BYLAE

Die area geleë binne die volgende grense:

Die voorgestelde Groenfontein-wyk is 'n hoërliggende voetheuwel met 'n diep klowe-landskap en is die opvangsgebied van die Nelsrivier, wat die Calitzdorp-dam voed. Die noordelike grens loop saam met die Calitzdorp-distrik se noordelike grens, net suid van die Gamkwaskloof-natuurreservaat. Die res van die grense volg die waterskeidinggrense van die Nelsrivier-opvangsgebied/dreineringskom noord van die Calitzdorp-dam.

Die voorgestelde wyk is geleë 280-930 m bo seevlak, met wingerde in valleie meestal 340-440 m bo seevlak, en strek hoofsaaklik oor die oorspronklike Matjiesgoedvallei, Quarrieveldt-, Kraaldoorn- en Groenfontein-plase.
