based on our performance measures and targets.

A brief overview of the Department's operations and significant achievements is given below.

### 5.2 Overview of departmental operations

The year under review has seen the Department successfully achieve the goals of its Operational and Annual Performance Plans. The governance structures of the Department continued discharging their responsibilities. The Executive Committee, Operations Committee, Enterprise Risk Management Committee, Information Technology Steering Committee and bid committees met as required.

To minimise risks, during the period under review the Department ensured that measures to mitigate

against identified risk were implemented. These were monitored on a quarterly basis through Enterprise Risk Management processes. The Audit Committee met regularly, and Internal Audit assisted with the monitoring of compliance and the enhancement of governance issues in the Department. The work of the Audit Committee and Internal Audit played a significant role in the Department obtaining an unqualified audit opinion (clean audit) for the 2017/18 financial year.

The Department ensured that all Supply Chain Management processes were followed to minimise incidents of non-compliance with the Public Finance Management Act and other relevant prescripts. This was confirmed by the high rating of the Department under the Management Performance Assessment Tool (MPAT). In the period under review the Department continued to pay all valid invoices within 30 days of receipt. The timely payment of invoices, especially to small, medium and micro-enterprises (SMMEs) is an important part of ensuring that the National Development Plan goal of creating a significant number of jobs by 2030 is achieved.

Designated employees are required to disclose their financial interests in terms of the Public Service Regulations. In the period under review, 100% of designated employees submitted their disclosures in time.

## 5. REPORT OF THE ACCOUNTING OFFICER (CONTINUED)

### 5.3 Significant developments and major projects undertaken

Below are some of the significant events that took place in the 2018/19 financial year. More details are given in the performance overview sections for the specific Programmes.

#### Space Science and Technology policy instruments

The National Space Programme Economic Case and the Space Industry Framework (with the Department of Trade and Industry) have been completed, and will be used to mobilise the funding needed for a long-term national space programme and the development of sustainable local space industry that will contribute to the country's economy and service delivery.

#### Operation Phakisa – Oceans Economy

The National Oceans and Coast Information Management System (OCIMS) has been developed with critical decision-support tools, including integrated vessel tracking, oil spill detection, flood hazards, harmful algal blooms, sea state, water quality and marine spatial planning, which will significantly improve the sustainable exploitation of oceans and preserve protected marine areas.

#### Oceans Economy and Satellite Development

A precursor for the Maritime Domain Awareness (MDA) Satellite Constellation, called ZACube-2, was successfully launched on 27 December 2018. Funding has been made available for the development of the full constellation. This constellation will also provide infrastructure for MDA and the National OCIMS, which will enhance and generate further information to support decision-making in marine governance, protection and spatial planning, as well as stimulating innovation and the growth of domestic SMMEs. The main users and stakeholders of the National OCIMS are the Departments of Environmental Affairs, Defence (Navy), Agriculture, Forestry and Fisheries, the South African Police Service, and government entities such as

the South African Maritime Safety Authority, National Search and Rescue Institute, Maritime Institute of Technology, and the National Ports Authority (Transnet).

#### Space Weather Regional Centre

South Africa has been appointed by the International Civil Aviation Organisation as a Regional Centre for Space Weather Information for the international aviation industry. The centre will provide critical space weather information for the African region.

#### Energy Security Grand Challenge – Energy storage

The Energy Security Grand Challenge is implemented mainly through three flagship programmes, namely, Hydrogen South Africa (HySA), the Energy Storage Research, Development and Innovation (RDI) Programme, and the Renewable Energy Hub-and-Spokes Programme. The period under review saw significant support for postgraduate students, academic publications, granted intellectual property rights, knowledge application products, commercial outputs, decision-support tools and policy directives under the Grand Challenge.

In support of technology commercialisation and getting HySA technology into the global value chain, HyPlat, a company spun out of HySA Catalysis, had its membrane electrode assemblies evaluated by a global original equipment manufacturer. The membrane electrode assemblies performed on par with those available on the market. Furthermore, 10 SolarTurtle energy kiosks were deployed in Lesotho to support rural women in business initiatives.

With regard to energy storage, a multilateral agreement between Germany and South African partners has been put in place to develop a low-cost nickel-iron battery. The partnership includes the University of the Western Cape, Eskom, the Fraunhofer Institute, one German company and two South African SMMEs. The DST investment of R4 million was used to leverage R1,5

## 5. REPORT OF THE ACCOUNTING OFFICER (CONTINUED)

million from Eskom and R10 million from the German partners. Non-disclosure agreements were signed with Manu Mishra (India), Avespa Holdings LLC (the United States of America) and Mzesi Energy (Pty) Ltd (South Africa) companies to explore the commercialisation of Coalgae.

A new decision-support tool for agricultural energy efficiency was introduced to provide evidence-based support for the development of targets under the National Energy Efficiency Strategy. Data from the Bioenergy Atlas was used as input into the land reform workshop and bio-jet fuel feasibility studies by the WWF, Fetola and Skynerg. A draft Shale Gas Action Plan was presented to the DST Exco and workshopped with international experts.

### Research and Innovation Infrastructure

#### *The launch of the Shallow Marine and Coastal Research Infrastructure*

The Shallow Marine and Coastal Research Infrastructure, launched on 19 October 2018 at Nelson Mandela University in Port Elizabeth, is one of 13 research infrastructures under the South African Research Infrastructure Roadmap (SARIR).

#### *The launch of the Dimamo Population Health Research Centre*

The South African Population Research Infrastructure Network (SAPRIN) was established under SARIR in 2016. Hosted by the South African Medical Research Council, it is a national network of research centres that monitor the health and socio-economic wellbeing of whole populations, with the aim of improving them. A node of the SAPRIN national network, the Dimamo Population Health Research Centre at the University of Limpopo, was launched on 10 December 2018. The centre was established to carry out routine measurements of the burden of non-communicable diseases such as high blood pressure and diabetes. This state-of-the-art research centre will not only boost interdisciplinary research and intervention capability at the university, but will also have national significance.

#### *Launch of the South African Open Science Framework Report*

The DST, with funding from the SA-EU Dialogue Facility, embarked on a SA-EU Open Science dialogue initiative between October 2018 and November 2018. The Framework consists of a set of guidelines, principles and best practices for promoting open science in South Africa. The Open Science Framework was launched at Science Forum South Africa in December 2018, in Pretoria.

#### *Amendments to legislation*

On 4 December 2018, the National Research Foundation Amendment Bill was approved by the National Council of Provinces (NCOP) and sent to the President for assent. The approval was preceded by a presentation of the Bill made by the DST on 31 October 2018, and a briefing was held in November 2018.

On 13 February 2019, the Portfolio Committee on Science and Technology considered and approved the NCOP amendments to the Protection, Promotion, Development and Management of Indigenous Knowledge Bill. The changes were not substantive, but largely technical in nature. The Bill was approved and referred to the House for consideration. On 13 March 2019, the National Assembly adopted the Bill and submitted it for the President's assent.

### Lindau Noble Laureate Meeting

On 10 May 2018, the Department hosted a meeting to prepare postgraduate students selected to attend a week-long meeting with Noble Laureate winners in physiology and medicine before their departure for Lindau. All six students were women. The actual meeting took place from 24 to 29 June 2018.

## 5. REPORT OF THE ACCOUNTING OFFICER (CONTINUED)

### **The South African Sanitation Technology Demonstration Programme**

The Department secured donor funding to support efforts to leverage and harness STI in support of improving service delivery and the capacity of the state to deliver services. One of the key initiatives in this regard is the South African Sanitation Technology Demonstration Programme (SASTEP). SASTEP supported key policy outcomes and policy initiatives such as the provision of access to decent sanitation services to rural communities through alternative technologies. This strategic initiative has supported the Industrialisation Policy Action Plan objective of building a strong manufacturing capability and services value chain across key sectors to diversify the economy. SASTEP created a viable technology platform for supporting a pipeline of alternative sanitation technologies to deliver on priorities such as the sanitation backlog in schools and rural areas. A strong set of players, including research institutions, municipalities, standard bodies such as the South African Bureau of Standards, eThekweni municipality and the South African Local Government Association, worked together in the development of an international standard (ISO 30500) for non-sewered sanitation systems. The adoption of this standard will enable South Africa to play a greater role in the innovative sanitation technologies space

### **The Waste and Water RDI Roadmaps**

The continued implementation of the Waste and Water RDI Roadmaps by the Waste Research Implementation Unit and the Water Coordination and Implementation Unit at the Council for Scientific and Industrial Research (CSIR) has supported 59 honours, masters and doctoral students. Of the students funded, 51% are female and 83% are black. For the first time, the biennial WasteCon conference hosted a special session dedicated to the students funded by the Waste Research Implementation Unit, at which seven students presented their work. The first waste sector chairs under the South African Research Chairs Initiative were announced in August 2018.

The incumbent of the Waste and Climate Change Chair at the University of KwaZulu-Natal, Prof. Cristina Trois, has seven funded postgraduate students. The Waste and Society Chair at the University of the Western Cape, Prof. Catherina Schenck, has leveraged funding to support 20 postgraduate students and three journal publications. Furthermore, the DST has embarked on the development of a Circular Economy Framework, and established a Circular Economy Forum to assist in developing the framework and monitoring its implementation going forward.

### **Data Science for Impact Decision Enhancement programme**

In line with the broader DST response to the Fourth Industrial Revolution discourse, the DST-funded programme on Data Science for Impact and Decision Enhancement (DSIDE) has been running for the past five years, and its aim is to support capacity building in the ever-growing field of data science by holding 12-week programmes of mentor-guided and learn-by-doing problem-solving of real world needs as presented by different stakeholders. In 2018/19 the programme recruited and trained 64 students, who are mostly third and fourth-year undergraduates in fields such as engineering, information technology, computer science and mathematics. The students tackled 16 projects, which included verifying and validating water usage in the Breede-Gouritz water catchment area in the Western Cape; categorising cases reported to the Presidential Hotline for the attention of appropriate departments; assisting the City of Tshwane Metropolitan Municipality emergency services (ambulance and fire brigade) to optimise response times by analysing call log data; exploring the typical electricity usage patterns to discover the different categories of electricity users in the township of Thembisa; and social media data analysis to detect themes, topics and overall sentiment, and predict the behaviour of customers/users on topics or products. Most of the graduates have since been employed in the private sector, in the ICT, financial and insurance, and energy sectors, (among others).

## 5. REPORT OF THE ACCOUNTING OFFICER (CONTINUED)

### mLab

Non-profit organisation mLab is a mobile technology accelerator that aims to support innovative new start-ups and to unlock the mobile applications economy. The open innovation laboratory started in 2012 and has evolved into a highly successful initiative. Its offerings include coding skills development (with code academies situated in townships), enterprise development (incubation) and co-creation opportunities with industry for university students. In 2018/19, two more mLab sites (in addition to those in Pretoria and Cape Town) have begun operating. In Polokwane (Limpopo) and Kimberley (Northern Cape).

### The Industry Innovation Partnership Programme

The DST continued to implement its Industry Innovation Partnership (IIP) Programme. This includes the Sector Innovation Fund (SIF) portfolio, as well as support for industry development centres hosted by the CSIR.

The SIF portfolio is designed to offer the private sector an incentive to invest more in RDI through co-investment in priorities identified by the private sector. There are seven industry associations supported through the SIF portfolio, in horticulture, post-harvest innovation, viticulture, forestry, agroprocessing, mineral processing and paper manufacturing. Since the pilot phase started in 2014/15, 200 postgraduate students have been supported, of which 9% (18 students) have already found employment in their respective fields, contributing to the development of a high-end skills pool (and thus the improved competitiveness) of these sectors. In addition, 94 interns and postdoctoral positions were supported, of which just under 25% found employment during the pilot phase. The Department has entered the second phase of the SIF, with the same seven industry associations.

The other leg of the IIP portfolio is the support of a number of industry development centres at the CSIR,

in sectors that represent potential new growth areas of the economy. These are the Biomanufacturing Industry Development Centre (BIDC), the Biorefinery Industry Development Facility, the Nanomaterials Industry Development Centre and the Photonics Prototyping Facility. The pilot phase of support for these centres ran from 2014/15 to 2018/19, and supported 29 SMMEs, most of them through the BIDC. In addition, 142 interns were supported across the centres, 66 of which are now employed, and 192 knowledge products (primarily commercial formulations or near commercial prototypes) were transferred to the entities supported.

### The Programme Management Unit

The Programme Management Unit established at the CSIR to assist in advancing initiatives in the local systems of innovation portfolio has now run two calls for proposals. This followed a new structured approach to soliciting proposals for regional innovation support platforms, such as innovation networking platforms or innovation-enabling infrastructure. Platforms in Limpopo, Welkom, East London and Kimberley are being supported. The outcomes of the second call are currently being finalised.

Finally, the DST is actively participating in a number of intergovernmental processes led by social partners, and international partnership processes aimed at supporting South Africa's response to the Fourth Industrial Revolution. As these processes mature, and with the establishment of a Presidential Advisory Commission on the Fourth Industrial Revolution, the Department will be called upon to further enhance its contribution in support of the national response.

### 5.4 Future plans of the Department

The future plans of the Department will be unpacked in 2019/20 when the Department's 2020-2025 Strategic Plan is developed. The plan will be informed by the 2019 White Paper on Science, Technology and Innovation, as well as the priorities of the incoming administration. However, the Department will

## 5. REPORT OF THE ACCOUNTING OFFICER (CONTINUED)

implement the plans indicated below in the next financial year.

### **Sovereign Innovation Fund**

In 2018/19 the proposed sovereign innovation fund was consolidated with the Small Business Fund to form the Small Business and Innovation Fund, which will be implemented in 2019/20. It is envisaged that the Small Enterprise Financing Agency, overseen by the Departments of Science and Technology and Small Business Development, will serve as the project management unit to implement the Small Business and Innovation Fund.

It is envisaged that the fund will offer primarily early-stage grants in support of pre-commercial, seed, start-up and fledgling companies, with scale-up funding being provided on an equity basis.

### **Science, technology and innovation partnerships**

The DST will continue building on its successes in international relations and will manage, monitor and recommit to meaningful international partnerships in science, technology and innovation to contribute to the mandate of the DST. The Department will continue to champion science diplomacy in Africa.

### **The RDI priorities of the circular economy**

The 2019 White Paper on Science, Technology and Innovation identified the circular economy as a new source of growth. In the short-term, the DST will enable the identification of critical circular economy RDI priorities to give effect to the policy intents of the White Paper. In addition, the DST will participate in broader processes to formalise a circular economy strategy for the country. The implementation of the Green Economy for Development programme will be ramped up in the coming financial year with support for SMMEs in the water and waste sectors (in particular, biorefineries).

### **The IIP and local systems of innovation**

The DST will continue to implement the broader Industry Innovation Partnerships (IIP) portfolio. Significant effort will be dedicated in the coming year to the future implementation of the IIP portfolio, as well as the DST's Local Systems of Innovation portfolio, and how these align with the new White Paper and the new decadal plan. There will be concerted focus on programmes to develop the skills required for a digital economy. In addition, much effort will also be spent on developing DST's approach to contributing to a transition to a circular economy.

### **Mining research and development initiatives**

In order to help secure the future of South Africa's mining industry, the National Treasury allocated the South African Mining Extraction RDI Strategy R63 million in the 2018/19 financial year. An additional 50% matching funds from the Minerals Council South Africa enabled substantial RDI programmes to be undertaken. The Mandela Mining Precinct was formally launched by the Ministers of Science and Technology and Mineral Resources in September 2018. The focus on mining RDI also includes an intentional effort to strengthen the local mining equipment manufacturing industry, which is led by the Department of Trade and Industry.

### **Development of next generation 3D printer**

The development of the next generation additive manufacturing machine has progressed well, with a number of prototype parts having been completed. This is in response to strong overseas interest in using the large bed (printing large components) at high speeds. The Industrial Development Corporation is involved in the process of industrialising the technology, although the detailed industrialisation model (for leveraging the intellectual property) is expected to be completed in the next financial year.

## 5. REPORT OF THE ACCOUNTING OFFICER (CONTINUED)

### 5.5 Discontinued activities and implications for the Department

As the Department begins to implement the 2019 White Paper on Science, Technology and innovation, the DST's activities will have to be aligned to the new policy intents.

### 5.6 New or proposed activities and implications for the Department

There are no new or proposed activities that will be implemented in the next financial year.

### 5.7 Overview of the financial results of the Department

#### Departmental receipts

The table below highlights receipts collected by the Department in the financial year under review and the past financial year (2018/19 and 2017/18).

## 5. REPORT OF THE ACCOUNTING OFFICER (CONTINUED)

Departmental receipts	2018/19			2017/18		
	Estimate	Actual amount collected	(Over)/Under Collection	Estimate	Actual amount collected	(Over)/Under Collection
	R'000	R'000	R'000	R'000	R'000	R'000
Sale of goods and services other than capital assets	35	64	(29)	58	60	(2)
Interest, dividends and rent on land	26	27	(1)	56	34	22
Sale of capital assets	-	217	(217)	-	430	(430)
Financial transactions in assets and liabilities	35 000	32 441	(2 559)	8 072	9 774	(1 702)
<b>Total</b>	<b>35 061</b>	<b>32 749</b>	<b>(2 806)</b>	<b>8 189</b>	<b>10 298</b>	<b>(2 109)</b>

In the period under review, the Department collected significant revenue as compared to the previous financial year. The increase was due to surpluses on project funds that were refunded to the Department and sale of old vehicles that were uneconomical to maintain. The other collections were in relation to commission on insurance deducted from officials.

### Spending trends

The Department's appropriation for the year under review was R7,958 billion, which was a 5,3% increase from R7,557 billion in 2017/18. The increase was mainly due to additional funding of R167 million to the National Research Foundation's iThemba LABS

(South African Isotopes Facility) and baseline increases in some of the transfers and subsidies line items.

The table below shows budget and actual expenditure per Programme for the financial year under review (2018/19) and the previous financial year (2017/18).

The table below shows budget and actual expenditure per Programme for the financial year under review (2018/19) and the previous financial year (2017/18).

Programme	2018/19			2017/18		
	Estimate	Actual amount collected	(Over)/Under Collection	Estimate	Actual amount collected	(Over)/Under Collection
	R'000	R'000	R'000	R'000	R'000	R'000
Administration	380 349	340 493	39 856	340 873	338 197	4 674
Technology Innovation	1 157 338	1 143 715	13 623	1 133 783	1 116 181	17 579
International Cooperation and Resources	142 449	139 872	2 577	168 211	130 598	35 594
Research Development and Support	4 519 058	4 516 626	2 432	4 300 795	4 291 924	8 869
Socio-Economic Innovation Partnerships	1 759 194	1 751 220	7 9748	1 613 567	1612 645	968
<b>Total</b>	<b>7 958 388</b>	<b>7 891 926</b>	<b>66 462</b>	<b>7 557 229</b>	<b>7 489 545</b>	<b>67 685</b>

## 5. REPORT OF THE ACCOUNTING OFFICER (CONTINUED)

The Department's spending performance has been consistently above 90% since its inception. It was 99,2% for the 2018/19 financial year.

### Summary of budget expenditure analysis per economic classification

Details	2018/19 R'000	2018/19 %
Amount voted	7 958 388	100
Actual expenditure	7 891 926	99,2%
Unspent funds	66 462	0,8%
<b>Economic classification</b>		
Current payments	546 152	6,86%
Transfer payments	7 336 589	92,19%
Payments for capital assets	9 042	0,11%
Payments for financial assets	143	0,002%
<b>Total payments</b>	<b>7 891 926</b>	<b>99,2%</b>

### Virements

The Department effected virements amounting to R73,4 million after the Adjusted Estimates of National Expenditure process, which represents 1% of the adjusted budget. An amount of R145 000 was moved between major items and R31 million was moved between Programmes.

R58,9 million was shifted within transfers and subsidies to fund the International Centre for Genetic Engineering and Biotechnology operations, intellectual property creator incentives, manufacturing of products and technology transfer related to indigenous knowledge systems, satellite launching capability and the South African Earth Observation Strategy.

### Supply Chain Management

The Department has procurement policies and delegations in place, and ensured that they were adhered to in the period under review. The Supply Chain Management (SCM) Policy was reviewed to ensure that new procurement guidelines introduced by the National Treasury were complied with. Furthermore, the Department developed and implemented an SCM checklist for the procurement of goods and services to ensure compliance with all

procurement processes. This checklist assisted in ensuring that the segregation of duties principle was observed at all times.

The Department has functional bid management committees. During the period under review the Department ensured that the relevant bid committee members were trained to ensure that they were able to discharge their responsibilities. No unsolicited bids were procured during the year under review.

### 5.8 Gifts and donations received in kind from non-related parties

There were no gifts and donations received in kind from non-related parties.

### 5.9 Standing Committee on Public Accounts (SCOPA) resolutions

There were no SCOPA resolutions.

### 5.10 Prior modifications to audit reports

The Auditor-General found no matters of significance regarding the administration of the Department.

## 5. REPORT OF THE ACCOUNTING OFFICER (CONTINUED)

### 5.11 Exemptions and deviations received from the National Treasury

No exemptions or deviations were raised by National Treasury.

### 5.12 Events after the reporting date

The Department received a claim at the end of the reporting period. A former manager of a science centre alleged unfair treatment and financial loss, and claimed financial restitution. On 20 June 2019 a legal opinion was received that indicated that the claim was frivolous and vexatious, and that it should be dismissed with costs.

### 5.13 Other

No other significant matters were raised during the period under review.

### 5.14 Acknowledgements and appreciation

I would like to express my appreciation to the DST staff and the DST Executive Committee for their support and dedication during the period under review. I would also like to thank Minister Kubayi-Ngubane and Deputy Minister Magwaza-Msibi for their support and leadership.

### 5.15 Conclusion

The Department is currently operating in an uncertain political and economic climate. However, it will continue to carry out its mandate.

### 5.16 Approval and sign-off

The Annual Financial Statements have been approved by the Accounting Officer.

**Dr PM Mjwara**

Accounting Officer

31 July 2019

## 6. STATEMENT OF RESPONSIBILITY AND CONFIRMATION OF ACCURACY OF THE ANNUAL REPORT

I confirm that, to the best of my knowledge and belief –

- all information and amounts disclosed throughout the Annual Report are consistent;
- the Annual Report is complete, accurate and free from any omissions;
- the Annual Report has been prepared in accordance with the Guidelines on Annual Reports issued by the National Treasury;
- the Annual Financial Statements (Part E) have been prepared in accordance with the modified cash standard and the relevant frameworks and guidelines issued by the National Treasury (the Accounting Officer is responsible for the preparation of the annual financial statements and for the judgements made in this regard);
- the Accounting Officer is responsible for establishing and implementing a system of internal control that have been designed to provide reasonable assurance as to the integrity and reliability of the performance information, the human resources information and the Annual Financial Statements;
- external auditors were engaged to express an independent opinion on the Annual Financial Statements.

In my opinion, the Annual Report fairly reflects the operations, the performance information, the human resources information and the financial affairs of the Department for the financial year ended 31 March 2019.

**Dr PM Mjwara**

Accounting Officer

31 May 2019

## 7. STRATEGIC OVERVIEW

### 7.1 Vision

Increased well-being and prosperity through science, technology and innovation.

### 7.2 Mission

To provide leadership, an enabling environment and resources for science, technology and innovation in support of South Africa's development.

### 7.3 Values

- **Professionalism**

The Department is professional and delivers high-quality performance to both internal and external stakeholders.

- **Innovation**

The Department is innovative in solving problems and enhancing effectiveness and efficiency.

- **Ethical behaviour**

The Department and its employees are consistent in their actions, and accountable and transparent in dealing with public funds and other resources.

- **Knowledge sharing**

The Department and its employees share and use knowledge constructively to ensure that it contributes to the building of a robust and productive knowledge economy.

## 8. LEGISLATIVE MANDATE

### 8.1 Academy of Science of South Africa Act, 2001

This Act establishes the Academy of Science of South Africa to promote common ground in scientific thinking across all disciplines, including the physical, mathematical and life sciences, as well as human, social and economic sciences; to encourage and promote innovative and independent scientific thinking; to

promote the optimum intellectual development of all people; to advise and facilitate appropriate action in relation to the country's needs, opportunities and challenges; and to link South Africa with high-level scientific communities within the Southern African Development Community, the rest of Africa and internationally.

### 8.2 Astronomy Geographic Advantage Act, 2007

This Act provides for the preservation and protection of areas in South Africa uniquely suited to optical and radio astronomy, and for intergovernmental cooperation and public consultation on matters concerning such areas.

### 8.3 Human Sciences Research Council Act, 2008

The Act provides for the continued existence of the Human Sciences Research Council, which carries out research that generates critical and independent knowledge relative to all aspects of human and social development.

### 8.4 Income Tax Act, 1962

Section 11D of the Income Tax Act gives the Minister of Science and Technology authority to approve scientific and/or technological research and development undertaken or funded in South Africa for a tax deduction in order to promote private sector R&D activities in the country.

### 8.5 Intellectual Property Rights from Publicly Financed Research and Development Act, 2008

The Act provides for the more effective use of intellectual property emanating from publicly financed research and development, through the establishment of the National Intellectual Property Management Office, the Intellectual Property Fund, and offices of technology transfer at higher education institutions and science councils.

## 8. LEGISLATIVE MANDATE (CONTINUE)

### 8.6 National Advisory Council on Innovation Act, 1997

The Act establishes the National Advisory Council on Innovation to advise the Minister of Science and Technology and, through the Minister, the Cabinet, on the role and contribution of science, mathematics, innovation and technology in promoting and achieving national objectives.

### 8.7 National Research Foundation Act, 1998

The Act establishes the National Research Foundation to promote basic and applied research, as well as the extension and transfer of knowledge in the various fields of science and technology.

### 8.8 Natural Scientific Professions Act, 2003

This Act establishes the South African Council for Natural Scientific Professions and legislates the registration of professional natural scientists, natural scientists-in-training, natural science technologists and natural science technologists-in-training.

### 8.9 Scientific Research Council Act, 1988

The Act refers to the activities of the Council for Scientific and Industrial Research, which undertakes directed research and development for socio-economic growth in areas that include the built environment, defence, the environmental sciences, and biological, chemical and laser technology.

### 8.10 South African National Space Agency Act, 2008

The Act establishes the South African National Space Agency to promote space science research, cooperation in space-related activities, and the creation of an environment conducive to the development of space technologies by industry.

### 8.11 Technology Innovation Act, 2008

The Act establishes the Technology Innovation Agency to promote the development and exploitation of discoveries, inventions, innovations and improvements in the public interest.

## 9. ORGANISATIONAL STRUCTURE

*The Minister of Higher Education,  
Science and Technology*

Innovation Partnerships*  
**Mr Imraan Patel**

## 10. ENTITIES REPORTING TO THE MINISTER

### 10.1 Academy of Science of South Africa

#### Overview of objectives

The Academy of Science of South Africa (ASSAf) aspires to be the apex organisation for science and scholarship in South Africa, recognised and connected both nationally and internationally. Through its membership, which represents the collective voice of the most active scholars in all fields of scholarly enquiry, ASSAf aims to generate evidence-based solutions to national problems.

As the only national science academy to be officially recognised by the South African government, ASSAf recognises and rewards excellence; promotes innovation and scholarly activity; provides effective, evidence-based scientific advice to government and other stakeholders; promotes public interest in and awareness of science and science education; and fosters national, regional and international linkages.

Some of the highlights for the period under review are set out below.

#### Membership

ASSAf currently has a membership of 541 top scholars in South Africa across diverse scientific disciplines, who could be used as a resource for evidence-based solutions to national problems.

#### Evidence-based studies

Authoritative evidence-based studies aimed at providing critical scientific advice take cognisance of the National Development Plan and the need to address the triple challenge of poverty, inequality and unemployment. Many of the Academy's current studies address skills development challenges for a knowledge-based economy. ASSAf published four

consensus study reports during the financial year – *Human Genetics and Genomics: Ethical, Legal and Social Implications*; *Status of Postgraduate Research Training in Engineering in South Africa*; and reports on two grouped peer reviews of scholarly journals, one in visual and performing arts and one in communication and information sciences. A fifth study, the Biennial Report on the State of Climate Change Science and Technology in South Africa, was completed in 2019.

