|                   | Code 87654 (Thrombolysis follow up) may only be used on the days following the initial procedure, 87650 (thrombolysis). If a balloon angioplasty and / or stent placement is performed at more than one defined anatomical site at the same sitting the relevant codes may be combined. However multiple balloon dilations or stent placements at one defined site will only attract one procedure code. |     |                  |       |           |             |

| Tariff code            | DESCRIPTION                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | UNITS | VALUE      |
|                        | In calculating the prices in this schedule, the following rounding method is used: Values R10 and below rounded to the nearest cent, R10+ rounded to the nearest 10cent. Modifier values are rounded to the nearest cent. When new item prices are calculated, e.g. when applying a modifier, the same rounding scheme should be followed.                                                                                                                                                                                                                                                                 |       |            |

| 490                    | Extended group consultation, counselling and/or therapy - per patient per full 15 minutes in excess of 120 minutes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 0.15  | R 6.29     |

## Road Accident Fund Tariff 2021/2022

| REHABILITATION HOSPITALS |                                                                                                                                                                                                                                                                  |               |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
|                          | In calculating the prices in this schedule, the following rounding method is used: Values R10 and below rounded to the nearest cent, R10+ rounded to the nearest 10cent. Modifier values are rounded to the nearest cent. When new item prices are calculated,   |               |
|                          | <b>GENERAL RULES</b>                                                                                                                                                                                                                                             |               |
| <b>A</b>                 | It is recommended that, when such benefits are granted, drugs, consumables and disposable items used during a procedure or issued to a patient on discharge will only be reimbursed if the appropriate code is supplied on the account.                          |               |
| <b>B.1</b>               | <b>Procedure for the classification of hospitals:</b>                                                                                                                                                                                                            |               |
| <b>B.1.1</b>             | Inspections of sub-acute facilities, private hospitals, rehabilitation hospitals or sub-acute facilities having practice code numbers commencing with the digits 059 will be conducted by an independent agency on behalf of BHF. Applications to be addressed   |               |
| <b>C</b>                 | Where possible, accounts shall reflect the practice code numbers and names of the surgeon, the anaesthetist and of any assistant surgeon who may have been present during the course of an operation.                                                            |               |
| <b>D</b>                 | All accounts shall be accompanied by a copy of the relevant theatre accounts specifying all details of items charged, as well as all the procedures performed. Photocopies of all other documents pertaining to the patients account must be provided on request |               |
| <b>E</b>                 | All accounts containing items which are subject to a discount in terms of the recommended benefit shall indicate such items individually and shall show separately the gross amount of the discount.                                                             |               |
| <b>F</b>                 | Accommodation fees includes the services listed below:                                                                                                                                                                                                           |               |
|                          | A. The minimum services that are required are items 3, 5 and 6.                                                                                                                                                                                                  |               |
|                          | B. If any of the other services included in this list are requested, no additional charge may be levied by the hospital.                                                                                                                                         |               |

|                | In calculating the prices in this schedule, the following rounding method is used: Values R10 and below rounded to the nearest cent, R10+ rounded to the nearest 10cent. Modifier values are rounded to the nearest cent. When new item prices are calculated, e.g. when applying a modifier, the same rounding scheme should be followed. TARIFFS ARE VAT                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |       |       |
|                | <b>GENERAL RULES</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |       |       |
| 5              | Every practitioner shall render a monthly account in respect of any service rendered during the month, irrespective of whether or not the treatment has been completed. NB. Every account shall contain the following particulars:<br>a) The surname, first name and other initials, if any, of the patient;<br>b) The practice code number, group practice number and individual provider registration number issued by the registering authorities for providers, if applicable, of the supplier of service and, in the case of a group practice, the name of the practitioner who provided the service;<br>c) the relevant diagnostic and such other item code numbers that relates to such relevant health service;<br>d) The date on which each relevant health service was rendered;<br>e) The relevant diagnostic codes and NHRPL item code numbers relating to the health service rendered. |       |       |
| 6              | It is recommended that, when such benefits are granted, drugs, consumables and disposable items used during a procedure or issued to a patient on discharge will only be reimbursed if the appropriate code is supplied on the account.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |       |       |
| 7              | Where emergency treatment is provided:<br>a. during working hours, and the provision of such treatment requires the practitioner to leave her or his practice to attend to the patient at another venue; or<br>b. after working hours<br>the fee for such visits shall be the total fee plus 50%.<br>For purposes of this rule:<br>a) "emergency treatment" means a bona fide, justifiable emergency social work service, where failure to provide the service immediately would result in serious or irreparable psychological or functional impairment<br>b) "working hours" means 8h00 to 17h00, Monday to Friday.<br>Modifier 0003 must be quoted after the appropriate code number(s) to indicate that this rule is applicable.                                                                                                                                                                |       |       |
| 8              | Compilation of reports is only to be included within billable time if these reports are for purposes of motivating for therapy and/or giving a progress report and/or a pre-authorisation report, and where such a report is specifically required. Maximum billable time for such a report is 15 minutes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |       |       |
|                | <b>Modifiers</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |       |       |

| In calculating the prices in this schedule, the following rounding method is used: Values R10 and below rounded to the nearest cent, R10+ rounded to the nearest 10cent. Modifier values are rounded to the nearest cent. When new item prices are calculated, e.g. when applying a modifier, the same rounding scheme should be followed. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |       |        |

|                                                                                                | The following principles are applicable:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |
|                                                                                                | 1. At all times best clinical practice must be adhered too.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |
|                                                                                                | 2. Items listed in the Recommended Guide to Reimbursement for Consumable and Disposable Items Charged by Private Hospitals and Same Day Surgery Facilities are described generically according to product classification and function. Trade names may be included, by means of example, for clarification purposes only. Photocopies of all documents pertaining to the patients account must be provided on request. The right to inspect the original source documentation at the hospital/sameday surgical facilities concerned is reserved. The Recommended Guide to Reimbursement for Consumable and Disposable Items Charged by Sub-Acute Facilities, Private Hospitals and Sameday Surgery Facilities will be reviewed half-yearly. |  |  |
|                                                                                                | 3. The cost of consumable and disposable items used on a patient in a hospital must be recovered by means of a charge mechanism as follows:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |
|                                                                                                | ¢ Items included in the per minute theatre fee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |  |
|                                                                                                | ¢ Items included in the per day ward or unit fee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |
|                                                                                                | ¢ Items are charged to the patient's account where reimbursement is not granted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |
|                                                                                                | 4. Any agreed difference on the basic interpretation of the Recommended Guide to Reimbursement for Consumable and Disposable Items Charged by Private Hospitals and Same Day Surgery Facilities list will be made in accordance with the approval of the duly appointed representatives of the individual contractor, MCO and representatives of private hospitals. Such approval shall be ratified in writing and circulated to all parties concerned. Where the hospital uses an excessively priced product, a review process should be conducted, and appropriate price adjustment made.                                                                                                                                                 |  |  |
|                                                                                                | 5. Disposable items are single use only and must never be reused.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |

