| 1932 | Laparoskopiese uretero-neosistostomie: sluit sistoskopies en uretrale stent invoeging uit (item 1807 mag nie by hierdie item gevoeg word nie)   |   | 382,30 | 305,84 | 6,00T |
| 1933 | Uretero-sigmoidostomie met rektale blaas en kolostomie                                                                                          |   | 252,00 | 201,60 | 5,00T |
| 1935 | Uretero-ileale kanaal                                                                                                                           |   | 388,00 | 310,40 | 5,00T |
| 1937 | Vervanging van ureter deur dermsegment: Eensydig                                                                                                |   | 277,00 | 221,60 | 5,00T |
| 1939 | Vervanging van ureter deur dermsegment: Bilaterale                                                                                              |   | 485,00 | 388,00 | 5,00T |
| 1941 | Ureterostomie-in-situ: Eensydig                                                                                                                 |   | 100,00 | 100,00 | 5,00T |
| 1943 | Ureterostomie-in-situ: Bilaterale                                                                                                               |   | 175,00 | 140,00 | 5,00T |
| 10.3 | Blaas                                                                                                                                           |   |        |        |       |
| 1945 | Instillasie van radio-ondeursigtige materiaal vir sistografie of uretrosistografie                                                              |   | 5,00   | 5,00   | 3,00T |
| 1947 | Instillasie van anti-karsinogene middels insluitend retensietyd, maar nie koste van materiaal of hidro-dilatatie van blaas nie                  |   | 10,00  | 10,00  | 3,00T |
| 1949 | Sistoskopie: Hospitaaltoerusting                                                                                                                |   | 44,00  | 44,00  | 3,00T |
| 1951 | En retrograde pielografie of retrograde ureterale kateterisasie: eensydig of bilateraal                                                         | + | 10,00  | 10,00  | 3,00T |
| 1952 | JJ Stent kateter                                                                                                                                | + | 44,00  | 44,00  | 3,00T |
| 1953 | Met hidrodilatatie van die blaas vir interstisiële sistitis                                                                                     | + | 5,00   | 5,00   | 3,00T |
| 1954 | Uretroskopie                                                                                                                                    | + | 35,00  |        | 3,00T |
| 1955 | En bilaterale ureteriese kateterisasie met differensiële funksie studies wat bykomende aandag tyd vereis                                        | + | 35,00  | 35,00  | 3,00T |
| 1957 | Met dilatatie van die ureter of ureters                                                                                                         | + | 25,00  | 25,00  | 3,00T |
| 1959 | Met manipulasie van ureterale calculus                                                                                                          | + | 20,00  | 20,00  | 3,00T |
| 1961 | Met die verwydering van vreemde liggaam of calculus uit uretra of blaas                                                                         | + | 20,00  | 20,00  | 3,00T |
| 1963 | Met fulguratie of behandeling van geringe letsels, met of sonder biopsie                                                                        | + | 15,00  | 15,00  | 3,00T |
| 1964 | En beheer van bloeding en bloedklont ontruiming                                                                                                 | + | 15,00  | 15,00  | 3,00T |
| 1965 | En kateterisasie van die ejakulasiekanaal                                                                                                       | + | 10,00  | 10,00  | 3,00T |
| 1967 | Met ureteriese meatotomie: Eensydig of bilateraal                                                                                               | + | 15,00  | 15,00  | 3,00T |
| 1969 | En koue biopsie                                                                                                                                 | + | 15,00  | 15,00  | 3,00T |
| 1971 | Met krio-chirurgie vir blaas- of prostaatsiekte                                                                                                 | + | 55,00  | 55,00  | 3,00T |
| 1973 | Met insnyding, fulguratie of reseksie van blaasnek en/of posterior uretra vir aangebore kleppe of obstruktiel hipertrofiëse blaasnek by 'n kind | + | 35,00  | 35,00  | 3,00T |
| 1975 | Ultraviolet sistoskopies vir blaas tumor                                                                                                        |   | 60,00  | 60,00  | 3,00T |
| 1976 | Optiese uretrotomie                                                                                                                             |   | 80,00  | 80,00  | 3,00T |
| 1977 | Transuretrale reseksie van ejakulatoriese kanaal                                                                                                |   | 60,70  | 60,70  | 3,00T |
| 1979 | Interne uretrotomie: Vroulik                                                                                                                    |   | 50,00  | 50,00  | 3,00T |
| 1981 | Interne uretrotomie: Manlik                                                                                                                     |   | 76,20  | 76,20  | 3,00T |
| 1983 | Transuretrale reseksie van blaas tumor                                                                                                          |   | 100,00 | 100,00 | 5,00T |
| 1984 | Transuretrale reseksie van blaasgewasse: Groot veelvuldige gewasse                                                                              |   | 115,00 | 115,00 | 5,00T |

## Road Accident Fund Tariff 2021/2022

|      |                                                                                                                                                                                                               |        |        |       |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------|-------|
| 1985 | Transuretrale reseksie van blaasnek: Vroulik of kind                                                                                                                                                          | 105,00 | 105,00 | 5,00T |
| 1986 | Transuretrale reseksie van blaasnek: Manlik                                                                                                                                                                   | 125,00 | 120,00 | 5,00T |
| 1987 | Litholapaksie                                                                                                                                                                                                 | 80,00  | 80,00  | 5,00T |
| 1989 | Sistometrogram                                                                                                                                                                                                | 25,00  | 25,00  | 3,00T |
| 1991 | Fluorometrie blaas, studies met videosistograaf                                                                                                                                                               | 40,00  | 40,00  | 3,00T |
| 1992 | Sonder videosistograaf                                                                                                                                                                                        | 25,00  | 25,00  | 3,00T |
| 1993 | Voiding siste-uretrogram                                                                                                                                                                                      | 21,00  | 21,00  | 3,00T |
| 1994 | Rigisican ondersoek                                                                                                                                                                                           | 66,00  | 66,00  | 3,00T |
| 1995 | Perkutane aspirasie van blaas                                                                                                                                                                                 | 10,00  | 10,00  | 3,00T |
| 1996 | Blaaskateterisasie: Manlik (nie tydens operasie nie)                                                                                                                                                          | 6,00   | 6,00   | 3,00T |
| 1997 | Blaaskateterisasie: Vroulik (nie tydens operasie nie)                                                                                                                                                         | 3,00   | 3,00   | 3,00T |
| 1999 | Perkutane sistostomie                                                                                                                                                                                         | 24,00  | 24,00  | 3,00T |