#### SciELO SA

Scientific Electronic Library Online South Africa (SciELO SA), the first fully open access platform for scholarly publishing in the country and the continent, houses 1 739 South African open access journal issues, 27 619 articles and 76 journal titles. Comparative statistics show a 47% increase in views between March 2018 and March 2019.

#### International liaison

Internationally, ASSAf has strengthened collaboration with African and overseas academies of science. It continues to represent South Africa on a number of continental and global science advice bodies, including the Network of African Science Academies and the InterAcademy Partnership. ASSAf also hosts two regional offices of key international partners, namely the International Science Council Regional Office for Africa and the World Academy of Sciences Regional Office for Sub-Saharan Africa.

### 10.2 The Council for Scientific and Industrial Research

#### Overview of objectives

The Council for Scientific and Industrial Research (CSIR) is a world-class African research and development organisation, which was established through an

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUE)

Act of Parliament in 1945. The CSIR undertakes directed, multidisciplinary research and technological innovation that contributes to the improved quality of life of South Africans. The organisation plays a key role in supporting government's programmes through directed research that is aligned with the country's priorities, the organisation's mandate, and its science, engineering and technology areas of competence.

Some of the highlights for the period under review are set out below.

### Demographic transformation

The CSIR met or exceeded the annual targets for seven of its 17 indicators. It had 2 342 employees at the end of the 2018/19 financial year, down 10,54% from 2 618 at the end of the 2017/18 financial year. This was as a result of (a) the moratorium on appointments as part of cost-containment measures, which allowed only critical staff to be recruited; (b) voluntary separations related to a repositioning and restructuring process; and (c) general staff turnover due to contracts ending, retirements and resignations. Of the staff, 1 608 (68,66%) were science, engineering and technology (SET) employees and 734 (31,34%) were support staff. Although the total number of SET staff was reduced, the transformation profile of the SET staff was maintained and targets for the percentage of black and female doctorates were achieved. The total number of chief researchers, especially the number of black chief researchers, remains a concern.

The majority (82,5%) of CSIR employees are employed in the professional and skilled categories. The CSIR is committed to the demographic transformation of its workforce. Approximately 5% (122 employees) of the workforce are non-South Africans, the majority of whom are employed as technical professionals. Black South Africans account for 66% (1 610 employees) of all employees, with black male South Africans accounting for 35% and black female South Africans accounting for 34% of all employees.

### Staff qualification profile

There are 320 CSIR employees with doctoral qualifications and 586 with master's-level qualifications. The proportion of black and female South African employees with doctorates is relatively low (41% and 27% respectively), but the CSIR is committed to the long-term efforts needed to improve this situation. The figures for master's-level qualifications are positive – 41% of employees at this level are female South Africans and 59% are black South Africans.

### Restructuring

A consultation process facilitated by the Commission for Conciliation, Mediation and Arbitration (CCMA) commenced in January 2019. The process was initiated to address operational areas that were not sustainable and to improve operational efficiency.

On 28 March 2019, employees who could not be placed in alternative positions within the CSIR were issued with notices of termination and a termination agreement setting out the restructuring package they qualified for in terms of the CSIR's retrenchment policy.

### Contribution to scientific output

The CSIR contributes to scientific development by identifying and investing in relevant areas of research. The outputs of these interventions include the production of a range of high-quality technical outputs (including peer-reviewed journal articles and patents) and the generation of contract research and development (R&D) income through the provision of research services. The CSIR met or exceeded the annual targets for three of the four indicators in this category.

In total, 45% of CSIR articles were published in journals with an impact factor of 2 to 4.99 (i.e. in the top 10% of journals), and 9% of CSIR articles were published in journals with an impact factor of 5 or higher (i.e. in the top 6% of journals). At the end of the 2018/19 financial year, the CSIR had generated R1,746 billion in contract

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUE)

R&D income against a target of R1,970 billion. The gap can be attributed mainly to delays in securing and finalising a number of planned contracts; the tender process requirements of National Treasury; changes in the funding landscape; models of key funders that require the CSIR to increase co-funding on various initiatives; and budget cuts and non-renewal of contracts with key customers resulting from global economic decline.

The total operating income of the CSIR amounted to R2,5 billion. The parliamentary grant recognised as income in 2018/19 was R752 million, an increase of 3,2% from the previous year. The CSIR's total contract income amounted to R1,75 billion. This includes a R78 million ring-fenced allocation from the DST. The decrease in contract income, excluding the revenue for investments in grant-funded property, plant and equipment of R34 million, amounts to 6,1%. Continued investment in acquiring and maintaining scientific infrastructure and equipment remains a priority.

### 10.3 Human Sciences Research Council

#### Overview of objectives

The Human Sciences Research Council (HSRC) is mandated to initiate, undertake and foster strategic basic and applied policy research in the human sciences, and to gather, analyse and publish data relevant to developmental challenges in South Africa, elsewhere in Africa and in the rest of the world. Of all the work done by the HSRC in the year under review, two areas deserve emphasis. The first is the alignment of the organisation's research priorities around poverty and inequality. The second is its research into urban spatial inequality.

Some of the highlights for the period under review are set out below.

#### Understanding the informal sector

In order to understand one of South Africa's most important and active sectors, the HSRC launched the first standardised survey of innovation in the informal sector at an event at the Mpumzu Traditional Authority Centre in KwaZulu-Natal in March 2019. The survey is being conducted using a sample of informal businesses from the Sweetwaters area. It aims to fill a major gap in understanding innovation in South Africa, since national studies tend to focus more on measurement in formal industrial and service sub-sectors, and much less on innovation in specific geographic communities, including informal enterprises in township or rural communities.

#### Municipal innovation

The HSRC, in partnership with the University of KwaZulu-Natal and the South African Local Government Association, has embarked on the second phase of the Municipal Innovation Maturity Index (MIMI). MIMI is a policy tool that encourages municipalities to think of innovative solutions and to develop a culture of continuous improvement in service delivery. It is a knowledge management tool relevant to promoting innovation in the public sector more broadly. The DST is supporting a sector-wide scaling-up of MIMI across the two municipal tiers via an online platform. The digitisation project will continue for two years. Municipal user inputs will be incorporated, and stakeholders will be encouraged to share their experiences at regular learning forums.

#### "Access to the City"

The HSRC, in the year under review, completed a national evaluative study for the Department of Human Settlements on the theme of "Access to the City". A highly qualitative, people-centred approach was adopted to improve the understanding of the dynamics of housing development from the perspective of the poor. It considered how people navigate their way into cities and how they find suitable

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUE)

or affordable places to live. The work was undertaken in collaboration with graduate students at five South African universities – Nelson Mandela University, the University of the Free State, the University of Pretoria, the University of South Africa, and the University of Fort Hare.

### 10.4 National Advisory Council on Innovation

#### Overview of objectives

The National Advisory Council on Innovation (NACI), established by the National Advisory Council on Innovation Act, 1997, is a statutory body that advises the Minister of Science and Technology, and through the Minister, the Cabinet, on the role and contribution of science, mathematics, innovation and technology in promoting and achieving national objectives. The Act gives NACI a broad policy (advisory) mandate over all matters intrinsic to the functioning of the national system of innovation.

Some of the highlights for the period under review are set out below.

#### Advice on biomass use

The most commonly known application of biomass is in the energy sector, where it is used to provide heat, fuel or electricity. However, production of chemicals from biomass is more profitable than producing energy from this renewable resource. Through an exhaustive process including workshops and interviews with role players along the biomass value chain, NACI identified a broad list of chemicals and their potential for near-term deployment and market consideration. From this list, a group of 32 chemicals serving 13 market categories were shortlisted. Of the 32 chemicals, 28 serve multiple markets, while others

serve the electronics and transportation industries.

#### South African Science, Technology and Innovation Indicators Report

The main output under this focus area was the publication of the 2017 South African Science, Technology and Innovation Indicators Report, which used to assess the state of the national system of innovation. NACI commissions the report annually. The report is produced using the innovation scorecard framework as a guide to obtain data and information from a range of international and local sources. Internal and external stakeholder inputs and those of experts in the system are also taken into consideration. The report, launched at a symposium on 28 June 2018, identified challenges such as a constrained human capital pipeline, and progress in areas such as transformation.

In an effort to ensure dissemination of the report findings beyond Gauteng, NACI teamed up with partner organisations to host roadshows on the report in Durban and Cape Town. The KwaZulu-Natal roadshow was hosted on 17 July 2018 in partnership with the Human Sciences Research Council (HSRC). This roadshow focused on the provincial innovation system, and included a panel discussion on the topic. The Western Cape roadshow was hosted on 20 July 2018 in partnership with the HSRC's Centre for Science, Technology and Innovation Indicators under the theme "Disruptive digitalisation, transformative change and inclusion: How do we design a responsive measurement agenda in South Africa?".

#### Design and implementation evaluation of the Sector Innovation Fund programme

A design and implementation evaluation of the DST's Sector Innovation Fund (SIF) programme was conducted, focusing in particular on how the programme contributes to increasing business expenditure on research and development (R&D). The SIF programme was established by the DST in 2013 to increase the competitiveness of South Africa's

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUE)

industrial sectors, private sector R&D expenditure, and interaction with the private sector, as well as to stimulate or create other sectors. A mixed evaluation method was used in conducting this research. The methodology included a documentation analysis and literature review, a quantitative survey and qualitative interviews with key actors, data collection, and international and local benchmarking. In addition, a round-table discussion was held on 30 November 2018 to solicit stakeholder inputs.

### **Round-table discussion on preliminary findings regarding impacts of imported technologies in South Africa**

On 15 October 2018, NACI hosted a round-table workshop in Pretoria to share and discuss preliminary findings on the impacts of imported technologies and solicit inputs from stakeholders on the national system of innovation. The findings covered research work based on a literature review on imported technologies, South Africa's technology balance of payments, and business sector innovation that stimulates economic growth and job creation. Discussion points included a disaggregation of private-sector and state-owned technologies, correlations between imported technologies and South African R&D, the distinction between low, medium and high technology and its importation, the examination of patents as intellectual property and their value if exploited, hindrances to firms wanting to access foreign technologies, policy around the importation of technology, and the adaptation of current procurement regulations to new innovations or pilots. The workshop concluded by acknowledging the need for a greater focus on business innovation and for research into policy implementation, as well as for cross-cutting research into the value of importing technologies to enhance business innovation.

## 10.5 National Research Foundation

### **Overview of objectives**

The National Research Foundation (NRF) is an agency of the government. Its primary objective is to contribute to the improvement of the quality of life of all South Africans through the promotion of a knowledge economy based on the generation, transfer and use of knowledge. The organisation promotes and supports research through the provision of grants and bursaries, research infrastructure, international and industry collaboration opportunities and mobility through all the stages of a researcher's career, across the spectrum of basic, applied and strategic research, with a mix of programmes and funding mechanisms aligned to national priorities. The NRF also supports and promotes awareness of and engagement with science to improve science literacy and public participation in science, technology, engineering, mathematics and innovation.

Some of the highlights for the period under review are set out below.

### **Employment equity targets**

Progress towards the achievement of long-term employment equity targets continues at a steady pace. The overall representation of black staff at the NRF is 72% against a target of 77% for the 2018/19 financial year. Female representation is 40,5% against a target of 44% (excluding foreign nationals). Key challenges remain gender representation at executive and senior management level and racial representation in the three highest employment categories. People with disabilities account for 0,6% of staff against a target of 1,72%.

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUE)

### Occupation and qualification analysis

In the period under review, there were 170 employees with doctoral qualifications and 125 with master's degrees. A total of 34 employees enrolled for PhDs and 59 for master's degrees.

### Science communication

Science communication aims to provide credible and accurate information that is accessible to all South African communities through partnerships between scientists, researchers and the media. Highlights for the period under review include the following:

- The Science and Technology Youth Journalism Programme has 26 young interns enrolled in the programme. They were deployed to cover the hydropower launch at Kwa Madiba in the Eastern Cape, the South African Environmental Observation Network (SAEON) Science Symposium in Phalaborwa in Limpopo, and a briefing session by the Minister of Science and Technology on the draft White Paper on Science, Technology and Innovation.
- The first-ever Loxion Science Fair and Expo was organised in the community of Mamelodi by Science for Ubuntu in partnership with Mams FM.
- SAEON scientists from the Arid Lands, Egagasini, Grassland-Forest-Wetland and Fynbos Nodes published more than 20 articles in national media.

### Centre for High Resolution Transmission Electron Microscopy

This collaboration is jointly funded by the NRF and the Swedish Foundation for International Cooperation in Research and Higher Education. The centre was awarded a three-year grant to the total value of R850 000 as part of the joint science and technology research collaboration between the NRF and Poland's National Centre for Research and Development. The funding was awarded for studying the role of

interfaces in multi-layered and coated structures. Extensive experimental work was undertaken, with exposure to top international research facilities.

### Human capacity development

- Staff at the Nuclear Medicine Department at the iThemba Laboratory for Accelerator-Based Sciences (iThemba LABS) benefited from a two-week radio-chemistry course.
- The South African Institute for Aquatic Biodiversity continued to contribute to human capacity development through the African Coelacanth Ecosystem Programme, which supports marine science researchers and their students at four historically black universities. This programme supported 69 students (21 honours, 42 master's and six PhD students, as well as two postdoctoral fellows).
- SAEON's Graduate Student Network (GSN) is an excellent platform for building capacity and skills that postgraduate students require for careers as scientists. In the period under review, the GSN gave students an opportunity to interact with their peers and established scientists through the 11th SAEON GSN Indibano, which was held at the Wits Rural Facility in Limpopo. The theme of the conference was "Selling your Science, Selling Yourself", with a focus on communicating effectively about science with the public.

### Knowledge generation

- The first test run of a pilot study was performed on six elephant blood samples (five from Knysna Elephant Park and one from Addo Elephant Park) in collaboration with a wildlife veterinarian and National Geographic photographer. The pilot potentially paved the way for a new project in collaboration with the Clinical Radiobiology Group at the GSI Helmholtzzentrum für Schwerionenforschung, in which the influence of the multiple copies of tumour suppressor gene

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUE)

TP53 in elephants would be investigated in the context of the Peto Paradox in order to develop new strategies for the prevention of radiation-induced cancers or help to sensitise cells to radiotherapy.

- Articles were written on the involvement of SAEON in the International Long-Term Ecological Research Network, expanding SAEON's strategic role in the network.
- SAEON published 74 research articles that not only contributed to science advancement but were instrumental in influencing government decisions.

### Research infrastructure and platforms

- Marine spatial data that can be acquired quickly and at higher resolutions is crucial for research, and this sometimes requires remote sensing platforms. Following the successful launch of the Shallow Marine and Coastal Research Infrastructure platform, the SAEON Elwandle Node acquired an aircraft that will be used as an airborne remote sensing platform. A hyperbaric chamber was installed to treat diving medical emergencies in order to ensure that a diving team's safety is prioritised in case of an emergency.
- SAEON established the uLwazi (isiZulu for "useful knowledge") Node for data and information platforms at the beginning of 2018. The node is well-resourced by way of government contracts relying on SAEON infrastructure for hosting a range of technology platforms, and is integrated with SAEON's research data infrastructure, data dissemination platform and associated systems such as the South African Risk and Vulnerability Atlas, Bioenergy Atlas, South African Earth Observation System of Systems, South African Spatial Development Infrastructure, Marine Information Management System and South African Carbon Sinks Atlas. These online systems support decision-making in the context of the

objectives of the National Development Plan.

- The Grasslands Node Maputaland Coastal Plain Long-term Socio-Ecological Research Platform has grown. It extends from St Lucia to Kosi Bay. In addition to all groundwater monitoring sites, there is one fully automatic weather station with live feed, six automatic rain gauge stations, and new mini weather stations. These stations address a major gap in weather station data for the northern region, which is entirely dependent on rainfall for underground aquifer recharge. This observation platform is aimed at addressing local global change challenges through understanding the relative impacts of land use and climate change in the area. An approach to co-create knowledge is being used by linking into local community structures with the aim to doing science "with and for society".

### 10.6 South African Council for Natural Scientific Professions

#### Overview of objectives

The South African Council for Natural Scientific Professions (SACNASP) is the regulatory body for natural science practitioners (professional natural scientists, natural scientists in training, natural science technologists and natural science technologists in training) in South Africa.

Some of the highlights for the period under review are set out below.

#### Growing and developing the pipeline

There were 1 570 new registrations at SACNASP in the period under review. By the end of the 2018/19 financial year, there were 13 791 scientists registered with SACNASP.

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUE)

To ensure a sustained growth in registration numbers, SACNASP has followed a multipronged approach to ensure that key stakeholders are aware of SACNASP and its registration requirements. Networking sessions were held in Gauteng, the North West, the Free State and Mpumalanga, providing opportunities to network and discuss key issues related to professional registration. SACNASP also held a session at Science Forum South Africa 2018 on “The Future of the Natural Science Professions”. The session was well attended, with standing room only. In terms of free student enrolment at SACNASP, 11 universities have been visited to date, and almost 2 000 students have been enrolled. This campaign sparked some interesting debates on professional registration and its benefits. SACNASP also attended natural science voluntary association events to promote professional registration, and made a well-received keynote presentation at the 2019 Skills Development Summit, presenting the reasons for professional registration to training and human resource practitioners. To improve its online presence, SACNASP has developed a new website that allows scientists to apply online, pay annual fees and print their own certificates. SACNASP will also be working with a service provider to increase its presence on social media platforms, to create opportunities to leverage awareness with millions of readers and to drive awareness through reader engagement and interest.

SACNASP partnered with Split Second Science at Scifest Africa 2019 in Makhanda, Eastern Cape. Daily “Know Your Elements” and “Chemistry Bingo” science shows and workshops were held for learners, who received SACNASP-branded periodic tables. SACNASP has signed a memorandum of understanding with the South African Agency for Science and Technology Advancement (SAASTA) that will see registered scientists assisting SAASTA with its science education projects, including Olympiads and expos.

### Publications

SACNASP has committed itself to producing research reports on the scientific community, and the first of

these, The Role of the South African Council for Natural Scientific Professions and its Voluntary Associations in the National System of Innovation, was launched on 14 June 2018. The Human Research Council (HSRC) compiled the report with input from the voluntary associations and SACNASP. A second report, Tracking of Employed, Unemployed and Underemployed Natural Science Graduates (2007-2017) will be completed in the 2019/20 financial year. It is hoped that the information gained from these reports, developed with special project funding from the DST, will assist government with science education planning.

### Stakeholder engagement

In terms of key stakeholder engagement, SACNASP once again focused on industry, government, academia and the recognised voluntary associations. SACNASP also contributed to the 2019 White Paper on Science, Technology and Innovation (STI), which all entities will use as a basis for their planning going forward. SACNASP was also invited to make input into the National STI Foresight Initiative arranged by NACI, and attended the inaugural BIO Africa Convention. SACNASP is assisting the DST with planning the Biological Science meeting as part of the South African Basic Sciences Platform meeting that will be held later in 2019.

In terms of interactions with other government departments, SACNASP worked with the Department of Agriculture, Forestry and Fisheries on draft amendments to the Agricultural Remedies Regulations, and participated in the Cluster Consultative Workshop on the Draft National Policy on Comprehensive Producer Development Support. SACNASP engaged with the Department of Higher Education and Training on the natural science fields for scholarships. SACNASP interacted with the National Disaster Management Centre of the Department of Cooperative Governance and Traditional Affairs on the professionalisation of the fire services. SACNASP met with the Department of Environmental Affairs on the professional registration of its staff, and with the Department of Trade and Industry (DTI) to

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUED)

discuss how the DTI can assist SACNASP in terms of building relationships with the industries connected to the DTI. SACNASP assists the Department of Home Affairs with critical skills evaluations in the natural sciences. It is currently working with the Quality Council for Trades and Occupations on a new science-related occupational qualification for restoration/rehabilitation or environmental management programme practitioners, who will manage environmental degradation associated with developmental projects or major environmental incidents.

With the aim of understanding regulatory best practices and establishing networks in the national regulatory space, SACNASP has engaged with various national regulatory bodies. These include the Health Professions Council of South Africa, the Engineering Council of South Africa, the Environmental Assessment Practitioners Association of South Africa and the Construction Sector Charter Council, specifically on the inclusion of professional scientists in their charter. SACNASP also interacted with the South African Institute of Chartered Accountants on the mechanisms employed by them to create a pipeline of graduates for registration.

### Governance

To ensure good governance and control of key SACNASP functions, the vacant post of Registration Manager was filled in late 2018. The incumbent will lead the registration section and manage the changes that need to be implemented to optimise the registration processes. In December 2018 a financial accountant was appointed to enhance SACNASP's finance department.

### Continuous professional development

SACNASP's investment in continuous professional development (CPD) has yielded positive results. The CPD website is fully functional and, to date, 711 events have been validated on the SACNASP CPD portal. There are approximately 3 201 active registered scientists (professional natural scientists

and certified natural scientists) on the portal. A total of 200 stakeholders (training providers, universities, recognised organisations and voluntary associations) are currently registered on the portal. This has helped registered natural scientists to ensure that their knowledge in their respective fields of practice is up to date. SACNASP is part of the steering committee of the candidate learnership programme at the Department of Water and Sanitation.

### Ethical conduct

The professional conduct of registered scientists is managed by the Professional Conduct Committee, which is appointed by SACNASP to address and manage transgressions of the Code of Conduct. In the year under review a revised code of conduct was adopted. The revisions will enable the committee to be more effective in its regulatory mandate. An increasing number of professional conduct cases are reported to SACNASP for investigation, many of which are highly complex and sensitive.

## 10.7 South African National Space Agency

### Overview of objectives

The South African National Space Agency (SANSA) is mandated to promote the peaceful use of space; support the creation of an environment conducive to industrial development in space technology; foster research in space science, communications, navigation and physics; advance scientific, engineering and technological competencies and capabilities through human capital development, outreach programmes and infrastructure development; and foster international cooperation in space-related activities.

Some of the highlights for the period under review are

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUED)

set out below.

### **Using space science to ensure national security**

SANSA continues to contribute to the safety and security of the nation through the high-frequency propagation service it provides to the South African National Defence Force (SANDF) from the SANSA Space Weather Centre. SANSA has built a customised tool for high-frequency predictions, called the Ionospheric Characterisation, Analysis and Prediction (IOCAP) Frequency Demonstrator, to ensure that the services and solutions offered to the SANDF are used effectively. This tool has been designed to assist the SANDF in communications planning, and consists of a central core with modules customised to the needs of the Army, Air Force and Navy. This service is important because it allows the SANDF to prepare for operations and communicate optimally with military personnel on the ground. The IOCAP Frequency Demonstrator is also of value to other sectors, such as the aviation and maritime sectors, which require efficient, accurate information for their communications planning.

### **Postgraduate student support programme**

In a rapidly changing global economy, where many traditional occupations are being displaced by technology, South Africa must develop its scientific research capabilities and produce suitably skilled people who can use technology to keep the country competitive and achieve socio-economic growth and transformation.

This will require a significant increase in science, technology, engineering and mathematics qualifications and the development of rare and transferable skills to meet the national demand for, among other things, a viable National Space Programme. Capacity development in space-related areas benefits not only space research but also other areas that require scientists, engineers and technicians. SANSA contributes to skills development through a number of initiatives, such as offering summer and winter schools, supervising postgraduates, and

lecturing at partner universities.

SANSA's Student Development Programme focuses on building a skills pipeline by supporting postgraduate students in space-related areas or fields that are required for the National Space Programme. SANSA received student development funding through National Research Foundation grants, and is currently giving financial support to 42 postgraduate students.

### **Developing nanosatellite engineering skills**

A postgraduate programme in satellite systems engineering was established at the Cape Peninsula University of Technology (CPUT) with seed funding from the DST and collaboration with Stellenbosch University and the then Hermanus Magnetic Observatory. The programme is hosted by the French South African Institute of Technology, which has since grown to incorporate the African Space Innovation Centre. The CPUT satellite programme's science, technology, engineering, mathematics and innovation outreach initiatives have had an impact on over 30 000 students since its inception. Furthermore, the programme has made significant strides in developing the next generation of skills required in the space industry and other high-tech industry sectors to support the country's participation in the fourth industrial revolution. So far, over 60 master's and doctoral students have graduated. Research and innovation outputs total 104 conference papers, 49 peer-reviewed journal papers, and 11 innovative technology developments. The programme also has 16 professional engineers in training.

### **Satellite and Weather Information for Disaster Resilience in Africa**

SANSA and the South African Weather Service are partnering with other African countries on the Satellite and Weather Information for Disaster Resilience in Africa (SAWIDRA) Regional Advanced Retransmission System (RARS) project. SAWIDRA RARS aims to improve the core capacities of the specialised national and regional climate centres to meet the need for near real-time early warning systems based on numerical

## 10. ENTITIES REPORTING TO THE MINISTER (CONTINUED)

weather predictions. Its specific aim is to improve the forecast and production capacity of regional climate centres and national meteorological services to enable them to provide the proper inputs to disaster risk mitigation agencies for issuing early warnings. Through this partnership with the African Development Bank, the African Centre of Meteorological Applications for Development (Niger), the Agence Gabonaise d'Etudes et d'Observations Spatiales (Gabon), and the African Intergovernmental Authority on Development Climate Prediction and Applications Centre, SAWS and SANSA aim to contribute to improving Africa's ability to address disaster risk reduction and management. SANSA's involvement in SAWIDRA RARS, like its involvement in the Digital Earth Africa project, stems from its commitment to the African space agenda.