| In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| <b>Intermediêre Lewensondersteuning</b> - 'n Uitroep waar die pasiëntassessering, behandelingsadministrasie, intervensies wat onderneem is en daaropvolgende monitoring binne die praktyk omvang van 'n geregistreerde Ambulans Noodassistent (AEA) val. (bv. Inisieer en/of handhawing van IV-terapie, nebulisasie, ens.) terwyl pasiënt in transit is.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Gevorderde Lewensondersteuning</b> 'n Uitroep waar pasiëntassessering, behandelingsadministrasie, intervensies wat onderneem word en daaropvolgende monitoring binne die bestek van praktyk van 'n geregistreerde Paramedikus (CCA en NDIP) val terwyl pasiënt in vervoer is. Dit sluit alle geïnkubeerde neonatale oordragte in.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>NOTAS:</b> Broeikasoorplasing vereis ALS-opgeleide personeel in ooreenstemming met die HPCSA-beslissing. - Indien 'n hospitaal of die behandelende geneesheer vereis dat 'n paramedikus die pasiënt moet vergesel op 'n oorpasing in die geval van die pasiënt wat ALS-intervensie benodig, moet die dokter wat die paramedikus versoek, 'n gedetailleerde motiveringsbrief skryf sodat ALS gehê kan word. - Indien 'n hospitaal of die behandelende geneesheer 'n Paramedikus vereis om die pasiënt te vergesel op 'n oorpasing in die geval van die pasiënt wat ILS-intervensie benodig, moet die dokter wat die Paramedikus versoek, 'n gedetailleerde motiveringsbrief skryf sodat ILS gehê kan word. - Om as 'n gevorderde lewensondersteuningsoproep te faktoreer, moet 'n geregistreerde gevorderde lewensondersteuningsverskaffer die pasiënt ondersoek, behandel en gemonitor het terwyl hy na die hospitaal vervoer het. - Waar 'n ALS-verskaffer 'n oproep bywoon, maar geen intervensies op 'n ALS-vlak op die pasiënt doen nie of ALS-monitoring en teenwoordigheid nie vereis word nie, sal die fakturering gebaseer wees op 'n laer vlak, afhangende van die sorg wat aan die pasiënt gegee word. (Bv. Paramedic sites IV-lyn of nebuliseer pasiënt met 'n B-agonis - dit val binne die praktyk van 'n AEA en moet dus gefaktoreer word as 'n ILS-oproep, nie 'n ALS-oproep nie). - Waar 'n ILS-verskaffer 'n oproep bywoon, maar geen intervensies op 'n ILS-vlak op die pasiënt doen of ILS-monitoring en teenwoordigheid nie vereis word nie, sal die fakturering BLS wees. - Waar die bestuur wat deur 'n paramedikus of AEA onderneem word binne die bestek van praktyk van 'n BAA val, moet die oproep op 'n BLS-vlak wees. <b>Neem asseblief kennis:</b> - Die bedrae wat in die tariefskedule vir elke sorgvlak gereflekteer word, sluit enige weggooigoed in (behalwe pasaangeërs, heimlich-klappe, hoëkapasiteit-gee-stelle, skakel 'n vloei, intra-osseuse naalde) en middels wat in die hantering van die pasiënt gebruik word. - Haemacel en kolloïedoplossing kan afsonderlik gelaai word. - Eise vir pasiëntontslag huis toe sal slegs in ag geneem word indien dit vergesel word van 'n skriftelike motivering van die behandelende geneesheer wat sodanige vervoer versoek het - wat duidelik aandui waarom 'n ambulans vir so 'n vervoer benodig word en watter mediese bystand die pasiënt op roete benodig. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Definisie: Reaksievoertuie:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Slegs reaksievoertuig - Gevorderde lewensondersteuning (ALS):</b> 'n Duidelike definisie moet gemaak word tussen die akute primêre reaksie en 'n bespreekte oproep. 1. Die Akute Primêre Reaksie word soos volg gedefinieer: 'n Oproep wat ontvang word vir mediese bystand aan 'n lid van die publiek wat siek of beseer is by die werk, huis of in 'n openbare area, bv. motorongeluk. Indien 'n reaksievoertuig na die toneel van die noodgeval gestuur word en die pasiënt het Gevorderde Lewensondersteuning nodig en wat deur ALS Personeel gelewer word, bv. CCA of Nasionale Diploma, sal die onderskeie diens geregig wees om op item 131 te rekenen vir sodanige diens. Die diens wat die pasiënt vervoer sal egter nie 'n rekening kan hef nie, aangesien die vervoerkoste ingesluit is by die ALS-tarief onder items 131 en 133. Verder moet die ALS-reaksievoertuigpersoneel die pasiënt na die hospitaal vergesel om die reg op die diens om te faktoreer vir genoemde ALS-dienste gelewer. 2. In die geval van 'n diens wat ALS lewer en nie sy eie ambulans het om die pasiënt na 'n mediese fasiliteit te vervoer nie, en van 'n ander diens gebruik maak, mag slegs die rekening vir die reaksievoertuig gehê word as die ALS-rekening onder items 131 en 133. Aangesien die ALS-tarief reeds vervoer insluit, is die reaksievoertuigdiens verantwoordelik vir die rekening vir die ander diensverskaffer, wat teen 'n BLS-tarief gehê sal word. Dit verseker dat daar slegs een rekening per pasiënt gehê word. Verder moet die ALS-personeel van die reaksievoertuig die pasiënt na die hospitaal in die ambulans vergesel om die diens op rekening te maak vir genoemde ALS-dienste gelewer. 3. Sou 'n reaksievoertuig na 'n toneel gaan en geen ALS-behandeling lewer nie, mag die genoemde reaksievoertuig nie 'n rekening hef nie. 4. Nieteenstaande dit, is item 151 van toepassing op alle ALS-resussitasie volgens die aantekeninge in hierdie skedule.                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Road Accident Fund Tariff 2021/2022

|       | <b>Slegs reaksievoertuig - Intermediêre Lewensondersteuning (ILS)</b> 'n Duidelike definisie moet getrek word tussen die akute primêre reaksie en 'n bespreekte oproep. 1. Die Akute Primêre Reaksie word soos volg gedefinieer: 'n Oproep wat ontvang word vir mediese bystand aan 'n lid van die publiek wat siek of beseer is by die werk, huis of in 'n openbare area, bv. motorongeluk. Indien 'n ILS-reaksievoertuig na die toneel van die noodgeval gestuur word en die pasiënt benodig Intermediêre Lewensondersteuning en wat deur ILS Personeel gelewer word, bv. AEA, sal die onderskeie diens geregtig wees om op item 125 te reken vir sodanige diens. Die diens wat die pasiënt vervoer sal egter nie 'n rekening kan hef nie, aangesien die vervoerkoste ingesluit is by die ILS-tarief onder items 125 en 127. Verder moet die ILS-reaksievoertuigspersoneel die pasiënt na die hospitaal vergesel om die reg te maak op die diens om te faktoreer vir genoemde ILS-dienste gelewer. 2. In die geval van 'n diens wat ILS lewer en nie sy eie ambulans het om die pasiënt na 'n mediese fasiliteit te vervoer nie, en van 'n ander diens gebruik maak, mag slegs die rekening vir die reaksievoertuig gehê word as die ILS-rekening onder items 125 en 127. Aangesien die ILS-tarief reeds vervoer insluit, is die reaksievoertuigdiens verantwoordelik vir die rekening vir die ander diensverskaffer. Dit verseker dat daar slegs een rekening per pasiënt gehê word. Verder moet die ILS-personeel van die reaksievoertuig die pasiënt na die hospitaal in die ambulans vergesel om die diens te laat faktoreer vir genoemde ILS-dienste gelewer. 3. Sou 'n reaksievoertuig na 'n toneel gaan en geen ILS-behandeling lewer nie, mag die genoemde reaksievoertuig nie 'n rekening hef nie. |                     |          |                           |

|       | <b>ROTORVLERKKOERS</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                     |             |                           |         |
|       | Definisies: 1. Dagligbedrywighede word gedefinieer vanaf sonsopkoms tot sonsondergang (en nagbedrywighede van sonsondergang tot sonsopkoms) 2. As vliegtuig meestal in nagtyd is (soos per definisie hierbo), bereken dan nagtyd-operasietariewe 3. Uitroepfooi sluit basiese oproepkoste plus ander vliegtuig aangegaan in. 4. Vliegtuig word vir 'n minimum van 30 minute gefaktureer en daarna in 15 minute inkremte. 5. 'n 2de pasiënt word oorgeplaas teen 50% vermindering van basiese oproep- en vlugkoste, maar personeel- en verbruiksgoederekoste bly per pasiënt. (Slegs indien vliegtuigvermoë vir veelvuldige pasiënte voorsiening maak) 6. Tariewe word volgens tyd bereken; van versneller op, tot versneller toe. 7. Helikopters moet binne die Cat 138 Ops val soos bepaal deur Burgerlugvaart.                                                                                                                                                          |                     |             |                           |         |

| In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |          |          |

| In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                 |         |            |                                        |        |

| In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word. |                                                                                                                                                                                                                                                                                |          |          |

|     | Die globale fooi vir Deurlopende Ambulante Peritoneale Dialise (CAPD) (Item 176) en Outomatiese Peritoneale Dialise (APD) (Item 177) sluit in: verbruiksgoedere; koste van masjien en masjien weggoigoed; professionele fooi; aanvanklike opleiding; in-sentrum opvolgbesoek. Hierdie fooi is gehef vir elke 30 dae siklus waarin CAPD of APD verskaf word. Indien CAPD of APD vir minder as 30 dae in enige siklus voorsien word (byvoorbeeld as gevolg van komplikasies of dood van die pasiënt):<br>a. indien die behandelingsperiode 26 dae of meer in daardie siklus is, is die volle fooi van toepassing;<br>b. indien die behandelingsperiode tot 25 dae in daardie siklus is, moet die fooi volgens die aantal werklike behandelingsdae proporsioneel bereken word. Wysiger 0001 moet aangehaal word en die aantal behandelingsdae moet gespesifiseer word. |         |             |
| 176 | Globale fooi vir Kontinue Ambulante Peritoneale Dialise (CAPD), per 30 dae periode.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 1700,00 | R 26 998,37 |