| 2885 | Trigeminale traktotomie                                                                                                                                                                                                                                                                      |         |  |        |  |        |
| 2886 | Kraniektomie: Suboksipitaal: Sluit servikale lamiektomie in vir dekompressie van medulla en rugmurg, met of sonder durale oorplanting (bv. Arnold-Chiari misvorming) (totale prosedure)                                                                                                      | 652,10  |  | 521,68 |  | 13.00T |
| 2887 | Vestibulêre senuwee                                                                                                                                                                                                                                                                          |         |  |        |  |        |
| 2888 | Mikrovaskulêre dekompressie van trigeminale, gesig- en glossafaryngeale senuwee (vrystelling van druk op die sensoriese wortel van die gasserion ganglion) (subtemporaal) indien aangedui, word die senuwee of 'n senuweebranch gesny, beëindig word vervang en vasgemaak (totale prosedure) | 570,20  |  | 456,16 |  | 11.00T |
| 2892 | Mikrovaskulêre dekompressie van kraniale senuwee (suboksipitaal)                                                                                                                                                                                                                             | 553,00  |  | 442,00 |  | 6.00T  |
| 2889 | Kraniektomie vir uitsny van breingewas: Infratentoriale of posterior fossa deur 'n laterale posterior insnyding en verwydering van oksipitale beentlap vir uitsny van serebellopontine hoek breintumor                                                                                       | 1106,80 |  | 885,44 |  | 13.00T |
| 2891 | Kraniektomie vir uitsny van breingewas: Infratentoriale of posterior fossa vir uitsny van breingewas: Sluit meningioom, serebellopontienhoekgewas of middellyngewas aan die basis van skedel uit                                                                                             | 819,70  |  | 655,76 |  | 13.00T |
| 2893 | Kraniektomie vir uitsny van breinabess: Infratentoriale of posterior fossa vir uitsny van breinabess                                                                                                                                                                                         | 648,30  |  | 518,64 |  | 13.00T |
| 2895 | Uitsny van gewas van glomus jugulare: Intrakraniaal                                                                                                                                                                                                                                          |         |  |        |  |        |
| 2897 | Uitsnyding van gewas van glomus jugulare: Ekstrakraniaal                                                                                                                                                                                                                                     |         |  |        |  |        |
| 2898 | Uitsnyding van tumor van glomus jugulare: Hemisferiektomie                                                                                                                                                                                                                                   |         |  |        |  |        |
| 6085 | Kraniektomie/kraniotomie: met verkenning van die infratentoriale area (onder die tentorium van die serebellum), posterior fossa (totale prosedure)                                                                                                                                           | 596,40  |  | 477,12 |  | 13.00T |
| 6086 | Kraniektomie/kraniotomie: met ontruiming van infratentoriale, intracerebellêre hematoom (totale prosedure)                                                                                                                                                                                   | 614,30  |  | 491,44 |  | 13.00T |
| 6087 | Kraniektomie/kraniotomie: met dreinerings van intrakraniale abess in die infratentoriale gebied met suiging en besproeiing van die area terwyl bloeding gemonitor word (totale prosedure)                                                                                                    | 631,80  |  | 505,44 |  | 13.00T |
| 6088 | Kraniale dekompressie veroorsaak deur oortollige vloeistof (bv. bloed en patologiese weefsel) met behulp van posterior fossa-benadering deur die oksipitale been te boor/saag (totale prosedure)                                                                                             | 605,10  |  | 484,08 |  | 13.00T |
| 6090 | Kraniektomie aan die basis van skedel (suboksipitaal): met bevryding en snit van een of meer kraniale senuwees (totale prosedure)                                                                                                                                                            | 624,00  |  | 499,20 |  | 11.00T |
| 6091 | Kraniektomie aan die basis van die skedel (suboksipitaal): met mesencefalese traktotomie of pedunkulotomie (reseksie van 'n senuweekanaal soos dit deur die mesencephalon of die serebellêre of serebrale pedunkel beweeg) (totale prosedure)                                                | 494,10  |  | 395,28 |  | 11.00T |
| 6092 | Kraniektomie: met uitsny van meningioma (neoplasma van meninges) van infratentoriale strukture of posterior fossa (totale prosedure)                                                                                                                                                         | 873,40  |  | 698,72 |  | 11.00T |
| 6093 | Kraniektomie: met uitsny van middellyn breingewas by basis van skedel; met behulp van posterior arikkulêre of transmastoid benadering (totale prosedure)                                                                                                                                     | 942,10  |  | 753,68 |  | 13.00T |
| 6094 | Kraniektomie: met uitsny of fenestrasie (skep opening vir dreinerings) van sist in die infratentorium of posterior fossa (totale prosedure)                                                                                                                                                  | 617,60  |  | 494,08 |  | 13.00T |
| 6095 | Kraniektomie (beentlap kraniotomie): met uitsny van serebellopontienhoek tumor (akoestiese neuroom/tumor/vestibulêre neurofibromatose (NF 1 of NF2)hoek tumor); gebruik van transtemporale (mastoid) benadering (totale prosedure)                                                           | 1079,60 |  | 863,68 |  | 11.00T |
| 6096 | Kraniektomie (beentlap kraniotomie): met uitsny van serebellopontienhoek tumor (akoestiese neuroom/tumor/vestibulêre neurofibromatose (NF 1 of NF2)hoek tumor); gebruik gekombineerde transtemporale (mastoid) en middel of posterior fossa benadering (totale prosedure)                    | 910,30  |  | 728,24 |  | 13.00T |
| 2899 | Kraniektomie/kraniotomie: met ontruiming van infratentoriale hematoom, subduraal of ekstraduraal                                                                                                                                                                                             | 543,10  |  | 434,48 |  | 13.00T |
| 2900 | Transkraniale eksplorاسie van wentelbaan: Verwydering van letsel (wat vryheid van beweging van ekstraokulêre oogspreier verseker). Sluit rekonstruksie van dak van wentelbaan, sluiting van dura en vervanging van skedel in (totale prosedure)                                              | 625,50  |  | 500,40 |  | 11.00T |
| 2916 | Kraniotomie: met intrakraniale hipofisektomie of uitsny van pituitêre tumor (totale prosedure)                                                                                                                                                                                               | 683,60  |  | 546,88 |  | 11.00T |