### 10.8 Technology Innovation Agency

#### Overview of objectives

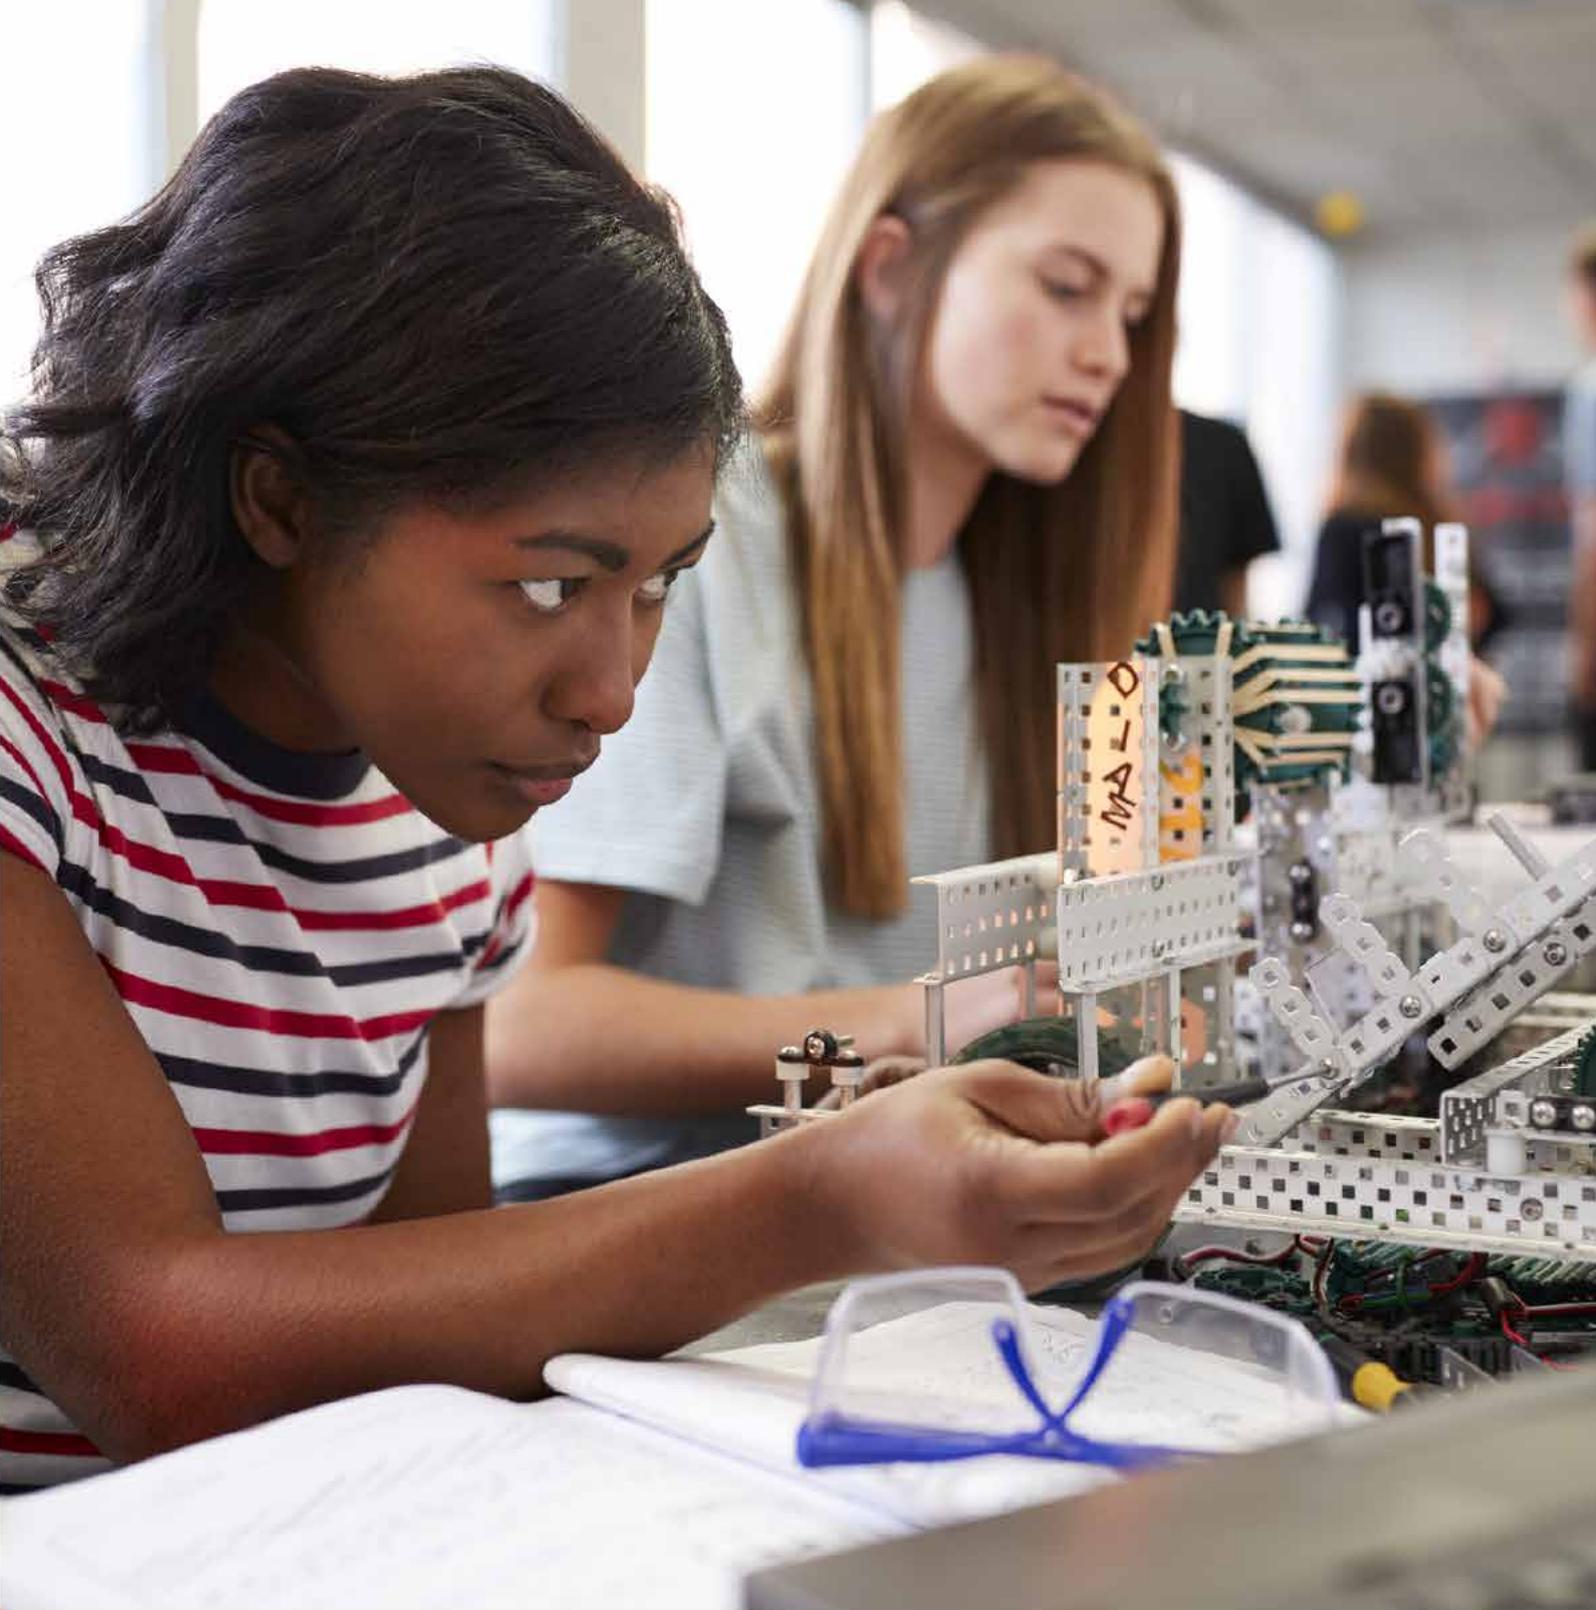

The Technology Innovation Agency (TIA) is mandated to provide customer-centric technology development funding and support, to provide an enabling environment for technology innovation in collaboration with other role players, and to develop an effective and efficient internal environment for the execution of its strategy.

Some of the highlights for the period under review are set out below.

#### Contribution to the African agenda

Following the launch of the TIA Africa Programme in the 2017/18 financial year, in 2018/19 the TIA undertook joint initiatives with Tunisia, Tanzania, Zambia, Botswana, Ethiopia, Ghana, Angola and Zambia. These initiatives included capacity building for intellectual property and innovation management and technology transfer with Tunisia, Botswana and Zambia, targeting researchers and technology transfer practitioners with the aim of enabling them to transfer their research outputs into commercialisation opportunities. The TIA hosted delegations from Tunisia and Zambia to launch the Bilateral Research Upscale Programme, which aims to scale up research activity and outputs from joint projects funded by the National Research Foundation with its African partners.

On the international front, the TIA mainly carried out activities to support the DST in the hosting of BRICS (Brazil, Russia, India, China and South Africa) activities under the Science and Technology Cooperation Agreement, and continued to implement other initiatives to promote closer cooperation with various African countries.

## **PART B** PERFORMANCE INFORMATION

## 1. AUDITOR-GENERAL REPORT: PREDETERMINED OBJECTIVES

The Auditor-General currently performs certain audit procedures on the performance information to provide reasonable assurance in the form of an audit conclusion.

The audit conclusion on the performance against predetermined objectives is included in the Report of the Auditor-General, published in Part E: Financial Information, on page 155.

## 2. OVERVIEW OF DEPARTMENTAL PERFORMANCE

### 2.1 Service delivery environment and alignment with broader government policies

In an effort to enhance service delivery by the government using the 2018/19 Annual Performance Plan as an implementation mechanism, the Department continued to contribute to the government's Programme of Action within the Medium-Term Strategic Framework by implementing its five strategic outcome-oriented goals as articulated in DST Strategic Plan. These goals are a responsive, coordinated and efficient national system of innovation; increased knowledge generation; using knowledge for economic development; human capital development (HCD); and using knowledge for inclusive development.

The DST initiatives are aligned with the broader government service delivery agenda. South Africa's National Development Plan (NDP) Vision 2030 highlights the importance of science, technology and innovation (STI) in national development. The NDP, published in 2012, notes that the developments in STI fundamentally alter the way people live, communicate and transact, with profound effects on economic growth and development. Science, technology and innovation are key to equitable economic growth, underpinning economic advances and improvements in health systems, education and infrastructure. The NDP argues that countries that are able to tackle poverty effectively by growing their economies are characterised by strong capabilities in STI.

The 1996 White Paper on Science and Technology, which introduced the concept of a national system of innovation (NSI), is the current underlying policy framework for the science and technology sector and continued to guide the DST's service delivery environment in the year under review. The main focus of the Department in the reporting period was to create an environment in which its work and the work of the wider NSI contribute to the reduction of inequality, poverty and unemployment in South Africa, and give marginalised communities more and better opportunities to participate fully in the economy.

The STI-related services provided by the Department include knowledge-generation stimulus packages in the form of research grants and innovation infrastructure developments. To ensure equal access by all, grants are provided through several instruments designed to strengthen research capacity at universities, including the South African Research Chairs Initiative and the Centres of Excellence Programme. In the year under review, the DST awarded over 4 633 research grants through NRF-managed programmes, and NRF-funded researchers published 9 159 research articles, cited in the reputable Web of Science citation database.

The DST admits that the STI skills deficit in the country continues to be a major challenge. Education remains key to people's prospects for improving their participation in the labour market and pursuing their socio-economic goals. As part of HCD initiatives, the Department supported a total of 13 154 students, comprising pipeline students (4 572 honours/BTech), 5 202 master's and 3 380 doctoral students.

## 1. AUDITOR-GENERAL'S REPORT: PREDETERMINED OBJECTIVES

South Africa is faced with a crisis of high and rising youth unemployment. Young people aged 15 to 24 years are the most vulnerable in the South African labour market, with an unemployment rate of 55,2%. This figure includes 31% of graduates. With the implementation of the internship programme, the DST and its partners recognise that the solution will take action from a variety of sectors and actors in order to turn the tide.

The Department continued to place students and postgraduates in work environments to gain STI experience. Through various programmes, the Department supported a total of 1 052 graduates and interns during the 2018/19 financial year.

The Department delivered technology-related services to municipalities aimed at improving access to basic services and unlocking economic development opportunities for marginalised and excluded communities. The Department expanded the list of participants in the Municipal Innovation Maturity Index, a tool that provides critical information

on the innovation capabilities and readiness of local government to deliver effective services.

Considerable progress was made with the DST's Grassroots Innovation Programme, which is designed to provide technical and financial support to social entrepreneurs and local innovators in townships and rural areas developing solutions addressing social challenges. These innovation entrepreneurs usually do not have access to formal expertise or access to research institutions. During the year under review, a call for grassroots innovations was issued. The call attracted over 288 responses from across the country, and over 100 qualifying local innovators are being enrolled in the programme, which will help them to develop their concepts, commercialise their ideas, and create prototypes.

Detailed STI-related service delivery outputs aimed at contributing to NDP goals are illustrated in Table 1 below and in the comprehensive strategic outcome-oriented goals performance section.

## 2. OVERVIEW OF DEPARTMENTAL PERFORMANCE (CONTINUED)

### 2.2 Service delivery improvement plan

The Department has completed a service delivery improvement plan. The table below highlights the achievements to date.

**Table 1: Main services and standards**

Main services	Beneficiaries	Current/actual standard of service	Desired standard of service	Actual achievement
Provide funding to institutions and agencies to support technology solutions in the areas of space science, energy and biosciences	Public research institutions, science councils, universities and entities	All funding transferred by the end of the financial year	All funding transferred by the end of each financial year	All funding transferred by the end of the financial year
Financial support for offices of technology transfer (OTTs) located at higher education institutions and science councils	Recipients include 26 higher education institutions and 11 Schedule 1 institutions as per the Intellectual Property Rights from Publicly Financed Research and Development Act	OTTs financially supported by the end of the financial year	OTTs financially supported by the end of each financial year	OTTs financially supported by the end of the financial year
Support uptake of space applications by government departments and agencies	Government departments (national, provincial and local) and agencies	<ul style="list-style-type: none"> <li>• National geospatial decision-support tool</li> <li>• Base maps for national land use and cover layer (human settlement layer, water bodies layer, disaster management and national vegetation maps)</li> <li>• Coordination of national Earth observation activities and promotion of the uptake of Earth observation applications</li> </ul>	<ul style="list-style-type: none"> <li>• Up-to-date national geospatial decision-support tool</li> <li>• Up-to-date base maps for national land use and cover layer (human settlement layer, water bodies layer, disaster management and national vegetation maps)</li> <li>• Better coordination and increased uptake of Earth observation applications</li> </ul>	<ul style="list-style-type: none"> <li>• Decision-support tools were developed through the National Oceans and Coastal Information Management System project (Operations Phakisa) and used by the Oceans and Coast stakeholders.</li> <li>• The annual stakeholder workshop for the Oceans and Coast community to solicit user requirements for the decision-support tools was held in November 2018).</li> </ul>

## 2. OVERVIEW OF DEPARTMENTAL PERFORMANCE (CONTINUED)

**Table 1: Main services and standards (continue)**

Main services	Beneficiaries	Current/actual standard of service	Desired standard of service	Actual achievement
Postgraduate bursary support	University students (honours, master's, doctoral) and postdoctoral researchers	Support provided to about 8% of total enrolled postgraduate students in universities	To double the percentage of postgraduate students supported	Support provided to 9% of postgraduate students in 2018/19
Placement of graduates and postgraduate students in SETI institutions for workplace experience	Graduates and postgraduate students	Support provided to about 15% of qualifying graduates	To provide support to about 30% of qualifying graduates	Support provided to 16% of graduates in 2018/19
Research grants to researchers	Researchers in universities, science councils and other national research facilities	Support provided to about three of every 10 qualifying researchers	To double the support to about six out of 10 qualifying researchers	Four out of 10 researchers supported in 2018/19
Financial and strategic support of R&D initiatives that will lead to publications, patents and prototypes	Universities, science councils, public-private partnerships	Ongoing support provided to R&D and demonstration of technology-based solutions with the intention of promoting their commercialisation and use	To facilitate knowledge generation and exploitation through R&D in key priority areas	186 knowledge outputs (peer reviewed publications and patents) and 9 prototypes were generated during 2018/19
Provide funding to institutions and agencies to support technology solutions in the areas of space science, energy and biosciences	Public research institutions, science councils, universities and entities	All funding transferred by the end of the financial year	All funding transferred by the end of each financial year	All funding transferred by the end of the financial year

## 2. OVERVIEW OF DEPARTMENTAL PERFORMANCE (CONTINUED)

**Table 2: Batho Pele arrangements with beneficiaries (consultation access)**

Current/actual arrangement	Desired arrangement	Actual achievement
Protection, Promotion, Development and Management of Indigenous Knowledge Bill (IK Bill)	Public awareness campaign on the IK Bill prior to the public hearings, and awareness of the rights of beneficiaries after the Bill comes in force	During the period under review, the DST facilitated the approval by the National Assembly in order for the IK Bill to go to the National Council of Provinces for concurrence. On 13 March 2019, the National Assembly approved the IK Bill for the President's signature.
Stakeholders and role players in STI awareness and engagement invited to submit project proposals	Grant funding awarded in response to proposals to organise activities throughout the country	82 organisations were awarded grants to conduct 2018 National Science Week activities.
Institutions and agencies submit research and development (R&D) project proposals and business plans. These are evaluated and approved by the Department and funding is transferred once approval is obtained.	No change required	Institutions and agencies submitted R&D project proposals and business plans. These were evaluated and approved by the Department and funding was transferred once approval had been obtained.
Research and development project proposals and business plans submitted by institutions and agencies, evaluated and approved or rejected by the Department, with funding transferred once approval has been obtained	No change required.	R&D project proposals and business plans submitted by institutions and agencies are evaluated by the Department and, if approved, received funding.
Space awareness and advocacy	Public awareness campaigns make students, private companies and spin-offs aware of the benefits of space science and technology.	<ul style="list-style-type: none"> <li>• Campaign was carried out in partnership with SANSA through direct visits to schools and festivals, as well as targeted campaigns such as the DST UNESCO International Day of Women and Girls in Science 2019.</li> <li>• The DST participated in the Cell C Take a Girl Child to Work Day campaign with the City of Ekurhuleni.</li> <li>• Learners took part in a competition to name ZACube-2, and also participated in the official send-off event for ZACube-2.</li> <li>• Space science and technology activities were included in the National Science Week festivities.</li> </ul>
The administration process for the R&D tax incentive is being simplified and the turnaround time for providing decisions on applications is being improved.	Actions should be reviewed and formulated on the basis of recommendations to improve incentive administration made by the government-industry task team	<ul style="list-style-type: none"> <li>• An impact evaluation was initiated, led by the National Treasury, to generate evidence about the benefits of the R&amp;D tax incentive. The impact evaluation will inform policy decisions about the incentive going forward, including the remaining responses to recommendations of the government-industry task team to improve the administration of the incentive.</li> <li>• Activities for raising awareness among applicants were scaled down during 2018/19 due to staff capacity and budget constraints.</li> <li>• Recruitment processes were initiated to fill staff vacancies, and appointments will be made in 2019/20.</li> </ul>

## 2. OVERVIEW OF DEPARTMENTAL PERFORMANCE (CONTINUED)

**Table 3: Service delivery information tool**

Current/actual information tool	Desired information tool	Actual achievement
Advocacy communication strategy	Implementation plan for dissemination	Strategy approved by the DST Executive Committee (Exco)
Ministerial guidelines on awarding bursaries	A reporting framework on ministerial guidelines	Annual reporting on progress with implementation of ministerial guidelines
Communication strategy, including exhibitions and media	Implementation plan for dissemination, including exhibitions and media	<ul style="list-style-type: none"> <li>• Strategy approved by Exco</li> <li>• Exhibitions held at all public participation programmes, and media successfully used</li> </ul>

**Table 4: Complaints mechanism**

Current/actual complaints mechanism	Desired complaints mechanism	Actual achievement
The National Research Foundation (NRF) has an appeal process for postgraduate students who are not awarded bursaries.	Panel of experts	Appeal framework reviewed by NRF
The NRF has an appeal process for researchers who are not awarded grants.	Panel of experts	Appeal framework reviewed by NRF
Technology Innovation Agency	Appeals procedure	Appeals procedure in implementation
The National Intellectual Property Management Office (NIPMO) has a dispute mechanism for administrative decisions it takes that may adversely affect a recipient.	Dispute panel	Dispute panel in place, with approved terms of reference and rules of procedure, as mandated by the Intellectual Property Rights from Publicly Financed Research and Development Act

## 2. OVERVIEW OF DEPARTMENTAL PERFORMANCE (CONTINUED)

In terms of the work of the Department's alignment with broader government policies, much has been said about the intrinsic need for STI in the delivery of the NDP goals. From the lessons learned internationally, the NDP acknowledges the role that STI can play in addressing the pressing challenges of poverty, unemployment and inequality in the country. For example, STI and related discoveries are recognised as future sources of economic growth, with the potential to create new types of jobs, and provide new solutions to problems trapping people in poverty, such as poor health and water shortages.

The importance of STI is increasingly occupying government's development agenda. Science, technology and innovation are fundamental to most government initiatives, including Operation Phakisa, as well as the cross-cutters in government's Nine-Point Plan. The Nine-Point Plan is diversifying and stimulating the economy through a number of initiatives, as articulated in the planning instruments.

### 2.3 Organisational environment

Although the DST functioned in a fiscally constrained environment during the period under review, with the compensation budget remaining a challenge, its operational efficiency remained a priority.

The Department continued to ensure good corporate governance through sound administration practices, effective operational systems, mechanisms to ensure financial oversight, information technology, and the IT Steering Committee. Combined assurance involved governance structures such as Exco, the Enterprise Risk Management Committee and the Audit Committee, and regular reporting and face-to-face interactions. There is also collaboration with the Audit Steering Committee convened by the Auditor-General.

The DST remains one of the top-performing departments in terms of the Management Performance Assessment Tool (MPAT), which is administered by the Department of Planning, Monitoring and Evaluation. Its most recent rating was 82%.

During the period under review, 100% of SMS members submitted their financial disclosures by the due date. There was significant improvement in compliance with the Performance Management Development System, with documents submitted in time by 98% of SMS members and 100% of non-SMS members.

The Department implemented its Skills Development Plan to ensure that officials grew skills to improve service delivery. A total of 165 employees went on management development programmes or received training in work-related areas such as project management, financial management and technical skills relevant to the Department. Of the employees supported, 60% were women, which will advance the equity profile of the DST.

Employees also received orientation on policies and legislation applicable to government, particularly the Department's core functions.

A total of 113 officials were awarded bursaries to pursue studies in fields including science, technology and innovation. During the period, 61,9% of the bursary holders were women. In addition, 1 052 interns were given an opportunity to gain workplace experience.

The Department values the well-being of its employees and 536 health screenings were conducted during the 2018/19 financial year. The DST's wellness services also include executive wellness services offered through its service provider, Careways. Twenty-five DST executive and SMS members accessed these services.

There is a relationship between health and productivity, including health-related absence and impaired performance. The Department has a Health Risk Management Programme and provides regular health risk screening services. Employees at high risk are provided with monthly advice and support to manage their health. For example, in the reporting period, the services of a dietician were provided to educate employees on healthy meal options. With many employees losing sleep over debt, which affects both their health and productivity negatively, the DST

## 2. OVERVIEW OF DEPARTMENTAL PERFORMANCE (CONTINUED)

conducted a personal financial management skills workshop with women employees at the Women's Day event held on 31 August 2018. Careways provides holistic financial management counselling to all DST employees.

### 2.4 Key policy developments and legislative changes

The NSI has undergone significant changes in the past 20 years and has become more complex and interlinked. As part of the governance and coordination of the NSI, several initiatives, including legislative changes, have been undertaken to improve its coherence and efficiency. Progress in this regard during the period under review includes the following:

- **The new White Paper:** Cabinet approved the 2019 White Paper on Science, Technology and Innovation on 6 March 2019. The new STI White Paper sets the long-term policy direction for the South African government to ensure a growing role for STI in a more prosperous and inclusive economy. Its core themes are inclusivity, transformation, and partnerships. Proposals are made to address policy coherence, the development of human capabilities, knowledge expansion, innovation performance and increased investment.
- **The National Research Foundation Amendment Bill:** On 4 December 2018, the Amendment Bill was approved by the National Council of Provinces (NCOP) and sent to the President for assent.
- **Protection, Promotion, Development and Management of Indigenous Knowledge Bill:** The DST followed the NCOP process for public hearings on the Bill. On 13 February 2019, the Portfolio Committee on Science and Technology considered and approved the NCOP amendments to the Bill. The National Assembly adopted the Bill on 13 March 2019, and it has been sent to the President for assent.

#### • Sutherland and Karoo Central Astronomy

**Advantage Area Regulations:** The Karoo Central Astronomy Advantage Area Regulations became effective on 15 December 2018, ushering in a new era in protecting the SKA/MeerKAT telescope from radio signals and electromagnetic radiation. The final list of exempted radio frequency spectrum will be published after concurrence has been received from Icasa. The Sutherland Central Astronomy Advantage Area Regulations were published for public comment on 22 November 2018. The final regulations will be promulgated in due course.

## 3. Strategic outcome-oriented goals

The DST has the mandate to coordinate a responsive and efficient national system of innovation. In order to realise the mandate, the Department has five strategic outcome-oriented goals, set out in the 2015-2020 DST Strategic Plan, that guide the Department's annual performance plans. During the year under review, the DST played a significant role in either leading or supporting the following Medium-Term Strategic Framework outcomes:

**Outcome 2:** A long and healthy life for all South Africans.

**Outcome 4:** Decent employment through inclusive economic growth.

**Outcome 5:** A skilled and capable workforce to support an inclusive growth path.

**Outcome 6:** An efficient, competitive and responsive economic infrastructure network.

**Outcome 7:** Vibrant, equitable, sustainable rural communities contributing towards food security for all.

**Outcome 10:** Protect and enhance our environmental assets and natural resources.

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

#### Goal 1: A responsive, coordinated and efficient national system of innovation

##### Goal statement: Build on previous gains to create a responsive, coordinated and efficient national system of innovation

In response to rapid global technological advancement and megatrends such as geopolitical shifts and climate change, the Department embarked upon the renewal of South Africa's science, technology and innovation (STI) policy.

Policy development was informed by extensive review, including the 2012 Ministerial Review Committee on the STI Landscape in South Africa, the 2016 National Advisory Council on Innovation (NACI) Review of the 1996 White Paper on Science and Technology, and the 2017 NACI Review of the performance of the NSI from 1996 to 2016. Over a period of approximately two years, the inputs of a wide range of NSI stakeholders in academia, industry, government and civil society were canvassed to shape STI policy responses to a changing technological environment and South Africa's national imperatives. Public consultation culminated in a high-level stakeholder workshop hosted by the Minister of Science and Technology on 9 November 2018. Two panels of internationally renowned STI experts reviewed the draft White Paper on STI, and Cabinet approved the White Paper on 6 March 2019.

The White Paper on Science, Technology and Innovation rests on five pillars.

- The White Paper intends to elevate STI in government planning and to improve the governance (including the monitoring and evaluation) of the public STI system. Most notably, an annual STI Summit, chaired by the Presidency, and involving all NSI partners, will be held to consider the progress and needs of the NSI, based on monitoring and evaluation information provided by NACI.
- The White Paper contains a set of policy interventions to improve the innovation-enabling environment, such as the adoption of a government-wide innovation compact to, among other things, coordinate South Africa's STI response to the Fourth Industrial Revolution, secure resources for

STI, and support business through the adoption of locally developed technologies and a stable and harmonised policy environment. Social and grassroots innovation receive attention, as do strategies to link local economic development planning to the enhancement of innovation at local and regional levels.

- The ambitions of the White Paper are underpinned by the improvement of South Africa's human capabilities, with policy interventions aimed at the concentration of technical skills, as well as retaining skills in the country. Policy interventions at early childhood development stage are included. Developing digital skills for the economy in the future is a particular focus, as is the cyberinfrastructure needed to underpin these skills.
- The White Paper aims to expand the research enterprise, for instance by improving the performance of higher-education institutions in terms of research output. It further supports openness and a diversity of knowledge fields, including indigenous knowledge systems. The role of research in society, particularly interdisciplinary and transdisciplinary research, as well as the diffusion of knowledge, is addressed.
- The White Paper focuses on increasing funding to the NSI, both from the public purse and industry. For instance, STI-intensive government departments will set aside a percentage of their budgets for STI programmes. Furthermore, to ensure funding efficiencies, a framework to guide public STI investment across government and its programmes will be developed.

The White Paper will be implemented through a series of decadal plans, which will be reviewed at least every five years. The decadal plans will be based on the NDP and a NACI foresight study currently under way.

During 2018/19, the panel appointed by the Minister to review the Intellectual Property Rights from Publicly Financed Research and Development Act, 2008 (IPR Act) and the National Intellectual Property Management Office (NIPMO) made significant

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

progress. Significant progress was made in this regard, and the initial findings of the review indicate that the IPR Act and NIPMO have generally been well-received within the NSI. Preliminary recommendations include consideration of the optimal positioning of NIPMO and amendments to the IPR Act. The final review document will be considered during 2019/20.

The DST commissioned a consensus study from the Academy of Science of South Africa (ASSAf) on the ethical, legal and social implications of genetics and genomics research in South Africa was approved by the DST Exco and launched during 2018/19. The study recommends that government considers stricter control measures to monitor developments in these rapidly evolving fields, to determine who is allowed to use genetic data and samples and to guide the formation of national regulations and policy. The recommendations made in the report include ways to fill gaps in the law and regulations, the possible establishment of an independent advisory body, as well as suggestions for how best to engage with communities.

In the period under review, the DST has initiated a coordinating committee, comprising the DST's science councils, to respond to policy questions around the Fourth Industrial Revolution (FIR). An additional input in this regard was a South African-European Union Dialogue on "Disruptive technologies and public policy in the age of the Fourth Industrial Revolution", held from 10 to 12 December 2018. The dialogue facilitated the exchange of ideas about key FIR topics, including the future of work, FIR technology platforms, the economic and social effects of the FIR, and a comparative review of different policy approaches towards the FIR in Europe and Africa. The HSRC is completing an exercise mapping South Africa's FIR capabilities in the NSI, with a focus on the strategic alignment of actions in the NSI.