| 006                                      | <p>Die skedule skryf nie die omvang van die praktyk van 'n bepaalde kategorie van mondigsondeersorgverskaffers voor nie; dit beperk ook nie die uitvoering van prosedures of dienste tot 'n geregistreerde spesialisiteit nie. Fooie gelys in 'n kolom van 'n spesifieke kategorie van Mondigsondeersorgverskaffer is gebruiklike fooie, sou die prosedure of diens deur daardie verskaffer kategorie gelewer word.</p> <p>Spesialiste word egter aangemoedig om hul praktyk te beperk tot die spesialisiteit of verwante spesialisiteite waarin hulle geregistreer is. Spesialis kan fooie hef vir prosedures of dienste wat gewoonlik op 'n ander spesialisiteit betrekking het, indien sodanige prosedures of dienste ook in hul spesialisiteit erken word, en as dit slegs vir hul bona fide pasiënte uitgevoer word. Sulke fooie sal nie hoër wees as dié wat deur algemene praktisyns vir dieselfde prosedures of dienste gehef word nie (HPCSA, Reël 25).</p> <p>Fooie vir prosedures of dienste wat nie in die kolom tandheelkundige terapeute gelys is nie en wat wel binne die gebied van tandheelkundige terapie val in terme van hul praktyk omvang, word as "op reëling" beskou totdat sodanige fooie gelys is.</p>                                                                                                                                                                                                                                                                           |
| 007                                      | <p>Prosedures wat nie in die Tandheelkundige Bylae gelys is nie</p> <p>Wanneer 'n prosedure uitgevoer word wat nie in die skedule gelys is nie, kan 'n toepaslike prosedurekode, gelys in die EVL vir mediese praktisyns, aangemeld word.</p> <p>Ongenoteerde prosedures. Enige prosedure wat nóg in die skedule, nóg in die mediese skedule beskryf word, moet aangemeld word deur kode 9099 - Ongelyste tandheelkundige prosedure of diens te gebruik. Die fooi vir 'n ongenoteerde tandheelkundige prosedure of diens moet gebaseer wees op die fooi van 'n vergelykbare prosedure. Kode 9099-kodes moet nie gebruik word om prosedures aan te meld waar die fooi "deur reëling" met die pasiënt en/of mediese skema bepaal word nie.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| C.                                       | DIENTE REËLS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 008                                      | <p>Mondelinge evaluasies en voltooiing van behandelingsplanne: Mondelinge ondersoeke sluit 'n ondersoek, diagnose en behandelingsbeplanning in (wanneer behandeling vereis word). Geen verdere fooie/voordele sal gehef word vir 'n mondelinge eksamen (kode 6101) of omvattende eksamen (kode 6102) totdat die behandelingsplan wat uit hierdie tipe eksamens voortspruit, voltooi is nie.</p> <p>Die voltooiing van 'n behandelingsplan wat uit 'n mondelinge eksamen en/of omvattende eksamen bewerkstellig word, moet aangedui word deur rapporteringskode 8120 – Behandelingsplan voltooi. Mondelinge diagnose gedefinieer. Die bepaling deur die tandarts van die mondigsondeerstoeestand van 'n individuele pasiënt wat bereik word deur die evaluering van data wat ingesamel is deur middel van geskiedenisopname, direkte ondersoek, pasiëntkonferensie, en sodanige kliniese hulpmiddels en toetse wat na die oordeel van die tandarts nodig mag wees.</p> <p>Behandelingsplan gedefinieer. Die behandelingsplan is die opeenvolgende gids vir die pasiënt se sorg soos bepaal deur die tandarts se gids vir die pasiënt se sorg soos bepaal deur die tandarts se diagnose en word deur die tandarts gebruik vir die herstel en/of instandhouding van optimale mondigsondheid.</p>                                                                                                                                                                                                              |

## Road Accident Fund Tariff 2021/2022

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                        |                                   |                 |                  |                   |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|-----------------------------------|-----------------|------------------|-------------------|
| 009         | Chirurgie riglyne:<br><br>1. Opvolgsorg vir terapeutiese chirurgiese prosedures: Die fooi/voordeel vir 'n operasie sal, tensy anders vermeld, normale na-operatiewe sorg vir 'n tydperk van hoogstens vier maande insluit. Indien 'n praktisyn nie self die na-operatiewe sorg voltooi nie, moet hy/sy reël vir na-operatiewe sorg sonder bykomende koste. 'n Fooi/voordeel vir na-operatiewe behandeling van 'n langdurige of gespesialiseerde aard kan gehê word soos ooreengekom tussen die praktisyn en die skema.<br><br>2. Veelvuldige prosedures (kaak-gesig- en mondchirurgie): Die fooi/voordeel vir meer as een operasie of prosedure wat deur dieselfde insnyding uitgevoer word, sal bepaal word as die fooi vir die groot operasie plus fooi/voordeel vir die byoperasie tot die aangeduide maksimum vir elke sodanige hulpoperasie of -prosedure (Wysiger 8005). Die fooi/voordeel vir meer as een operasie of prosedure wat onder dieselfde narkose, maar deur 'n ander insnyding uitgevoer word, sal bepaal word op die fooi/voordeel vir die groot operasie plus: 75% vir die tweede prosedure/operasie (Wysiger 8009). 50% vir die derde en daaropvolgende prosedures/operasies (Modifier 8006). Hierdie reël is nie van toepassing waar twee of meer onverwante operasies deur praktisyns in verskillende spesialiteite uitgevoer word nie, in welke geval elke praktisyn geregtig sal wees op die volle fooi/voordeel van die operasie. Indien, binne vier maande, 'n tweede operasie vir dieselfde toestand of besering uitgevoer word, sal die fooi/voordeel vir die tweede operasie 50% van dié van die eerste operasie wees (Wysiger 8006).<br><br>3. Assistent-chirurg (Kaak-gesig- en periodontale chirurgie): Die fooi betaalbaar aan 'n spesialisassistent word bepaal as 1/3 (van die fooi van die praktisyn wat die prosedure uitvoer (Wysiger 8001)). Die fooi betaalbaar aan 'n algemene tandheelkundige assistent word bepaal as 15% (van die fooi van die praktisyn wat die prosedure uitvoer (Wysiger 8007)). Die pasiënt moet vooraf ingelig word dat 'n ander tandarts/spesialis by die operasie sal help en dat 'n fooi aan die assistent betaalbaar sal wees. Die assistent se naam moet verskyn op die faktuur wat aan die pasiënt gelewer word.<br><br>4. Chirurgiese span (Kaak-gesig- en mondchirurgie): Die bykomende fooi vir alle lede van die chirurgiese span vir na-ure noodchirurgie sal bereken word deur 25% by die fooi te voeg vir die prosedure of prosedures wat uitgevoer word (Wysiger 8008).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                        |                                   |                 |                  |                   |
| 010         | <p>Ortodontiese riglyne: 1. Die dokumentasie en eerste faktuur aan die pasiënt/mediese skema met betrekking tot ortodontiese dienste sal die volgende inligting insluit: a. Die behandelingsplan en tipe behandeling (behandelingskode-nummer); b. 'n Diagnostiese kode (ICD-10) en c. 'n Ortodontiese betalingsplan wat die volgende aandui: i. Die totale fooi wat vir die behandeling gehê sal word; ii. Die totale maande van ortodontiese behandeling (retensieperiode uitgesluit); iii. Die aanvanklike fooi betaalbaar deur die pasiënt (ongeveer 20% van die totale fooi); en iv. Die maandelikse betalings van die balans van die fooi.</p> <p>2. Die fooi vir ortodontiese behandeling sluit nie 'n kliniese mondelinge evaluering en nodige diagnostiese dienste in nie. Die fooi vir korrektiewe terapie (dws kodes 8861 tot 8888) is 'n inklusiewe fooi en geen bykomende fooie mag gehê word vir intra-operatiewe mondelinge evaluasies en voorkomende dienste nie. 'n Pre-ortodontiese behandelingsbesoek, 'n ortodontiese retensie en 'n mondelinge evaluering na voltooiing van die behandelingsplan (retensiefase ingesluit) is uitgesluit en moet bykomend tot korrektiewe ortodontiese behandeling as afsonderlike prosedures aangemeld word (Kode 8803 x3). Intra/na-ortodontiese behandelingsrekords wat bestaan uit radiografieë/diagnostiese beelde (beperk tot 'n kefalometrie film en 5 mond-/gesigbeelde) en diagnostiese afgietsels kan gehê word wanneer 'n korrektiewe ortodontiese behandelingsplan voltooi is (retensiefase ingesluit).</p> <p>3. Die fooi vir 'Vaste toestel terapie' (kodes 8861 en 8865 tot 8888), soos bepaal deur die individuele praktisyn, sal op 'n maandelikse wyse oor die behandelingsperiode gehê word (retensiefase uitgesluit).</p> <p>4. Wanneer gedeeltelike vaste toestel of voorlopige ortodontiese behandeling (kodes 8858, 8861, 8865 of 8866) gevolg word deur volledige vaste toestel ortodontiese behandeling (kodes 8873 tot 8888) verskaf deur dieselfde ortodontis, die fooie gehê vir die gedeeltelike vaste toestel terapie voorlopige behandeling sal afgetrek word van die fooi gekwoteer vir die volle vaste toestel ortodontiese behandeling.</p> <p>5. Die totale fooi vir veelvuldige fases van volle vaste toestel ortodontiese behandeling wat deur dieselfde ortodontis verskaf word, mag nie die mees onlangse fooi (bepaal op die aanvangsdatum van die finale stadium van volle vaste toestel behandeling) vir die toepaslike volle vaste ortodontiese prosedure oorskry nie.</p> <p>6. Wanneer die pasiënt tydens behandeling na 'n ander praktisyn oorskakel, of behandeling om enige rede beëindig word, moet die oorspronklike behandelende praktisyn die aantal behandelingsmaande wat oorbly, aandui en die balans van die fooi bepaal deur die volgende formule toe te pas: Totale betaling (vir behandeling) slegs minus 20% van die totale fooi (vir bandering - indien van toepassing) vermenigvuldig met die persentasie behandeling wat oorbly. Byvoorbeeld, as die praktisyn R 10 000.00 betaal is vir 'n 24-maande behandelingsplan en 18 maande se behandeling voltooi is. Die balans sal R 2 000.00 wees (of R 10 000.00 - R 2 000.00 x 6/24). Die lengte van die behandelingsplan vanaf die oorspronklike versoek om magtiging sal gebruik word om die aantal oorblywende behandelingsmaande te bepaal. Die praktisyn wat die behandeling voortduur, sal die inligting verskaf soos uiteengesit in paragraaf 1 hierbo. Rapporteer kode 8891 (Ortodontiese oorspasing) met die fooi wat gehê sal word vir voortsetting van die behandeling bykomend tot die toepaslike ortodontiese behandelingskode. Die fooi vir deuropende behandeling is onderhewig aan voorafgoedkeuring deur die pasiënt se mediese skema.</p> <p>7. Wanneer 'n gevestigde ortodontiese pasiënt herbehandeling benodig, sal die inligting soos uiteengesit in paragraaf 1 hierbo en die oorsaak(s) vir herbehandeling verskaf word. Rapporteer kode 8892 (Ortodontiese herbehandeling) met die fooi wat gehê sal word vir herbehandeling bykomend tot die toepaslike ortodontiese behandelingskode. Ortodontiese herbehandeling is onderhewig aan voorafgoedkeuring deur die Fonds.</p> |                                        |                                   |                 |                  |                   |
| 011         | Tandheelkundige fooie: Praktisyns is geregtig op vergoeding indien hulle by die hof teenwoordig is op versoek van 'n advokaat of prokureur. Gebruik kode 8111 (Tandheelkundige getuienis) om dento-regswerk aan te meld. Die kode word in die bykomende algemene dienste-afdelings in die kodelyste gelys.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                        |                                   |                 |                  |                   |
| D.          | WYSIGERS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                        |                                   |                 |                  |                   |
| 012         | Wysigers moet gebruik word met prosedures wat regdeur die EVL geïdentifiseer word. Wysigers verskaf die manier waarop die rapporterende praktisyn kan aandui dat 'n diens of prosedure wat uitgevoer is deur een of ander spesifieke omstandigheid verander is, maar nie die definisie of kode daarvan verander het nie. Die sinvolle toepassing van wysigers vermy die noodsaaklikheid van afsonderlike prosedurelyste wat die modifiserende omstandighede kan beskryf. Wysigers kan gebruik word om aan die ontvanger van die verslag aan te dui dat: a. 'n Diens of prosedure is deur meer as een praktisyn uitgevoer. b. 'n Diens of prosedure is verhoog of verminder. c. Slegs 'n gedeelte van 'n diens is uitgevoer. d. 'n Bykomende diens is uitgevoer. e. 'n Diens of prosedure is meer as een keer gelewer. f. Die fooi/voordeel is verander as gevolg van 'n finansiële ooreenkoms.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                        |                                   |                 |                  |                   |