| 14.8 | Kraniotomie vir                                                                                                                                                                                                                                               |        |        |        |  |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------|--------|--|
| 2901 | Kraniotomie/trefnasie (beenflap kraniotomie): met uitsny van supratentoriale meningioom                                                                                                                                                                       | 756,70 | 605,36 | 11.00T |  |
| 2902 | Kraniotomie vir subdurale inplanting van strook- en roosterelektrodes vir beslagleggingsmonitering en breinkartering                                                                                                                                          | 398,10 | 311,28 | 9.00T  |  |
| 2903 | Kraniotomie/trefnasie of beenflap kraniotomie: met uitsny van supratentoriale breingewas, uitgesluit meningioma (totale prosedure)                                                                                                                            | 650,00 | 520,00 | 11.00T |  |
| 2904 | Kraniotomie/kraniotomie: met evakuering van supratentoriale, intraserebrale hematoom                                                                                                                                                                          | 590,20 | 472,16 | 11.00T |  |
| 2905 | Kraniotomie met verhoogde beenflap: Uitsny van epileptogeniese fokus sonder elektrokortikografie tydens chirurgie                                                                                                                                             | 489,00 | 391,20 | 11.00T |  |
| 2906 | Kraniotomie: skedelgebaseerde herstel van encephalocoele (totale prosedure)                                                                                                                                                                                   | 493,50 | 394,80 | 11.00T |  |
| 2907 | Kraniotomie met verhoging van beenflap: met lobektomie van temporale lob, sonder elektrokortikografie tydens die operasie (totale prosedure)                                                                                                                  | 730,00 | 584,24 | 11.00T |  |
| 2908 | Kraniotomie vir Torkildsen anastomose                                                                                                                                                                                                                         |        |        |        |  |
| 2909 | Kraniotomie: Herstel van durale / serebrospinale vloeistof (CSF) lek. Sluit chirurgie vir aneurysma/arteriovenale misvorming (AVM): Chirurgie, intrakraniale supratentoriale, eenvoudig                                                                       | 474,60 | 379,68 | 11.00T |  |
| 2910 | Arteriovenuse misvorming (AVM): Chirurgie, intrakraniale supratentoriale, eenvoudig                                                                                                                                                                           | 671,40 | 537,12 | 15.00T |  |
| 6115 | Kraniotomie/kraniotomie: Supratentoriale verkenning                                                                                                                                                                                                           | 487,10 | 389,68 | 11.00T |  |
| 6116 | Insnyding en onderhuidse plasing van kraniale beenoortplanting (bv. gesplete of volle dikte); skeeroortplanting of beenstof, met skenkerplek wat reeds vir die hoofprosedure blootgestel is.                                                                  | 25,90  | 25,90  |        |  |
| 6117 | Kraniotomie/kraniotomie: Dreinerings van intrakraniale abses in die supratentoriale streek (totale prosedure)                                                                                                                                                 | 564,70 | 451,76 | 11.00T |  |
| 6118 | Dekompressiewe kraniotomie/kraniotomie: Met of sonder duraplastie, vir die behandeling van intrakraniale hipertensie (mees algemeen veroorsaak deur ernstige geslote kop trauma) sonder ontruiming van geassosieerde intraparenchimale hematoom of lobektomie | 705,10 | 564,05 | 11.00T |  |
| 6119 | Dekompressiewe kraniotomie/kraniotomie: Met of sonder duraplastie, vir die behandeling van intrakraniale hipertensie sonder ontruiming van geassosieerde intraparenchimale hematoom, met lobektomie                                                           | 706,50 | 565,20 | 11.00T |  |
| 6120 | Slegs dekompressie van (dak van) wentelbaan: Transkraniale benadering (totale prosedure)                                                                                                                                                                      | 548,60 | 438,88 | 11.00T |  |
| 6121 | Verkenning van wentelbaan: Transkraniale benadering met biopsie (totale prosedure)                                                                                                                                                                            | 561,00 | 448,80 | 11.00T |  |
| 6123 | Kraniale dekompressie: subtemporaal (pseudotumor cerebri, spleetventrikel-sindroom)                                                                                                                                                                           | 430,00 | 344,00 | 11.00T |  |
| 6125 | Kraniotomie/trefnasie (beenflap kraniotomie): supratentoriale uitsny van breinabses                                                                                                                                                                           | 566,20 | 452,96 | 11.00T |  |
| 6126 | Kraniotomie/trefnasie (beenflap kraniotomie): supratentoriale uitsny/fenestrasie van sist                                                                                                                                                                     | 550,90 | 440,72 | 11.00T |  |
| 6127 | Inplanting, chemoterapie-middel: Intrakavitêr, brein intrakavitêr, VOEG TOE by hoofprosedure                                                                                                                                                                  | 25,70  | 25,70  |        |  |
| 6128 | Inplanting, subduraal: Stroop elektrodes deur 1 of meer braam/trefnagte. Langtermyn monitering van aanvalle                                                                                                                                                   | 364,50 | 291,60 | 11.00T |  |
| 6129 | Kraniotomie met verhoging van beenflap: Subdurale inplanting van 'n elektrode-skikking. Langtermyn monitering van aanvalle                                                                                                                                    | 453,50 | 362,80 | 11.00T |  |
| 6130 | Kraniotomie met verhoogde beenflap: Uitsny van serebrale epileptogeniese fokus, insluitend elektrokortikografie tydens chirurgie (sluit verwydering van elektrode-skikking in)                                                                                | 298,60 | 238,88 | 11.00T |  |
| 6131 | Kraniotomie met verhoogde beenflap: Lobektomie, temporale lob, sonder elektrokortikografie tydens chirurgie (sluit die verwydering van elektrode-skikking in)                                                                                                 | 763,70 | 610,96 | 11.00T |  |
| 6132 | Kraniotomie met verhoging van beenflap: Lobektomie, temporale lob met elektrokortikografie tydens chirurgie                                                                                                                                                   | 789,70 | 631,76 | 11.00T |  |
| 6133 | Kraniotomie met verhoging van beenflap: Lobektomie, anders as temporale lob, gedeeltelik of totaal, met elektrokortikografie tydens chirurgie                                                                                                                 | 699,40 | 559,52 | 11.00T |  |
| 6134 | Kraniotomie met verhoging van beenflap: Lobektomie, anders as temporale lob, gedeeltelik of totaal, sonder elektrokortikografie tydens chirurgie                                                                                                              | 647,20 | 517,76 | 11.00T |  |
| 6135 | Kraniotomie met verhoging van beenflap: Transaksie van corpus callosum                                                                                                                                                                                        | 637,10 | 509,68 | 11.00T |  |
| 6136 | Kraniotomie met verhoging van beenflap: Gedeeltelike of subtotaal (funksionele) hemisferektomie                                                                                                                                                               | 643,90 | 515,12 | 11.00T |  |
| 6137 | Kraniotomie met verhoogde beenflap: Uitsny van stolling van choroïd plexus                                                                                                                                                                                    | 507,90 | 406,32 | 11.00T |  |
| 6138 | Kraniotomie met verhoging van beenflap: Uitsnyding van kraniofaringioom                                                                                                                                                                                       | 943,20 | 754,56 | 11.00T |  |
| 6139 | Kraniotomie met verhoging van beenflap: Selektiewe amygdalohippokampektomie                                                                                                                                                                                   | 666,20 | 532,96 | 11.00T |  |