#### Goal 2: Increased knowledge generation

##### **Goal statement: Maintain and increase the relative contribution of South African researchers to global scientific output**

Without investment in publications, research grants, and research and innovation infrastructure, knowledge generation is not possible. Research grants are provided through several instruments designed to strengthen research capacity at universities and research-performing institutions, including the science councils. In the period under review, the DST, through the National Research Foundation (NRF), awarded research grants to 4 633 researchers, 40% of whom were black, and 39% women. In terms of the production of new knowledge, over 9 161 research articles were published by funded researchers and cited in the Thomson Reuters Web of Science Citation Database. Researchers are supported throughout their research careers, from emerging researchers to established and internationally recognised ones, through instruments such as the Thuthuka Programme, the South African Research Chairs Initiative and the Centres of Excellence Programme.

During the 2018/19 financial year, the Department, through the NRF, awarded 35 research infrastructure grants, totalling R703,015 million. In 2018, one of the research facilities funded, the iThemba Laboratory for Accelerator-Based Science, celebrated the 10th anniversary of the SA-CERN collaboration, and the opportunities it has created for the South African research community to achieve excellence in the area of particle physics. The facility employs senior scientists who are part of the programme and offers world-class infrastructure and administrative support. Over the past decade, through participation in CERN experiments, South African researchers have made their mark in the global arena and contributed significantly to major breakthroughs. The country has also benefited greatly from the collaboration in terms of human capital development, as well as building research and innovation capacity.

The Shallow Marine and Coastal Research Infrastructure (SMCRI), another of the 13 research infrastructures

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

under the South African Research Infrastructure Roadmap (SARIR), was launched in October 2018 at Nelson Mandela University. The main elements of the SMCRI include –

- research-intensive sites along the coast;
- an airborne remote sensing platform to observe changes taking place along the shoreline;
- a fleet of fully-equipped coastal research vessels to support nearshore marine research;
- a coastal biogeochemistry laboratory to measure seawater quality;
- underwater wave and current sensors to observe the increase in magnitude and frequency of storm surges;
- partial carbon dioxide and acidity sensors to quantify the risk of ocean acidification on marine ecosystems;
- water level gauges to determine the rate of sea-level rise;
- remotely operated vehicles and camera systems to observe sea life;
- a hyperbaric chamber on the Ocean Sciences Campus to support research diving;
- a suite of other sensors that will help to provide a better understanding of physical and chemical drivers, as well as ecosystem responses to the changes taking place.

It is anticipated that the SMCRI will make a significant contribution to the knowledge economy through the production of postgraduate degrees, the publication of peer-reviewed articles and the mentoring of interns. The data-driven economy will benefit from the publication of thousands of unique datasets that will be made openly available, and the blue economy from an improved understanding of ocean resources, the opportunities they offer and the threats they face.

The DST developed a framework for the establishment

and maintenance of a sustainable National Integrated Cyberinfrastructure System (NICIS). The system aims to exploit the enormous synergies that can be derived from integrating national cyberinfrastructure into a cluster of mutually supporting activities, which leverage high-level financial and strategic planning, and allow for coordinated oversight and management. This integration is important for the implementation of competitive national science and technology strategies, international scientific and engineering collaborations, and socio-economic impact.

The Department strongly believes that NICIS, which is now in its fourth year of implementation, needs to be positioned prominently in the NSI, and will therefore promote engagements and research collaborations through the provision of high-speed network capacity and high-performance processing, storing, sharing and preservation of research data.

The South African Population Research Infrastructure Network (SAPRIN) was established under SARIR in 2016, and December 2018 saw the launch of the Dimamo Population Health Research Centre, a node of SAPRIN hosted by the South African Medical Research Council. Dimamo monitors the health and socio-economic well-being of people, providing information that can help to improve well-being.

Dimamo was developed to expand the existing research system, the Dikgale Health and Demographic Surveillance System, which has been operating at the University of Limpopo since 1995. The new facility is expected to advance interdisciplinary research and intervention capability in the country by observing the changing exposure risk factors to various non-communicable diseases such as high blood pressure and diabetes, which are rapidly increasing as lifestyles change.

The DST, with funding from the SA-EU Dialogue Facility, embarked on a SA-EU Open Science dialogue. The purpose of the project was to consult a wide range of stakeholders, and to use the knowledge and experiences of South African and European open science experts to formulate guidelines, principles,

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

recommendations and best practices for promoting open science in South Africa. The Open Science Framework was launched at the Science Forum South Africa in December 2018.

The 64-antenna MeerKAT radio telescope was completed and commissioned for science operations during the second quarter of 2018/19 and launched by the Deputy President on 13 July 2018. At the launch, a panorama obtained with the new telescope was unveiled. This revealed extraordinary detail in the region surrounding the supermassive black hole at the centre of the Milky Way, proving the MeerKAT to be one of the best scientific instruments in the world.

The Department also launched the MeerLICHT optical telescope during the year under review. The telescope is a collaboration between research institutions in the Netherlands, South Africa and the United Kingdom. The MeerLICHT will complement the MeerKAT by conducting simultaneous observations in the optical spectrum. This facility will add an unprecedented and innovative dimension to the novel observing mode of the MeerKAT telescope, and will open up the regime of simultaneous, radio-optical correlations in astrophysical transients. The launch of the instrument was a key milestone in multiwavelength astronomy development.

To increase astronomy capacity in historically disadvantaged institutions, the DST provided funds to North-West University to build a dome for their newly established Mahikeng Astronomical Observatory, which houses a 16-inch Meade LX200GPS optical telescope that is used for research by students as well as for outreach to local schools and the community.

The DST has completed the economic case for the National Space Programme and the Space Industry Framework in collaboration with the Department of Trade and Industry. The economic case clearly shows the value of space science and technology in modern day economics, and will serve to mobilise adequate funding for the implementation of a viable space programme and the development of a sustainable

domestic space industry that will contribute to socio-economic development, inclusive growth and service delivery in the country.

The South African National Space Strategy, approved by Government in 2010, advocates for the growth of South African space science and technology (S&T) capability as a way of addressing the technology balance of payments for space services. The space-engineering sector value chain requires capabilities in the following areas:

- Spacecraft development – Earth-orbiting satellites, among others.
- Satellite launch development – launch vehicles, launch infrastructure (Overberg Test Range (OTR)) and launcher manufacturing and integration facilities (there are assembly, integration and testing facilities at Houwteq, Rheinmetall Denel Munition and OTR).
- Ground segment development capability – satellite communication centres, user terminals (VSAT and DSTV receivers) and satellite receiver stations (there are receiver stations at Hartebeesthoek and OTR).
- Space engineering and manufacturing facilities – Houwteq, RDM and OTR.

#### Goal 3: Human capital development

##### **Goal statement: Increase the number of high-level graduates and improve their representivity**

Investment in the development of skills and knowledge that can be used to create economic value for the country is vital. In the period under review the Department, through the NRF, funded or co-funded a total of 13 154 students, comprising 4 572 honours, 5 202 master's and 3 380 doctoral students. The demographic targets for black (80%) and women (55%) students supported were exceeded at honours and master's level, but at doctoral level more needs to be done to achieve equity in the distribution of

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

bursaries, scholarships and fellowships. Of the 799 postdoctoral researchers supported in 2018/19, 395 were South Africans, 73 were permanent residents and 331 were non-South Africans.

The Centre for High Performance Computing Student Cluster Competition team supported by the DST received third place for South Africa (after China and Singapore) at the 2018 International Student Cluster Competition held in Germany in June 2018. In this competition, students had to demonstrate their innovative computer skills and were judged on their ability to design a supercomputer cluster that met strict power constraints and high-performance benchmarks.

On 10 May 2018, the DST hosted a Lindau Nobel Laureate pre-departure event for South African postgraduate students, all women, who had been selected to attend a week-long meeting with Noble Laureate winners in the fields of physiology and medicine. The actual meeting in Lindau took place from 24 to 29 June 2018.

The DST co-sponsored the 2018 Deep Learning Indaba with the aim of increasing African participation and contribution to advances in artificial intelligence and machine learning, and to address the issue of diversity in these fields. The DST funded the participation of four honours, 19 master's and seven doctoral students at the event.

The annual DST-led National Science Week was launched on 28 July 2018 at the University of Mpumalanga in Nelspruit. The focus week saw 82 grant holders, including NRF facilities, science councils, science centres, universities, museums and independent organisations engage the public in science awareness activities across the country. The primary goal of the campaign is to promote science and technology literacy, as well as awareness of the value of science, technology, engineering, mathematics and innovation in people's daily lives. Various stakeholders and interest groups conduct activities, and during the 2018/19 financial year over 29 million participants were reached through various

programmes.

In support of the national transformation agenda, the Department hosted the South African Women in Science Awards (SAWiSA) in Polokwane, Limpopo, on 23 August 2018. The event served to recognise both young and established women researchers in the natural and applied sciences, and the social sciences and humanities. SAWiSA recognises and rewards excellence by women scientists and researchers, and profiles them as role models for younger women, towards a more inclusive science system. The SAWiSA event attracted significant public and media interest.

The DST, through its programmes, supported a total of 1 052 graduates and interns during the 2018/19 financial year. The DST-NRF Internship Programme is a workplace preparation programme that places students and postgraduates in work environments to gain experience. The programme makes a significant contribution to the absorption of postgraduate students in the job market, while also attracting them to research careers, thereby contributing to the reduction of unemployment and inequality. This programme is complemented by the National Youth Service programme, which places students with degrees and diplomas as volunteers operating as science communicators in the network of science centres across the country.

In the 2018/19 reporting period, the Department funded or co-funded students in designated niche areas (high-end skills) that support sustainable development. Over 210 postgraduate students received full or partial bursaries towards their studies in fields related to global change through programmes like the Applied Centre for Climate and Earth System Science, the Africa Earth Observatory Network/iPhakade, the South African Environmental Observation Network, the Risk and Vulnerability Science Centre, the Southern Ocean Carbon and Climate Observatory, and the Foundational Biodiversity Information Programme. More than 60 of these students and emerging researchers received support to attend relevant training, exchange

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

programmes, conferences and workshops, including the 4th National Conference on Global Change, held in December 2018. Funding was also provided to allow four established researchers to participate in international research programmes, e.g. the Intergovernmental Panel on Climate Change.

In 2018/19, the implementation of the Waste Research, Development and Innovation (RDI) Roadmap supported 81 researchers and funded over 20 grant projects, with 22 honours, master's and doctoral students completing degrees in waste management. Of the students funded, 56% were women and 83% black.

For the first time, the Institute of Waste Management of Southern Africa's biennial WasteCon conference held a special session dedicated to the students funded by the CSIR's Waste Roadmap Implementation Unit, at which seven students presented their work.

#### Goal 4: Using knowledge and innovation for economic development

##### Goal statement: Derive a greater share of economic growth from R&D-based opportunities and partnerships

STI initiatives have been identified as the primary drivers of economic growth, job creation and the socio-economic reform agenda in the country. During the period under review, the Department focused on the stimulation and intensification of technological innovation in order to improve economic growth.

The DST, the Department of Small Business Development and the National Treasury moved closer to concluding the process of establishing the Small Business Innovation Fund, which is intended to help bridge the current commercialisation funding gap. The fund will receive R1 billion a year for the MTEF period.

During the 2018/19 reporting period, the National Intellectual Property Management Office (NIPMO) continued to play an enabling role in the utilisation of knowledge for economic and social development

through the Office of Technology Support Fund. The fund provides financial support to offices of technology transfer for human resources, capacity development and assistance with costs for the protection and maintenance of intellectual property (IP) rights through the Intellectual Property Fund. Since 2011, NIPMO has received 1 800 actionable disclosures from institutions for IP developed from publicly financed R&D, and the pipeline of IP from publicly financed R&D continues to grow. During the 2018/19 financial year the IP Creator Awards were introduced as an incentive.

##### Creating innovative industries for the future

The DST continues to encourage industry innovation partnerships as part of broader government efforts to support industry competitiveness. The main objective is to create an environment in which government can collaborate effectively with industry and support co-investments in RDI in key strategic sectors of the economy, encouraging the private sector to invest more in RDI. The DST has funded a number of large RDI programmes that have the potential to result in new industries or to renew the competitiveness and market share of existing industrial subsectors.

Progress was made with the flagship Aeroswift additive manufacturing project. Once industrialised, the Aeroswift has the potential to create a new manufacturing segment in South Africa. The technology development is proceeding well. A number of demonstration components have been completed, and some are already employed in a flying aircraft. International interest in using the specific capabilities of this novel, locally developed additive manufacturing machine continues to increase.

Through the Council for Scientific and Industrial Research (CSIR), the DST supports the Industry Innovation Partnerships facilities, for example, the Biorefinery Industrial Development Facility in Durban. The facility is aimed at innovation-led industry development and competitiveness, encouraging increased private sector investment in RDI activities and promoting job creation. It makes it easier and less

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

risky for existing and new industry players to develop, test and adapt biorefinery technologies for South African biomass sources, improving socio-economic and environmental conditions. The facility is currently focused on the forestry and paper and pulp sectors, which are under financial strain both nationally and internationally, and where technological innovations can help to prevent job losses and enable renewed growth. These two sectors will be the initial focus while the capability of the facility is demonstrated, but it is envisaged that the focus will broaden to include other organic biomass.

Under the Biorefinery RDI Consortium, which involves universities and SMMEs, the acquisition and commissioning of a 10-ton oil presser machine was finalised. The infrastructure enables the development and upscaling of the bio-based product portfolio, which includes biopaint and bioink.

During the period under review, the DST supported the development of protein and enzyme reagent processes and products for commercialisation through the ReagEnz Max initiative. The initiative seeks to develop and commercialise market-ready technologies for the recombinant production of protein and enzyme reagents in response to market needs. Progress made towards realising the project's intended outcome of commercialisation included the signing of an instant access licence agreement between the CSIR and a young entrepreneur to spin-out a commercial entity, and the incorporation of CapeBio Technologies (Pty) Ltd as a formal business entity. The CapeBio start-up has been registered as a Level 1 BBBEE company and has already raised initial start-up funding and incubation support from the Allan Gray Orbis Foundation.

Outcomes of the National Biocatalysis Initiative, which is a technology platform that uses biological catalysts to accomplish specific syntheses of chemical compounds towards the manufacture of both commodity and value-added products, included the signing of a technology licence agreement between the DST/CSIR and Puris (Pty) Ltd, and the transfer of four technology

packages for upscaling and demonstration.

Renewable energy has become an integral part of the country's energy agenda. The DST and its partners understand that innovation is needed to revolutionise batteries to strengthen clean energy research capabilities, which can also create employment. South Africa's plentiful manganese and other mineral resources suitable for energy use in stationary and mobility applications give the country a comparative advantage in energy storage

During the reporting period, a multilateral agreement between Germany and South African partners was put in place to develop a low-cost nickel-iron battery. The partnership includes the University of the Western Cape, Eskom and the Fraunhofer Society, as well as one German and two South African SMMEs. The DST investment of R4 million was used to leverage R1,5 million from Eskom and R10 million from the German partners. The Department has made a significant investment into the development of an innovative algae technology, which has the ability to turn the millions of tons of coal dust wasted annually into high quality algae-based biofuel. Non-disclosure agreements were signed with companies in India (Manu Mishra), the United States of America (Avespa Holdings, LLC) and South Africa (Mzesi Energy) to explore the commercialisation of Coalgae™.

In support of technology commercialisation and getting hydrogen fuel cell technology into the global value chain, HyPlat, a spin-off of the HySA Catalysis Centre of Competence, had its membrane electrode assemblies (MEAs) evaluated by a global original equipment manufacturer, which found that the performance of the MEAs was on par with those available on the market.

Three electric scooters with a fuel cell range extender and supporting hydrogen refuelling infrastructure were completed in collaboration with the South African Post Office (SAPO) as demonstrators. The scooters will be used by SAPO to deliver mail. In April 2018, a 2,5kW fuel cell unit developed through the

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

HySA programme was launched at Poelano Secondary School near Ventersdorp. The unit, combined with 17 kW installed capacity of solar panels and 28,8 kWh of battery storage, on-site hydrogen production and storage, is providing renewable electricity for lights and ICT equipment for the benefit of more than 400 learners at the school. Furthermore, 10 SolarTurtle energy kiosks were deployed in Lesotho to support rural women in their business initiatives. This solution is based on the DST-funded solar energy programme.

In strengthening global partnerships, South Africa, through the DST, hosted the 30th International Partnership for Hydrogen and Fuel Cells in the Economy (IPHE) Steering Committee meeting in Pretoria from 4 to 7 December 2018. The IPHE comprises 19 member countries and the European Commission, and is dedicated to the development, promotion and integration of hydrogen fuel cells in the global economy. Fuel cell technology uses hydrogen and platinum to generate electricity for use in stationary and mobile applications, and has the potential to support South Africa's economic growth, including the Mining Phakisa.

#### **Research and development tax incentive**

Much progress has been made in improving the turnaround time for providing decisions on applications for the R&D tax incentive. This incentive is designed to encourage private-sector investment in scientific and technological research and development activities. Of the 131 applications received, 95 (or 73%) had been provided with decisions by 31 March 2019. The percentage of applications provided with decisions within 90 days had increased to 39% (51 applications).

An impact evaluation was initiated by the National Treasury to generate evidence about the benefits of the R&D tax incentive. The findings are expected in the first quarter of 2019/20 financial year. In the interim, four separate, independent studies, made available in 2018/19, provided external opinions on the functioning of the R&D tax incentive. Firstly,

a study by Trade and Industry Policy Strategies indicated that many businesses were aware of the existence of the R&D tax incentive, but needed more guidance on how to access it, and more user-friendly application processes. Secondly, the review of business incentives by the Department of Planning, Monitoring and Evaluation affirmed the relevance of government support through the R&D tax incentive and made specific recommendations on how the overall system of incentives in South Africa could be strengthened. These recommendations are consistent with the proposal in the 2019 White Paper on Science, Technology and Innovation to harmonise policy instruments for supporting business sector R&D and innovation.

Thirdly, a study was carried out for the Davis Tax Committee, which estimated that beneficiary companies spent an additional R1,83 on R&D for each rand of revenue foregone following the support through this incentive. Fourthly, an Organisation for Economic Cooperation and Development (OECD) study showed that, although South Africa's overall level of government support for business R&D was below the OECD average, estimates of the B-Index indicated that South Africa was providing a competitive tax system for R&D for small and large firms.

#### **Goal 5: Using knowledge and innovation for inclusive development**

**Goal statement: Accelerate inclusive development through scientific knowledge, evidence and appropriate technology**

#### **Food security and sustainable rural development**

Through the Sector Innovation Fund (SIF), the DST has supported a portfolio of seven industries, namely horticulture, post-harvest innovation, viticulture, forestry, mineral processing, paper manufacturing, and agroprocessing.

Small-scale agroprocessing initiatives in South Africa are still facing major challenges. The structural

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

constraints of such initiatives have been linked to and exacerbated by historical, natural and financial factors. The challenge is to co-design ways to manage these constraints effectively through innovation.

To address some of the challenges of the agricultural bioeconomy, the DST, in collaboration with the Technology Innovation Agency, supports the Agricultural Bioeconomy Innovation Partnership Programme (ABIPP). Current co-funding is received from the Winter Cereal Trust, the Sasol Trust, the Maize Trust, GrainSA and the Oil and Protein Seed Development Trust. Key project partners include GrainSA, Sensako, Pannar, the Agricultural Research Council, Stellenbosch University, the University of Pretoria, North-West University, Agri Technovation, the Eden Social Development Foundation, the Vaal University of Technology and the University of the Free State.

In the 2018/19 financial year ABIPP funded existing and new initiatives. Details are given below:

- The Wheat Breeding Platform. This focuses on developing drought-tolerant and pest-resistant varieties. In 2018/19, 270 lines were made available to different breeding companies, of which 161 were selected by the Agricultural Research Commission (ARC), 27 by Sensako and 18 by Corteva (Pannar). Since 2015, 27 new cultivars have been released by the breeding companies, one by the ARC, eight by Sensako and 18 by Pannar.
- The Maize Breeding Programme. This project, implemented by the Climate Resilience Consortium, focuses on developing hybrid varieties with increased resilience to drought and heat stress. The target is to reach 100 000 small-holder farmers over a five-year period.
- The Crop Protection Consortium. This initiative screens for soil-borne and seed-borne diseases with a view to developing and managing an early warning system for disease outbreak. Two projects were completed during the reporting

period, one on prominent nematode pests affecting soybean and maize in summer grain-producing regions, and another looking at determinants of soil health, comparing soil disease complexes (specifically soil-borne diseases and nematodes) from conservation agricultural and conventional tillage systems to identify which crop rotation practices contributed to less diseased soils. A third project was initiated in 2018 to monitor the spread of fall armyworm in South Africa one on prominent nematode pests affecting soybean and maize in summer grain-producing regions, and another looking at determinants of soil health, comparing soil disease complexes (specifically soil-borne diseases and nematodes) from conservation agricultural and conventional tillage systems to identify which crop rotation practices contributed to less diseased soils. A third project was initiated in 2018 to monitor the spread of fall armyworm in South Africa

- The Soybean Food and Nutrition Project. This is aimed at developing appropriate technologies and disseminating them to farmers and communities to promote the production and processing of soybean. The project has the potential to support economic growth for emerging farmers.
- The Bioinnovation Aquaculture Programme: This was established under ABIPP and a call for proposals was made. The programme will initially support projects related to freshwater and marine production systems (particularly on increasing yield), aquatic animal feed, health and disease management technologies, and aquaculture value addition and post-harvest technologies for food security and nutrition. The intention is to support national priorities, including the Oceans Economy Phakisa.
- Agroprocessing for niche commodities. ABIPP funded agroprocessing initiatives through TIA in support of marula, honeybush and Cape Aloe. The three projects are aimed at developing

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

and commercialising the valuable nutritional and medicinal content of these indigenous plants, opening new market opportunities that will result in job creation and local benefit. A marula community development programme in Hoedspruit, aimed at expanding the marula market, and co-funded by the Industrial Development Corporation and TIA, was initiated during the 2018/19 financial year.

- In support of agri-parks, the DST is co-funding GrainSA's farmer development support initiative to provide additional innovation incentives and alternative sources of nutrition in communities through crops such as beans and maize. Seeds are distributed throughout communities to diversify people's diets and increase the amount of niacin consumed. Nixtamalisation technologies are demonstrated and recipes provided in rural communities. The project further looked at storage capabilities to prevent mycotoxin contamination, and threshing capabilities (efficient harvesting of maize). The Farmer Development Programme is also targeting communities within agri-parks.

During the reporting period, several initiatives were undertaken to promote co-operatives and agroprocessing initiatives. Fifteen community-based initiatives were supported through the construction and equipping of pilot pre-processing facilities and agri-businesses. The Innovation Hub (BioPark) incubated 14 SMMEs, supporting business development and entrepreneurship in RDI-based natural products.

ABIPP supported the Multi-African States Foot-and-Mouth Disease Rapid Response programme, which focuses on livestock disease management through the development of diagnostics and technologies to support and inform policies that will assist in managing notifiable diseases such as foot-and-mouth disease. The programme is implemented by the CSIR and aims to develop a coordinated emergency point-of-care diagnostic that will respond to foot-and-

mouth disease outbreaks in livestock, and ultimately build human capacity by giving formal and informal training related to foot-and-mouth disease control and management to South African and non-South African participants. The Onderstepoort Veterinary Institute, the University of Pretoria and North-West University are also partners in the initiative.

#### Health innovation initiatives

Through the Strategic Health Innovation Partnerships programme at the South African Medical Research Council (SAMRC), the DST has been funding a Phase III clinical trial to assess the efficacy of levofloxacin preventive therapy in children that have been exposed to multidrug-resistant tuberculosis (MDR TB). The project has been completed and has demonstrated that novel paediatric levofloxacin formulation was well tolerated and safe in children less than five years of age. The study resulted in the development of a paediatric levofloxacin 100 mg dispersible formulation which has been prequalified by the World Health Organization (WHO) and is available globally to children living in countries that procure medicines from the Global Drug Facility. The results of the study, commissioned by the WHO, have directly informed WHO guidelines for MDR TB treatment in children.

In ensuring a healthy life for all, the TB and malaria drug discovery programmes at the University of Cape Town Drug Discovery and Development Centre have secured approximately R46 million over the next three years (2019 to 2021) from the Bill and Melinda Gates Foundation (BMGF). SHIP funding served as leverage to secure the extension of the BMGF funding. The funding will advance TB and malaria drug discovery efforts at the university with a focus on the further development of the malaria drug candidate and the chemical series for TB that are at various stages of development (hit identification, hit-to-lead, and lead optimisation).

The Medicines for Malaria Venture (MMV) has secured approximately R18 million over the next three years

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

as co-funding for the SHIP-funded malaria drug discovery programme. This represents a significant increase in MMV's contribution to the programme. The additional funding has enabled the expansion of the programme to a malaria consortium based in Gauteng. The extended malaria programme will also provide a platform for enhancing drug discovery capacity on the African continent, with chemists and biologists from the Universities of Nairobi, Ghana and Yaounde being included in the programme as a result of the additional funding provided by MMV.

With funding from the DST, the SAMRC and the CSIR, the University of Pretoria has completed a project in the Mamelodi District of Tshwane on the use of the Umbiflow device to screen and manage an unselected pregnant population. The results have been submitted for publication. The device, designed for use in resource-limited settings, has demonstrated significant potential in reducing premature births and child mortality. It has been estimated that about 20 000 premature births are recorded in South Africa annually. The routine use of the Umbiflow device could result in a significant reduction in the local perinatal mortality rate. The Transition to Scale programme of Grand Challenges Canada has committed CAD\$500 000 over two years for the commercialisation of the Umbiflow. Efforts to find a suitable commercial partner are currently under way. The WHO has also committed an amount of US\$218 000 to expand Umbiflow studies in other developing countries, including India, Kenya, Ghana and Rwanda.

The DST and its partner, the Central University of Technology in Bloemfontein, have established a new Medical Device Additive Manufacturing Technology Demonstrator in their Centre for Rapid Prototyping and Manufacturing (CRPM) for the production of medical-related additive manufacturing (AM) parts such as implants for teeth, disks for the spine, and new heart valves. The CRPM also became one of the world's first AM centres at a university to receive ISO 13485 accreditation, which is essential for the

production of certified AM medical implants and devices. The DST awarded an amount of R39 750 Million for the acquisition and development of high-end infrastructure for this facility.

#### **The mLab initiative**

mLab Southern Africa is a mobile technology solutions laboratory and start-up accelerator aimed at unlocking the mobile applications economy. In the 2018/19 financial year, in addition to the mLab sites in Pretoria and Cape Town, new sites began operating in Polokwane and Kimberley. Discussions to establish an mLab site in Mpumalanga are under way. The mLab initiative had evolved successfully, with offerings that include coding skills development, enterprise development (incubation) and co-creation opportunities with industry for university students, among others.

#### **Improved access to sanitation**

The DST and its partners, the Department of Water and Sanitation, the Department of Environmental Affairs, the Water Research Commission and the South African National Biodiversity Institute, offered a workshop at the 2018 Stockholm World Water Week on "Integrating grey and green for water security in Southern Africa". The session highlighted the interface between built (grey) infrastructure and green (ecological) infrastructure and that far less money was spent on ecological infrastructure than on built infrastructure.

Under the DST-Hitachi Engineer Exchange Programme, six engineers under the age of 35 working at municipalities or water utilities across South Africa spent two months in Japan learning about how water is managed at a municipal level. They were also exposed to different water technologies and innovations that could be used in their working environments. This programme has proven successful, with the South African Local Government Association (SALGA) participating in the selection of candidates, and has led to the creation of the Young Engineers "Changemakers" Programme, a partnership between

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

the WADER water technologies demonstration platform and SALGA.