|                                                  | Die tak van tandheelkunde wat gebruik word om tandheelkundige afwykings en siektes te identifiseer en te voorkom. Sluit alle dienste/prosedures wat aan die tandarts beskikbaar is in vir die evaluering van bestaande toestande en die bepaling van enige verdere tandheelkundige sorg wat nodig mag wees.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |        |   |        |          |
|                                                  | <b>KLINIESE MONDELINGE EKSAMEN</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |        |   |        |          |
|                                                  | Die doel van mondelinge eksamens is om relevante inligting, verlore en hede, wat nodig is om by 'n diagnose en behandelingsplan te kom (wanneer behandeling aangedui word) waar te neem en aan te teken. 'n Behandelingsplan is 'n lys van prosedures of dienste wat die tandarts voorstel om op 'n tandheelkundige pasiënt uit te voer, gebaseer op die resultate van die ondersoek en diagnose. Dikwels word meer as een behandelingsplan aangebied. Mondelinge ondersoeke kan die integrasie vereis van inligting wat verkry word deur bykomende diagnostiese prosedures, wat afsonderlik gerapporteer moet word. Die mondelinge ondersoek, diagnose en behandelingsbeplanning is die verantwoordelikheid van die tandarts. Die insameling en aantekening van sommige data en komponente van die mondelinge eksamen kan egter gedelegeer word. Mondelinge ondersoeke en konsultasies sluit die uitreiking van voorskrifte in waar medikasie vereis word. |   |        |   |        |          |

|                                             | Diagnostiese radiografie/diagnostiese beeld sluit interpretasie in. Radiografie/diagnostiese beeld moet slegs geneem word vir kliniese redes soos deur die tandarts bepaal en prakties moet voldoen aan die Regulasies rakende veilige radiologiese praktyk en die nodige voorsorg tref om bestraling van pasiënte te minimaliseer. Radiografie/diagnostiese beeld is deel van die pasiënt se kliniese rekord, moet van diagnostiese kwaliteit wees, behoorlik geïdentifiseer en gedateer. Die tandarts moet die oorspronklike beeld behou en slegs kopieë moet gebruik word om aan versoeke te voldoen wat deur pasiënte of derdeparty-befondsers gemaak word. 'n Volledige reeks intra-orale radiografieë/beelde vir diagnostiese doeleindes word slegs een keer per behandelingsplan vereis. 'n Tweede reeks kan in uitsonderlike gevalle vereis word, bv. na periodontale chirurgie. Dieselfde geld vir panoramiese films, waar addisionele films nodig mag wees vir opvolg/herevaluatie doeleindes. Diagnostiese radiografieë/diagnostiese beeld wat endodontiese behandeling, periodontale behandeling, die chirurgiese onttrekking van tande of wortels en vaste prosteses voorafgaan, is fundamenteel tot etiese kliniese praktyk. |          |          |          |          |          |   |

|      | Die tak van tandheelkunde wat handel oor die rekonstruksie van die harde weefsel van 'n tand of groep tande, beseer of vernietig deur trauma of siekte. Herstellende dienste/prosedures het ten doel om die funksie van 'n natuurlike tand te herstel. Voortande sluit snytande en hoektande in. Posterior tande sluit premolare en kiestande in. Die aantal tandoppervlaktes wat herstel is, dws mesiaal, okklusaal (of insiaal), distaal, linguale of vestibulêre (bukkaal of labiaal), word gebruik om die toepaslike prosedurekode te bepaal. 'n Een-oppervlak-herstel behels byvoorbeeld net een van die oppervlaktes, terwyl 'n twee-oppervlak-herstel na twee van die vyf oppervlaktes strek. Met 'n vier-of-meer-oppervlaktes is anterior herstel wat vier tandoppervlaktes behels en die insnijdingshoek betrokke is. Beperkings op amalgaam en harsgebaseerde saamgestelde restourasies: (1) Die rapportering van twee afsonderlike restourasies van dieselfde materiaal (bv. 'n MO en DO amalgaam herstel) op dieselfde tand is gepas. Sommige mediese skemas het egter 'n klousule in hul tandheelkundige plan(te) wat dekking van dieselfde tandoppervlak, soos 'n okklusale, twee keer op dieselfde dag beperk en kan die rapportering van 'n MOD-herstel in plaas van 'n aparte MO en DO vereis. herstel. (2) Die huidige NHRPL-tariewe sluit direkte pulpbedekking (kode 8301) en rubberdamtoediening (kode 8304) in. |   |        |   |   |   |   |   |   |
|      | <b>AMALGAM RESTOURASIES</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |        |   |   |   |   |   |   |
|      | Alle kleefmiddels, voerings, basisse en polering is ingesluit as deel van die restourasie. Indien penne gebruik word, moet dit apart gerapporteer word. Sien kodes 8345, 8347 en 8348 vir pos- en/of penbehoud."                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |        |   |   |   |   |   |   |

|      | Harsherstelwerk verwys na 'n wye kategorie van materiale, insluitend maar nie beperk nie tot komposiete. Rapporteer hierdie kodes wanneer glasionomere/-komponente as restourasies gebruik word. Die prosedures sluit in suur-ets, kleefmiddels (insluitend harsbindmiddels) en uitharding van 'n deel van die restourasie. Harsherstelwerk maak gebruik van die direkte tegniek. Vir die indirekte tegniek, sien "Harsinlegsels/-inlegsels" Indien penne gebruik word, moet dit bykomend tot hierdie kodes gerapporteer word - Sien kodes 8345, 8347 en 8348 vir pos- en/of penbehoud.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |        |   |   |   |   |   |   |

|                                                                 | Gebruik hierdie kodes vir enkel porselein/keramiek inleg/opleg restaurasies. Sien die Vaste Protodontiese Diens-afdeling vir porselein/keramiek inlegsele/slegs brughouers. Porselein/keramiek inlegsele/-ingelste sluit alle indirekte keramiek-, porselein- en polimeerversterkte porseleintipe inlegsele/ingelste in. Foole vir die aanwending van 'n rubberdam (8304) kan bykomend tot hierdie kodes gehê word. MOET BEVESTIG WORD: Wanneer rekenaargegenereerde (CAD/CAM) keramiekherstelwerk deur die tandheelkundige praktisyen vervaardig word, is laboratoriumkoste nie van toepassing nie. Rapporteer kodes 8570 (Vervaardiging van rekenaargegenereerde keramiekrestorasie) en 8560 vir die koste van die keramiekblok bykomend tot die restaurasie. |   |          |   |   |   |   |         |

