

COVID-19: UPDATED LEVEL 3 TALKING POINTS

The power to defeat coronavirus is in our hands.

- As the country gradually opens up, and as we resume more activities, the risk of infection inevitably increases.
- Through our personal and collective actions we can continue to delay the rate of infection across society.
- The most effective defences against the virus are the simplest; everyone must continue to wash hands, sanitise and adhere to safety measures.
- When traveling, wear a face mask at all times and maintain a safe distance and reduce contact with others where possible.

Government has eased restrictions on certain economic activities.

The following economic activities will resume under level 3.

- Restaurants for 'sit-down' meals.
- Accredited and licenced accommodation, with the exception of home sharing accommodation like AirBnB.
- Conferences and meetings for business purposes and in line with restrictions on public gatherings.
- Cinemas, theatres and casinos, in line with the limitations on the gathering of people.
- Personal care services, including hairdressers and beauty services.
- Non-contact sports such as golf, tennis, cricket and others.
- Contact sports will be allowed only for training and modified activities with restricted use of facilities.
- Announcements will be made in due course to detail these measures and indicate the date from which these activities will be permitted.

Certain restrictions remain in place.

- Our national borders remain closed.
- The on-site consumption of alcohol is prohibited.
- Bars and taverns, shebeens, night clubs, fêtes, bazaars, beaches, public parks, and museums remain closed.

- Male and female initiation practices are prohibited during this period.
- The sale of liquor is permitted from 1 June 2020 only between Mondays and Thursdays from 09h00 and 17h00.

We are addressing the shortage of coronavirus test kits.

- Like many other countries, South Africa has been affected by the global shortage of coronavirus test kits and other materials.
- We have prioritised testing patients in hospitals, health care workers, vulnerable people like the elderly and hotspot areas.
- We are using every avenue available to source the supplies we need and to increase our testing capacity and improve the turnaround time.
- Among the initiatives, that we have pursued together with other countries on our continent is the ground-breaking Africa Medical Supplies Portal.
- This is a single continental marketplace where African countries can access critical medical supplies, such as test kits, from suppliers and manufacturers in Africa and around the world.

We are monitoring international developments in the treatment of COVID-19.

- A study by the University of Oxford in Britain found that the drug dexamethasone reduced deaths among patients on ventilation by a third.
- The dexamethasone drug is manufactured in South Africa and it is being considered for use on patients on ventilators and on oxygen supply.
- We believe that this will improve our management of the disease among those who are most severely affected.

The lockdown bought us valuable time.

- We used the time during the lockdown to prepare and put in place public health measures to minimise infections.
- We established over 100 quarantine centres, increased the number of intensive care units and have made provision for additional beds in field hospitals.

- Ons kan deur ons persoonlike en gesamentlike optrede voortgaan om die infeksietempo oor die hele samelewing te vertraag.
- Die mees effektiewe beskerming teen die virus is die eenvoudigste: was jou hande, ontsmet jou omgewing en kom veiligheidsmaatreëls na.
- Wanneer 'n mens reis, moet jy te alle tye 'n gesigsmasker dra, 'n veilige afstand van ander mense handhaaf en kontak met ander mense vermy waar moontlik.

Die regering het beperkings op bepaalde ekonomiese aktiwiteite verslap.

Die volgende ekonomiese aktiwiteite sal onder vlak 3 hervat word.

Ons doen stappe om die tekort aan koronavirus-toetsstelle op te los.

- Net soos baie ander lande, is Suid-Afrika ook deur die wêreldwyse tekort aan koronavirus-toetsstelle en ander benodighede beïnvloed.
- Ons het prioriteit verleen aan toetsing van pasiënte in hospitale, gesondheidsorgwerkers, kwesbare mense soos bejaardes en brandpuntgebiede.
- Ons gebruik elke beskikbare metode om die nodige voorrade te verkry, ons toetsingskapasiteit te verhoog en die omkeertyd te verbeter.
- Een van die inisiatiewe wat ons saam met ander lande op ons vasteland begin het, is die baanbreker spesiale Afrika-mark vir mediese voorraad.
- Dit is 'n enkele kontinentale mark, waar Afrika-lande toegang kan verkry tot kritieke mediese voorrade soos toetsstelle vanaf verskaffers en vervaardigers in Afrika en regoor die wêreld.

Ons monitor internasionale ontwikkelings in die behandeling van COVID-19.

- 'n Studie deur die Universiteit van Oxford in Brittanje het bevind dat die middel deksametasoon sterftes onder pasiënte op ventilators met 'n derde verminder het.
- Deksametasoon word in Suid-Afrika vervaardig en word oorweeg vir behandeling van pasiënte op ventilators en op suurstoftoevoer.

- Ons glo dat dit ons sal help om die siekte beter te bestuur onder diegene wat die ernstige beïnvloed word.

Die grendeltyd het vir ons waardevolle tyd gekoop.

- Ons het die grendeltydperk gebruik om voor te berei en openbaregesondheidsmaatreëls te implementeer om infeksies tot die minimum te beperk.
- Ons het meer as 100 kwarantynsentrums gevestig, die aantal intensiewesorg-eenhede vermeerder en voorsiening vir bykomende beddens in veldhospitale gemaak.