Much progress was made in the demonstration of innovative technology solutions in support of improving access and quality of service delivery. The South African Sanitation Technology Demonstration Programme continued to contribute towards improving access to decent and appropriate sanitation services, mainly for rural households. The programme was refocused to strengthen its contribution to industrialisation and technology localisation within the context of the national Industrial Policy Action Plan. The DST participated in the discussions of the new global standards for off-grid sanitation, a key enabling factor for the industrialisation of the innovative sanitation technology sector

#### **Support for service delivery**

To contribute to the realisation of the NDP outcomes, the Department focused on interventions strengthening the capacity of the state to deliver basic services. This was done through the provision of innovative, evidence-based technologies to enhance decision-making and policy development. Innovation is key for a capable state and the Department advanced its Municipal Innovation Maturity Index initiative, which provides information on municipalities' innovation capabilities and readiness.

The Department also expanded its on Innovation Champions initiative, an instrument that recruits unemployed graduates to assist municipalities to incorporate innovation into their strategy and operations. The initiative has been piloted mainly in rural municipalities in an effort to sustain rural communities.

Supporting service delivery decision-making also saw the acknowledgement of the Urban Knowledge Exchange Southern Africa (UKESA) by key partners as a strategic online platform to support the Integrated Urban Development Framework. UKESA also contributes towards promoting innovation and good practice in cities, towns and villages. In support of

sustainable human settlements, the Department's STI for Sustainable Human Settlements Roadmap project hosted the first national Off-the-Wall Human Settlements Showcase, which enabled innovators and entrepreneurs to showcase their innovative solutions for the human settlements sector. The roadmap project continues to influence the sustainable human settlements discourse in line with national, regional and global development outcomes.

#### **Support for grassroots innovation**

The Grassroots Innovation Programme is a DST initiative aimed at providing technical and financial support to social entrepreneurs and local innovators in townships and rural areas who are developing solutions to address social challenges. During the 2018/19 financial year, 100 qualifying local innovators were enrolled in the programme to develop their concepts, commercialise their ideas, develop prototypes, and access funding and technical expertise.

Using lessons learnt in the pilot phase, the Department moved to scale-up the Grassroots Innovation Programme, a key intervention under Policy Intent 4.10 of the Cabinet-approved White Paper on STI. The scaled-up programme was redesigned to give priority to contributing towards strengthening provincial innovation systems as well as collaboration with the private sector and non-profit organisations in supporting grassroots innovators, particularly towards the commercialisation of their solutions. One of the former beneficiaries of the Grassroots Innovation Programme secured industrial development funding for a manufacturing facility in her rural town. The beneficiaries of the programme are also participating as ambassadors of this initiative and, as such, contribute towards the notion of a responsible, inclusive and equitable system of innovation.

Furthermore, a new approach was adopted in the 2018/19 financial year for the DST's Local Systems of Innovation Portfolio, which was structured to solicit proposals for Regional Innovation Support Platforms, through a process managed on behalf of the DST by a

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

programme management unit established at the CSIR. A call for proposal process attracted 18 proposals, leading to support for innovation networking platforms in Limpopo, Welkom, East London and Kimberley. The outcomes of a second call are currently being finalised.

#### **International cooperation in support of Goals 1 to 5**

Increasing opportunities for the NSI to access international resources and support, including through sharing the experience and expertise of the DST's global partners, was a significant factor in the achievement of all five of the Department's strategic outcome-oriented goals. The Department succeeded in improving the coordination of participation by different South African organisations, especially in ensuring alignment with strategic national priorities. The DST has been implementing strategic frameworks to guide the participation of the NSI in partnership initiatives with other African partners, as well as to attract STI-oriented foreign investment to South Africa.

#### **Science, technology and innovation support for Africa**

The African partnership portfolio has once again been especially active, with 93 research and innovation projects jointly supported by the DST and African partner governments during the financial year. The DST also supported 17 African Union and Southern African Development Community (SADC) STI initiatives, making it possible for these initiatives to progress. Through diverse international partnerships, the DST enabled an investment of R91 million by these partners to build and strengthen STI capacity in other African countries.

To mark South Africa's Chairship of the SADC, the Department coordinated the production of the first SADC Regional Report on Investment in Research and Development. The report will be presented at the 2019 Joint Meeting of SADC Ministers responsible for Education and Training, and Science, Technology and Innovation. Being the first of its kind in the region,

this report will serve as a baseline to monitor progress towards the target for R&D investment in the region as well as indications of national STI policies and their orientations.

#### **Resources and access to expertise for the South African NSI**

During the period under review, the DST ensured a greater focus on achieving socio-economic impact through its international partnerships, with special attention being paid to fostering cooperation with industry partners and developing collaboration with an innovation focus. Many initiatives to bolster the DST's ability to address poverty, unemployment and inequality in South Africa were also fostered, especially with development partners. Focused on the leveraging of global support for the use of knowledge production in South Africa, for both economic and inclusive development, the Department facilitated international investment of R517 million in the NSI during the year under review.

A diverse portfolio of bilateral and multilateral programmes coordinated by the DST during the financial year afforded South African researchers opportunities to collaborate in joint knowledge-generation activities, with 718 international partner organisations, 20% of which were private organisations. This collaboration saw an investment of more than R3,3 billion by the DST's international partners in support of collaboration with South Africa. These relationships and investments were invaluable in expanding and enriching South Africa's knowledge-generation outputs.

Support for South African human capital development through international partnerships remains a cross-cutting strategic priority and saw, among other things, 1 470 South African students participating in international postgraduate training programmes. This was part of the implementation of the Global Knowledge Partnerships platform, created to support South African students accessing opportunities abroad. Of these students, 88% were black South Africans and

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

44% women. Sixty-seven technical exchanges aimed at building and reinforcing South Africa's capacity in key science and technology domains were facilitated with international partners.

South Africa played a significant role in the establishment of the Group on Earth Observations (GEO) and is a founding member. South Africa became Lead Co-Chair of GEO in November 2018, taking over from the United States of America. The function of the Lead Co-Chair is to preside over the GEO Plenary and Executive Committee, as well as to set priorities for the year and work closely with the GEO Secretariat to advance GEO's mission. Under South Africa's guidance, the GEO community will prioritise engagement with the Global South in building a results-orientated Global Earth Observation System of Systems (GEOSS), supporting global policy priorities through Earth observations and strengthening the sustainability of the GEO enterprise. As GEO moves towards its 5th Ministerial Meeting in 2019, it is important to emphasise the importance of the active engagement of the Global South in ensuring the diversity and inclusivity of its vision. GEO can only be effective if all regions are contributors to this vision, particularly the youth and entrepreneurs located in the Global South.

South Africa is the current Chair of AfriGEO (formerly AfriGEOSS), an initiative aimed at facilitating and coordinating the participation of Africa in GEO. As Chair, the DST finalised the process for the AfriGEO Secretariat to be hosted at the Regional Centre for Mapping of Resources for Development in Nairobi, Kenya. The Department will provide funding for the initial operationalisation of the Secretariat, while seeking further funding from the AfriGEO Member States.

#### Science diplomacy

The convention establishing the new international Square Kilometre Array Observatory, which will govern the global SKA radio telescope project, was signed in Rome after a negotiating process in which the DST played a crucial role.

Science diplomacy and the promotion of South Africa as a preferred international partner for STI initiatives remained a major aspect of the DST's work. In the period under review, the DST, ASSAF and the Department of International Relations and Cooperation hosted a workshop on diplomacy, leadership and negotiation. This provided a platform for the DST to create a uniquely branded South African STI diplomacy, and champion training at a continental level.

The fourth Science Forum South Africa attracted more than 3 000 participants from 79 countries. The DST secured five tactical leadership positions for South Africa in global science decision and policy-making structures, and influenced six multilateral outcomes, which had the objective of positioning the DST and its key priorities strategically for international support.

#### Overseas bilateral cooperation

During the year under review, DST hosted the 6th BRICS (Brazil, Russia, India, China and South Africa) STI Ministerial Meeting, which focused on initiatives such as disruptive technologies and big data in order to provide BRICS countries with a competitive advantage in the Fourth Industrial Revolution. On the margins of the ministerial engagement, the DST also hosted the BRICS Young Scientist Forum, and the Minister of Science and Technology had bilateral meetings with her Indian and Chinese counterparts to recommit to bilateral cooperation and note progress with ongoing cooperation. In addition, the DST hosted engagements to establish new working groups for the New Industrial Revolution, a BRICS Academies of Science meeting, a BRICS working group meeting on health science, a BRICS energy working group meeting and a South Africa-Brazil seminar on start-ups.

The DST supported the visit of the Portfolio Committee on Science and Technology's visit to South Korea and Japan to learn about the science systems of these countries and to identify opportunities for South Africa. Several technical exchanges were held with international partners, including Sri Lanka

### 3. STRATEGIC OUTCOME-ORIENTED GOALS (CONTINUED)

(water management), Jamaica (a seminar for young innovators and a national conference on STI), Taiwan (agribiotech), India (renewable energy) and Norway (research cooperation on the blue economy, climate change, the environment and renewable energy).

To manage, monitor and recommit to meaningful international partnership in science, technology and innovation, the DST engaged in consultations and partnership forums with the United Arab Emirates, Russia, Saudi Arabia, Iran, New Zealand, France and Vietnam. Negotiations were completed or new agreements signed with countries such as Ireland, the Czech Republic and Turkey.

On the margins of the 2018 Science Forum South Africa, the successful 20th anniversary of science and technology cooperation with Italy was celebrated and the Minister hosted the Iranian Vice President for Science and Technology, accompanied by a business marking a significant milestone in strengthening the science and technology cooperation between the two countries.

#### International resources

The DST's relations with the European Union were expanded in 2018/19 through the participation of the Director-General in the Annual Science|Business Framework Conference, the hosting of an open science workshop in partnership with the European Commission, securing funding from the SA-EU Strategic Partnership Dialogue Facility for the implementation of a policy dialogue on the circular economy to be implemented by the DST, and the finalisation of a multilateral call on disruptive technologies to be launched through the Eureka Network.

The DST secured EU General Budget Support (GBS) for the Green Economy for Development. This will strengthen the smallholder essential oils value-chain through local innovation and feasibility studies for industrial loan finance. In addition, new Sector Budget Support (SBS) was secured for R&D partnerships for competitiveness; validating the viability of innovation

for service delivery, and international innovation support actions.

During the period under review the DST participated in the 8th EuroScience Open Forum and launched the Big Data Analytics and Transboundary Water Collaboration Programme, which is an initiative stemming from cooperation between the DST, the SADC Ground Water Management Institute, the USAID Global Development Lab and IBM.

#### Multilateral cooperation

The DST hosted a joint meeting of SADC Ministers for Education and Training and Science, Technology and Innovation as the Chair of SADC in 2018. Twelve member states, as well as representatives of the African Union, NEPAD, UNESCO, the International Labour Organisation, the Regional Universities Forum for Capacity Building in Agriculture, the African Academy of Sciences and the Southern African Regional Universities Association attended the meeting. Substantial support for the approved SADC Women in Science, Engineering and Technology (WISSET) Organisation was garnered from all the member states in attendance. The DST hosted a successful National Consultation Forum on the establishment of a WISSET National Chapter for South Africa. The main objective of the meeting was to discuss and adopt the draft WISSET-SA Constitution and develop an activity roadmap, as requested by the SADC Education and Training, and Science, Technology and Innovation Ministers.

To manage, monitor and recommit to meaningful international partnership in science, technology and innovation, the DST engaged several African countries, including Botswana, Egypt, Ethiopia, Ghana, Lesotho, Mozambique, Tanzania and Uganda, in the year under review. A scientometric study was undertaken to enlist an independent opinion and establish scientific background context to the repositioning of the DST's Joint Research Programme with Africa.

## 4. PERFORMANCE INFORMATION BY PROGRAMME

### Programme 1: Administration

#### Purpose

To provide strategic policy and planning alignment, ensure effective governance, risk management, monitoring and evaluation, and provide strategic science communication with stakeholders about the activities of the DST and the national system of innovation.

#### Chief directorates

**The Ministry and Office of the Director-General** support the Minister, Deputy Minister and Director-General by providing professional and executive support. The component is responsible for the development of systems and mechanisms for handling parliamentary questions and replies, Cabinet matters, correspondence, submissions and memoranda. It also coordinates activities within the Department to assist in steering the NSI towards the development of a knowledge-intensive economy with higher productivity levels.

**Enterprise Risk Management** ensures that a risk management culture is embedded within the Department, by creating risk management awareness, and elevating risk management to a strategic level in the Department in order to improve the DST's risk maturity level. The component's secondary role is to ensure that countering fraud is made an integral part of strategy, operations and administration in the Department (i.e. to promote a fraud risk management culture in the DST).

**Policy, Planning, Governance, Monitoring and Evaluation** supports the DST leadership in steering the NSI.

**Internal Audit Activity** performs internal appraisal activities to improve the effectiveness of control and governance processes to help the Department achieve its strategic, operational, and financial and compliance objectives.

**Human Resources** ensures that the Department is able to (i) provide a professional service through accurate, consistent and best employment practices in all its activities, which are aimed at supporting the achievement of the DST's strategic and operational objectives; (ii) attracting and retaining employees who share the same organisational vision; (iii) championing change and transition, with a view to being a catalyst in the transition of people and the organisation to embrace and implement change; (iv) setting performance standards and managing performance against them; and (v) promoting an environment that supports the personal and career development of all employees so that they can reach their full potential and contribute better to the achievement of the Department's strategic objectives, instilling a culture of service excellence.

**Finance** ensures the effective, efficient and economic use of financial resources in line with financial prescripts through the development and implementation of financial systems, policies, frameworks and procedures. This includes budget planning and expenditure monitoring, and the management of procurement, acquisition, logistics, assets and financial transactions.

**Information System and Knowledge Management** is responsible for the delivery of services that support the Department's strategic plan and individual unit's objectives through the effective use of information technology. Its purpose is to align the Department's Information Technology Strategy with its business strategy to ensure that the organisation achieves optimum use of its resources.

**Science Communication** is responsible for ensuring effective communication between the Department and its key stakeholders and creating awareness of the Department's key objectives and activities. The component raises the profile of the work done by the Programmes in line with the vision and mission of the Department. It also facilitates the preparation of information that the Minister and the Deputy Minister communicate externally.

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUE)

**Legal Services** is responsible for providing effective and efficient legal services to the Department in order to ensure that the interests of the Department are protected against any legal risk. The component ensures that the Department complies with relevant legislation and takes a proactive approach to dealing with matters that have the potential to give rise to conflict or legal challenges.

### **Strategic objectives**

- To coordinate the identification, formulation and implementation of strategic initiatives, and ensure that the priorities of the DST and its entities are aligned to national priorities.
- To develop and maintain good corporate governance systems for the Department and its entities.
- To provide strategic communication for the DST and its entities through marketing, media and branding initiatives, and the Science Engagement Strategy.
- To make the DST an employer of choice and acquire and retain appropriately skilled personnel.
- To provide an efficient and effective information technology service.
- To ensure effective and efficient financial and procurement services.

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

Table 5: Programme 1 – Administration

Not achieved		Partially achieved			Achieved		
Strategic objective	Performance indicator	Actual achievement 2017/18	Planned target 2018/19	Actual achievement 2018/19	Deviation between planned target and actual achievement for 2018/19	Status	Comment on deviation
To coordinate the identification, formulation and implementation of strategic initiatives and ensure that the priorities of the DST and its entities are aligned to national priorities	DST public entities' annual performance plans and annual reports approved by the Minister and chairpersons of the boards	DST public entities' 2018/19 annual performance plans and CSIR shareholder compact signed by the Minister and chairpersons of the boards by 31 March 2018	DST public entities' 2019/20 annual performance plans and annual reports approved by the Minister by 31 March 2019	DST public entities' 2019/20 annual performance plans and annual reports approved by the Minister by 31 March 2019	None	Achieved	n/a

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

### Programme 2: Technology Innovation

#### Purpose

To enable research and development (R&D) in space science and technology (S&T), energy security and the bioeconomy, and in the emerging and converging areas of nanotechnology, robotics, photonics and indigenous knowledge systems (IKS), and to promote the realisation of commercial products, processes and services from these R&D initiatives. In addition, through the implementation of enabling policies and interventions along the entire innovation value chain, to promote the protection and utilisation of intellectual property, technology transfer and technology commercialisation.

#### Chief directorates

**Bioinnovation** was previously known as Biotechnology and Health Innovation. The name change is a better reflection of its core mandate, and factors in the recent incorporation of the Indigenous Knowledge-based Technology Innovation unit into the component. Bioinnovation leads the DST's implementation of the Bio-economy Strategy, which focuses more on socio-economic outcomes, and the strengthening of research and innovation competencies that form the strategic base of the bio-based NSI, rather than merely on the development of technologies. It is a national strategy, incorporating the innovation needs of other departments and industry.

**Hydrogen and Energy** provides policy leadership in RDI initiatives in the energy sector that are crosscutting and have long-term impact. It plays a key role in developing a sustainable and globally competitive South African energy knowledge base and industry, especially as this relates to the nascent global hydrogen economy, by informing and co-shaping the national energy policy in coordination with the Department of Energy and other key stakeholders. In particular, the Department plays an advisory role in the broader energy landscape, specifically in the Integrated Energy Plan and Integrated Resource Plan, with special emphasis on the technologies to be

used in addressing the country's energy needs, their deployment and the incentives required to facilitate the successful deployment of these technologies.

**Space Science and Technology** is a crosscutting and user-driven component that supports the creation of an environment conducive to the implementation of the National Space Strategy and the South African Earth Observation Strategy, under the overarching guidelines of the National Space Policy led by the Department of Trade and Industry. The National Space Strategy was a response to the Ten-Year Innovation Plan, which identified key outcomes that had to be realised over the long term in order for South Africa to leverage the opportunities that the space value chain presents.

**Innovation Priorities and Instruments** supports and strengthens the innovation policy package (and related interventions) aimed at creating and sustaining an enabling environment for innovation, technology development, and the commercialisation of publicly funded R&D initiatives. This includes the identification, development, creation and support of policy and institutional structures that facilitate technology development and its progression into national and international markets. The Emerging Research Areas focus includes the development of nanotechnology, photonics, robotics, and the South African Biodesign Initiative, through the roll-out of approved strategies and implementation plans.

The **National Intellectual Property Management Office** is the national implementing office for the Intellectual Property from Publicly Financed Research and Development Act (IPR Act), and is currently located in the Department as a specialised service delivery unit. It was established to provide for the more effective utilisation of intellectual property (IP) emanating from publicly financed R&D. It provides support to offices of technology transfer at universities and science councils, develops capacity in IP management, provides incentives for IP creators to encourage them to disclose, protect and commercialise their creations, provides funding through the IP Fund for the protection and maintenance of IP emanating

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

from publicly financed R&D, and provides incentives, support, capacity development, funding and compliance services. NIPMO also ensures compliance with the IPR Act and Regulations by recipients of publicly financed R&D.

### Strategic objectives

- To facilitate and resource investments in space S&T, energy, bioinnovation, nanotechnology, robotics, photonics, indigenous knowledge systems (IKS), intellectual property (IP) management, technology transfer and technology commercialisation.
- To oversee, monitor and regulate key policy initiatives, including institutions/agencies and support interventions in the key strategic areas of space S&T, energy, bioinnovation, nanotechnology, robotics and photonics.
- To coordinate and support high-end skills development in –
  - the strategic and emerging S&T areas of synthetic biology, structural biology, systems biology and functional genomics (collectively the South African Biodesign Initiative), space S&T, energy, bioinnovation, nanotechnology, robotics, photonics and IKS.
  - IP management, technology transfer and technology commercialisation.
- To support, promote, and advocate the development and translation of scientific research and development outputs into commercial products, processes and services that will contribute towards economic growth and a better quality of life.

#### 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

Table 6: Programme 2 – Technology Innovation

Achieved		Partially achieved			Not achieved		
Strategic objective	Performance indicator	Actual achievement 2017/18	Planned target 2018/19	Actual achievement 2018/19	Deviation between planned target and actual achievement for 2018/19	Status	Comment on deviation
To facilitate and resource investments in space science, energy, bioinnovation, nanotechnology, robotics, photonics, IKS, IP management, technology transfer and technology commercialisation	Number of instruments funded in support of knowledge utilisation	19 instruments funded in support of knowledge utilisation by 31 March 2018	21 instruments funded in support of knowledge utilisation by 31 March 2019	21 instruments were funded in support of knowledge utilisation by 31 March 2019	None	Achieved	n/a
	Number of knowledge outputs generated	165 knowledge outputs generated	149 knowledge outputs generated by 31 March 2019	187 knowledge outputs were generated by 31 March 2019	+38	Achieved	The target for publications is affected by the publishing process, which allows for the exchange of documents between authors and publishers and can be lengthy. Therefore, it is difficult to predict a specific target.

outputs into commercial products, processes and services that will contribute towards economic growth and a better quality of life	Number of commercial outputs in designated areas	5 commercial outputs in designated areas by 31 March 2018	3 commercial outputs in designated areas by 31 March 2019	2019	+4	Achieved	Innovation Centre was not anticipated. Target setting for commercialisation challenging. Experience has shown that products deemed to have high potential may fail to attract commercial partners, so the level of interest shown in products/innovations in the 2018/19 financial year was not anticipated.
		7 commercial outputs in designated areas by 31 March 2019					

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

### Programme 3: International Cooperation and Resources

#### Purpose

To strategically develop, promote and manage international relationships, opportunities and S&T agreements that strengthen the NSI and enable an exchange of knowledge, capacity and resources between South Africa and its regional and international partners. International Cooperation and Resources also supports South African foreign policy through science diplomacy.

#### Chief directorates

**International Resources** works to increase the flow of international resources into the country by creating conditions for access to international STI skills and global projects.

**Multilateral Cooperation and Africa** advances and facilitates South Africa's participation in strategic African bilateral agreements and multilateral organisations on STI, to strengthen the NSI and to achieve shared economic and social development in the region and on the continent.

**Overseas Bilateral Cooperation** promotes and facilitates collaborative activities and leverages resources in support of the NSI from countries

outside Africa, with a specific focus on developing a knowledge-driven economy.

#### Strategic objectives

- To secure international funds to complement South Africa's national investments in STI, including resources for DST initiatives requiring external investment.
- To access international knowledge, capacities and resources, to enhance South Africa's national STI capabilities, and to contribute to the attainment of the DST's targets for human capital development, especially for international PhD training.
- To strengthen cooperation in STI in Africa, to build capacities and support initiatives of the SADC and AU, for the advancement of both South Africa and Africa's growth and development agenda.
- To maximise South Africa's strategic interests in international cooperation in STI, in support of South Africa's foreign policy objectives, and international trade and investment partnerships, creating a better South Africa, and contributing to a better and safer Africa in a better world.

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

**Table 7: Programme 3 – International Cooperation and Resources**

Strategic objective	Performance indicator	Actual achievement 2017/18	Planned target 2018/19	Actual achievement 2018/19	Deviation between planned target and actual achievement for 2018/19	Status	Comment on deviations
To secure international funds to complement South Africa's national investments in STI, including resources for DST initiatives requiring external investments	Amount (expressed in rand millions) of international funds directly invested in research, innovation and STI HCD programmes as well as research infrastructure investments in South Africa accounted for as part of cooperation initiatives implemented by the DST	R448 million in international funds directly invested in research, innovation and STI HCD programmes, including research infrastructure investment in South Africa as part of cooperation initiatives implemented by the DST by 31 March 2018	R440 million in international funds directly invested in research, innovation and STI HCD programmes, as well as research infrastructure investments in South Africa accounted for as part of cooperation initiatives implemented by the DST by 31 March 2019	R517 million in international funds directly invested in research, innovation and STI HCD programmes, as well as research infrastructure investments in South Africa accounted for as part of cooperation initiatives implemented by the DST by 31 March 2019	+R77 million	Achieved	With the completion of the MeerKAT Radio Telescope during the financial year, substantial international funding came into the country
	Amount (expressed in rand millions) of funds invested by international partners in their own organisations and	R1,199 billion invested by international partners in their own organisations and initiatives, but targeted at	R280 million invested by international partners in their own organisations and initiatives, but targeted at	R3 347 billion invested by international partners in their own organisations and initiatives, but targeted at	+R3 067 billion	Achieved	There was an increase in funding from international partners because of the successes of NSI partners in competitive STI

	Number of leadership positions occupied by South Africa in international STI governance structures relevant to influencing resource allocation to support priorities of government's Programme of Action following specific DST intervention	7 leadership positions occupied by South Africa in international STI governance structures relevant to influencing resource allocation to support priorities of government's Programme of Action following specific DST intervention by 31 March 2018	4 leadership positions occupied by South Africa in international STI governance structures relevant to influencing resource allocation to support priorities of government's Programme of Action following specific DST intervention by 31 March 2019	5 leadership positions occupied by South Africa in international STI governance structures relevant to influencing resource allocation to support priorities of government's Programme of Action following specific DST intervention by 31 March 2019	+1	<b>Achieved</b>	The promotion of South Africa as a preferred STI partner provided opportunities to promote the country's STI leaders, which resulted in an additional leadership position for South Africa.

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

### Programme 4: Research Development and Support

#### Purpose

To provide an enabling environment for research and knowledge production that promotes the strategic development of basic sciences and priority science areas, through science promotion, HCD, and the provision of research infrastructure and relevant research support, in pursuit of South Africa's transition to a knowledge economy.

#### Chief directorates

**Human Capital and Science Promotion** formulates and implements policies and strategies that address the availability of human capital for STI, and that provide fundamental support for research activities. The chief directorate provides strategic direction and support to institutions mandated to develop human capital and increased knowledge production, as well as interfacing with relevant stakeholders in this regard. In addition, the chief directorate is responsible for supporting the development of a society that is scientifically literate and critically engaged with science through public engagement in STI and the enhancement of the youth's access to STI.

**Basic Sciences and Infrastructure** facilitates the strategic implementation of research and innovation equipment and infrastructure to promote knowledge production in areas of national priority and to sustain R&D-led innovation. The component also promotes the development and strengthening of basic or foundational sciences, such as physics, chemistry, biological and life sciences, geographic and geological sciences, and human and social sciences.

**Science Missions** promotes the development of research, the production of scientific knowledge, and human capital in science areas in which South Africa enjoys a geographic advantage. These areas include the dynamics of climate change and its impact on Earth systems, Antarctic and marine research, the palaeosciences and indigenous knowledge systems.

**Astronomy** supports the development of astronomical sciences around a new multiwavelength astronomy strategy, and provides guidance and support to relevant astronomy institutions in the implementation of strategic astronomy programmes. Of particular relevance are the Southern African Large Telescope, the MeerKAT, the High Energy Stereoscopic System, and the African Very Long Baseline Interferometry Network and Square Kilometre Array (SKA) projects.

#### Strategic objectives

- To contribute to the development of representative, high-level human capital able to pursue locally relevant, globally competitive research and innovation activities.
- To ensure the availability of and access to internationally comparable research and innovation infrastructure in order to generate new knowledge and train new researchers.
- To support and promote research that develops basic sciences through the production of new knowledge and relevant training opportunities.
- To strategically develop priority science areas in which South Africa enjoys a competitive advantage, by promoting internationally competitive research and training activities and outputs.
- To promote public engagement on STI.