|                            | Gebruik hierdie kodes vir enkelkroon herstel. Sien die Vaste Protodontiese Diens-afdeling vir kroonbrughouers en die Inplantingdienste-afdeling vir kroon op osseo-geïntegreerde implantings. Porselein/keramiekkroon sluit alle keramiek-, porselein- en porselein in wat met metaalkroon saamgesmelt is. Harskroon en harsmetaalkroon sluit alle versterkte hitte en/of drukgeharde harsmateriaal in. Metaalkomponente sluit strukture in wat deur middel van konvensionele gietwerk en/of elektroformasie vervaardig word. Tydelike en/of intermediêre kroon, die verwydering daarvan (voorlopige kroon ingesluit) en sementering van die permanente restourasies is ingesluit as deel van die restourasies. MOET BEVESTIG WORD: Wanneer rekenaargegenereerde (CAD/CAM) keramiekerstelwerk deur die tandheelkundige praktisyn vervaardig word, is laboratoriumkoste nie van toepassing nie. Rapporteer kodes 8570 (Vervaardiging van rekenaargegenereerde keramiecrestourasie) en 8560 vir die koste van die keramiekblok bykomend tot die restourasie. |   |          |   |   |   |        |

|      | Die tak van protodonsie wat gemeoid is met die vervanging of herstel van tande deur kunsmatige plaasvervangers wat nie maklik verwyderbaar is nie. 'n Prostetiese houer (bv. kroon/inleg/inleghouer) word in hierdie afdeling gedefinieer as 'n deel van 'n brug wat 'n pontiek aan die aanslagrand heg. 'n Pontiek is daardie deel van 'n brug wat 'n ontbrekende tand of tande vervang. Elke houer en elke pontiek vorm 'n eenheid in 'n brug. Porselein-/keramiekhousers en ponies sluit tans alle keramiek, porselein en porselein in wat saamgesmelt is met metaalhousers en pontics. Harshousers en pontika en harsmetaalhousers en pontics sluit alle versterkte hitte en/of drukgeharde harsmateriale in. Metaalkomponente sluit strukture in wat deur middel van konvensionele gietwerk en/of elektroformasie vervaardig word. |   |          |   |        |   |       |   |        |   |          |

|      | Kommentaar: Kodes 8415, 8416, 8417 en 8418 sluit ovaalvormige pontiese ontwerpe in. Die nomenklatuur van die pontika is hersien om saam te val met die nomenklatuur wat vir krone gebruik word, wat akkurate rekordhouding verbeter. 'n Soortgelyke benadering is gevolg vir krone en inlegsele/inlegsels wat as brughousers gebruik word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |          |   |        |   |       |   |        |   |          |

| In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |          |         |

| In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |          |          |

|                                                                                                                                                                                                                                                                                                                                                                  | <b>Konsultasie:</b> 'n Situasie waar 'n homeopatiese praktisyn 'n pasiënt se volle geskiedenis afneem en (waar van toepassing) 'n toepaslike ondersoek, en repertoriesing van die geval en studie van Materia Medica doen en/of behandeling en/of medisyne voorskryf of toedien of die pasiënt met raad bystaan. (Die metode van repertoriesing en seleksie van medisyne word deur die praktisyn bepaal). Of 'n vrywillige geskeduleerde konsultasie vir dieselfde toestand binne vier (4) maande (alhoewel die simptome kan verskil van dié wat tydens die eerste konsultasie aangebied word). Dit kan impliseer dat 'n geskiedenis en/of repertoriesing van die geval en studie van Materia Medica en/of ondersoek en/of voorskryf of toediening van behandeling en/of medisyne en/of berading neergelê word. Meervoudige klagtes wat tydens dieselfde besoek behandel word: Slegs een konsultasiefooi is gehê alhoewel die pasiënt met 'n aantal klagtes kan voorlê. Indien die pasiënt 'n onverwante klagte het ten tye van toediening, bv. 'n homeopatiese inspuiting as deel van 'n kursus, is slegs 'n fooi vir 'n besoek gepas. Hospitaalbesoeke, by hospitaal of ouetehuis (alle ure): Volgens reëling met Fonds/pasiënt. |
| <b>Definisie: Medisyne</b>                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|                                                                                                                                                                                                                                                                                                                                                                  | <b>Voorgeskrewe medisyne:</b> Homeopatiese medisyne word volgens die homeopatiese beginsels en filosofie voorgeskryf. Die filosofie kan bestaan uit 'n klassieke, 'n kliniese of 'n gekombineerde klassieke/kliniese benadering. Die voorskrif kan eie homeopatiese medisyne, of pasiëntspesifieke saamgestelde medisyne of 'n kombinasie van beide insluit. Die voorskrif kan ook spesiaal-ingevoerde medisyne insluit. Die medisyne kan voorgeskryf word in die vorm van 'n tablet, kapsules, ampulle, vloeibare druppels, vloeibare stroop, oordruppels, neusdruppels, oogdruppels, pille, korrels, poeiers, salwe, ys, setpille, plakkers, ens. voorgeskryf in 'n simplekse sterkte, moedertinktuur (Æ), lae sterkte, multi-sterkte, ens., en/of komplekse vorm.<br><b>Eie medisyne:</b> Dit is geregistreerde medisyne (in ooreenstemming met die homeopatiese omvang van praktyk) wat in die ope mark of handel beskikbaar is, of wat in grootmaat van vervaardigers of groothandelaars gekoop en in kleiner volumes aan pasiënte uitgereik word sonder enige samestelling of manipulasie. Die reseptering van sulke medisyne vereis die toepaslike NAPPI-kode wat deur die vervaardiger/verspreider verskaf word.           |