|             | Neem asseblief kennis: Wysiger 0083 is nie van toepassing op Afdeling 19.8: Vaskulêre studies en Afdeling 19.14: Intervensionele radiologiese prosedures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |        |  |        |  |       |
|             | Reëls van toepassing op Afdeling 19.8: Vaskulêre studies en Afdeling 19.14: Intervensionele radiologiese prosedures: a. Die Tegnieke Komponent (TC) van items 3536-3550 sluit die koste van die volgende in: i. Alle topies ii. Alle filmkoste (wysiger 0084 is nie van toepassing nie) iii. Alle fluoroskopie (item 3801 is nie van toepassing nie) iv. Alle klein verbruiksgoedere (gedefinieer as enige item behalwe kateters, geleidingsdrade, invoerstelle, gespesialiseerde kateters, ballonkateters, stents, emboliese middels, dwelms en kontrasmedia, narkose verbruiksgoedere en dwelms) b. Die Tegnieke Komponent (TC) vir items 3526-3550 mag slegs een keer per geval per dag deur die eienaar van die toerusting wees en is slegs van toepassing op radiologiepraktieke. c. Indien 'n prosedure uitgevoer word deur 'n nie-radioloog saam met 'n radioloog as 'n span, in 'n fasiliteit wat deur die radioloog besit word, sal elke lid van die span hul onderskeie volle eenhede gebruik soos per wysigers en die toepaslike items. d. Indien 'n prosedure deur 'n nie-radioloog en 'n radioloog as 'n span uitgevoer word, in 'n fasiliteit wat nie deur die radioloog besit word nie, is wysigings 6301 en 6302 van toepassing. |  |        |  |        |  |       |
|             | <b>Let wel:</b> In die geval van selektiewe kateterisering van 'n tak van die aorta, word die professionele komponent vir kateterisering van die aorta ingesluit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |  |        |  |       |

| <p>Neem asseblief kennis: Wysiger 0083 is nie van toepassing op Afdeling 19.8: Vaskulêre studies en Afdeling 19.14: Intervensie radiologiese prosedures</p> <p>Reëls van toepassing op Afdeling 19.8: Vaskulêre studies en Afdeling 19.14: Intervensie radiologiese prosedures: a. Die Tegiese Komponent (TC) van Items 3536-3550 sluit die koste van die volgende in: i. Alle lopies ii. Alle filmkoste (wysiger 0084 is nie van toepassing nie) iii. Alle fluoroskopie (Item 3601 is nie van toepassing nie) iv. Alle klein verbruksgoedere (gedefinieer as enige item behalwe kateters, geleidingsdrade, invoerstelle, gespesialiseerde kateters, ballonkateters, stents, emboliese middels, dwelms en kontrasmedia, narkose verbruksgoedere en dwelms) b. Die Tegiese Komponent (TC) vir Items 3526-3550 mag slegs een keer per geval per dag deur die eienaar van die toerusting wees en is slegs van toepassing op radiologiese prosedures. c. Indien 'n prosedure uitgevoer word deur 'n nie-radioloog saam met 'n radioloog as 'n span, in 'n fasiliteit wat deur die radioloog besit word, sal elke lid van die span hul onderskeie volle eenhede gebruik soos per wysigers en die toepaslike items. d. Indien 'n prosedure deur 'n nie-radioloog en 'n radioloog as 'n span uitgevoer word, in 'n fasiliteit wat nie deur die radioloog besit word nie, is wysigers 6301 en 6302 van toepassing.</p> |                                                                                                                                                                                                 |        |        |       |  |  |  |

| In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word. |                                                                                                                                                                                                                                                                                                           |            |

## Road Accident Fund Tariff 2021/2022

| OSTOPATIE |                                                                                                                                                                                                                                                                                                                                                                                                       |        |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
|           | In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word.                                      |        |
|           | REËLS                                                                                                                                                                                                                                                                                                                                                                                                 | Waarde |
| 1         | Alle rekeninge moet aangebied word met die volgende inligting duidelik gestel:<br>- naam van osteopaat<br>- kwalifikasies van die osteopaat<br>- BHF-oefennummer<br>- Posadres en telefoonnummer<br>- Datum waarop die diens(te) gelewer is<br>- Toepaslike itemkodes<br>- Die aard van die behandeling<br>- Die voornaam van die pasiënt<br>- Die naam en praktyknommer van die verwysende praktisyn |        |
| 2         | Die fooi van meer as een prosedure wat tydens dieselfde konsultasie of besoek uitgevoer word, is die fooi vir die groot prosedure plus die fooi ten opsigte van elke bykomende prosedure, maar onder geen omstandighede sal bykomende fooie gehef word vir meer as drie a                                                                                                                             |        |
| 3         | Na 'n reeks van 10 behandelings ten opsigte van een pasiënt vir dieselfde toestand, moet die betrokke praktisyn so gou moontlik aanmeld indien verdere behandeling nodig is. Betaling vir behandeling van meer as die vasgestelde getal kan later toegestaan word                                                                                                                                     |        |
| 4         | Dit word aanbeveel dat, wanneer sulke voordele toegestaan word, dwelms, verbruiksgoedere en weggooibare items wat tydens 'n prosedure gebruik word of aan 'n pasiënt uitgereik word by ontslag slegs vergoed sal word indien die korrekte NAPPI-kode op die rekening verskaf word.                                                                                                                    |        |
|           | ITEMS                                                                                                                                                                                                                                                                                                                                                                                                 |        |
| 1         | Konsultasie, Spinale of Gewrigsmanipulasie                                                                                                                                                                                                                                                                                                                                                            |        |