#### 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

Table 8: Programme 4: Research Development and Support

Achieved		Partially achieved			Not achieved		
Strategic objective	Performance indicator	Actual achievement 2017/18	Planned target 2018/19	Actual achievement 2018/19	Deviation between planned target and actual achievement for 2018/19	Status	Comment on deviation
To contribute to the development of representative, high-level human capital able to pursue locally relevant, globally competitive research and innovation activities	Total number of PhD students awarded bursaries annually as reflected in the reports from the NRF and relevant entities	3 621 PhD students awarded bursaries through Programme 4 funds as reflected in the reports from the NRF and relevant entities by 31 March 2018	Not less than 3 100 PhD students awarded an annual bursary funds as reflected in the reports from the NRF and relevant entities by 31 March 2019	3 380 PhD students awarded an annual bursary funds as reflected in the reports from the NRF and relevant entities by 31 March 2019	+280	Achieved	The target was exceeded by 9% owing to the large number of quality applicants. Performance cannot be predicted or managed within closer margins because it depends on the pool of applicants, and the grant values, which cannot be perfectly predicted.
To contribute to the development of representative, high-level human capital able to pursue locally relevant, globally competitive research and innovation activities	Total number of pipeline postgraduate students awarded bursaries annually as reflected in the reports from the NRF and relevant entities	10 601 (4 956 honours/BTech students and 5 645 master's) pipeline students awarded bursaries through Programme 4 funds as reflected in the reports from the NRF and	Not less than 10 800 pipeline postgraduate students awarded an annual bursary as reflected in the reports from the NRF and relevant entities	9 774 pipeline postgraduate students awarded bursaries as reflected in the NRF and relevant entities by 31 March 2019	-1 020	Not achieved	The target was missed by 9,4% due to the fact that the budget was not growing and compounded by cuts.

science areas in which South Africa enjoys a competitive advantage, by promoting internationally competitive research and training activities and outputs	receivers installed on MeerKAT	commissioned as per engineering specifications for a single polarisation array by 31 March 2018	science mode receivers installed on MeerKAT by 31 March 2019	installed on MeerKAT by 31 March 2019			
	Number of biennial reports on the state of climate change S&T in South Africa approved by Cabinet	A plan for compiling the second biennial report on the state of climate change S&T in South Africa was approved by Exco by 31 March 2018	Second biennial report on the state of climate change S&T in South Africa submitted to Cabinet by 31 March 2019	Second biennial report on the state of climate change S&T in South Africa not submitted to Cabinet by 31 March 2019		<b>Not achieved</b>	Owing to the Cabinet's busy schedule, the Minister could not submit the report to Cabinet by 31 March 2019.
To promote public engagement on science, technology and innovation	Number of participants in science awareness and engagement programmes as reflected in the project reports of the NRF and other service providers	2 575 839 people participated in DST-supported science engagement programmes by 31 March 2018	Not less than 2,1 million participants (learners and members of the public) in science awareness and engagement programmes as reflected in the project reports of the NRF and other service providers by 31 March 2019	About 29 418 913 participants (learners and members of the public) in science awareness and engagement programmes as reflected in the project reports of the NRF and other service providers by 31 March 2019	+27 318 913	<b>Achieved</b>	The deviation is due to the increased use of mainstream media, specifically television.

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

### Programme 5: Socio-economic Innovation Partnerships

#### Purpose

To enhance the growth and development priorities of government through targeted S&T-based innovation interventions and the development of strategic partnerships with other government departments, industry, research institutions and communities.

#### Chief directorates

**Technology Localisation, Beneficiation and Advanced Manufacturing** funds technology and innovation development programmes to advance strategic medium and long-term sustainable economic growth and sector development priorities, as well as government service delivery, through the following value-adding functions:

- Investing in the medium and long-term knowledge-generation capabilities of the NSI in targeted innovation areas.
- In partnership with other government departments and economic actors, spearheading focused efforts that exploit knowledge capabilities for economic benefit. Economic benefit includes the development of advanced technologies and industries, improved government service delivery, improved productivity and competitiveness, and technology transfer and support to SMEs and manufacturing firms in the supply chains of large-scale public procurement programmes.

**Sector Innovation and Green Economy** provides policy, strategy and direction setting support for the R&D-led growth of strategic sectors of the economy and to enhance S&T capacity to support a transition to a green economy. The component does this through the following:

- Facilitating the implementation of high-impact S&T interventions.

- Identifying and initiating S&T programmes that support the growth of the environmental technologies and services sector in South Africa.
- Facilitating policy and strategy development on R&D interventions that support the growth of the ICT sector (excluding the ICT retail sector).
- Providing innovation policy and planning support to economic actors in priority economic sectors and provincial and local governments..

**Innovation for Inclusive Development** supports the experimentation of S&T-based innovations for tackling unemployment, poverty and inequality through the creation of sustainable job and wealth opportunities, building sustainable human settlements, and enhancing the delivery of basic services. The component focuses on supporting the widespread adoption and use of S&T-based innovation by supporting the demonstration of promising innovative technologies that do not yet have widespread application, but are seen as having the potential to achieve government's broad development objectives. In its interventions, the component prioritises the generation of practical knowledge and insights to support evidence-based policy and decision-making, introducing decision-support tools to enhance service delivery, and building capacity in relevant state institutions and communities.

**Science and Technology Investment** leads and supports the development of indicators and instruments for measuring and monitoring investments in S&T and the performance of the NSI, and ways of strengthening the NSI and innovation policy. This includes an annual R&D survey, innovation measurement, the development of S&T indicators, the development of databases and information systems such as the Research Information Management System and the national S&T expenditure tables, and the implementation of section 11D of the Income Tax Act, 1962, to promote private-sector R&D investment.

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

### Strategic objectives

- Through knowledge, evidence and learning, to inform and influence how S&T can be used to achieve inclusive development.
- To identify, grow and sustain niche high-potential STI capabilities for sustainable development and the greening of society and the economy.
- To identify, grow and sustain niche high-potential STI capabilities that -
  - improve the competitiveness of existing industries with growth potential in aerospace, advanced manufacturing, chemicals, advanced metals, mining, ICTs and sector innovation funds;
  - facilitate the development of R&D-led new-targeted industries.
- To enhance understanding and analysis that support improvements in the functioning and performance of the NSI.
- To strengthen provincial and rural innovation and production systems through analysis and catalytic interventions.
- To introduce and manage interventions and incentive programmes that increase the level of private sector investment in scientific or technological R&D.

## 4. PERFORMANCE INFORMATION BY PROGRAMME (CONTINUED)

### Changes to planned targets

There were no changes to planned targets.

### Approval

This is to confirm that the Executive Committee (Exco) of the Department of Science and Technology discussed the Department's performance information report for the 2018/19 financial year at its meeting of 27 May 2019, and that Exco made inputs into the content of the report, which reflects the DST's performance for the period covered in the report.

**Dr PM Mjwara**

Director-General

31 May 2019

## 5. TRANSFER PAYMENTS

The Department transfers funds to various entities in pursuit of its mandate. These entities assist the Department to achieve its objectives. The table below indicates the entities and the reasons transfers were made. The detailed information regarding the entities to which the transfers were made is disclosed fully in the Annexures to the Annual Financial Statements in Part E.

### Programme 1: Administration

Organisation/theme	Budget R'000	Actual expenditure R'000	Reasons for transfer payment
Institutional and programme support	14 286	14 134	Assistance for research activities
<b>Total</b>	<b>14 286</b>	<b>14 134</b>	

### Programme 2: Technology Innovation

Organisation/theme	Budget R'000	Actual expenditure R'000	Reasons for transfer payment
Biotechnology Strategy	37 742	37 742	Implementation of the Biotechnology Strategy
Energy Grand Challenge	37 049	37 049	Support R&D in the renewable energy sector
Health innovation	75 747	75 697	R&D for new health products and services
HIV/Aids prevention and treatment technologies	24 588	24 588	Research into technologies to combat and prevent HIV/ Aids
Hydrogen Strategy (Capital)	70 971	70 971	Support research infrastructure in the hydrogen and energy sector
Hydrogen Strategy (Current)	40 206	40 206	Support R&D in the hydrogen and energy sector
Indigenous knowledge systems	28 071	28 071	Implementation of indigenous knowledge systems initiatives
Innovation projects	9 417	9 417	To promote intellectual property management, regulation and commercialisation
International Centre for Genetic Engineering and Biotechnology	32 077	31 249	R&D of new health products
South African National Space Agency	138 036	138 036	To support the creation of an environment conducive to industrial development and space technology
Space science	18 499	18 499	R&D to support space science initiatives
Technology Innovation Agency	420 322	420 322	To stimulate and intensify technology innovation and commercialisation output
Biofuels	7 245	7 245	Biofuels research

## 5. TRANSFER PAYMENTS (CONTINUED)

Organisation/theme	Budget R'000	Actual expenditure R'000	Reasons for transfer payment
Emerging Research Areas	96 501	96 402	R&D into emerging research areas
Offices of technology transfer – Support	49 000	49 000	Intellectual Property Fund and capacitating offices of technology transfer
South African National AIDS Council	-	--	HIV and Aids research
Technology Top 100	-	-	Technology Top 100 Awards
<b>Total</b>	<b>1 085 471</b>	<b>1 083 258</b>	

### Programme 3: International Cooperation and Resources

Organisation/theme	Budget R'000	Actual expenditure R'000	Reasons for transfer payment
Global science: Bilateral cooperation	14 948	14 793	Growing international partnerships with the aim of leveraging resources for R&D and human capital development
Global science: International resources	43 139	43 094	Growing international partnerships with the aim of leveraging resources for R&D and human capital development
Global science: Multilateral cooperation	9 388	9 388	Growing international partnerships with the aim of leveraging resources for R&D and human capital development
<b>Total</b>	<b>67 475</b>	<b>67 275</b>	

### Programme 4: Research Development and Support

Organisation/theme	Budget R'000	Actual expenditure R'000	Reasons for transfer payment
Academy of Science of South Africa	25 668	25 668	To promote innovative and independent scientific thinking
Astronomy	30 639	30 639	Support to radio and optical astronomy
Human and Social Development Dynamics	27 409	27 399	Policy and institution building (10-year plan and centres of excellence)
Human resource development	897 506	897 506	Implementation of human capital development initiatives

## 5. TRANSFER PAYMENTS (CONTINUED)

Organisation/theme	Budget R'000	Actual expenditure R'000	Reasons for transfer payment
National Research Foundation	904 752	904 752	To support and promote research through funding human resource development
Science awareness	77 253	77 253	Research and initiatives towards youth involvement in the science arena
Square Kilometre Array (Capital)	709 412	709 412	Infrastructure for the SKA project
South African Research Chairs Initiative	530 274	530 274	To fund research chairs in higher education institutions
Cyberinfrastructure	236 339	236 339	Operation and management of CHPC initiatives and connectivity of research institutions
Research and development infrastructure	822 185	822 185	Infrastructure development
<b>Total</b>	<b>4 468 126</b>	<b>4 468 126</b>	

### Programme 5: Socio-economic Innovation Partnerships

Organisation/theme	Budget R'000	Actual expenditure R'000	Reasons for transfer payment
Advanced Manufacturing Technology Strategy	52 662	52 662	Implementation of the Advanced Manufacturing Technology Strategy
Council for Scientific and Industrial Research	963 164	963 164	This is a parliamentary grant as per the Estimates of National Expenditure, to be used to provide science and technology services and solutions, and identify opportunities for new technologies to be further developed and exploited in the private and public sectors for commercial and social benefit.
Environmental innovation	32 611	31 713	Identifying and initiating S&T programmes that support the growth of the environmental technologies and services sector in South Africa
Human Sciences Research Council	303 733	303 733	Parliamentary grant as per the Estimates of National Expenditure. To conduct large-scale policy-relevant social science research

## 5. TRANSFER PAYMENTS (CONTINUED)

Organisation/theme	Budget R'000	Actual expenditure R'000	Reasons for transfer payment
Information and communication technology	26 237	26 237	Implementation of the South African ICT RDI Roadmap Facilitating policy and strategy development on R&D interventions that support the growth of the ICT sector (excluding the ICT retail sector)
Mining research and development	63 000	63 000	Mining research and development
Local manufacturing capacity	105 864	105 864	Support for technology localisation. Assistance for local companies to develop their technology capabilities to enable them to leverage procurement opportunities under the infrastructure build programmes of the state-owned enterprises. Funding for technology stations to render technology support to small and medium enterprises.
Local systems of innovation	71 992	71 992	Support for local innovation interventions and science parks. Support for industry innovation partnerships.
Research Information Management System	4 000	4 000	Information access for decision making – continued development and maintenance of the Research Information Management System
Resource-based industries	48 443	45 191	S&T policy strategy and direction-setting support to harness value from South Africa's natural resources
Innovation for Inclusive Development	25 841	25 840	Development of indicators and instruments for measuring and monitoring investments in S&T and the performance of the NSI. Supports experimentation with S&T-based innovations for tackling poverty, inequality and unemployment through the creation of sustainable job and wealth opportunities and enhancing the delivery of basic services.

## 5. TRANSFER PAYMENTS (CONTINUED)

Organisation/theme	Budget R'000	Actual expenditure R'000	Reasons for transfer payment
Science and technology indicators	9 984	9 984	Development of indicators and instruments for measuring and monitoring investment in S&T and the performance of the NSI
<b>Total</b>	<b>1 707 531</b>	<b>1 703 379</b>	

## 6. DONOR FUNDS

### 6.1 Donor funds received

#### 6.1.1 Donor funds received in cash

The DST received official development assistance (ODA) from the European Union, Finland and Austria. Below is a brief summary of the activities supported by these ODA partners in science and technology.

Name of donor	European Union
<b>Full amount of the funding (R'000)</b>	5 000
<b>Period of the commitment</b>	3 years
<b>Purpose of the funding</b>	ESASTAP 2020
<b>Expected outputs</b>	Develop a skilled and capable workforce
<b>Actual outputs achieved</b>	<p>The project is a coordination and support platform created to strengthen science, technology and innovation (STI) cooperation between South Africa (SA) and the European Union (EU). The project is divided into five different work packages, each of which is further broken down into separate tasks, addressing specific areas of cooperation within broader SA-EU STI relations.</p> <p><b>Task 1.1 – Promotion of SA participation in the EU Framework Programme</b></p> <p>A number of H2020 roadshows/info-days and exhibitions were organised in the 2018/2019 financial year, in Gauteng, the Free State, the Western Cape, Limpopo and the Northern Cape, among others. The focus was on disseminating information on EU programmes to historically disadvantaged institutions. The 2018-2020 work programme for Horizon 2020 highlighted potential flagship initiatives.</p> <p><b>Task 1.2 – Analysis of SA Horizon 2020 participation by the Academy of Science of South Africa (ASSAf)</b></p> <p>The DST provided support to ASSAf for the analysis of SA participation in the H2020 Framework Programme. ASSAf successfully updated the report and submitted to the coordinator.</p> <p><b>Task 1.3 – Promotion of SA research and innovation programmes in Europe to enhance SA-EU bilateral cooperation activities of the Reciprocity Forum (DST)</b></p> <p>Through the DST, South Africa participated in the EuroScience Open Forum 2018 in France, as part of the project deliverables to host two events showcasing South African programmes in Europe.</p> <p>The DST was allocated an exhibition stand where SA expertise was profiled in order to attract interest from EU researchers for collaboration with SA under the European Union Framework Programme for research and innovation, Horizon 2020.</p> <p>The ESASTAP 2020 project participated in the ICT 2018 event hosted by the European Commission in Austria from 4 to 6 December 2018. The event attracted 4 800 visitors and focused on the digital transformation of society and industry. It presented an opportunity for the people involved in this transformation to share their experience and vision of the world in the digital age. The event also assisted in introducing and preparing participants for the remaining call for proposals under the Horizon 2020 Framework Programme.</p>

## 6. DONOR FUNDS (CONTINUED)

<p><b>Actual outputs achieved</b></p>	<p>A delegation of six selected researchers and three DST officials attended the event, funded through ESASTAP 2020. At the event a networking session convened by ESASTAP 2020 project, which provided an opportunity for the South African delegation to make presentations on policy matters, available instruments for cooperation and research expertise, and to discuss strategies for improving cooperation between the SA and EU.</p> <p><b>Task 1.4 – Supporting of the SA National Contact Points (NCPs)</b></p> <p>The DST reviewed the NCP network and its effectiveness and appointed a new network comprising representatives for 22 thematic areas. Subsequently, there were several resignations from the NCPs for security, energy, advanced manufacturing and nanotechnology. The assistant NCPs replaced them.</p> <p>The DST has provided financial support to the NCP network with regard to attending the training sessions organised by the European Commission (EC) and convening information-sharing sessions on the opportunities in the EU programmes for the South African national system of innovation (NSI).</p> <ul style="list-style-type: none"> <li>• The DST supported two NCPs/representatives of the NSI to attend international training in November 2018 (energy and nanotechnology).</li> <li>• NCPs have participated in DST-organised H2020 information session roadshows</li> </ul> <p>The second NCP meeting was in the form of one-on-one consultations with the Deputy Director-General: International Cooperation and Resources, putting emphasis on the remaining calls of the H2020 programme until the end of the Framework Programme in 2020.</p> <p>An NCP consultative report was submitted by the DST to the coordinator.</p> <p><b>Task 1.5 – Support the bilateral SA-EU S&amp;T policy dialogues and contribute to the implementation of the EU-SA Joint S&amp;T Cooperation Committee (JSTCC) and the SA-EU National Innovation Policy Dialogues recommendations (DST)</b></p> <p>The JSTCC is an annual meeting between SA and the EU to assess progress with STI cooperation between the two partners. The meeting alternates between the two continents (Africa and Europe) and is co-chaired by the Directors-General of the DST and the EC Directorate for Research and Innovation. The project is responsible for the implementation of the recommendations emanating from the JSTCC discussions.</p> <p>The project implemented the recommendations of the 2017 SA-EU JSTCC held in December 2017 in South Africa. These included planning an international technology transfer exchange programme for SA participants with European organisations.</p> <p>The 16th SA-EU JSTCC took place in Belgium on 12 April in 2019, co-chaired by the Director-General of the DST and the EC Directorate for Research and Innovation. The ESASTAP 2020 project convened side activities alongside the 16th SA-EU JSTCC.</p>
<p><b>Amount received in current period (R'000)</b></p>	<p>1 118</p>
<p><b>Amount spent by the department (R'000)</b></p>	<p>1 118</p>
<p><b>Reasons for the funds unspent</b></p>	<p>Not applicable</p>
<p><b>Monitoring mechanism by the donor</b></p>	<p>These funds are audited by the Auditor-General or external auditors at the request of the donor.</p>

## 6. DONOR FUNDS (CONTINUED)

Name of donor	Finland
<b>Full amount of the funding (R'000)</b>	80 000
<b>Period of the commitment</b>	4 years
<b>Purpose of the funding</b>	BioFISA II
<b>Expected outputs</b>	To develop a skilled and capable work force
<b>Actual outputs achieved</b>	<p>The Programme has created awareness of SANBio through its partners in different countries where stakeholder workshops were held, engaging over 250 participants.</p> <p>A major output was the development of a video series for the FemBioBiz competition, which will be aired online and on national televisions. The video is aimed raising public awareness of SANBio and its contribution to gender equity in the biosciences, as well as attracting partners to collaborate with SANBio on this initiative, indirectly encouraging young female students to see opportunities in biosciences.</p> <p>To date, 10 of the 12 projects have passed the prototyping stage and seven are generating revenue. Six start-ups have been established and all the other projects have a commercialisation partner to assist them with product commercialisation.</p>
<b>Amount received in current period (R'000)</b>	14 176
<b>Amount spent by the department (R'000)</b>	14 176
<b>Reasons for the funds unspent</b>	Not applicable.
<b>Monitoring mechanism by the donor</b>	These funds are audited by the Auditor-General or external auditors at the request of the donor.

## 6. DONOR FUNDS (CONTINUED)

Name of donor	Austria
<b>Full amount of the funding (R'000)</b>	54
<b>Period of the commitment</b>	1 year
<b>Purpose of the funding</b>	M-ERA.NET
<b>Expected outputs</b>	To enhance South Africa's national science, technology and innovation capabilities through access to international knowledge, capacity and resources.
<b>Actual outputs achieved</b>	<p>Funds allocated from ERA.NET for materials research and innovation project (M-ERA.NET 2) are provided by the European Commission for the activities and travel of partners to the consortium meetings. The DSI has an obligation as per grant agreement to participate in all consortium meetings.</p> <p>The DST participated in a working group meeting held in Bucharest, Romania, on 18 and 19 September 2018. The meeting was for the 44-member consortium to discuss various operational aspects of the network. The consortium also received updates on management matters relating to the 2018 call and funding arrangements from the partners.</p> <p>A steering board meeting was held from 29 to 30 January 2019 in Rome and the DST was represented. The consortium discussed the planning for the 2019 additional joint call and additional activities, including monitoring and evaluation assessments. For the 2019 call, five applications were received from South Africans. The initial evaluation will be done during the next working group meeting in September 2019.</p>
<b>Amount received in current period (R'000)</b>	54
<b>Amount spent by the department (R'000)</b>	54
<b>Reasons for the funds unspent</b>	n/a
<b>Monitoring mechanism by the donor</b>	These funds are audited by Auditor-General or external auditors at the request of the donor.

## 6. DONOR FUNDS (CONTINUED)

Name of donor	European Union
Full amount of the funding (R'000)	30 000
Period of the commitment	1 year
Purpose of the funding	General Budget Support – Green Economy for Development
Expected outputs	<ul style="list-style-type: none"> <li>• Develop technologies to maximise the use of valuable natural resources by minimising the generation of waste.</li> <li>• Develop technologies for the beneficiation of waste biomass (production of high value materials and products from the waste) to avoid landfilling.</li> <li>• Demonstrate the validity of technologies and the potential to create jobs in the biomanufacturing sector.</li> <li>• Demonstrate the ability of technologies to increase revenue in the sector.</li> <li>• Enable demonstrable technology transfer to SMMEs and/or large industry to build sustainable businesses;</li> <li>• Increase industry competitiveness through local technology development and localisation of product development.</li> <li>• Human capital development: Impart skills relevant to the industry through training and technology transfer.</li> </ul>
Actual outputs achieved	New programme and work in still in progress.
Amount received in current period (R'000)	30 000
Amount spent by the department (R'000)	26 000
Reasons for the funds unspent	Not applicable
Monitoring mechanism by the donor	These funds are audited by Auditor-General or external auditors at the request of the donor.

## 7. CAPITAL INVESTMENT

### 7.1 Capital investments, maintenance and asset management plan

The Department has an asset management policy that assists in ensuring the effective and efficient management of assets. The policy will be reviewed in the next financial year to ensure that it is aligned with new asset management requirements. During the year under review, the Department embarked on a process of enhancing its asset management system to assist with asset management and reporting.

In the year under review, the Department conducted two asset verifications thus ensuring that all redundant, obsolete and damaged assets were disposed and replaced on time. As part of its asset management strategy, the Department periodically reviews its assets and procures new ones where necessary. During the year under review, the Department embarked on a process of refreshing old computer equipment such as laptops. The process of refreshing old computers will be continued in the next financial year.

## **PART C** GOVERNANCE

## 1. INTRODUCTION

The Department is committed to maintaining the highest standards of corporate governance, which are fundamental to the management of public finances and resources. The frameworks below are main pillars of the Department's corporate governance arrangements.

## 2. RISK MANAGEMENT

The Department views enterprise risk management (ERM) as imperative for the successful delivery of its mandate. The Department believes that identifying, understanding and managing risks in an enterprise-wide context will ensure accountability and sustainability, and that ERM will direct the Department to address possible negative events in a proactive and timely manner, while exploiting opportunities presented by future uncertainties.

Various processes have been instituted to ensure the commitment of the entire Department to ERM, and the definition of clear risk management roles and responsibilities. These include the provision of awareness sessions, the publication of articles in the Department's quarterly newsletter, regular risk assessments and subsequent follow-ups.

The Department has a Chief Risk Officer and effective management systems (policy, framework, strategy, guidebooks and annual implementation plan) for ERM.

To ensure the quality, integrity and reliability of the Department's ERM processes and responses, the Department has an Enterprise Risk Management Committee (ERMC) comprising four independent members and four ex officio members. The Audit Committee Chairperson is a standing invitee to the ERMC. In the period under review, the ERMC continued to play an integral part in ensuring that the Department maintains and enhances its ERM maturity level. The following table indicates the members of the ERMC and the meetings they attended in the period under review:

Name	Member status	Meetings attended	Notes
C Boltman	Independent member (Chairperson)	5 of 5	Appointed as member and Chairperson on 1 Feb. 2018
C Marais	Independent member	5 of 5	Appointed as member on 1 Feb. 2018
F Kobo	Independent member	5 of 5	Appointed as member on 1 Feb. 2018
M Ramataboe	Independent member	5 of 5	Appointed as member on 1 Feb. 2018
T Makhode	Ex officio member	5 of 5	Appointed as member on 1 Feb. 2018
D Mmakola	Ex officio member	1 of 2	DDG: Institutional Planning and Support – resigned with effect from 31 Oct. 2018.
N Mokoena	Ex officio member	3 of 3	Appointed as acting DDG: Institutional Planning and Support with effect from 1 Nov. 2018
N January	Ex officio member	2 of 2	ERMC composition revised – number of ex officio members reduced from 4 to 1.
P Makukule	Ex officio member	1 of 2	ERMC composition revised – number of ex officio members reduced from 4 to 1.
L Konar	Audit Committee Chairperson – Standing invitee	4 of 5	

## 2. RISK MANAGEMENT (CONTINUE)

The Department's Internal Audit Activity and the Audit Committee provide independent assurance on the Department's ERM processes, and advise on the effectiveness of risk management controls and risk mitigation initiatives.

Strategic, operational and functional risk profiles were finalised for the period under review, and risk mitigation was monitored quarterly by the ERM. In addition, risk assessments were conducted for key projects, including projects managed on behalf of the Department by its entities.

The ERM Chairperson briefed the Director-General every quarter, and the Minister annually, on the effectiveness and adequacy of enterprise risk management across the Department. The annual briefing of the Minister was introduced in the 2016/17 financial year.

The following improvements were made in the period under review:

- The composition of the ERM was revised, with the number of ex officio members reduced from four to one. There are still four independent members, one of whom serves as the chairperson. The change was made in line with the King IV Report on Corporate Governance for South Africa, which recommends that risk governance committees be made up of executive and non-executive members, with the majority being non-executive members.
- An additional meeting of the ERM was introduced in the third or fourth week of January each year, for the purpose of reviewing the first draft of the Department's strategic, Programme, and fraud risk profiles. The additional meeting allows the ERM to better exercise its oversight role in terms of the completeness and quality of the Department's risk profiles. In the period under review, this meeting took place on 31 January 2019.
- The Department refined its articulation of risks, as part of improving the quality of risk

documents and making it easier for staff to identify the real risks facing the Department.

## 3. FRAUD AND CORRUPTION

The Department has an effective system for fraud risk management, including a framework, a strategy, whistle-blowing policies, and an annual fraud prevention and detection plan.

The fraud risk profile was finalised at the beginning of the period under review, and served as the basis for the formulation of the annual fraud prevention and detection plan. The implementation of the plan is driven by the Directorate: ERM and progress is monitored quarterly by the ERM and the Audit Committee.

Using various mediums of communication, the Department actively promotes awareness of fraud and corruption, and the use of the National Anti-Corruption Hotline. The Department has designated mid-November to mid-December of each year as Anti-Corruption Month and hosts its annual Anti-Corruption Day during this period. In the year under review, the Department's programme focused on heightening staff awareness of cybercrime.

The veracity of allegations of fraud and corruption is thoroughly investigated using internal and/or external resources. The outcome of an investigation guides the Accounting Officer on the steps to be taken to finalise the matter (disciplinary action, recovery of state resources or criminal investigation). If warranted, the Department will report a matter to the appropriate law enforcement authority (e.g. the South African Police Service, the Special Investigation Unit or the Office of the Public Protector) for further investigation. However, this was not necessary in the period under review. The progress of investigations is reported on in closed sessions at all ERM meetings.

For the period under review, no new matters were referred by the Public Service Commission to the Department for investigation.

## 4 MINIMISING CONFLICT OF INTEREST

The Public Service Regulations and the Department of Public Service and Administration directive on financial disclosures requires both SMS and non-SMS employees to disclose their financial interests. 100% of SMS and 98% non-SMS employees in the Department disclosed their financial interests as required, and corrective action was taken against the employees who did not disclose their financial interests in time.

The Department also requires potential conflicts of interest to be declared by all members of all governance structures.

## 5. CODE OF CONDUCT

The Department conducted awareness sessions on the Code of Conduct for the Public Service in a bid to promote a high standard of ethical behaviour, as required by the Constitution of the Republic of South Africa and the Public Service Regulations.

