NO. 6472

1 August 2025

Gazette Notice

DEPARTMENT OF PUBLIC WORKS

AGRÉMENT SOUTH AFRICA

(Approval of innovative construction products and systems)

Notice is hereby given that Agrément South Africa has, with effect from 30 June 2025, issued an Agrément certificate, details of which appear in the schedule hereto.

SCHEDULE

Agrément Certificate 2025/656

Subject: Spunbond Roof Undertile Membrane

Certificate holder: RF Spunbond (Pty) Ltd.

Description: Spunbond Roof Undertile Membrane is an 80 g/m² nonwoven fabric created by extruding molten thermoplastic (polypropylene) material into continuous filaments. These filaments are laid down to form a web and then bonded together.

The Spunbond Roof Undertile Membrane is designed to prevent excessive pressure build-up within the roofing cavity during wind gusts. It is specifically intended for use as an under-tile roofing membrane in all tiled roof residential building applications in both conventional and Agrément-approved roof constructions, across all regions of South Africa, catering to all occupancy classification types (SANS 10400: Table 1 of Regulations A (20) (1)). When utilised in the conventional manner, it is capable of:

- reduce air leakage, and
- reduce ingress to the roof space from wind-driven rain and dust.

This certificate and Agrément South Africa's assessment apply only to the Spunbond Roof Undertile Membrane manufactured by RF Spunbond (Pty) Ltd. It is installed in accordance with the certificate holder's installation manual, as described and illustrated in this certificate, and where the terms and conditions of certification are complied with.

The Agrément certificate contains detailed information on the product and can be accessed at <http://www.agrement.co.za>.