| 1             | Tensy tydige stappe (dws 24 uur voor die afspraak) geneem word om 'n afspraak te kanselleer, kan die betrokke fooi gehef word, maar is nie betaalbaar nie. Elke saak sal egter op meriete oorweeg word en, indien omstandighede dit regverdig, sal geen fooi gehef word nie. Wysiger 0001 moet aangehaal word                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |         |        |
| 2             | In uitsonderlike gevalle waar die fooi buite verhouding laag is in verhouding tot die werklike dienste wat deur die praktisyn gelewer word, moet die praktisyn motivering verskaf vir 'n hoër fooi en sodanige hoër fooi as wat met die praktisyn ooreengekom kan word, kan gehef word                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |         |        |
| 3             | Waar 'n praktisyn toerusting gebruik wat nie deur daardie praktisyn besit word nie, sal 'n vermindering van 15% van die betrokke tarief van toepassing wees. Wysiger 0003 moet aangehaal word wanneer hierdie                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |         |        |
| 4             | In die geval van langdurige of duur behandeling, moet die praktisyn eers vasstel of finansiële verantwoordelikheid ten opsigte van sodanige behandeling aanvaar sal word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |         |        |
| 5             | Na 'n reeks van 20 behandelings ten opsigte van een pasiënt vir dieselfde toestand, moet die betrokke praktisyn so gou moontlik aanmeld indien verdere behandeling nodig is. Betaling vir behandelings wat die vasgestelde getal oorskry, kan toegestaan word na ontvangs van 'n brief van die betrokke praktisyn wat die behoefte aan sodanige behandeling motiveer                                                                                                                                                                                                                                                                                                                                                                                                                                                  |         |        |
| 6             | Waar noodbehandeling verskaf word:<br>a. gedurende werksure, en die verskaffing van sodanige behandeling vereis dat die praktisyn haar of sy praktyk moet verlaat om die pasiënt in die hospitaal te versorg; of<br>b. na werksure<br>die fooi vir sulke besoeke is die totale fooi plus 50%.<br>Vir doeleindes van hierdie reël:<br>a. "noodbehandeling" 'n bona fide, regverdigbare noodfisioterapieprosedure, waar versuim om die prosedure onmiddellik te verskaf, ernstige belemmering van liggaamsfunksies of ernstige disfunksie van 'n liggaamsorgaan of -deel tot gevolg sou hê, of die persoon se lewe in ernstige gevaar sou plaas; en<br>b. "werksure" beteken 8h00 tot 17h00, Maandag tot Vrydag.<br>Wysiger 0006 moet na die toepaslike kodenommer(s) aangehaal word om aan te dui dat hierdie reël van |         |        |
| 7             | Praktisyns word daaraan herinner dat 'n laer fooi as wat in die voordeleskaal verskyn, gehef sal word indien die gebruiklike fooi in die area minder is as wat gehef word. Verlaagde fooie sal ook gehef word waar die praktisyn sy/haar fooi in privaat praktyk in spesifieke gevalle sou verminder het. Langdurige behandeling of uitsonderlike gevalle moet ook spesiale oorweging geniet in ooreenstemming met die                                                                                                                                                                                                                                                                                                                                                                                                |         |        |
| 8             | Die fooi ten opsigte van meer as een prosedure (uitsluitend evaluasie- en besoekitems 407, 501, 502, 503, 507, 509, 701, 702, 703, 704, 705, 706, 707, 708, 801, 3, 3, 9) wat tydens dieselfde konsultasie of besoek uitgevoer word, is die fooi vir die groot prosedure plus die helfte van die fooi ten opsigte van elke bykomende prosedure, maar onder geen omstandighede mag fooie gehef word vir meer as drie prosedures wat uitgevoer word in die behandeling van enige toestand. Wysiger 0008 moet dan na die toepaslike kodenommers vir die bykomende kodenommers aangehaal word vir die bykomende                                                                                                                                                                                                           |         |        |
| 9             | Wanneer meer as een toestand behandeling vereis en elkeen van hierdie toestande 'n individuele behandeling noodsaak, sal dit as individuele behandelings gehef word. Volledige besonderhede van die aard van die behandelings en die diagnose of diagnostiese kodes moet vermeld word. Wysiger 0009 moet dan na die toepaslike kodenommer aangehaal word om aan te dui dat hierdie reël van toepassing is.                                                                                                                                                                                                                                                                                                                                                                                                            |         |        |
| 10            | Wanneer die behandelingstye van twee heeltemal afsonderlike en verskillende toestande ooreenstem, is die fooi die volle fooi vir een toestand en 50% van die fooi vir die ander toestand. Beide voorwaardes moet gespesifiseer word. Wysiger 0010 moet dan na die toepaslike kodenommer aangehaal word om aan te dui dat hierdie reël van toepassing is.                                                                                                                                                                                                                                                                                                                                                                                                                                                              |         |        |

## Road Accident Fund Tariff 2021/2022

|     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |    |          |

|            | In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word.                                                                                                                                                                                                                                                                                                                                                                        |         |        |
|            | <b>Algemene Reëls</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |         |        |
| A          | Alle rekeninge moet aangebied word met die volgende inligting duidelik gestel:<br>· naam van praktisyn<br>· kwalifikasies van die praktisyn;<br>· BHF-praktyknommer;<br>· posadres en telefoonnommer;<br>· datum waarop diens(te) gelewer is;<br>· Die relevante diagnostiese kodes en NHRPL-itemkodenommers met betrekking tot die gesondheidsdiens gelewer;<br>· die voornaam van die pasiënt;<br>· die naam en praktyknommer van die verwysende praktisyn, indien van toepassing.                                                                                                                                                                                                                                                    |         |        |
| B          | Die tarief ten opsigte van meer as een prosedure wat tydens dieselfde konsultasie of besoek uitgevoer word, is die volle tarief vir die hoofprosedure plus die helfte van die tarief ten opsigte van elke bykomende prosedure wat uitgevoer word in die behandeling van enige toestand.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |         |        |
| C          | Dit word aanbeveel dat, wanneer sulke voordele toegestaan word, dwelms, verbruiksgoedere en weggooibare items wat tydens 'n prosedure gebruik word of aan 'n pasiënt uitgereik word by ontslag slegs vergoed sal word indien die toepaslike kode op die rekening verskaf word.                                                                                                                                                                                                                                                                                                                                                                                                                                                          |         |        |
| D          | Die bedrag wat gehef word ten opsigte van medisyne en geskeduleerde stowwe sal nie die perke oorskry wat voorgeskryf word in die Regulasies met betrekking tot 'n deursigtige prysstelsel vir medisyne en geskeduleerde stowwe, gedateer 30 April 2004, gemaak ingevolge die Wet op Medisyne en Verwante Stowwe, 1965 (Wet). No 101 van 1965).<br><br>Met betrekking tot alle ander materiaal, moet items gehef word (BTW uitgesluit) teen netto verkrygingsprys plus -<br>* 26% van die netto verkrygingsprys waar die netto verkrygingsprys van daardie materiaal minder as honderd rand is; en<br>* 'n maksimum van ses-en-twintig rand waar die netto verkrygingsprys van daardie materiaal groter as of gelyk aan honderd rand is. |         |        |