The Ethics Committee was formally launched as part of Anti-Corruption Month activities in November 2018, with the aim of creating awareness about its functions and as part of an ongoing process of promoting ethical conduct within the Department.

## 6. HEALTH, SAFETY AND ENVIRONMENTAL ISSUES

Section 8 of the Occupational Health and Safety Act, 1993 (Act No. 85 of 1993), requires every employer to “provide and maintain, as far as is reasonably practicable, a working environment that is safe and without risk to the health of his employees”. Furthermore, Occupational Health and Safety Assessment Series (OHSAS) 18001:2007, which is the accepted international standard for OHS management systems, requires the employer to identify all possible workplace hazards, assess the risks associated with these hazards, and as far as is reasonably practicable, mitigate or eliminate these risks.

The Department’s Occupational Health and Safety (OHS) Strategy focuses on four objectives, which are to (i) improve the DST working environment by

regularly conducting occupational hygiene surveys, and monitoring the implementation of green working environment standards; (ii) review the OHS management system to address OHS challenges within the Department; and (iii) enhance compliance with OHS legislation and other requirements, and promote OHS awareness among DST employees. Inspections, a ventilation assessment and a biological assessment were conducted and the findings are being addressed. The Department has a functional Health and Safety Committee. The Committee has been educated about OHS legal obligations to equip them to execute their responsibilities.

OHS incidents such as injuries and narrowly avoided injuries were analysed and addressed quarterly. Notices were placed at various points in the Department to heighten awareness of OHS risks and the need for compliance with guidelines. These included notices on the Department’s OHS policy, procedures for working at heights, the incident management guide, the guide on the management of medical emergencies, and the evacuation procedure. In-house training was provided to the Emergency Response Team and the Health and Safety Committee so that they could respond effectively in case of emergency. Emergency evacuation drills were conducted as required.

## 7. PORTFOLIO COMMITTEE

Information on briefings to the Portfolio Committee on Science and Technology between 17 April 2018 and 27 February 2019.

Date	Subject	Matters raised by the Portfolio Committee (highlights of high-level issues)	How the matters were addressed/resolved
17 April 2018	Department of Science and Technology on their 2019/20 Annual Performance Plans and Budget.	All questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
18 April 2018	Briefing by the National Research Foundation (NRF) on its 2018/2019 Annual Performance Plan and budget.	All questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
18 April 2018	Briefing by the National Advisory Council on Innovation (NACI) on its 2018/2019 Annual Performance Plan and budget.	All questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
18 April 2018	Briefing by the Human Sciences Research Council (HSRC) on its 2018/2019 Annual Performance Plan and budget	All questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
19 April 2018	Briefing by Academy of Science of South Africa (ASSAf) on its 2018/2019 Annual Performance Plan and budget.	Members asked how will ASSAf and the National Research Foundation (NRF) collaborate with the Science Engagement Programme. Members asked what was the outcome of the consensus study on Postgraduate Research Training in Engineering. All the other questions were answered and no follow-up questions were raised.	ASSAf will take up the question of science engagement with new Minister but thought more efficiency is possible if collaborating with NRF.  ASSAf indicated that they will provide feedback on the status of the consensus study on Postgraduate Research Training in Engineering as soon as the document is finalised.  All other matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
19 April 2018	Briefing by the Technology Innovation Agency (TIA) on its 2018/2019 Annual Performance Plan and budget.	All questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily.

## 7. PORTFOLIO COMMITTEE (CONTINUED)

Date	Subject	Matters raised by the Portfolio Committee (highlights of high-level issues)	How the matters were addressed/resolved
25 April 2018	Briefing by Council for Scientific and Industrial Research (CSIR) on its 2018/2019 Annual Performance Plan and budget.	Members asked for status update on bursaries and number of dropped out. Members wanted to know the extent the CSIR had collaborated with the Water Research Council.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
25 April 2018	Briefing by the South African National Space Agency (SANSa) on its 2018/2019 Annual Performance Plan and budget.	Members wanted to know how much had been spent on the EOSAT1 satellite over the three years and further asked as if SANSa was looking at the Department, National Treasury or Parliament for a commitment to the R400 million needed to launch or was there another plan to get to the launch stage after 2020. All the other questions were answered and no follow-up questions were raised.	All other matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
25 April 2018	Briefing by the Department of Science and Technology to the Select Committee on the Protection, Promotion, Development and Management of Indigenous Knowledge Bill.	All questions were answered and no follow-up questions were raised.	Matters were addressed satisfactory.
16 May 2018	Briefing by the Department of Science and Technology on the review of the South African Science, Technology and Innovation Institutional Landscape (STIL) Report	All questions were answered and no follow-up questions were raised.	Matters were addressed satisfactory.

## 7. PORTFOLIO COMMITTEE (CONTINUED)

Date	Subject	Matters raised by the Portfolio Committee (highlights of high-level issues)	How the matters were addressed/resolved
23 May 2018	Briefing by the Department of Science and Technology on the DST Concept Note: Sovereign Innovation Fund.	<p>Members asked if the Department had any knowledge about the Council for Scientific and Industrial Research (CSIR) retail store developed for recyclable paper bag and further asked if maybe the CSIR could make direct contact with the Ackerman Foundation and with Pick 'n Pay about this.</p> <p>All the other questions were answered and no follow-up questions were raised.</p>	<p>The Department had been alerted to this and a letter had been sent to CSIR executives to find out if they knew about this and if they did could they provide more information about his. The Department acknowledged the Committee's advice that it was important for the CSIR to make contact with the Ackerman Foundation and Pick 'n Pay. The Department would keep oversight over this as part of their oversight over the CSIR. The Department would keep the Committee informed about this matter.</p> <p>All other matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website (<a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a>).</p>
30 May 2018	Briefing by the Department of Science and Technology Fourth Industrial Revolution and the Digital Economy.	<p>Members asked if there were a source document that provided more information than the presentation on fourth Industrial Revolution and the Digital Economy.</p> <p>Members asked about the possibilities of new jobs within this revolution because it was not only in terms of the data or science but also jobs in the more creative fields.</p> <p>All the other questions were answered and no follow-up questions were raised.</p>	<p>The Department indicated that they did not have a source document. The Minister had asked the Department to compile a document which had to be completed by the end of the month (May). This document would be forwarded to the Committee on completion.</p> <p>The Department was happy to provide a detailed answer. This was what the Inter-Departmental team had been asked to develop.</p> <p>All other matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website (<a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a>).</p>

## 7. PORTFOLIO COMMITTEE (CONTINUED)

Date	Subject	Matters raised by the Portfolio Committee (highlights of high-level issues)	How the matters were addressed/resolved
6 June 2018	Briefing by the DST on Mining Research Development and Innovation Programme and Phakisa	<p>Members asked that the Committee be provided with a list of all the rankings so that it was clear where South Africa stood in comparison with the rest of the world and asked if mining was in trouble, plateauing or if it was just ageing.</p> <p>All the other questions were answered and no follow-up questions were raised.</p>	<p>The Department replied that the ranking was in the world and that the Department indicated that the mining arena was quite broad. The strategy was really about gold and platinum because this was where efforts were being deepened. The future of mining depended on its stakeholders and the decisions they made. The degree of mechanisation in mining also influenced the choices society made.</p> <p>All other matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website (<a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a>).</p>
22 August 2018	Briefing by the Department of Science and Technology on the Science and Technology Laws Amendment Bill, 2018:	<p>Members asked whether it would be possible to get copies of all the submission made because there were submissions that had been dealt with but the Committee did not have access to them. All the other questions were answered and no follow-up questions were raised.</p>	<p>The Department indicated that copies of the submissions and the responses would be made available to the Committee.</p> <p>All other matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website (<a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a>).</p>
29 August 2018	Briefing by the Department of Science and Technology (DST) on the Square Kilometer Array (SKA) Convention – the international organisation governance role	<p>All the questions were answered and no follow-up questions were raised.</p>	<p>Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website (<a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a>).</p>

## 7. PORTFOLIO COMMITTEE (CONTINUED)

Date	Subject	Matters raised by the Portfolio Committee (highlights of high-level issues)	How the matters were addressed/resolved
5 September 2018	Briefing by the Department of Science and Technology on the South African Research Infrastructure Roadmap and the National Integrated Cyber Infrastructure System.	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
10 October 2018	<p>Brief by the Office of the AG on the audit outcomes of the Department of Science and Technology (DST) and entities for 2017/18</p> <p>Briefing by the South African National Space Agency (SANSA) on annual performance and financials 2017/18.</p>	<p>Members asked about the neglected areas such as telecoms and Global Navigation Satellite Services (GNSS)' and if SANSA communicated with the Department of Telecommunications and Postal Services.</p> <p>Members asked what gender category distribution was present within the racial distribution categories of SANSA's employee demographics and what racial categories made up the gender distribution of the company (60.7% male, 39.3% female).</p> <p>All the other questions were also answered and no follow-up questions were raised</p>	<p>CEO replied that regarding the neglected areas and limited resources, SANSA had been engaging with the Department of Telecommunications and Postal Services (DTPS). From a DTPS perspective, it had been trying to construct a national strategy for telecommunications, and SANSA had been helping since it had experience through developing the space strategy policy. The process was ongoing, and SANSA was part of the committee, and there were options in terms of securing South Africa's telecoms satellite, which was what the DTPS was currently considering. From a Global Navigation Satellite Services' perspective, the other key department was the Department of Transport.</p> <p>SANSA indicated that the racial and gender distribution was shown in SANSA's annual report on page 101. In the executive team there were four women -- one was in Geneva, one was defending a contract currently at risk, and the Executive Director for Enterprise Services was also away at the moment. SANSA's executive female colleagues were very busy -- it was not that it had not brought them to the meeting.</p>

## 7. PORTFOLIO COMMITTEE (CONTINUED)

Date	Subject	Matters raised by the Portfolio Committee (highlights of high-level issues)	How the matters were addressed/resolved
			All other matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
10 October 2018	Briefing by the National Research Foundation (NRF) on annual performance and financials 2017/18	All the questions were answered and no follow-up questions were raised.	AMatters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
11 October 2018	Briefing by Council for Scientific and Industrial Research (CSIR) on annual performance and financials 2017/18.	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
11 October 2018	Briefing by Technology Innovation Agency (TIA) on annual performance and financials 2017/18	All the questions were answered and no follow-up questions were raised.	All questions were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
11 October 2018	Briefing by the Academy of Science of South Africa (ASSAf) on annual performance and financials 2017/18.	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
11 October 2018	Brief by South African Council for Natural Scientific Professions (SACNASP) on annual performance and financials 2017/18	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
17 October 2018	Briefing by the Department of Science and Technology (DST) on annual performance and financials 2017/18.	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
17 October 2018	Brief by the National Advisory Council on Innovation (NACI) on annual performance and financials 2017/18.	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
24 October 2018	Briefing by the Department of Science and Technology (DST) on the draft 2018 White Paper on Science , Technology and Innovation.	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).

## 7. PORTFOLIO COMMITTEE (CONTINUED)

Date	Subject	Matters raised by the Portfolio Committee (highlights of high-level issues)	How the matters were addressed/resolved
31 October 2018	DST brief on STI landscapes approach to supporting the Sustainable Development Goals agenda	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
31 October 2018	Briefing by the DST on the National Research Foundation Bill	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
7 November 2018	Briefing by the DST on the status of Climate Change Research in South Africa (DST contribution).	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).
21 November 2018	Briefing by the DST on its 2nd quarter financial and performance report.	<p>Members asked if there was a possibility of unravel the mystery of an ancient civilisation that existed in the distant past that was even more intelligent than people today.</p> <p>Members asked for the number of companies that benefited from the MeerKAT (Square Kilometre Array – SKA) and pointed out that he was still awaiting a response.</p> <p>Members requested a list of the students from all the Departmental entities who had received bursaries, along with the family background assessments of each student.</p> <p>All the other questions were answered and no follow-up questions were raised.</p>	<p>The Department indicated that they would follow up with relevant officials, who kept record of the questions and which ones whose answers had been submitted to the Chairperson of the Committee. He added that he would check the progress of the process and request further information from the funding agencies (mainly the NRF), if it had not been activated.</p> <p>The Department will provide the committee with the detail report.</p> <p>The Department will provide the committee with the detail report.</p> <p>All other matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website (<a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a>).</p>
13 February 2019	NCOP Amendments to Protection, Promotion, Development and Management of Indigenous Knowledge Bill.	All the questions were answered and no follow-up questions were raised.	Matters were addressed satisfactorily and recorded on the Parliamentary Monitoring Group website ( <a href="http://www.pmg.org.za/minutes">www.pmg.org.za/minutes</a> ).

## 7. PORTFOLIO COMMITTEE (CONTINUED)

### 8. SCOPA RESOLUTIONS

There were no Standing Committee on Public Accounts (SCOPA) resolutions.

### 9. PRIOR MODIFICATIONS TO AUDIT REPORTS

There were no prior modifications to the audit reports of the Department.

### 10. INTERNAL CONTROL UNIT

There is no internal control unit in the Department. All internal control functions are performed by the Internal Audit Activity.

### 11. INTERNAL AUDIT AND AUDIT COMMITTEES

#### **Key activities and objectives of Internal Audit Activity**

Internal audit is a primary assurance tool that supports stewardship and accountability in the spending of public funds, and is a key component of the governance of the Department in terms of improving the Department's governance, risk management and management controls. This is achieved by proactively providing independent, objective assurance and consulting activities as outlined in the three-year risk

based rolling internal audit plan.

In establishing audit priorities during the strategic planning cycle for 2015 to 2020, Internal Audit Activity employed a risk-based approach, considering the key areas of risk for the Department relating both to its current operations and to those proposed in the current Strategic Plan and risk management strategy.

Emerging risks and issues were considered when completing the audit plan. Internal Audit Activity conducted a follow-up of audit recommendations to ensure that value was derived from the auditing performed.

#### **Summary of audit work done**

Audit effort was directed to the areas of reporting on performance against predetermined objectives, financial reporting, supply chain management, information technology, Management Performance Assessment Tool results, strategic risk profiles, and a sample of projects implemented by the Department in the achievement of its strategic objectives. Internal Audit Activity also evaluated the level of combined assurance provided by the various assurance providers to determine whether the combined assurance received was appropriate for addressing all significant risks facing the Department.

## 11. INTERNAL AUDIT AND AUDIT COMMITTEES (CONTINUED)

Audit effort was directed to the areas of reporting on performance against predetermined objectives, financial reporting, supply chain management, information technology, Management Performance Assessment Tool results, strategic risk profiles, and a sample of projects implemented by the Department in the achievement of its strategic objectives. Internal Audit Activity also evaluated the level of combined assurance provided by the various assurance providers to determine whether the combined assurance received was appropriate for addressing all significant risks facing the Department.

### Key activities and objectives of the Audit Committee

The Audit Committee is constituted to fulfil the Department's statutory obligations in terms of section 77 of the Public Finance Management Act, 1999, and the Treasury Regulations issued in terms of the Act. The Audit Committee is an oversight body, providing independent oversight over governance, risk management and control processes of the Department. The Committee's mandate and responsibilities are clearly defined in the Audit Committee Charter, in accordance with which four Audit Committee meetings were convened in the year under review.

### Attendance of Audit Committee meetings by Audit Committee members

Name	Qualifications	Internal or external	Date appointed	Date contract ended	Number of meetings attended
Shirley Machaba	CA (SA), CD (SA), CRMA, CCSA	External	1 Oct. 2012	30 Sept. 2018	2 of 4

Irene Tlhase	MA in Economics, BSc (Agribusiness)	External	1 Oct. 2018	n/a	2 of 2
Moshupi Mokgobinyane	CA (SA), MPhil in Accounting Sciences, BCom Hons (Accounting), CTA	External	1 Nov. 2018	n/a	2 of 2

## 12. AUDIT COMMITTEE REPORT

We are pleased to present our report for the financial year ended 31 March 2019.

### 1. Audit Committee responsibility

The Audit Committee has fulfilled its responsibilities in terms of section 38(1)(a)(ii) of the Public Finance Management Act and Treasury Regulation 3.1.13. The Committee has adopted formal terms of reference as its Audit Committee Charter, and has regulated its affairs

and discharged all its responsibilities in compliance with the Charter, except that it has not reviewed changes to accounting policies and practices.

### 2. The effectiveness of Internal Audit Activity

Internal Audit Activity reports functionally to the Audit Committee. The Audit Committee approves the internal audit charter and annual audit plan of Internal Audit Activity to maintain its independence. A quality assurance and improvement programme is

## 12. AUDIT COMMITTEE REPORT (CONTINUED)

implemented annually and the results are presented to the Audit Committee. Internal Audit Activity received a generally conforms rating this year during the external quality assurance validation exercise that is performed every five years.

Under the guidance of the Audit Committee and the Enterprise Risk Management Committee, the combined assurance plan was reviewed to assess whether the combined assurance received was appropriate for addressing all significant risks facing the Department. All assurance providers carried out their responsibilities as indicated in the combined assurance plan. The Audit Committee is satisfied that Internal Audit Activity is operating effectively and has addressed pertinent risks to the Department by implementing the annual audit plan.

### 3. The effectiveness of internal controls

Our review of the significant audit findings, which was informed by the risk assessments conducted in the Department, revealed certain weaknesses which were then raised with the Department.

Areas selected for audit included –

- performance information;
- procurement processes;
- financial statement reviews;
- contract management;
- information technology audits;
- strategic risk profiles;
- follow-up of internal and external audit findings;
- projects funded by the Department;
- the Management Performance Assessment Tool.

An area of concern is the adequacy and effectiveness of Information Technology controls in the areas of IT Service Continuity Management, User Access Management and Program Change Management.

### 4. In-year management and monthly/quarterly reporting

The Department submits monthly reports on departmental expenditure and quarterly reports on its interim financial statements to the Treasury, as required by the Public Finance Management Act. The Department also reports quarterly to the Department of Planning, Monitoring and Evaluation on performance against predetermined objectives. During the year under review, the Audit Committee monitored these reports, which were prepared and issued by the Accounting Officer and management.

### 5. Evaluation of financial statements

The Audit Committee –

- reviewed and discussed, with the Auditor-General South Africa (AGSA) and the Accounting Officer, the audited annual financial statements to be included in the annual report;
- reviewed the Department's compliance with legal and regulatory provisions;
- reviewed significant adjustments resulting from the audit;
- reviewed the AGSA's management letter and management's response to it;
- reviewed information on predetermined objectives to be included in the annual report.

Overall, the Audit Committee is satisfied with the submission and quality of both the interim and annual financial statements prepared by the Department.

### 6. Enterprise risk management

Enterprise risk management is a structured process that focuses on the identification, assessment, management and monitoring of risk. A fully functional Enterprise Risk Management Committee supports the Executive Authority and Accounting Officer by providing oversight, reviewing information presented

## 12. AUDIT COMMITTEE REPORT (CONTINUED)

by management, and reporting on the adequacy and effectiveness of the Department's risk management system. The Committee monitored significant risks and is satisfied that they were reduced to an acceptable level. Comprehensive strategies for enterprise risk management and fraud risk management were developed and implemented. The fraud risk management strategy includes a fraud prevention and detection plan. For the purposes of coordination and fostering relationships, the Chairperson of the Audit Committee and the Chief Audit Executive are standing invitees to the Enterprise Risk Management Committee, and the Chairperson of the Enterprise Risk Management Committee and the Chief Risk Officer are standing invitees to the Audit Committee.

### 7. Annual performance review

The Committee has considered the performance information reports submitted to the AGSA for review.

### 8. Auditor-General's report

We have reviewed the Department's commitments identified in the AGSA status of review document for audit issues raised in the previous year and we are satisfied that the matters are being adequately addressed. However, the following areas of concern require management intervention:

- The adequacy and effectiveness of Information Technology controls in the areas of IT Service Continuity Management, User Access Management and Program Change Management.

The Audit Committee concurs with and accepts the conclusions of the Auditor-General on the annual financial statements, and is of the opinion that the audited annual financial statements be accepted and read together with the report of the AGSA.

**Dr Len Konar**

Chairperson of the Audit Committee

Department of Science and Technology

25 July 2019

## **PART D** HUMAN RESOURCE MANAGEMENT

## PART D: HUMAN RESOURCE MANAGEMENT

### 1. Introduction

The reporting information contained in this section of the Annual Report has been prescribed by the Department of Public Service and Administration for all departments within the Public Service.

### 2. Overview of Human Resources

As at 31 March 2019, the departmental post establishment was at 490, with 400 positions filled and 90 vacant, translating to an 18,37% vacancy rate. This was owing the impact of the National Treasury decision to reduce the baseline of the allocation for compensation of employees, which resulted in all vacant positions being declared unfunded.

A total of 29 employees left the Department and two employees were recruited from within the Public Service, making the departmental turnover rate 6,8%. Resignation accounted for most (62,1%) terminations, with transfers to other departments accounting for 13,8% and death for 10,4%.

The Department continued to comply with the Performance Management and Development System. All 103 Senior Management Service (SMS) members submitted their performance agreements by the due date and all performance rewards for both SMS and non-SMS were processed by 31 December 2018.

As part of the Department's ongoing commitment to health promotion programmes, it has a designated SMS member, a dedicated directorate and an adequate budget. All the committees required in this regard by the Public Service Regulations are functioning.

As at 31 March 2019, only 81% of the approved departmental organisational structure was funded. The process of reviewing the organisational structure was suspended during the transition from the fifth to the sixth administration. With 19% of the approved structure unfunded, staff in funded positions carry out the functions of unfunded positions, and many employees are overburdened and overstretched.

### 3. HUMAN RESOURCES OVERSIGHT STATISTICS

#### 3. Human resources oversight statistics

##### 3.1 Personnel-related expenditure

**Table 3.1.1: Personnel expenditure by Programme in the period 1 April 2018 to 31 March 2019**

Programme	Total expenditure (R'000)	Personnel expenditure (R'000)	Training expenditure (R'000)	Professional and special services expenditure (R'000)	Personnel expenditure as % of total expenditure	Average personnel cost per employee (R'000)
Administration	380 349	165 290	4 277	5 266	43,4	826
Technology Innovation	1 157 338	42 159	0	0	3,6	878

Question	Yes	No	Details, if yes
1. Has the Department designated a member of the SMS to implement the provisions contained in Part VI E of Chapter 1 of the Public Service Regulations, 2001? If so, provide her/his name and position.	X		Ms Siphwe Mthombeni Director: Special Programmes
2. Does the Department have a dedicated unit or has it designated specific staff members to promote the health and well-being of its employees? If so, indicate the number of employees who are involved in this task and the annual budget that is available for this purpose.	X		The Directorate: Special Programmes has five employees (one director, one deputy director and two assistant directors). R1,966 million was allocated for the promotion of employees' health and wellness, including HIV, Aids and TB programmes.

### 3. HUMAN RESOURCES OVERSIGHT STATISTICS (CONTINUED)

<p>3. Has the Department introduced an employee assistance or health promotion programme for its employees? If so, indicate the key elements/services of this programme.</p>	<p>X</p>	<p>The Department's Employee Assistance Programme services are outsourced to Careways. The services offered include assistance with personal, family, work, financial, health and legal challenges. Key elements of the programme include counselling, health risk assessments, HIV counselling and testing, TB screenings, the distribution of male and female condoms, and education, awareness and sporting activities.</p>
<p>4. Has the Department established one or more committees as contemplated in Part VI E.5 (e) of Chapter 1 of the Public Service Regulations, 2001? If so, please provide the names of the members of the committee and the stakeholder(s) that they represent</p>	<p>X</p>	<ol style="list-style-type: none"> <li>1. Ms Loretta Pillay</li> <li>2. Ms Ellen Moloji</li> <li>3. Mr Sphiwe Shange</li> <li>4. Ms Truelove Mnguni</li> <li>5. Ms Nombulelo Dlalisa</li> <li>6. Ms Pertunia Mphato</li> <li>7. Mr Vincent Napo</li> <li>8. Ms Ncumisa Runeyi</li> <li>9. Ms Caroline Mohlamonyane</li> <li>10. Mr Siyabonga Ndlovu</li> <li>11. Mr Phumelele Yabo</li> <li>12. Ms Tumisang Sebitloane</li> <li>13. Ms Mathodi Mathebula</li> <li>14. Mr Wiseman Ndlela</li> <li>15. Ms Vivienne Gondwe</li> <li>16. Mr Benny Nhlapo</li> <li>17. Ms Hlamalani Khoza</li> <li>18. Ms Sphiwe Mthombeni</li> </ol> <p>The committee represents all employees in the Department (both SMS and non-SMS members).</p>

### 3. HUMAN RESOURCES OVERSIGHT STATISTICS (CONTINUED)

<p>5. Has the Department reviewed its employment policies and practices to ensure that they do not unfairly discriminate against employees on the basis of their HIV status? If so, list the employment policies/practices so reviewed.</p>	<p>X</p>		<p>The following policies were reviewed and approved:</p> <ol style="list-style-type: none"> <li>1. DST Policy on HIV/Aids and TB in the Workplace.</li> <li>2. DST Policy on Occupational Health and Safety.</li> <li>3. DST Policy on Reasonable Accommodation for People with Disabilities.</li> <li>4. The Health and Wellness Programme Policy.</li> <li>5. The Health and Productivity Policy</li> </ol>
<p>6. Has the Department introduced measures to protect HIV-positive employees or those perceived to be HIV-positive from discrimination? If so, list the key elements of these measures.</p>	<p>X</p>		<p>The Department has a Policy on HIV Aids and TB. A number of awareness and education initiatives were implemented to address the issue of stigma and discrimination, such as the commemoration of World Aids Day and the annual candlelight memorial.</p> <p>Information on disability awareness was provided through the intranet and workshops were conducted with employees.</p>
<p>7. Does the Department encourage its employees to undergo voluntary HIV counselling and testing? If so, list the results that this has achieved. .</p>	<p>X</p>		<p>The Department conducts quarterly HIV counselling and testing (HCT) drives. An average of 24% of employees were tested over the four quarters. A service provider was appointed with effect from 16 February 2018 to provide off-site HCT services for employees and their family members nationwide.</p>
<p>8. Has the Department developed measures/indicators to monitor and evaluate the impact of its health promotion programme? If so, list these measures/indicators.</p>	<p>X</p>		<p>The Department has adopted measures and indicators as provided by the Department of Public Service and Administration (DPSA) Employee Health and Wellness Strategic Framework for the Public Service. Quarterly progress reports (with remedial actions) are submitted to the DPSA. The Department's wellness unit also monitors the implementation of services by Careways and employees provide an evaluation of the services provided.</p>

# REPORT OF THE AUDITOR-GENERAL TO PARLIAMENT ON VOTE NO. 30: DEPARTMENT OF SCIENCE AND TECHNOLOGY

## Report on the audit of the financial statements

### Opinion

1. I have audited the financial statements of the Department of Science and Technology set out on pages 162 to 289 which comprise of the appropriation statement, the statement of financial position as at 31 March 2019, the statement of financial performance, the statement of changes in net assets and the statement of cash flows for the year then ended, as well as the notes to the financial statements, including a summary of significant accounting policies.
2. In my opinion, the financial statements present fairly, in all material respects, the financial position of the Department of Science and Technology as at 31 March 2019, and its financial performance and cash flows for the year then ended in accordance with the Modified Cash Standard (MCS) prescribed by National Treasury and the requirements of the Public Finance Management Act of South Africa, 1999 (Act no. 1 of 1999) (PFMA).

### Basis for opinion

3. I conducted my audit in accordance with the International Standards on Auditing (ISAs). My responsibilities under those standards are further described in the auditor-general's responsibilities for the audit of the financial statements section of this auditor's report.

4. I am independent of the department in accordance with sections 290 and 300 of the International Ethics Standards Board for Accountants' *Code of ethics* for professional accountants (IESBA code), parts 1 and 3 of the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants* (including International Independence Standards) and the ethical requirements that are relevant to my audit in South Africa. I have fulfilled my other ethical responsibilities in accordance with these requirements and the IESBA codes.
5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

### Other matters

6. I draw attention to the matter below. My opinion is not modified in respect of this matter.

### Unaudited Supplementary Schedules

7. The supplementary information set out on pages 290 to 307 does not form part of the financial statements and is presented as additional information. I have not audited these schedules and, accordingly, I do not express an opinion on them.