|  | <p><b>Nie-proprietêre homeopatiese medisyne:</b> Dit is homeopatiese medisyne (in ooreenstemming met die homeopatiese omvang van die praktyk) wat deur die geregistreerde homeopatiese praktisyn en/of deur 'n geregistreerde homeopatiese medisyne vervaardiger geformuleer en/of voorberei en/of gemanipuleer, en/of self saamgestel word die voorskrif en/of formule van die geregistreerde homeopatiese praktisyn en wat nie in die mark/handel beskikbaar is nie. <b>Gee/repeer:</b> Ingevolge Wet 101 van 1965 beteken dit in die geval van 'n mediese praktisyn, tandarts, praktisyn, verpleegster of enige voorskrywer wat gemagtig is om medisyne uit te gee. i. die interpretasie en evaluering van 'n voorskrif; ii. die keuse, hersamestelling, verdunning, etikettering, aantekening en verskaffing van die medisyne in 'n toepaslike houër; iii. die verskaffing van inligting en instruksies om veilige en effektiewe gebruik van 'n medisyne deur 'n pasiënt te verseker. <b>Samestelling/samestelling:</b> Beteken om 'n medisyne voor te berei, te meng, te kombineer, te verpak en te etiketteer vir reseptering as gevolg van 'n voorskrif vir 'n individuele pasiënt deur 'n apteker of 'n persoon wat ingevolge Wet 101 van 1965 gemagtig is. <b>Eie materiaal:</b> Om gebruik te word vir alle materiaal en/of ongeregistreerde/ongeskeduleerde produkte wat in behandeling gebruik word. Die toepaslike NAPPI-kode(s), waar van toepassing, moet verskaf word.</p> |
|  | <p><b>Algemene reëls oor medisyne, voorrade, materiaal en gebruik van eie toerusting in behandeling en prosedures</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|  | <p><b>GEBRUIK VAN MEDISYNE KODE:</b> Gelisensieerde praktisyns: • 201: As medisyne wat aan pasiënte geresepteer word, mag slegs gebruik word deur 'n praktisyn wat gelisensieer is om medisyne uit te gee • 202-204: As saamgestelde medisyne wat aan pasiënte geresepteer word, mag slegs gebruik word deur 'n praktisyn wat gelisensieer is om medisyne saam te stel en uit te gee. • 221 -224: Mag gebruik word deur 'n gelisensieerde praktisyn in die administrasie of gebruik van 'n medisyne of materiaal tydens die konsultasie. Items 222-224 vereis spesifiek 'n samestellingslisensie • 209: Die gebruik of administrasie van eiendomsmateriaal tydens 'n konsultasie</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | <p><b>Ongelisensieerde praktisyns:</b> • 221: Toegedienende eie medisyne (in ooreenstemming met die homeopatiese omvang van praktyk) aan pasiënte tydens die konsultasie aangesien administrasie nie 'n resepteringslisensie regverdig soos per Regulasie 18, Wet 101 van 1965, wat sê: Regulasie 18, Wet 101 (8) vir die doeleindes van hierdie regulasie verwys "samestelling en reseptering" nie na 'n medisyne wat voorbereiding vereis vir 'n eenmalige toediening aan 'n pasiënt tydens 'n konsultasie nie • 209: Die gebruik of toediening van eiendomsmateriaal tydens 'n konsultasie • 400: 'n Resepsiekode wat die reseptering van eie Homeopatiese medisyne aan 'n pasiënt vir 'n mediese noodtoestand op 'n eenmalige basis deur 'n ongelisensieerde praktisyn toelaat. Dit moet slegs gebruik word met inagneming van die begrip van die term "nood mediese toestand" waar versuim om so 'n handeling 'n gevaar vir die pasiënt of gemeenskap sou wees of soos omskryf deur die Regulasies tot die Wet op Mediese Skemas, 1998 (Wet 131 van 1998): "Mediese noodtoestand" beteken die skielike en, op die tydstip, onverwagte aanvang van 'n gesondheidstoestand wat onmiddellike mediese of chirurgiese behandeling vereis, waar versuim om mediese of chirurgiese behandeling te verskaf ernstige inkorting van liggaamsfunksies of ernstige disfunksie tot gevolg sal hê van 'n liggaamsorgaan of -deel, of sou die persoon se lewe in ernstige gevaar stel.</p>           |
|  | <p><b>Refleksie van NAPPI/NHRPL-kodes op elektroniese en papiereise:</b> 1. NAPPI-kodes is slegs relevant vir Items 201, 221 en, indien van toepassing, 209. 2. Weens die aard van nie-eiendomsmedisyne bestaan geen NAPPI-kodes vir Items 202-204 en 222-224 en die insluiting van die NHRPL kodes moet as voldoende beskou word. 3. Vir elektroniese eise moet elke NHRPL-en/of NAPPI-kode op sy eie reël gereflekteer word, gevolg deur opeenvolgende kolomme: die Enkeluitgangsprys (SEP) of NHRPL-waarde (BTW ingesluit) van die spesifieke medisyne en die totale bedrag wat 'n BTW ingesluit reflekteer bedrag.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|  | <p>Items 201 en 209 maak voorsiening vir die heffing van materiaal en medisyne wat in behandeling gebruik word. • Alle materiaal wat gebruik word moet op alle rekeninge gespesifiseer word. • Medisyne, verbande en ander noodsaaklike materiaal vir tuisgebruik deur die pasiënt moet op voorskrif van 'n apteker verkry word of, indien 'n apteker nie gereedlik beskikbaar is nie, kan die praktisyn dit van eie af verskaf. voorraad mits 'n toepaslike voorskrif aan die rekening geheg is • Nie geskik vir items soos spatels wat normaalweg in ondersoek in die kamers gebruik word nie • Nie geskik vir items soos spuite, naalde en handskoene, ens. • Praktisyns word nie toegelaat om sfigmomanometers te verkoop nie. (bloeddrukmetings) of elektromediese toestelle aan pasiënte • Vir sykamertoetsing deur praktisyns is geen ekstra koste in terme van Item 201 van toepassing vir materiaal of stelle wat gebruik word nie</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|  | <p>Die bedrag wat gehef word ten opsigte van eie medisyne sal teen netto verkrygingsprys wees. Met betrekking tot alle ander materiaal, moet items (BTW uitgesluit) gehef word teen netto verkrygingsprys plus: • 26% van die netto verkrygingsprys waar die netto verkrygingsprys van daardie materiaal minder as honderd rand is • 'n maksimum van twintig ses rand waar die netto verkrygingsprys van daardie materiaal groter as of gelyk aan honderd rand is</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| S.  | <b>Ventilasie:</b> Eenhede vir items 1212, 1213 en 1214 (ventilasie) sluit die volgende in: (a) Meting van minuutvolume, vitale kapasiteit, tyd- en vitale kapasiteit studies. (b) Toets en koppel van die masjien. (c) Pas pasiënt op masjien: stel masjien, synchroniseer pasiënt met masjien. (d) Opdrag aan verpleegpersoneel. (e) Alle daaropvolgende besoeke vir 24 uur.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| T.  | <b>Ventilasie</b> (items 1212 tot 1214) vorm nie deel van normale post-operatiewe sorg nie, maar mag nie by item 1204 gevoeg word nie. Kategorie 1: Gevalle wat intensiewe monitoring vereis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| U.  | <b>Obstetriese prosedures:</b> (a) Wanneer 'n algemene praktisyn 'n pasiënt in die voorgeboortelike tydperk behandel en, na die aanvang van die bevalling, 'n verloskundige verskoe om die saak oor te neem, is die algemene praktisyn daarop geregtig om te betaal vir al die voorgeboortelike konsultasies wat hy/sy opgetree het. (i) Indien die pasiënt vir minder as 6 uur in kraam was, sal die algemene praktisyn 50,00 kliniese prosedure-eenhede hef volgens item 2614: Globale verloskundige sorg. (ii) Indien die pasiënt vir meer as 6 uur in kraam was, sal die algemene praktisyn 80,00 kliniese prosedure-eenhede hef volgens item 2614: Globale verloskundige sorg. (b) Wanneer 'n algemene praktisyn 'n verloskundige ontbied om te help met 'n bevalling, die bestuur van 'n bevalling oor te neem, en die pasiënt behandel tot na die post-partum besoek, sal die verloskundige hef volgens item 2614: Globale verloskundige sorg. (c) Wanneer 'n algemene praktisyn 'n verloskundige (spesials of algemene praktisyn) ontbied om te help met 'n bevalling, of die bestuur van 'n bevalling oor te neem, maar die algemene praktisyn behandel die pasiënt tot ná die post-partum besoek, moet die verloskundige hef volgens item 2616: Intrapartum obstetriese sorg deur verloskundige in oorleg, en die algemene praktisyn volgens item 2614: Global obstetriese sorg.                                                                                                                                                                                                                                                                                                                                               |
| V.  | (a) Elektro-konvulsiewe behandeling: Besoeke by die hospitaal of ouetehuis tydens 'n kursus van elektro-konvulsiewe behandeling is geregverdig en kan bykomend tot die fooie vir die prosedure gehef word. (b) Behalwe waar anders aangedui, word die duur van 'n mediese psigoterapeutiese sessie vasgestel op 20 minute of 'n gedeelte daarvan, met dien verstande dat so 'n gedeelte 50% of meer van die tyd van 'n sessie uitmaak. Hierdie sessie sluit tyd vir 'n dokter, verpleegpersoneel of assistent in.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Y.  | <b>Kontras materiaal:</b> Behalwe waar anders aangedui, is radioloog geregtig om te betaal vir kontras materiaal wat gebruik word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Z.  | Geen foie is onderhef aan meer as een vermindering nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| AA. | Prosedures om koste van isotoop uit te sluit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| BB. | Die fooie in hierdie afdeling (bestralingsonkologie) sluit NIE die koste van radium of isotope in nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| CC. | <b>Akupunktuur:</b> (a) Wanneer twee afsonderlike akupunktuurtegnieke gebruik word, sal elke behandeling as 'n afsonderlike behandeling beskou word waarvoor fooie afsonderlik gehef kan word. (b) Daar mag nie meer as twee afsonderlike tegnieke by elke sessie gehef word nie. (c) Die maksimum aantal akupunktuurbehandelings per kursus waarvoor gehef moet word, is beperk tot 20. Indien verdere behandeling aan die einde van hierdie behandelingsperiode vereis word, moet dit met die pasiënt onderhandel word. (d) Item 0380 verwys na kopvelakupunktuur as 'n behandeling in eie reg en nie na die gebruik van akupunktuurpunte op die kopvel nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| EE. | <b>Ultraklankondersoek:</b> Die internasionale norm wat goedgekeur is vir gebruik in Suid-Afrika vir NORMALE SWANGERSKAP is twee ultraklankondersoeke: (a) Die eerste skandering moet verkieslik 'n nekdietskatting insluit en tussen 10 en 14 weke swangerskap uitgevoer word. Die tweede skandering moet tussen 20 en 24 weke uitgevoer word en moet 'n volledige anatomiese verslag insluit. Alle daaropvolgende ultraklankskanderings word uitgesluit van die voordele van die Fondstiensy dit gepaard gaan met behoorlike motivering. 'n Ultraklankskandering om 'n abnormale vroeë swangerskap te bepaal, kan voor 10 weke gevorm word, maar hierdie skandering mag nie gebruik word om 'n normale ongekompliceerde swangerskap te diagnoseer nie. Item 3618 is 'n ginekologiese skandering en die gebruik daarvan is nie goedgekeur vir gebruik tydens swangerskap nie. (b) In gevalle waar die skandering deur die behandelende praktisyn uitgevoer word, moet 'n duidelike aanduiding vir so 'n skandering op die rekening gelewer word, of 'n motiveringsbrief moet aan die rekening geheg word (die praktisyn moet een van die twee kies opsies). (c) In die geval van 'n verwysing, moet die verwysende dokter 'n motiveringsbrief aan die radioloog of ander praktisyn wat die skandering doen, indien 'n Afskrif van die motiveringsbrief moet aangeheg word by die eerste rekening wat aan die pasiënt gelewer is (deur die radioloog of die ander praktisyn wat die skandering doen) en moet aangeheg word aan die eerste rekening wat by die Fondstiensy die pasiënt of die dokter, na gelang van die geval. (d) In die geval van 'n verwysing na 'n radioloog, moet geen motivering van die radioloog vereis word nie. |
| VF. | (a) Wanneer 'n sistoskopiese 'n verwante operasie voorafgaan, is Wysiger 0013: Endoskopiese ondersoek wat tydens 'n operasie gedoen word, van toepassing, bv. sistoskopiese gevolg deur transuretrale (TUR) prostatektomie. (b) Wanneer 'n sistoskopiese 'n onverwante operasie voorafgaan, is Wysiger 0005: Veeelvulde prosedures/operasies onder dieselfde narkose van toepassing, bv. sistoskopiese vir urienweginfeksie gevolg deur liesbreukherstel. (c) Geen wysiger is van toepassing op item 1949: Sistoskopiese, wanneer dit saam met enige van items 1951 tot 1973 uitgevoer word nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| GG. | <b>Vaslegging en optekening van eksamens:</b> Beelde van alle radiologiese, ultraklank- en magnetiese resonansbeeldingsprosedures moet tydens elke ondersoek vasgelê word en 'n permanente rekord word deur middel van film, papier of magnetiese media opgeneem. 'n Verslag van die ondersoek, insluitend die bevindinge en diagnostiese kommentaar, moet geskryf en vir vyf jaar gestoor word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| RR. | Die Radiologie-afdeling in hierdie pryslys is nie vir gebruik deur geregistreerde spesialisradiologiese praktisyn (Pr No "038") of kerngeneeskundepraktisyn (Pr No "025"), maar slegs vir gebruik deur ander spesialispraktisyn of algemene praktisyns. 'n Afsonderlike Radiologie-skedule is vir die uitsluitlike gebruik van geregistreerde spesialisradiologiese praktisyn (Pr No "038") en kerngeneeskundepraktisyn (Pr No "025").                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Wysiger                           | Beskrywing                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Byvoegings kodes | Spesialiste |        | Algemene praktisyne |        | Narkose toegedien |        |
|                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                  | Eenhede     | Waarde | Eenhede             | Waarde | Eenhede           | Waarde |
| 0002                              | <b>Geskrewe verslag oor X-strale:</b> Die laagste vlak kode vir 'n nuwe pasiëntkantoor (spreekkamer) besoek is slegs van toepassing waar 'n radioloog versoek word om 'n skriftelike verslag te gee oor X-strale wat elders geneem is en aan hom voorgelê word. Die bogenoemde item en die laagste vlak aanvanklike hospitaalbesoekkode, soos toepaslik, moet nie gebruik word vir roetine-aanmelding van X-strale wat elders geneem is nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                  |             |        |                     |        |                   |        |
| 0004                              | <b>Prosedures wat in eie prosedurekamers uitgevoer word:</b> (a) Prosedures uitgevoer in dokters se eie prosedurekamers in plaas van in 'n hospitaalteater of onverbonden teater-eenheid: soos per fooi vir prosedure + 100% (die waarde van wysiger 0004 is gelyk aan 100% van die waarde van die prosedure(s) wat uitgevoer is). (b) Wysiger 0004 mag slegs gebruik word wanneer die operasie/prosedure-eenheid wat aan 'n enkele prosedure toegewys is, hoër as 30,00 eenhede is. (c) Neem asseblief kennis: Slegs die mediese dokter wat die fasiliteit en die toerusting besit/huur mag Modifier 0004 gebruik. Slegs een persoon mag hierdie wysiger gebruik vir prosedures wat in dokter se eie prosedurekamers uitgevoer word. (d) Neem asseblief kennis dat Wysiger 0004 nie saam met Wysiger 0074 en 0075 gebruik mag word nie.                                                                                                                                                                                                                                                                                                                        |                  |             |        |                     |        |                   |        |
| 0005                              | <b>Veelvuldige terapeutiese prosedures/operasies onder dieselfde narkose:</b> (a) Tensy anders geïdentifiseer in die tarief wanneer veelvuldige terapeutiese prosedures/operasies aansienlike tyd en/of kompleksiteit byvoeg, en wanneer elke prosedure/operasie duidelik geïdentifiseer en gedefinieer is, sal die volgende waardes geld: 100% (volle waarde) vir die eerste of groot prosedure/operasie, 75% vir die tweede prosedure/operasie, 50% vir die derde prosedure/operasie, 25% vir die vierde en daaropvolgende prosedures/operasies. Hierdie wysiger is nie van toepassing op suwer diagnostiese prosedures nie. b) In die geval van veelvuldige frakture en/of ontwrigtings sal bogenoemde waardes geld.                                                                                                                                                                                                                                                                                                                                                                                                                                         |                  |             |        |                     |        |                   |        |
|                                   | c) Wanneer suiver diagnostiese endoskopiese prosedures of diagnostiese endoskopiese prosedures wat nie verband hou met enige terapeutiese prosedures wat uitgevoer word nie, onder dieselfde algemene narkose uitgevoer word, is Wysiger 0005 nie van toepassing op die fooi vir sulke diagnostiese endoskopiese prosedures nie, aangesien die fooi vir endoskopiese prosedures nie vir nasorg voorsiening maak nie. Spesifiseer onverwante endoskopiese prosedure en verskaf diagnose om diagnostiese endoskopiese prosedure(s) aan te dui wat nie verband hou met ander (terapeutiese) prosedures wat onder dieselfde narkose uitgevoer word nie. d) Neem asseblief kennis: Wanneer meer as een klein prosedure uitgevoer word en die tarief voorsiening maak vir items vir "opvolgende" of "maksimum vir veelvuldige bykomende prosedures" (sien Afdeling 2. Integumentêre Stelsel) Wysiger 0005 is nie van toepassing nie aangesien die fooi reeds is 'n verlaagde fooi. e) * Beteken dat hierdie item bykomend tot 'n ander definitiewe prosedure gebruik word en dus nie onderhewig is aan vermindering volgens Wysiger 0005 nie (sien ook Wysiger 0082). |                  |             |        |                     |        |                   |        |
| 0006                              | <b>Besoekende spesialis wat prosedures uitvoer:</b> Waar spesialis kleiner sentrums besoek om prosedures uit te voer, is fooi vir hierdie spesifieke prosedures uitgesluit nasorg. Die verwysende praktisyne sal dan geregtig wees op daaropvolgende hospitaalbesoek vir nasorg. Indien die verwysende praktisyne nie beskikbaar is nie, moet die spesialis, in ooreenstemming met die pasiënt, 'n geskikte locum tenens kies. Beide die chirurg en die praktisyne wat die nasorg hanteer het, moet in sulke gevalle Wysiger 0006 aanhaal met die spesifieke items wat hulle gebruik.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                  |             |        |                     |        |                   |        |