|     | Afdelings 5.7 tot 5.8 (Gasse); en                                                                                                                                                                                                                                                                                                                                                                                            |            |            |          |
|     | 1. Die koste van spesiale behandeling van pasgebore babas, bv. besnydenis gesertifiseer as nodig deur die behandelende praktisyne, wat in ooreenstemming met die Nasionale Verwysingspryslys vir privaat hospitale hanteer sal word.                                                                                                                                                                                         |            |            |          |
|     | 2. Indien 'n epidurale narkose vir of 'n vaginale bevalling of 'n keisersnee gegee word, kan 'n addisionele foon (item 011) gehet word. Dit bestaan uit 'n epidurale pak, alle verbruiksgoedere wat gebruik word, sowel as verpleegtyd.                                                                                                                                                                                      |            |            |          |
|     | 3. 'n Ongekompliseerde verblyf in 'n kwekery vir roetine-waarneming is by die kraamfooi ingesluit, sowel as fototerapie en roetine hoërsorg-waarneming na aflewering vir die pasgebore baba.                                                                                                                                                                                                                                 |            |            |          |
|     | 4. 'n Neonat wat gespesialiseerde behandeling in 'n saal, hoërsorg of ICU benodig, sal as 'n pasiënt in sy eie reg beskou word en om daardie rede sal die Nasionale Verwysingspryslys op sodanige neonat toegepas word en 'n rekening kan gelewer word op 'n foon                                                                                                                                                            |            |            |          |
|     | In sulke gevalle by die vaste foon per dag van toepassing totdat die moeder ontslaan word, maar die bedrag van item 015, per dag moet van die vaste foon (wat die kwekeryfooi-komponent insluit) afgetrek word.                                                                                                                                                                                                              |            |            |          |
|     | 5. Indien die moeder in hoërsorg of ICU opgeneem word, word die volle rekening op 'n foon vir diens basis gelewer, aangesien dit duidelik nie 'n ongekompliseerde bevalling is nie. Die kodes vir die kwekerygeld (item 015) en die kraamkamer (item 016) moet gebruik word om te dek                                                                                                                                        |            |            |          |
|     | 6. Die eerste dag foon sluit die koste van opname van die moeder, 'voorbereiding' en 'staging' ens, opname in die kraamkamer, die bevalling en nageboorteperiode tot middernag in. Dit sluit enige koste in wat aangegaan word tydens die vroeë stadiums van 'n ongekompliseerde                                                                                                                                             |            |            |          |
|     | Die tweede dag word bereken vanaf middernag na die geboorte van die neonat op die dag van bevalling.                                                                                                                                                                                                                                                                                                                         |            |            |          |
|     | Indien die moeder egter opname benodig vir stabilisering of behandeling van 'n mediese toestand soos diabetes, pre-eklampsie of urienweginfeksie, val so 'n opname buite die bestek van die kraam vaste foon. 'n Rekening sal dan gelewer word                                                                                                                                                                               |            |            |          |
|     | Indien die moeder egter in ICU of hoërsorg opgeneem word, moet die volle rekening op 'n diensfooi-basis gelewer word. As die baba opname benodig - sien (4).                                                                                                                                                                                                                                                                 |            |            |          |
|     | 7. Toelating vir onderdrukking van premature kraam is nie 'n ongekompliseerde aflewering nie, en 'n rekening moet gelewer word op 'n foon vir diens basis.                                                                                                                                                                                                                                                                   |            |            |          |
|     | 8. Die volgende lys chirurgie (kraammandjie) is by die daggeld ingesluit.                                                                                                                                                                                                                                                                                                                                                    |            |            |          |

Handelsname kan insluit                                                                          |  |  |  |
| 3. Die koste van verbruikbare en weggooibare items wat op 'n pasiënt in 'n hospitaal gebruik word, moet deur middel van 'n laaimeganisme soos volg verhaal word:                                                                                                                                                                      |  |  |  |
| \$ Items ingesluit by die per minuut teaterfooi.                                                                                                                                                                                                                                                                                      |  |  |  |
| \$ Items ingesluit by die per dag saal of eenheidsfooi.                                                                                                                                                                                                                                                                               |  |  |  |
| \$ Items word teen die pasiënt se rekening gehê waar vergoeding nie toegestaan word nie.                                                                                                                                                                                                                                              |  |  |  |
| 4. Enige ooreengekome verskil oor die basiese interpretasie van die Aanbevole Gids tot Vergoeding vir Verbruikbare en Weggooibare Items wat deur Privaat Hospitale en Dieselfde Dag Chirurgie Fasiliteite gehê word, sal gemaak word in ooreenstemming met die goedkeuring van die behoorlike a                                       |  |  |  |
| 5. Weggooibare items is slegs eenmalig en moet nooit hergebruik word nie.                                                                                                                                                                                                                                                             |  |  |  |
| \$ Eenmalige items sal teen 100% gehê word.                                                                                                                                                                                                                                                                                           |  |  |  |
| \$ Hospitale sal 'n etiese oordemning onderteken dat items vir eenmalige gebruik slegs een keer gebruik sal word. Indien 'n hospitaal nie daaraan voldoen nie, kan dit by die groeptoefkantoer aangemeld word. Indien 'n aanvaarbare verduideliking nie binne 14 dae verskaf word nie, kan betaling op daardie rekening moontlik wees |  |  |  |
| 6. Herbruikbare produkte met beperkte lewensduur is produkte wat bedoel is vir veelvuldige gebruik en as sodanig deur die vervaardigers onderskryf word. Sulke produkte sal gehê word volgens die "Fraksionele" heffings soos uiteengesit en word voortdurend hersien. Die item sal oorweeg word                                      |  |  |  |
| 7. Waar 'n hospitaal 'n buitensporige prysprodukt gebruik, moet 'n hersieningsproses met die partye soos gelys onder 3 hierbo uitgevoer word, en toepaslike prysaanpassing gemaak word.                                                                                                                                               |  |  |  |
| Sleutel aanwysers                                                                                                                                                                                                                                                                                                                     |  |  |  |
| Die verskillende sleutelaanwysers in die Aanbevole Gids tot Vergoeding vir Verbruikbare en Weggooibare Items gehê deur Privaat Hospitale en Dieselfde Dag Chirurgie Fasiliteite Lys is soos volg:                                                                                                                                     |  |  |  |
| Sleutelbeskrywing                                                                                                                                                                                                                                                                                                                     |  |  |  |