# REPORT OF THE AUDITOR-GENERAL TO PARLIAMENT ON VOTE NO. 30: DEPARTMENT OF SCIENCE AND TECHNOLOGY

## Responsibilities of the accounting officer for the financial statements

8. The accounting officer is responsible for the preparation and fair presentation of the financial statements in accordance with MCS as prescribed by National Treasury and the requirements of the PFMA, and for such internal control as the accounting officer determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.
9. In preparing the financial statements, the accounting officer is responsible for assessing the Department of Science and Technology's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the appropriate governance structure either intends to liquidate the department or to cease operations, or has no realistic alternative but to do so.

## Auditor-general's responsibilities for the audit of the financial statements

10. My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

11. A further description of my responsibilities for the audit of the financial statements is included in the annexure to this auditor's report.

## Report on the audit of the annual performance report

### Introduction and scope

12. In accordance with the Public Audit Act of South Africa, 2004 (Act no. 25 of 2004) (PAA) and the general notice issued in terms thereof, I have a responsibility to report material findings on the reported performance information against predetermined objectives for selected programmes presented in the annual performance report. I performed procedures to identify findings but not to gather evidence to express assurance.
13. My procedures address the reported performance information, which must be based on the approved performance planning documents of the department. I have not evaluated the completeness and appropriateness of the performance indicators/ measures included in the planning documents. My procedures also did not extend to any disclosures or assertions relating to planned performance strategies and information in respect of future periods that may be included as part of the reported performance information. Accordingly, my findings do not extend to these matters.
14. I evaluated the usefulness and reliability of the reported performance information in accordance with the criteria developed from the performance management and reporting framework, as defined in the general notice, for the following selected programmes presented in the annual performance report of the department for the year ended 31 March 2019:

# REPORT OF THE AUDITOR-GENERAL TO PARLIAMENT ON VOTE NO. 30: DEPARTMENT OF SCIENCE AND TECHNOLOGY

Programmes	Pages in annual performance report
<b>Programme 2 – technology innovation</b>	<b>71– 76</b>
<b>Programme 4 – research development and support</b>	<b>84 – 89</b>
<b>Programme 5 – socio-economic innovation partnerships</b>	<b>90 – 97</b>

15. I performed procedures to determine whether the reported performance information was properly presented and whether performance was consistent with the approved performance planning documents. I performed further procedures to determine whether the indicators and related targets were measurable and relevant, and assessed the reliability of the reported performance information to determine whether it was valid, accurate and complete.

16. I did not raise any material findings on the usefulness and reliability of the reported performance information for these programmes.

## Other matter

17. I draw attention to the matter below.

## Achievement of planned targets

18. Refer to the annual performance report on pages 43 to 98 for information on the achievement of planned targets for the year and explanations provided for the under/ over achievement of a number of targets.

## Report on the audit of compliance with legislation

### Introduction and scope

19. In accordance with the PAA and the general notice issued in terms thereof, I have a responsibility to report material findings on the compliance of the department with specific matters in key legislation. I performed procedures to identify findings but not to gather evidence to express assurance.

20. I did not raise material findings on compliance with the specific matters in key legislation set out in the general notice issued in terms of the PAA.

# REPORT OF THE AUDITOR-GENERAL TO PARLIAMENT ON VOTE NO. 30: DEPARTMENT OF SCIENCE AND TECHNOLOGY

## Other information

21. The accounting officer is responsible for the other information. The other information comprises the information included in the annual report which includes the accounting officer's report and the audit committee's report. The other information does not include the financial statements, the auditor's report and those selected programmes presented in the annual performance report that have been specifically reported in this auditor's report.
22. My opinion on the financial statements and findings on the reported performance information and compliance with legislation do not cover the other information and I do not express an audit opinion or any form of assurance conclusion thereon.
23. In connection with my audit, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements and the selected programmes presented in the annual performance report, or my knowledge obtained in the audit, or otherwise appears to be materially misstated.
24. I did not receive the other information prior to the date of this auditor's report. When I do receive and read this information, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the other information be corrected. If the other information is not

corrected, I may have to retract this auditor's report and re-issue an amended report as appropriate. However, if it is corrected this will not be necessary.

## Internal control deficiencies

25. I considered internal control relevant to my audit of the financial statements, reported performance information and compliance with applicable legislation; however, my objective was not to express any form of assurance on it.
26. I did not identify any significant deficiencies in internal control.

*Auditor-General*

Pretoria  
31 July 2019

# ANNEXURE – AUDITOR-GENERAL'S RESPONSIBILITY FOR THE AUDIT

1. As part of an audit in accordance with the ISAs, I exercise professional judgement and maintain professional scepticism throughout my audit of the financial statements, and the procedures performed on reported performance information for selected programmes and on the department's compliance with respect to the selected subject matters.

## Financial statements

2. In addition to my responsibility for the audit of the financial statements as described in this auditor's report, I also:
  - identify and assess the risks of material misstatement of the financial statements whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control
  - obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the departments's internal control
  - evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the accounting officer
  - conclude on the appropriateness of the accounting officer's use of the going concern basis of accounting in the preparation of the financial statements. I also conclude, based on the audit evidence obtained, whether a

material uncertainty exists related to events or conditions that may cast significant doubt on the Department of Science and Technology's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements about the material uncertainty or, if such disclosures are inadequate, to modify the opinion on the financial statements. My conclusions are based on the information available to me at the date of this auditor's report. However, future events or conditions may cause a department to cease continuing as a going concern

- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

## Communication with those charged with governance

3. I communicate with the accounting officer regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.
4. I also confirm to the accounting officer that I have complied with relevant ethical requirements regarding independence, and communicate all relationships and other matters that may reasonably be thought to have a bearing on my independence and, where applicable, related safeguards.

## NOTES TO THE APPROPRIATION STATEMENT FOR THE YEAR ENDED 31 MARCH 2019

### Details of transfers and subsidies as per the Appropriation Act (after virement)

Details of these transactions can be viewed in the note to the Transfers and Subsidies, disclosure notes and Annexure 1 (B, C, E, D, F and G) to the Annual Financial Statements.

### Details of specifically and exclusively appropriated amounts voted (after virement)

Details of these transactions can be viewed in note 1 (Annual Appropriation) to the Annual Financial Statements.

### Details of payments for financial assets

The details of these transactions can be viewed in note 7 to the Annual Financial Statements.

### Explanations of material variances from amounts voted (after virement)

Per Programme	Per Final appropriation	Actual expenditure	Variance	Variance as a % of final appropriation
	R'000	R'000	R'000	%
Programme name				
Administration				
Compensation of employees	174,032	165,290	8,742	5.0%
Goods and services	178,169	151,726	26,443	14.8%
Payments for capital assets	13,735	9,020	4,715	34.3%

The variances are due to delays in filling identified critical positions, cancellation of events, discontinuation of roof replacement, savings on audit fees, and delays in finalising an agreement for Microsoft licences.

Per Programme				
Technology Innovation				
Goods and services	22,544	18,175	4,369	19.4%

The variance is due to late receipt of invoices for travel and subsistence and the hosting of the Indigenous Knowledge Bio-innovation programme.

Per Programme				
Socio-economic Innovation				
Partnerships				
Goods and services	8,686	7,210	1,476	16.9%

The variance is due to the postponement of the intellectual property and technology transfer survey projects.

## **ACCOUNTING POLICIES**

### **FOR THE YEAR ENDED 31 MARCH 2019**

The financial statements have been prepared in accordance with the following policies, which have been applied consistently in all material aspects, unless otherwise indicated. Management has concluded that the financial statements present fairly the Department's primary and secondary information.

The historical cost convention has been used, except where otherwise indicated. Management has used assessments and estimates in preparing the Annual Financial Statements, where necessary. These are based on the best information available at the time of preparation.

Where appropriate and meaningful, additional information has been disclosed to enhance the usefulness of the financial statements and to comply with the statutory requirements of the Public Finance Management Act, 1999 (Act No. 1 of 1999), as amended by Act No. 29 of 1999, and the Treasury Regulations issued in terms of the Act and the Division of Revenue Act.

#### **1. Basis of preparation**

The financial statements have been prepared in accordance with the Modified Cash Standard.

#### **2. Going concern**

The financial statements have been prepared on a going concern basis for the following reasons, among others:

- (i) The Department was allocated a budget over the Medium Term Expenditure Framework period that includes R8 billion that was allocated for the next financial year for its operations. This budget will assist in paying for short-term financial obligations such as personnel and other priority projects.
- (ii) The Department's five-year (2015-2020) Strategic Plan is still ongoing. The plan is being implemented and will only be reviewed after 2020.

#### **3. Presentation currency**

All amounts have been presented in South African rands (R), which is also the functional currency of the Department.

#### **4. Rounding**

Unless otherwise stated, all financial figures have been rounded to the nearest one thousand rand (R'000).

#### **5. Foreign currency translation**

Cash flows arising from foreign currency transactions are translated into South African rands using the spot exchange rates prevailing at the date of payment/receipt.

#### **6. Comparative information**

##### **6.1 Prior period comparative information**

Prior period comparative information has been presented in the current year's financial statements. Where necessary, figures included in the prior period financial statements have been reclassified to ensure that the format in which the information is presented is consistent with the format of the current year's financial statements.

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2019

### 6.2 Current year comparison with budget

A comparison between the approved final budget and actual amounts for each Programme and economic classification is included in the appropriation statement.

## 7. Revenue

### 7.1 Appropriated funds

Appropriated funds comprise departmental allocations. Appropriated funds are recognised in the Statement of Financial Performance on the date the appropriation becomes effective. Adjustments to the appropriated funds made in terms of the adjustments budget process are recognised in the Statement of Financial Performance on the date the adjustments become effective.

The net amount of any appropriated funds due to or from the National Revenue Fund at the reporting date is recognised as payable or receivable in the Statement of Financial Position.

### 7.2 Departmental revenue

The departmental revenue is recognised in the Statement of Financial Performance when received and is subsequently paid into the National Revenue Fund, unless otherwise stated. Any amount owing to the National Revenue Fund at the reporting date is recognised as payable in the Statement of Financial Position.

### 7.3 Accrued departmental revenue

Accruals in respect of departmental revenue (excluding tax revenue) are recorded in the notes to the financial statements when –

- it is probable that the economic benefits or service potential associated with the transaction will flow to the Department; and
- the amount of revenue can be measured reliably.

The accrued revenue is measured at the fair value of the consideration receivable. Write-offs, if any, are made according to the Department's debt write-off policy

## 8. Expenditure

### 8.1 Compensation of employees

#### 8.1.1 Salaries and wages

Salaries and wages are recognised in the Statement of Financial Performance on the date of payment.

#### 8.1.2 Social contributions

Social contributions made by the Department in respect of current employees are recognised in the Statement of Financial Performance on the date of payment. Social contributions made by the Department in respect of ex-employees are classified as transfers to households in the Statement of Financial Performance on the date of payment.

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2019

### 8.2. Other expenditure

Other expenditure such as goods and services, transfers and subsidies, and payments for capital assets are recognised in the Statement of Financial Performance on the date of payment. The expense is classified as a capital expense if the total consideration paid is more than the capitalisation threshold.

### 8.3 Accruals and payables not recognised

Accruals and payables not recognised are recorded in the notes to the financial statements when the goods are received, or in the case of services, when they are rendered to the Department, or in the case of transfers and subsidies, when they are due and payable. Accruals and payables not recognised are measured at cost.

### 8.4 Leases

#### 8.4.1 Operating leases

Operating lease payments made during the reporting period are recognised as current expenditure in the Statement of Financial Performance on the date of payment. The operating lease commitments are recorded in the notes to the financial statements.

#### 8.4.2 Finance leases

Finance lease payments made during the reporting period are recognised as capital expenditure in the Statement of Financial Performance on the date of payment. The finance lease commitments are recorded in the notes to the financial statements and are not apportioned between the capital and interest portions.

Finance leases acquired at the end of the lease term are recorded and measured at the lower of –

- cost, being the fair value of the asset; or
- the sum of the minimum lease payments made, including any payments made to acquire ownership at the end of the lease term, excluding interest.

## 9. Aid assistance

### 9.1 Aid assistance received

Aid assistance received in cash is recognised in the Statement of Financial Performance when received. In-kind aid assistance is recorded in the notes to the financial statements on the date of receipt and is measured at fair value.

Aid assistance not spent for the intended purpose, and any unutilised funds from aid assistance that are required to be refunded to the donor, are recognised as a payable in the Statement of Financial Position.

### 9.2 Aid assistance paid

Aid assistance paid is recognised in the Statement of Financial Performance on the date of payment. Aid assistance payments made prior to the receipt of funds are recognised as a receivable in the Statement of Financial Position.

## **ACCOUNTING POLICIES**

### **FOR THE YEAR ENDED 31 MARCH 2019**

#### **10. Cash and cash equivalents**

Cash and cash equivalents are stated at cost in the Statement of Financial Position. Bank overdrafts are shown separately on the face of the Statement of Financial Position.

For the purposes of the Cash Flow Statement, cash and cash equivalents comprise cash on hand, deposits held, other short-term highly liquid investments, and bank overdrafts.

#### **11. Prepayments and advances**

Prepayments and advances are recognised in the Statement of Financial Position when the Department receives or disburses the cash. Prepayments and advances are initially and subsequently measured at cost.

#### **12. Loans and receivables**

Loans and receivables are recognised in the Statement of Financial Position at cost plus accrued interest, where interest is charged, less amounts already settled or written-off. Write-offs are made according to the Department's write-off policy.

#### **13. Investments**

Investments are recognised in the Statement of Financial position at cost.

#### **14. Financial assets**

##### **14.1 Financial assets (not covered elsewhere)**

A financial asset is recognised initially at its cost plus any transaction costs that are directly attributable to the acquisition or issue of the financial assets. At the reporting date, a department shall measure its financial assets at cost, less any amounts already settled or written off, except for recognised loans and receivables, which are measured at cost plus accrued interest, where interest is charged, less amounts already settled or written off.

##### **14.2 Impairment of financial assets**

Where there is an indication of impairment of a financial asset, an estimation of the reduction is the recorded carrying value, to reflect the best estimate of the amount of the future economic benefits expected to be recovered from that asset is recorded in the notes to the financial statements.

#### **15. Payables**

Loans and payables are recognised in the Statement of Financial Position at cost.

#### **16. Capital Assets**

##### **16.1 Immovable capital assets**

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2019

Immovable capital assets are reflected in the asset register of the Department and recorded in the notes to the financial statements at cost or fair value where the cost cannot be determined reliably. Immovable capital assets acquired in a non-exchange transaction are recorded at fair value at the date of acquisition. Immovable assets are subsequently carried in the asset register at cost and are not currently subject to depreciation or impairment.

Subsequent expenditure of a capital nature forms part of the cost of the existing asset when ready for use.

Additional information on immovable assets not reflected in the asset register is provided in the notes to financial statements.

### 16.2 Movable capital assets

Movable capital assets are initially recorded in the notes to the financial statements at cost. Movable capital assets acquired through a non-exchange transaction are measured at fair value as at the date of acquisition. Where the cost of movable capital assets cannot be determined accurately, the assets are measured at fair value, and where fair value cannot be determined; the assets are measured at R1.

All assets acquired prior to 1 April 2002 (or a later date as approved by the Office of the Accountant General) are measured at R1. Movable capital assets are subsequently carried at cost and are not subject to depreciation or impairment.

Subsequent expenditure that is of a capital nature is added to the cost of the asset at the end of the capital project, unless the movable asset is recorded by another department, in which case the completed project costs are transferred to that department.

### 16.3 Intangible assets

Intangible assets are initially recorded in the notes to the financial statements at cost. Intangible assets acquired through a non-exchange transaction are measured at fair value as at the date of acquisition.

Internally generated intangible assets are recorded in the notes to the financial statements when the Department commences the development phase of the project.

Where the cost of intangible assets cannot be determined accurately, the assets are measured at fair value, and where fair value cannot be determined; the assets are measured at R1. All assets acquired prior to 1 April 2002 (or a later date as approved by the Office of the Accountant General) are recorded at R1. Intangible assets are subsequently carried at cost and are not subject to depreciation or impairment.

Subsequent expenditure that is of a capital nature is added to the cost of the asset at the end of the capital project, unless the intangible asset is recorded by another department/entity, in which case the completed project costs are transferred to that department.

### 16.4 Project Costs: Work in progress

Expenditure of a capital nature is initially recognised in the statement of financial performance at cost when paid. Amounts paid towards capital projects are separated from the amounts recognised and accumulated in work-in-progress until the underlying assets are ready for use. Once ready for use, the total accumulated payments are recorded in the asset register. Subsequent payments to complete the project are added to the capital asset in the asset register. Where the Department is not the custodian of the completed project asset, the asset is transferred to the custodian subsequent to completion.

## **17. Provisions and contingents**

### 17.1 Provisions

Provisions are recorded in the notes to the financial statements when there is a present legal or constructive obligation to forfeit economic benefits as a result of events in the past and it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate of the obligation can be made. The provision is measured as the best estimate of the funds required to settle the present obligation at the reporting date.

### 17.2 Contingent liabilities

Contingent liabilities are recorded in the notes to the financial statements when there is a possible obligation that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not within the control of the Department, or when there is a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation or the amount of the obligation cannot be measured reliably.

### 17.3 Contingent assets

Contingent assets are recorded in the notes to the financial statements when a possible asset arises from past events, and whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not within the control of the Department.

### 17.4 Commitments

Commitments are recorded at cost in the notes to the financial statements when there is a contractual arrangement or an approval by management in a manner that raises a valid expectation that the Department will discharge its responsibilities, thereby incurring future expenditure that will result in the outflow of cash.

## **18. Unauthorised expenditure**

Unauthorised expenditure is recognised in the statement of financial position until such time as the expenditure is either –

- approved by Parliament with funding and the related funds are received; or
- approved by Parliament without funding and is written off against the appropriation in the Statement of Financial Performance; or
- transferred to receivables for recovery.

Unauthorised expenditure is measured at the amount of the confirmed unauthorised expenditure.

## **19. Fruitless and wasteful expenditure**

Fruitless and wasteful expenditure is recorded in the notes to the financial statements when confirmed. The amount recorded is equal to the total value of the fruitless and/or wasteful expenditure incurred.

Fruitless and wasteful expenditure is removed from the notes to the financial statements when it is resolved or transferred to receivables for recovery. Fruitless and wasteful expenditure receivables are measured at the amount that is expected to be recoverable and are de-recognised when settled or subsequently written off as irrecoverable.

## **20. Irregular expenditure**

Irregular expenditure is recorded in the notes to the financial statements when confirmed. The amount recorded is equal to the value of the irregular expenditure incurred unless it is impracticable to determine, in which case reasons therefore are provided in the notes.

Irregular expenditure is removed from the notes when it is either condoned by the relevant authority, transferred to receivables for recovery, or not condoned and is not recoverable.

Irregular expenditure receivables are measured at the amount that is expected to be recoverable and are de-recognised when settled or subsequently written off as irrecoverable.

## **21. Changes in accounting estimates**

Changes in accounting policies that are effected by management have been applied retrospectively in accordance with Modified Cash Standard (MCS) requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such instances, the Department shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with MCS requirements.

Correction of errors is applied retrospectively in the period in which the error has occurred, in accordance with MCS requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases, the Department shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

## **22. Events after the reporting date**

Events after the reporting date that are classified as adjusting events are accounted for in the financial statements, if occurred. Events after the reporting date that are classified as non-adjusting events after the reporting date are disclosed in the notes to the financial statements, if occurred.

## **23. Agent-principal arrangements**

The Department is in an agent-principal arrangement with the Department of Justice and Constitutional Development. In terms of the arrangement of a principal-agent, all related revenues, expenditures, assets and liabilities have to be recognised or recorded in terms of the relevant policies listed herein. Additional disclosures have to be provided in the notes to the financial statements where appropriate.

## **24. Departures from the MCS requirements**

Management has concluded that the financial statements present fairly the Department's primary and secondary information; that the Department complied with the Standard; and that there was no departure from any particular requirement to achieve fair presentation.

## **25. Capitalisation reserve**

The capitalisation reserve comprises financial assets and/or liabilities originating in a prior reporting period but which are recognised in the Statement of Financial Position for the first time in the current reporting period. Amounts are recognised in the capitalisation reserves when identified in the current period and are transferred to the National Revenue Fund when the underlying asset is disposed of and the related funds are received.

## **26. Recoverable revenue**

Amounts are recognised as recoverable revenue when a payment made in a previous financial year becomes recoverable from a debtor in the current financial year. Amounts are either transferred to the National Revenue Fund when recovered or are transferred to the Statement of Financial Performance when written off.

## **27. Related party transactions**

A related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party. Related party transactions within the Minister's portfolio are recorded in the notes to the financial statements when the transaction is not at arm's length.

Key management personnel are those persons having the authority and responsibility for planning, directing and controlling the activities of the Department. The number of individuals and their full compensation is recorded in the notes to the financial statements

## **28. Inventories**

At the date of acquisition, inventories are recorded at cost price in the Statement of Financial Performance. Where inventories are acquired as part of a non-exchange transaction, the cost of inventory is its fair value at the date of acquisition. Inventories are subsequently measured at the lower of cost and net realisable value or the lower of cost and current replacement value (the factors which could lead to the revaluation of inventory includes but is not limited to obsolescence, defects, over-supply, and major price declines). Subsequent measurement of the cost of inventory is determined on the weighted average basis. The Department is not an inventory institution, therefore the note on inventory is not applicable

## **29. Public-private partnerships**

Public-private partnerships (PPPs) are accounted for based on the nature and/or substance of the partnership. The transaction is accounted for in accordance with the relevant accounting policies. The summary of the significant terms of the PPP agreement, the parties to the agreement, and the date of commencement thereof together with the description and nature of the concession fees received, the unitary fees paid, and the rights and obligations of the Department are recorded in the notes to the financial statements. The Department is not a party to any public-private partnership.

## **30. Employee benefits**

The value of each major class of employee benefit obligation (accruals, payables not recognised, and provisions) is disclosed in the employee benefits note.

**NOTES TO THE FINANCIAL STATEMENT  
FOR THE YEAR ENDED 31 MARCH 2019**

**1. Annual appropriation**

Included are funds appropriated in terms of the Appropriation Act (and the Adjustments Appropriation Act) for National Departments (Voted funds):

	<b>Final appropriation 2018/2019</b>	<b>Actual funds 2018/2019</b>	<b>Funds not requested/ not received</b>	<b>Final appropriation 2017/2018</b>	<b>Appropriation received 2017/2018</b>
	<b>R'000</b>	<b>R'000</b>	<b>R'000</b>	<b>R'000</b>	<b>R'000</b>
Administration Technology Innovation	383,802	383,152	650	342,871	342,871
International Cooperation and Resources	1,131,723	1,131,723	-	1,133,760	1,133,760
Research Development and Support	136,399	136,399	-	166,192	166,192
Socio-economic Innovation Partnerships	4,528,204	4,528,204	-	4,300,793	4,300,793
<b>Total</b>	<b>7,958,388</b>	<b>7,957,738</b>	<b>650</b>	<b>7,557,229</b>	<b>7,557,229</b>

The Department anticipated underspending under goods and services as a result of an amount of R650 000 that was not requested.

**2. Departmental revenue**

	<b>Note</b>	<b>2018/19 R'000</b>	<b>2017/18 R'000</b>

<b>Liable to</b>			
Claims against the department	<i>Annex 3B</i>	401	830
<b>Total</b>		<b>401</b>	<b>830</b>

The Department received a claim at the end of the reporting period, in which a former manager of a science centre alleges unfair treatment and financial loss, and is therefore claiming restitution. As at 31 May 2019, management was of the opinion that the summons received should be disclosed as a contingent liability based on the information at our disposal. On 20 June 2019, management received a legal opinion indicating that the claim is frivolous and vexatious, therefore it must be dismissed with costs; furthermore, the amount of the claim is not a reliable estimate, and therefore it cannot be disclosed.

**NOTES TO THE FINANCIAL STATEMENT  
FOR THE YEAR ENDED 31 MARCH 2019**

**19. Commitments**

	Note	2018/19 R'000	2017/18 R'000
<b>Current expenditure</b>			
Approved and contracted		23,292	29,243
Approved but not yet contracted		127	8,635

	<b>Note</b>	<b>2018/19 R'000</b>	<b>2017/18 R'000</b>
Leave entitlement*		12,521	13,066
Service bonus (Thirteenth cheque)		7,496	7,392
Performance awards		5,293	4,954
Capped leave commitments		3,278	3,024
Other (Long Service Awards)		31	69
<b>Total</b>		<b>28,619</b>	<b>28,505</b>

\*A negative amount of R526,198.02 was offset against leave entitlement. The amount was as a result of a pro-rata calculation of leave taken by employees as at 31 March 2019. In terms of the pro-rata calculation, employees are entitled to 5.49 days of leave from 1 January to 31 March. If an employee takes more leave, this results in a negative leave taken for the three-month period. This situation will automatically be rectified during the leave period.

**26. Events after the reporting date**

The Department received a claim at the end of the reporting period, in which a former manager of a science centre alleges unfair treatment and financial loss, and is therefore claiming restitution. As at 31 May 2019, management was of the opinion that the summons received should be disclosed as a contingent liability based on the information at our disposal. On 20 June 2019, management received a legal opinion indicating that the claim is frivolous and vexatious, therefore it must be dismissed with costs; furthermore, the amount of the claim is not a reliable estimate, and therefore it cannot be disclosed.

**27. Related party transactions**

**27.1 Related party transactions**

<b>Payments made</b>	<b>2018/19 R'000</b>	<b>2017/18 R'000</b>
Goods and services	-	-
<b>Total</b>	<b>-</b>	<b>-</b>

**27.2 Public entities under ownership control of the Department**

The following entities are under the ownership control of the Department in terms of Chapter 1 of the Public Finance Management Act, 1999, and report to the Minister of Science and Technology, and as such are related parties to the Department:

**Schedule 3A – National public entities**

- Human Sciences Research Council
- National Research Foundation
- South African National Space Agency
- Technology Innovation Agency

**Schedule 3B – National government business enterprises**

- Council for Scientific and Industrial Research

**NOTES TO THE FINANCIAL STATEMENT  
FOR THE YEAR ENDED 31 MARCH 2019**

The Department's transactions with these entities are limited to transfer and subsidy payments. Annexure 1C and 1E to the Annual Financial Statements reflect payments to these public entities. Where transactions other than these occur, they occur within a normal supplier/client relationship in terms of the procurement procedures of the Department and the Public Finance Management Act, 1999.

**27.3 Related party relationships with other departments**

The Department has a related party relationship with the Department of Public Works that provides office accommodation free of charge to the Department. The Department of Public Works claims maintenance fees only. The Department has a relationship with the Academy of Science of South Africa that is funding its operations. All the transactions the Department has with these entities are at arm's length.

**28. Key management personnel**

	No. of individuals	2018/19 R'000	2017/18 R'000
Political office bearers	2	4,357	4,353

The civil claim against the Department in respect of injuries allegedly sustained when the claimant fell in an open hole in the Pretoria Zoo Gardens.	401	-	-	-	401
Review application of the arbitrator's decision.	429	-	(429)	-	-
<b>Total</b>	<b>830</b>	<b>-</b>	<b>(429)</b>	<b>-</b>	<b>401</b>

The Department received a claim at the end of the reporting period, in which a former manager of a science centre alleges unfair treatment and financial loss, and is therefore claiming restitution. As at 31 May 2019, management was of the opinion that the summons received should be disclosed as a contingent liability based on the information at our disposal. On 20 June 2019, management received a legal opinion indicating that the claim is frivolous and vexatious, therefore it must be dismissed with costs; furthermore, the amount of the claim is not a reliable estimate, and therefore it cannot be disclosed.
