

## DEPARTMENT OF PUBLIC WORKS AND INFRASTRUCTURE

NO. 4859

24 May 2024

AGRÉMENT SOUTH AFRICA  
(Approval of innovative construction products and systems)

Notice is hereby given that Agrément South Africa has, with effect from 25 April 2023, **amended** an Agrément certificate, details of which appear in the schedule hereto.

## SCHEDULE

Agrément certificate 2018/574 (Amended April 2023): Polyglass Spider P & Spider P Mineral Waterproofing Membranes

**Subject:** Polyglass Spider P & Spider P Mineral Waterproofing Membranes

**Certificate holder:** Polyglass SPA

**Description:** Polyglass Spider P & Spider P Mineral Waterproofing Membranes are self-adhesive bituminous membranes made with ADESO® technology. The technology is a unique dual-compound process that creates an aggressive self-adhesive on the bottom layer combined with a modified bitumen compound on the weathering surface. Polyglass Spider P & Spider P Mineral Waterproofing Membranes are made from plastomeric compound (APP) reinforced with a staple non-woven polyester fabric reinforced and stabilised with longitudinal glass threads.

Polyglass Spider P is protected by a polyethylene film or virgin polypropylene fabric on its upper side while the upper side of the Polyglass Spider P Mineral is protected by an even layer of natural coloured mineral slate chips. The upper side of the latter, an innovative granule-free end-lap. The membranes are also provided with SEALLap® treatment for better selfedge bonding.

Polyglass Spider P & Spider P Mineral Waterproofing Membranes have an adhesive underside protected by a mono-silicone coated polyethylene film to be removed at the time of application. The Spider P is manufactured in three (3) thicknesses: 1.5 mm, 1.8 mm and 2 mm and the Spider P Mineral in a thickness of 3.5 mm.

Polyglass Evolight S and Evolight S Mineral Waterproofing Membranes must be applied by approved applicators.

The Agrément certificate contains detailed information on the product and can be accessed at <http://www.agrement.co.za>.