| 0015 | <b>Binnearse infusies:</b> Waar binnearse infusies (insluitend bloed en bloedsellulêre produkte) toegedien word as deel van die nabehandeling na die operasie of bevaling, sal geen ekstra fooie gehel word nie aangesien dit by die globale operasie- of kraamfooie ingesluit is. Sou die praktisyn wat die operasie doen of die kraamgeval versorg, verkies om 'n ander praktisyn te vra om postoperatiewe of na-bevaling binnearse infusies uit te voer, dan sal die praktisyn self (en nie die pasiënt nie) verantwoordelik wees om sodanige praktisyn vir die infusies te vergoed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |       |  |       |  |  |  |
| 0016 | <b>Prosedures uitgevoer op pasgeborenes met 'n gewig van minder as 1000g:</b> Voeg 50% van die eenhede by vir die procedure(s) wat uitgevoer word (slegs om deur pediatriese chirurgie gebruik te word.) Wysiger 0016 kan in samewerking met Wysiger 0019(a) gebruik word wanneer toepaslik.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |       |  |       |  |  |  |
| 0017 | <b>Insputings toegedien deur praktisyns:</b> Wanneer desensitiserings, binnearse, binnespiere of onderhuidse insputings deur die praktisyn self toegedien word aan pasiënte wat die spreekkamers bywoon, vorm 'n eerste insputing deel van die konsultasie/ besoek en moet slegs alle daaropvolgende insputings vir dieselfde toestand om 7.50 gehel word. Konsultatiewe dienste-eenhede wat wysiger 0017 gebruik om die bedrag te weerspieël (nie tesame met 'n konsultasie- item gehelbaar nie)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  | 7,50  |  | 7,50  |  |  |  |
| 0018 | Chirurgiese wysiger vir persone met 'n BMI van 35+ (berekende volgens kg/m <sup>2</sup> ): Fooi vir procedure +50% vir chirurgie en 'n 50% verhoging in narkose tydeenhede vir anesthesioloog.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |       |  |       |  |  |  |
| 0019 | <b>(a) Chirurgie op neonate (tot en met 28 dae na geboorte) en lae geboortegewig babas (minder as 2500g) onder algemene narkose (besnydenis uitgesluit):</b> Eenhede vir procedure + 50% van die eenhede vir die procedure wat deur die chirurgie uitgevoer word en 'n 50% toename in narkose tydeenhede vir narkose. Wysiger 0016 kan by Wysiger 0019(b) gevoeg word wanneer toepaslik. <b>(b) Pasgeborenes OF babas met lae geboorte (minder as 2500 g) wat intensiewe sorg benodig:</b> Eenhede vir die intensiewesorgitems + 50% eenhede vir die intensiewesorgitems vir neonatoloog en/of pediater.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |       |  |       |  |  |  |
| 0020 | Bewuste sedasie: Enige geval wat buite 'n hospitaal/teater uitgevoer word, moet met die relevante procedurekode gekodeer word. Om hierdie gevalle te identifiseer, moet die bogenoemde wysiger gebruik word om aan die Fonds aan te dui dat daar geen hospitaal-/teaterrekening sal wees nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |       |  |       |  |  |  |
| 0046 | Waar in die behandeling van 'n spesifieke fraktuur of ontwrigting (saamgestelde of geslote) 'n aanvanklike procedure binne een maand gevolg word deur 'n oop reduksie, interne fiksasie, eksterne skeletale fiksasie of beenoortplanting op dieselfde been, moet die fooi vir die aanvanklike behandeling van daardie been, fraktuur of ontwrigting met 50% verminder word. Neem asseblief kennis: Hierdie vermindering sluit nie die assistent se fooi in waar van toepassing nie. Na een maand is 'n volle fooi soos vir die aanvanklike behandeling van toepassing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |       |  |       |  |  |  |
| 0047 | 'n Breuk wat NIE vermindering vereis nie, sal op 'n fooi per diensbasis gehel word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |       |  |       |  |  |  |