## Road Accident Fund Tariff 2021/2022

| Privaat Verpleegkunde |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |         |        |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|--------|
|                       | By die berekening van die Tarief word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent. R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word. TARIWE IS BTW INSUITEND.                                                                                                                                                                                                                                                                                                                                                                         |         |        |
| A                     | ALGEMENE INLIGTING                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |         |        |
|                       | Alle rekeninge moet aangebied word met die volgende inligting duidelik gestel: i. Naam van verpleegkundige praktisyn, agentskap of tuisgesondheidsorganisasie (wat ook al van toepassing is); ii. Voorafmagtigingskode, waar van toepassing iii. Kwalifikasies van die verpleegkundige iv. BHF-praktyknommer v. Artikel 22A-permitnommer (indien van toepassing) vi. Posadres en telefoonnommer vii. Datums waarop dienste gelewer is viii. Die relevante diagnostiese kodes en NHRPL-itemkodenommers wat verband hou met die gesondheidsdiens gelewer. ix. Voornaam van die pasiënt                                                                                                                                                           |         |        |
| B                     | ALGEMENE REËLS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |         |        |
| KODE                  | Beskrywing                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Eenhede | Waarde |
| 01                    | KONSULTASIE, BERADING, BEPLANNING EN/OF ASSESSERING: Konsultasie, berading en/of assessering (kodes 001 en 002 hieronder) behels konsultasie, geskiedenisopname, pasiëntondersoek en assessering, waarneming, behandelingsbeplanning, nasorgbehandelingsbeplanning, ontslagbeplanning en/of berading. Indien 'n konsultasie en een of meer prosedures tydens die besoek uitgevoer word, kan beide 'n konsultasiekode en die betrokke prosedurekode(s) gehef word, maar die tyd wat aan die prosedure spandeer word, sal nie by die konsultasietydperk ingesluit word vir doeleindes van die bepaling van die konsultasie nie. 'n Konsultasie mag nie gehef word waar die uitsluitlike doel van die besoek was om 'n prosedure uit te voer nie. |         |        |
| 02                    | NOODBESOEKE Bonafide, regverdigbare noodverpleegdienste wat te eniger tyd aan 'n pasiënt gelewer word, kan 'n addisionele fooi trek soos gespesifiseer in item 014. Dit het spesifiek betrekking op huisbesoeke vir prosedures wat nodig word buite dié wat vooraf gereël is, soos maar nie uitsluitlik nie, geblokkeerde urinêre kateters, IV-terapie wat weefsels of wonde(s) wat oormatig dreineer en addisionele verband benodig. Dit moet vergesel word van 'n skriftelike motivering. LET WEL DAT HIERDIE FOOI SLEGS VAN TOEPASSING IS OP GEREISTREERDE VERPLEEGSTERS IN PRIVAAT PRAKTYK, EN NIE OP VERPLEEGAGENTSAPPE NIE.                                                                                                              |         |        |
| 021                   | SONDAE EN OPENBARE VAKANSIEDAE Wanneer kodes 036, 037 of 038 gehef word vir dienste gelewer op 'n Sondag, sal die fooi ten opsigte van hierdie kodes met 50% opgeblaas word. Wysiger 0007 moet na die toepaslike kodenommer(s) aangehaal word om aan te dui dat hierdie reël van toepassing is. Wanneer kodes 036, 037 of 038 gehef word vir dienste gelewer op 'n openbare vakansiedag, sal die fooi ten opsigte van hierdie kodes met 100% opgeblaas word. Wysiger 0001 moet na die toepaslike kodenommer(s) aangehaal word om aan te dui dat hierdie reël van toepassing is. LET WEL DAT HIERDIE FOOI SLEGS VAN TOEPASSING IS OP VERPLEEGAGENTSAPPE EN NIE OP GEREISTREERDE VERPLEEGSTERS IN PRIVAAT PRAKTYK NIE.                           |         |        |
| 03                    | PROSEDURES Indien 'n saamgestelde fooi of algemene uurlikse tarief gehef word, mag geen addisionele fooi vir prosedures gehef word nie. Die fooi ten opsigte van meer as een prosedure wat op dieselfde tyd uitgevoer word, is die fooi ten opsigte van die hoofprosedure plus 50% van die fooi van elke filiaal of bykomende prosedure. Wysiger 0002 moet aangehaal word.                                                                                                                                                                                                                                                                                                                                                                     |         |        |
| 04                    | FOOIE Die tarief wat gehef kan word ten opsigte van die lewering van 'n diens wat nie in hierdie voordeelskedule gelys is nie, sal gebaseer word op die tarief ten opsigte van 'n vergelykbare diens. Wysiger 0003 moet aangehaal word met die beskrywing van diens gelewer en die toepaslike itemnommer wat gebruik is.                                                                                                                                                                                                                                                                                                                                                                                                                       |         |        |

## Road Accident Fund Tariff 2021/2022

|      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |      |          |

| 05   | KOSTE VAN MEDISYNE EN MATERIALE Die bedrag wat gehêf word ten opsigte van medisyne en geskeduleerde middels mag nie die perke oorskry wat voorgeskryf word in die Regulasies met betrekking tot 'n deursigtige prysstelsel vir medisyne en geskeduleerde middels, gedateer 30 April 2004, gemaak ingevolge die Medisyne en Verwante Stowwe Wet, 1965 (Wet No 101 van 1965). Die toepaslike resepteringsfooi soos beoog in artikel 22G van die Wet wat gehêf moet word deur persone wat ingevolge artikel 22C(1)(a) van die Wet gelisensieer is, moet, eksklusief BTW, soos volg bereken word: • Waar die enkeluitgangsprys van 'n medisyne of geskeduleerde stof minder as honderd-agt-en-twintig rand (R128.00) is, mag die resepteringsfooi nie meer as 30% van die enkele uitreepys ten opsigte van daardie medisyne of geskeduleerde stof nie; • Waar die enkele uitreepys van 'n medisyne of geskeduleerde stof gelyk is aan of meer as honderd-agt-en-twintig rand (R128.00), mag die resepteringsfooi nie agt-en-veertig sent (R38.40) oorskry nie t.o.v. daardie medisyne of geskeduleerde stof; Met betrekking tot alle ander materiaal, moet items (BTW uitgesluit) gehêf word teen netto verkrygingsprys plus - * 26% van die netto verkrygingsprys waar die netto verkrygingsprys van daardie materiaal minder as honderd rand is; en * 'n maksimum van ses-en-twintig rand waar die netto verkrygingsprys van daardie materiaal groter as of gelyk aan honderd rand is. Item 301 moet gekwoteer word behalwe vir stomalprodukte waar item 205 gekwoteer moet word. |      |          |
| 051  | MEDISYNE Geskeduleerde medisyne mag nie deur 'n instansie verskaf word nie. Intramaskulêre/Binnenaarse inspuiting en OPAT mag slegs deur 'n geregistreerde verpleegkundige toegedien word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |      |          |
| 06   | TOERUSTING (HUUR EN VERKOPE) Huur van toerusting: 1% van die huidige vervangingswaarde van die toerusting per dag. Totale heffing mag nie 50% van vervangingswaarde oorskry nie. Beskrywing van toerusting wat verskaf moet word. Om gefaktureer te word in terme van item 302. Betaling van hierdie item is volgens die diskresie van die betrokke mediese skema, en moet oorweeg word in gevalle waar kostebesparings behaal kan word. Vir toerusting wat aan 'n lid verkoop word, kan die netto verkrygingsprys van die toerusting gehêf word (item 303). Dit moet op 'n aparte faktuur wat aan die rekening geheg is, wees aangesien die koste van hierdie items aan die lid terugbetaal word en nie aan die verskaffer betaal word nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |      |          |
| 08   | REISFOOI Neem asseblief kennis dat die Fonds oor die algemeen nie die verantwoordelikheid vir vervoeruitgawes aanvaar nie, aangesien dit geag word by die fooi ingesluit te wees.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |      |          |
|      | <b>WYSIGERS</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |      |          |