| 1.4  | WYSIGERS WAT DIE ADMINISTRASIE VAN NARKOSEMIDDELS BEHEER VIR ALLE PROSEDURES EN WERKSAAMHEDE                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |  |  |  |  |  |  |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|--|--|--|
| 0020 | Bewuste sedasie: Enige geval wat buite 'n hospitaal/teater uitgevoer word, moet met die relevante prosedurekode gekodeer word. Om hierdie gevalle te identifiseer, moet die bogenoemde wysiger gebruik word om aan te dui dat daar geen hospitaal-/teaterrekening sal wees nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |  |  |  |  |  |  |
| 0021 | Bepaling van narkose-foele: Narkose-foele word bepaal deur die som van die basiese narkose-eenhede te verky (toegedeel aan elke prosedure wat moontlik onder narkose uitgevoer mag word soos aangedui in die "Narkose Uitgevoer" kolom) plus die tyd eenhede (berekende volgens die formule in Wysiger 0023) en die toepassike wysigers (sien Wysigers 0037-0044). In gevalle van operatiewe prosedures op die muskuloskeletale stelsel, oop frakture en oop vermindering van frakture of ontwrigtings voeg eenhede by soos neergeleë deur Wysigers 5441 tot 5448.                                                                                                                                                                                                                                                                                                                                                    |  |  |  |  |  |  |  |
| 0023 | Die basiese narkose-eenheid word in die tarief neergeleë en word in die narkosekolom weerspieël. Hierdie basiese narkose-eenheid weerspieël die bykomende narkose-riksko, die tegniese vaardigheid wat van die narkose-/narkotiseur vereis word en die omvang van die chirurgiese prosedure, maar sluit die waarde uit van die werklike tyd wat spandeer word om die narkose toe te dien. Die tydeenheid (aangedui deur "T") sal in alle gevalle op die volgende basis by die gelyste basiese narkose-eenheid gevoeg word: Narkosetyd: Die vergoeding vir narkosetyd is per 15 minute periode of gedeelte daarvan, bereken vanaf die aanvang van die narkose, dws 2.00 narkose-eenheid per 15 minute periode of deel daarvan, met dien verstande dat indien die duur van die narkose langer as een (1) uur is, die aantal eenhede na een (1) uur 3.00 sal wees narkose-eenheid per 15 minute periode of deel daarvan. |  |  |  |  |  |  |  |
| 0024 | Pre-operatiewe assesserings wat nie deur prosedures gevolg word nie: Indien 'n pre-operatiewe assessering van 'n pasiënt deur die narkose-/narkotiseur nie deur 'n operasie gevolg word nie, sal dit beskou word as 'n besoek aan die hospitaal of ouerhuis en die toepassike hospitaalsesiekitem moet aangekla.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |
| 0025 | Berekening van narkosetyd: Narkosetyd word bereken vanaf die tyd wat die narkose-/narkotiseur begin om die pasiënt voor te berei vir die induksie van narkose in die operasietheater of in 'n soortgelyke ekwivalente area en eindig wanneer die narkose-/narkotiseur nie meer vertel word om sy/haar persoonlike professionele aandag aan die pasiënt, dit wil sê wanneer die pasiënt met redelike veiligheid onder die gebruiklike post-operatiewe toesig geplaas kan word. Waar langdurige persoonlike professionele aandag nodig is vir die welstand en veiligheid van sodanige pasiënt, sal die nodige tyd gewaardeer word op dieselfde basis as hierbo aangedui vir die narkosetyd. Die narkose-/narkotiseur moet op sy/haar rekening die presiese narkosetyd, insluitend die toesigtyd wat saam met die pasiënt spandeer word, toon.                                                                           |  |  |  |  |  |  |  |
| 0027 | Meer as een prosedure onder dieselfde narkose: Waar meer as een operasie onder dieselfde narkose uitgevoer word, sal die basiese narkose-eenheid dié van die groot operasie met die hoogste aantal eenhede wees.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |  |  |  |
| 0028 | Aanwyser vir gebruik van laevoer-narkosetegniese minder as 1 liter/minuut: Varsgasvoer van minder as 1 liter/minuut.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |  |  |  |  |  |
| 0029 | Assistent-narkotiseur: Wanneer dit nodig gemaak word deur die omvang van die narkose, kan 'n assistent-narkotiseur in diens geneem word. Die vergoeding van die assistent-narkotiseur word op dieselfde basis bereken as in die geval waar 'n algemene praktisyn die narkose toedien.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |
| 0030 | Aanwyser vir gebruik van laevoer-narkosetegniese 1-2 liter/minuut: Varsgasvoer van 1 tot 2 liter/minuut.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |  |  |  |  |  |  |
| 0031 | Binnearse drup en oortappings: Behandeling met binnearse drup en oortappings word beskou as deel van die normale behandeling by die toediening van 'n narkose. Geen bykomende foele mag vir sulke dienste gehel word wanneer dit of voor, of tydens werklike teater- of operasionele tyd gelever word nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |  |  |  |  |
| 0032 | Pasiente in bui posisie: Narkose wat toegedien word aan pasiente in die bui posisie moet 'n minimum van 4.00 basiese narkose-eenhede hê. Wanneer die basiese narkose-eenheid vir die prosedure 3.00 is, moet een ekstra narkose-eenheid bygevoeg word. As die basiese narkose-eenheid vir die prosedure 4.00 of meer is, moet geen ekstra eenheid bygevoeg word nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |  |  |  |  |  |
| 0033 | Deelname aan algemene versorging van pasiente: Wanneer 'n narkotiseur/narkotiseur vereis word om deel te neem aan die algemene versorging van 'n pasiënt tydens 'n chirurgiese prosedure, maar nie die narkose toedien nie, kan sodanige dienste teen volle narkose-tarif vergoed word, onderhewig aan die voorwaardes van wysiger 0035: Narkose toegedien deur 'n narkose-/narkotiseur, en wysiger 0036: Narkose toegedien deur algemene praktisyns.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |  |  |  |  |  |
| 0034 | Kop- en nekprosedures: Alle narkosemiddels wat toegedien word vir diagnostiese, chirurgiese of X-straalprosedures op die kop en nek moet 'n minimum van 4.00 basiese narkose-eenhede hê. Wanneer die basiese narkose-eenheid vir die prosedure 3.00 is, moet een ekstra narkose-eenheid bygevoeg word. As die basiese narkose-eenheid vir die prosedure 4.00 of meer is, moet geen ekstra eenheid bygevoeg word nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |  |  |  |  |  |
| 0035 | Narkose toegedien deur 'n narkose-/narkotiseur: Geen narkose wat toegedien word, sal 'n totale waarde van minder as 7.00 narkose-eenheid (basiese eenhede, tydeenheid plus toepassike wysigers) hê nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |  |  |  |  |  |  |
| 0036 | Narkose toegedien deur algemene praktisyns: a. Narkose wat een uur of minder toegedien word: die eenheid (basiese eenheid plus tyd plus die toepassike bevochtigers) wat gebruik word om die eenheid te bereken vir 'n narkose toegedien deur 'n algemene praktisyn wat een uur of minder duur, sal dieselfde wees as dié vir 'n spesialis-narkotiseur. Geen narkose wat uitgevoer word, moet minder as 7.00 narkose-eenheid wees nie (wysiger 0035). b. Narkose wat langer as een uur duur, sal die eenheid wat gebruik word om die eenheid vir 'n narkose wat deur 'n algemene praktisyn toegedien word te bereken 4/5 (80%) wees van die totale aantal eenhede (basiese eenheid plus tyd plus die toepassike wysigers) van toepassing op die spesialis anesthesioloog. Die berekende narkose-eenheid moet nie minder as 11.00 narkose-eenheid wees nie.                                                            |  |  |  |  |  |  |  |

Road Accident Fund Tariff 2021/2022

|                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |  |  |  |  |  |  |