|                       | <p>• Noodoproepkode 01010 moet slegs gebruik word indien radioloog na die kamers uitgeroep word om na normale werksure verslag te doen oor 'n ondersoek. Mag nie vir roetine-rapportering tydens verlengde werksure gebruik word nie. • Noodoproepkode 01020 moet slegs gebruik word wanneer 'n radioloog oor opvolgende gevalle rapporteer nadat hy na die kamers uitgeroep is om 'n aanvanklike na-uurse prosedure aan te meld. Hierdie kode kan ook gebruik word vir tuis-teleradiologie aanmelding van 'n noodprosedure. Mag nie gebruik word vir roetine-rapportering gedurende normale of verlengde werksure nie. • Radioloogbystand in teaterkode 01030 mag slegs gebruik word indien die radioloog aktief betrokke is om 'n ander radioloog of klinikus met 'n prosedure by te staan. • Radiograafbystand in teater 01040 mag nie gebruik word vir prosedures wat uitgevoer word in fasiliteite wat deur die radioloog besit word nie; maw slegs vir bywoning van hospitaalteaters ens. Is nie van toepassing op Bed Side Unit (BSU) eksamens nie. • Tweedemeningkonsultasies moet slegs gebruik word indien 'n skriftelike verslag verskaf word soos aangedui in kodes 01050, 01055, 01060. Nie bedoel vir ad hoc verbale konsultasies nie.</p> |  |        |   |          |        |            |

|                      | Intervensiekodes (aspirasie/biopsie/ablasies/sistdreinerings, ens.) kan gekombineer word met die relevante leidingkodes (fluoroskopie, ultraklank, CT, MR) soos voorheen beskryf. Die masjienkodes 00540, 00550, 00560 en 00570 mag nie met hierdie kodes gekombineer word nie. Indien ultraklankleiding (00230) gebruik word vir 'n prosedure wat ook een van die masjienkodes (00540, 00550, 00560 en 00570) lok, kan dit afsonderlik gekodeer word. Kodes 80640, 80645, 87682, 87683 sluit fluoroskopie in. Masjienkodes mag nie bygevoeg word nie. Alle ander intervensionele prosedures is volledige unieke prosedures wat 'n hele omvattende prosedure beskryf en kombinasies van verskillende kodes sal slegs ondersteun word wanneer dit gemotiveer is. |        |   |          |         |   |           |

| In die berekening van die pryse in hierdie skedule, word die volgende afrondingsmetode gebruik: Waardes R10 en onder afgerond tot die naaste sent, R10+ afgerond tot die naaste 10 sent. Wysigerwaardes word tot die naaste sent afgerond. Wanneer nuwe itempryse bereken word, bv. wanneer 'n wysiger toegepas word, moet dieselfde afrondingskema gevolg word. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |         |        |

| Die volgende beginsels is van toepassing:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |
| 1. Te alle tye moet die beste kliniese praktyk ook nagekom word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |
| 2. Items gelys in die Aanbevole Gids tot Vergoeding vir Verbruikbare en Weggoobare Items wat deur Privaat Hospitale en Dieselfde Dag Chirurgie Fasiliteite gehef word, word generies beskryf volgens produkklassifikasie en funksie. Handelsname kan by wyse van voorbeeld slegs vir verduidelikingsdoeleindes ingesluit word. Fotokopieë van alle dokumente met betrekking tot die pasiëntrekening moet op versoek verskaf word. Die reg om die oorspronklike brondokumentasie by die betrokke hospitaal/samedag chirurgiese fasiliteite te inspekteer word voorbehou. Die aanbevole gids tot vergoeding vir verbruiksgoedere en weggoobare items wat deur subakute fasiliteite, privaat hospitale en fasiliteite vir dieselfde dag chirurgie gehef word, sal halfjaarlik hersien word. |  |  |
| 3. Die koste van verbruikbare en weggoobare items wat op 'n pasiënt in 'n hospitaal gebruik word, moet deur middel van 'n laimeganisme soos volg verhaal word:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |
| Ø Items ingesluit by die per minuut teaterfooi.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |  |
| Ø Items ingesluit by die per dag saal of eenheidsfooi.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |
| Ø Items word teen die pasiënt se rekening gehef waar vergoeding nie toegestaan word nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |
| 4. Enige ooreengekome verskil oor die basiese interpretasie van die Aanbevole Gids tot Vergoeding vir Verbruikbare en Weggoobare Items wat deur Privaat Hospitale en Dieselfde Dag Chirurgie Fasiliteite gehef word, sal gemaak word in ooreenstemming met die goedkeuring van die behoorlik aangestelde verteenwoordigers van die individuele kontrakteur, MCO en verteenwoordigers van private hospitale. Sodanige goedkeuring sal skriftelik bekragtig word en aan alle betrokke partye gesirkuleer word. Waar die hospitaal 'n buitensporige prysprodukt gebruik, moet 'n hersieningsproses uitgevoer word en toepaslike prysaanpassing gemaak word.                                                                                                                                 |  |  |
| 5. Weggoobare items is slegs eenmalig en moet nooit hergebruik word nie.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |
| Ø Eenmalige items sal teen 100% gehef word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |  |  |
| Ø Hospitale sal 'n etiese omdenking onderteken dat items vir eenmalige gebruik slegs een keer gebruik sal word. Indien 'n hospitaal nie daaraan voldoen nie, kan dit by die groeptoekantoor aangemeld word. Indien 'n aanvaarbare verduideliking nie binne 14 dae verskaf word nie, kan betaling op daardie rekening teruggehou word.                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |
| 6. Herbruikbare produkte met beperkte lewensduur is produkte wat bedoel is vir veelvuldige gebruik en as sodanig deur die vervaardigers onderskryf word. Sulke produkte sal gehef word volgens die "Fraksionele" heffings soos uiteengesit en word voortdurend hersien. Die item sal as lewensduur herbruikbaar beskou word (beperkte veelvuldige gebruik) as dit minder as 100 keer hergebruik kan word (as sodanig deur die vervaardiger onderskryf).                                                                                                                                                                                                                                                                                                                                  |  |  |
| 7. Waar 'n hospitaal 'n buitensporige prysprodukt gebruik, moet 'n hersieningsproses met die partye soos gelys onder 3 hierbo uitgevoer word, en toepaslike prysaanpassing gemaak word.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |
| Sleutel aanwysers                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |
